The Atomic Energy Commission, as the able Senator has so well said, employed outside experts to make a thorough study. They came in with a recommendation that the power load be supplied by a combination of TVA and the private concerns already named. The Atomic Energy Commission alleged, properly, that it was not a power-producing agency, that a utility system would be better equipped to construct and to operate, and in the event of a termination of the program, which is the subject of the pending legislation, those utility systems would be in a better position to use and dispose of the power. As I understand the pending bill, the immediate question has to do with the problem of financing the construction of the huge steam plants. Is that not correct?

Mr. HICKENLOOPER. Yes.

Mr. President, I wish to reread the last portion, for the purpose of emphasis:

Mr. GORE. * * * As I understand the pending bill, the immediate question has to do with the problem of financing the construction of the huge steam plants. Is that not correct?

Mr. HICKENLOOPER. Yes. I may say that in the absence of legislation of the nature of the bill the Senate is now considering, it is impossible, without the cancellation-damage contracts, to get the capital financing for these companies, because the hazard in building the plants is so great. The AEC might elect to cancel, let us say, immediately upon completion of the plant, but before any electricity is developed. At that time the AEC would have a right to say, "We have changed our minds; we do not want it." So, without cancellation-damage contracts, which at that point are substantial, but which diminish year by year for the next 10 years until they completely exhaust themselves, private companies will not undertake the work because the hazard then becomes too great. There is no sale for such an amount of electricity at the present time in that area, and they are not going to take a chance on a market being developed for it.

Mr. GORE. So I understood from studies that have been made since the bill was called on the Consent Calendar on Monday. I am now fully prepared to withdraw my objection and, moreover, to join in support of the bill.

Mr. HICKENLOOPER. The Senator from Tennessee has been very cooperative and very helpful, and I certainly appreciate his attitude. Under no circumstances do I want this bill to be passed with any substantial doubt in the mind of any Senator.

I digress, Mr. President, to say that, after all the legislative history I have cited, there was no room for doubt in the mind of anyone. Seldom have I seen an instance in which we have exercised such meticulous care, both in the committee and on the floor of the Senate, to fix definitely and specifically the meaning of the amendment as it proceeded through the legislative process.

I read further from the debate:

I want all Senators to be assured that good business practices have been followed by the AEC, and that the Commission has had only one thing in mind; namely, to get the best bill for the atomic energy program. They would ask for money to construct their own powerplants, if they were convinced that that course was better for the program, but they believe that the plan now proposed is better than one which would require them to furnish the capital investment. They consider that they are coming out with really an advantage. I want everyone to be satisfied of that.

Mr. ELLENDER. Mr. President, will the Senator yield?

Mr. HICKENLOOPER. I yield to the Senator from Louisiana.

Mr. ELLENDER. Could we not conclude that the enactment of the pending bill would be an inducement to private enterprise to furnish the electricity needed, rather than have the Congress vote for the construction of steam plants, as has been done in the past for TVA?

Mr. HICKENLOOPER. Yes, that is correct.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. HICKENLOOPER. I yield to the Senator from Oregon.

Mr. MORSE. I desire to say, as I said yesterday on the floor of the Senate, that I appreciate the cooperation the Senator from Iowa has extended to me.

Mr. HICKENLOOPER. The Senator from Oregon is fully entitled to it.

Mr. MORSE. The Senator from Iowa has been very kind about this matter. I do not always get that kind of cooperation from my colleagues, but the Senator from Iowa always accords it to me.

I raised the questions I did last Monday, resulting in this bill's being brought up by motion rather than on a call of the Consent Calendar, because we now have in the RECORD a legislative history which I think is very much needed in connection with legislation of this kind.

Mr. President, as I said a moment ago, I know of no other instance in which such great care was taken to determine the meaning and to specify the meaning of an amendment.

Let me also observe that I know no instance, in my 16 years of experience in the Congress, in which the intent of Congress has been so violated and the clear meaning of a statute so misconstrued as in the instant case.

Mr. HILL. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. HILL. The Senator from Tennessee has given us the history of this particular provision. Does he find anywhere, any place—in the hearings, in the committee report, or in the CONGRESSIONAL RECORD—one iota of evidence to indicate that any contract such as the Dixon-Yates proposal would be attempted?

Mr. GORE. The answer is "No"; but the case is worse than that. It is specifically set out in instance after instance—in the committee hearings, in the committee report, in the debate on the floor of the House of Representatives, in the debate on the floor of the Senate—that the authority is limited to these specified installations. Mr. President, in the construction of a statute, it is obvious that consideration must be given to what is excluded, when specification is resorted to. So I say not only is authority to do this lacking, but in instance after instance there is a specific delegation of the authority for these three facilities.

Mr. HILL. Mr. President, will the Senator from Tennessee yield again?

Mr. GORE. I yield.

Mr. HILL. In other words, as we say, this authority is nailed down and absolutely fixed to electrical energy for those three installations, and not for any other purpose; is not that correct?

Mr. GORE. Let me reread from page 2 of the report:

> The power is to be used for the operation of the gaseous diffusion plants at the three sites specified.

On every page except the last one—I see no particular reference on it—but on 4 of its 5 pages, the report spells out and specifies the limited nature of the authority granted by the amendment.

Mr. MONRONEY. Mr. President, will the Senator from Tennessee yield again to me?

Mr. GORE. I yield.

Mr. MONRONEY. Is it not a fact that the powerful three little words, "in connection with," constitute the small thread of alleged legal logic that must be twisted and distorted in order to find even a figment by which to justify using the Atomic Energy Commission as a dummy in this TVA power deal, this making of the TVA a captive customer of the Dixon-Yates group, through using to that end the dummy corporate setup or dummy corporate authority of the Atomic Energy Commission?

Mr. GORE. I agree with the Senator. I believe I used a partially incorrect analogy earlier in the day. I compared the general counsel of the Atomic Energy Commission to myself. I think I should have turned the comparison around. After the President of the United States had issued an order, after the Chairman of the Commission had become a partisan to this deal, and the general manager was obviously working hand in glove with the interests which desired it, to ask the general counsel of the Atomic Energy Commission to give a ruling as to whether this contract was legal under the Atomic Energy Act would be about like asking my 6-year-old son if he had a good daddy, when I was standing very near by. I had said it would be like asking me if I had a good boy. I think the coercion shows up more clearly when the illustration is turned around.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. MONRONEY. The junior Senator from Tennessee is extremely well informed, and is ably expressing himself in this case. Does he not think it is a bit strange that after the General Manager of the Atomic Energy Commission, the Budget Bureau, and all concerned had apparently accepted the order, had saluted and determined to obey the command, then they cast about to find a legal way to make this contract to supply TVA commercial users in the Memphis area? As shown in the testimony before the Joint Committee on Atomic Energy, on the 16th of June, the legal opinion, which was read today on the floor of the Senate, and which is supposed to contain legal justification for the contract, was dated June 22, if I heard correctly. So the contract was put in line, the details were arranged, the Atomic Energy Commission was directed by the Budget Bureau, and the TVA was directed by the Budget Bureau, some 6 days before the legal authority seemed important enough to be put down in black and white.

Mr. GORE. Then they asked the General Counsel, after they had done this, "Can you find authority to do it?" He wrote an "iffy" opinion even then.

Mr. MONRONEY. That is correct. Apparently he relied on the three little words "in connection with." They seem to cover the universe.

Mr. GORE. Perhaps there was a telephone connection between the points.

Mr. MONRONEY. Perhaps that is what the "connection" means.

Mr. GORE. The point I have been laboring to make tonight, however, is that if the Atomic Energy Commission is so to misuse its power, or if the Commission is to be so misused, against its will in this collateral matter, then the Congress must give deliberate consideration to every word and every line in a 104-page bill.

By this bill we are asked to grant vast powers, vast discretionary authority; yet we are seeing right before our eyes a disgraceful misuse of that power.

Mr. MONRONEY. Can the junior Senator from Tennessee tell the junior Senator from Oklahoma how we can protect and assure the people of this great country that the language in any legislation we write will not be stretched and the telephone on the desk at the Atomic Energy Commission, geared to the Executive Office of the President, allowed to supersede the law, or that the law will not be used in the manner which is not consistent with its concise language and the clear and concise history of the section of the act on which reliance is placed? I can think of nothing in the English language clearer than that portion of the committee report, and the debate on the floor of the Senate which the junior Senator from Tennessee has just read, interpreting the section on which the general counsel for the Atomic Energy Commission relies for his authority. If the general counsel had read the report and the debate, I do not believe he could have found a single figment of justification for arriving at the strained conclusion which he reached, namely, that the authority now exists.

Mr. GORE. Even in finding that the authority now exists, he predicates the opinion upon a circumstance which is nonexistent.

Let me say to my able friend, the distinguished junior Senator from Oklahoma, that democracy cannot function well in an aura of doubt and suspicion. So we are faced with the misuse of power, the distortion of power, and the granting of special privilege beyond the intent of Congress. It raises doubts and suspicions which make the working of democracy difficult indeed. I say that unless there is confidence on the part of the Congress in the executive branch of the Government, the job of legislating, as the Senator pointed out in his able address, becomes minutely burdensome indeed. Also, we must resort to restrictions upon executive agencies which would hamper their efficiency.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. MONRONEY. May I conclude with one further thought?

Mr. GORE. I yield.

Mr. MONRONEY. Strained and difficult to understand, because of language stretching, as I find the alleged authority to be, even stranger is the new principle of tax absorption in connection with the Federal income tax. The opinion from the distinguished general counsel of the Atomic Energy Commission—at least, the portions I heard read by the distinguished Vice Chairman of the Joint Committee on Atomic Energy—still did not spell out in any way where that authority stems from. I wonder whether, in that process of stretching of language, we have now found a way by which Government departments can relieve persons with whom they contract of the burden of the Federal income tax. Such authority has not heretofore existed, to my knowledge, in the Defense Department or any other department of the Govern-

ment. I did not know it existed even in the Atomic Energy Commission.

Mr. GORE. I had an exchange with the able senior Senator from Iowa over the question of whether such a contract would be legal or illegal. In the opinion of the junior Senator from Tennessee it would be an illegal provision in the contract, and therefore would render the entire contract invalid. But whether it is legal or illegal is not the question. I submit that the question is whether it is right or wrong. Is it right to tax every business in the State of Oklahoma, every corporation, and even the little people who make incomes as low as $30 a week, and then reimburse Dixon-Yates $800,000 a year in taxes which it rightfully owes, under the operation of this contract?

Mr. MONRONEY. I certainly agree with the distinguished junior Senator from Tennessee that this is special treatment for one corporation out of thousands, and is certainly not in keeping with the intent of Congress. I also wonder whether any agency of Government, independent or otherwise, has the authority clearly to circumvent the right of Congress to levy taxes, a right which must remain solely in the Congress.

Mr. GORE. I think a constitutional question is raised as well as a statutory question.

Mr. MONRONEY. That is what I was thinking. I was wondering where we would finally land if runaway agencies had the right to say who is to be taxed, and who does not have to pay taxes.

Mr. GORE. If the President of the United States can pick up the telephone and call an independent agency of Government and say, "This particular corporation is my friend," or "This corporation is not my friend," or for some reason or other, say, "I want you to make a contract to reimburse this corporation for all its taxes," I say that is a deplorable precedent, if it serves for precedential purposes, because it will lead to vast and undesired consequences. If it is not followed by extension of the same privilege to other business corporations and persons, then it is preferential treatment which should not be endorsed by the Senate.

Mr. President, the question of overriding the decision of an independent agency and dictating a course of action contrary to its will has been raised. This is a most important issue in the controversy, as I see it. Despite the contentions of a majority of the Commission that the proposed contract is improvident, the Commissioners apparently feel they are compelled to proceed with negotiations in view of the fact that the President, through the Bureau of the Budget, has directed them so to do. I submit that the independence and integrity of this vital independent agency of the Government are at stake. I propose to discuss briefly the character and the status of the so-called independent agencies of our Government.

One has but to examine a chart of the organization of our Government to realize that these independent agencies have, over the years, come to occupy a most important position in the execution of the accepted functions of the Federal Government. Generally speaking, under the Constitution, Congress is charged with the responsibility of enacting laws and the Executive is charged with the execution of them. Cabinet posts have been created for the purpose of carrying out the detailed execution of the laws, under the direct supervision and subject to the will of the Chief Executive. But it was found advisable at an early date to create these independent agencies whose exact technical and legal status is somewhat difficult of specific description.

Mr. HILL. Mr. President, will the Senator from Tennessee yield for a question?

Mr. GORE. I yield.

Mr. HILL. A little while ago the Senator referred to capital investment. I wonder if he has any idea who are the financiers behind the Dixon-Yates proposal, what bank, or what group of banks, what investment bankers, are proposing to finance the proposal? Does the Senator have any idea as to that?

Mr. GORE. I do not. I had understood that when the von Tresckow group came forward to submit a proposal, it was required to detail its financial sponsors and supporters, to submit the names of its engineers, and to establish its competency. But all such questions regarding Dixon-Yates seem to have been taken for granted. I cannot answer the Senator's question.

Mr. HILL. Is it true that so far as the von Tresckow group is concerned, it not only appeared before the Joint Committee on Atomic Energy, but also before a subcommittee of the Judiciary Committee, and there gave all relevant and detailed facts as to how their proposal would be financed, who their bankers would be, who were the financiers, who were the attorneys who would pass on the question of bonds? They gave the whole story of their financial set-up. Does not the Senator think the Senate is entitled to know who is financially behind the Dixon-Yates proposal? Who are the underwriters of it; who are going to handle the bonds? Is it some big financial house in New York, or some group of investment bankers, or a single investment house? Who is behind the proposal?

Mr. GORE. Many questions can be asked, and many have been asked, but few have been answered.

Since the Senator has brought about a digression from my discussion of independent agencies and their importance, I should like to comment upon the exclusive character of the contract.

The Bureau of the Budget issued a statement in which it attempted to minimize the charge which the junior Senator from Tennessee and other Senators have made, that the proposal is not a competitive proposition; that the contract is tailor-made; that one concern and one only could meet specifications. I think that is true, despite the explanation of the Bureau of the Budget. I should be glad to supply the reasons why I consider it to be true.

The data sheet supplied by the Atomic Energy Commission to concerns desiring to submit proposals in this regard can be found on page 7004 of the CONGRESSIONAL RECORD of June 1, 1954.

I learned a few days prior to that date that the Atomic Energy Commission had prepared and furnished this data sheet to the von Tresckow group. I did not learn that through the von Tresckow group; I learned it independently. I telephoned Mr. Cook, in the Atomic Energy Commission, and asked if a data sheet and specifications for the proposal had been prepared. He said the data sheet had been prepared and was in mimeograph form. I asked him to send me a copy of it, which he did. I have it before me.

I have also before me the statement of the Bureau of the Budget, which reads, in part, as follows:

> There was ample opportunity for interested parties to come forth with proposals to supply the Government's needs.

Obviously, I could have made a proposal. The senior Senator from Alabama could have made a proposal. So there was ample opportunity for all interested parties to come forth with proposals to supply the Government's needs.

I read further:

> Prior to the transmission of the budget message—

Listen to this. Maybe this sheds a little light on the genesis of the proposal—

> Prior to the transmission of the budget message discussions had been held with private utility groups presently supplying power to the Atomic Energy Commission and with representatives of other private utilities.

Ah, Mr. President, that may give us a little clue. The first time I learned of this proposal was when I read that part of the President's budget message which made reference to relieving TVA of a part of its responsibility to AEC, but we see from the Budget Bureau that it had been discussed long before the budget message. With whom had it been discussed?

With private utility groups presently supplying power to the Atomic Energy Commission and with representatives of other private utilities.

I read further:

> Although the Government issued no formal invitations for bids for these additional power needs, the statement in the President's budget message received wide publicity in the general press and trade publications and was a matter of public record, particularly in the Tennessee Valley area.
>
> The question that bidding was restricted is entirely without foundation.

I wish to point out that that which is now proposed, as the senior Senator from Alabama knows, is not that which was contained in the President's budget message. The Dixon-Yates contract is something else.

Coming back to the sentence in the statement of the Budget Director, I read:

> There was ample opportunity for interested parties to come forth with proposals to supply the Government's needs.

The question is not whether there was ample opportunity for them to come forth with proposals. The question is whether they could come forth on an equal competitive basis. To that question, the answer is: "No." The data sheet and specifications are all that are

needed to prove that. Let me read from page 7416 of the RECORD of June 1, 1954. We find that the data sheet, in paragraph 2 (f), calls for—

> Delivery to TVA for the account of AEC at points near or at Memphis, Tenn., for use in the Memphis area by TVA as a replacement of energy being delivered by TVA to the Paducah gaseous diffusion plant.

So it is to be delivered at Memphis. Whoever comes forth with a proposal to meet the Government's needs must come forth with a proposal to supply power at Memphis, for use at Memphis, or in the Memphis area.

What other qualifications must the bidder have, or must be submitted? We find this requirement:

> 2. (d) Dependable backup to permit year-round operation at 600,000 kilowatts to provide for a shutdown for normal maintenance operations.

Who has that backup?

Mr. HILL. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. HILL. As the power business is a monopoly business, only one concern could have that backup, and that would be the concern operating in that particular territory. Is not that true?

Mr. GORE. Of course it is true. So, in the light of that qualification, let me read this statement of the Director of the Bureau of the Budget, a statement which is noteworthy subterfuge:

> There was ample opportunity for interested parties to come forth with proposals to supply the Government's needs.

Ample opportunity. Everybody come. Come on, boys, and submit your proposals.

But what did they have to have? What did they have to bring with them? Not merely a proposal. They had to bring with them the capacity to back up 600,000 kilowatts of electricity for the Memphis area. Who could qualify? One, and only one.

Mr. President, this deal is tailormade for one concern, and one concern only. I referred to this data sheet on the floor of the Senate on April 22, and I stated then that if the deal were consummated on this basis, it would be an exclusive contract, tailormade for one concern, and one concern only.

I warned the administration then that if it went through with this deal it would be an oft-told story. It is being told a few times now. If the administration persists in its action, I shall personally be responsible for telling the story in every State of the Union, in all its gory details.

Let me specify another provision. This is section 2 (e):

> Excess generating capacity may be used by supplier for sale to others or for own use when not needed by AEC provided reasonable credit accrues to AEC.

Who has the capacity for using energy in that area? I could come forward with a proposal, but how could I use the excess power? I have no franchise to sell power in the State of Arkansas or in the State of Mississippi. Who has it? Only the combines operating in that area.

Oh, yes, the Director of the Budget says to the American people, in a deliberate attempt to mislead them, in a deliberate attempt to cover up this deal, that there was ample opportunity for interested parties to come forth with proposals to supply the Government's needs; but the Government required them to come forth with that which was possessed by one outfit, and one alone.

I repeat: This statement is unworthy of a man holding the high position of Director of the Bureau of the Budget of the United States of America.

It is exclusive and tailormade for one, and one only.

I never took the trouble to examine in detail the proposals of the Von Tresckow group. I said from the beginning that neither that group nor any other group could successfully compete, according to these specifications. They did not have the requirements. Only one concern had them. Whom was this deal discussed with? The answer to that question may shed some light on why this is exclusive, and why it is tailormade. It may reveal the genesis of the proposition.

Many Members have inquired on the floor of the Senate, and a number of Senators have inquired of me personally and privately, where this deal came from. Let me read:

> Prior to the transmission of the budget message, discussion had been held with the private utility groups presently supplying power to the Atomic Energy Commission, and with representatives of other private utilities.

Did they discuss it with all those who were free to come forth with proposals? Who drafted this data sheet? Who drew up these specifications? I suppose the group who were in the discussion.

Mr. HILL. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. HILL. Does not the Senator believe that if we could ascertain who is to finance this proposal, who the underwriters are, who the financers are, what banks are behind it, what investment house or houses are behind it, that might throw light upon the genesis of the proposal?

Mr. GORE. I think that would shed much light, but not all the light. I think it will be necessary to start with a certain bank in New York City, and then go to a certain power lobbyist's office. Then we shall have to move to the Budget Bureau.

There are a number of places which might furnish us some interesting information; and if after next November there is a turnover in the control of this body, which the junior Senator from Tennessee anticipates, I shall submit for the consideration of the Senate an inquiry into the genesis of the proposal and of those who are involved in it.

Mr. HILL. Mr. President, will the Senator yield?

Mr. GORE. I yield to the Senator from Alabama.

Mr. HILL. The Senator does not think that the office of that power lobby would be far from the Capitol, does he?

Mr. GORE. Oh, I think representatives of the power lobby have been infesting the Capital for quite a while.

(At this point Mr. GORE yielded to Mr. SALTONSTALL to present a conference report, which appears elsewhere in the RECORD under the appropriate headline.)

Mr. GORE. Mr. President, a few moments ago I started to discuss the implication of the overriding of the judgment of an independent agency. Under the Constitution, the Congress is charged with the responsibility of enacting the laws, and the Executive with their execution. Cabinet posts have been created for the purpose of carrying out the detailed execution of the law, under the direct supervision of and subject to the will of the Chief Executive. But it was found advisable at an early date to create independent agencies, whose exact technical and legal status is somewhat difficult of specific definition.

They are generally of two types. We have what may be classified as our regulatory commissions, which perform quasi-judicial functions. Included in this category are such agencies as the Federal Communications Commission, Securities and Exchange Commission, Federal Trade Commission, and the Interstate Commerce Commission.

A second type of independent agency includes those that are specifically created by the Congress for the administration of a specific Government program, in accordance with the directives set forth by the Congress in the act creating each of the individual agencies. In this category we find such important agencies as the Veterans' Administration, the Tennessee Valley Authority, the Atomic Energy Commission, the Housing and Home Finance Agency, and the Small Business Administration.

It is interesting to note that none of these independent agencies are made specifically subordinate to any of the Executive departments of the Government which are headed by a Cabinet officer.

I do not say that these independent agencies are completely independent of supervision by the Executive. It is true, however, that the degree of detailed supervision by the Executive varies as among the individual agencies. Their directors, or the members of the Executive Board or Commission, as the case may be, are appointed by the President, with the advice and consent of the Senate.

The courts have generally held that in seeking to ascertain the extent of the Executive's authority to direct the activities of a particular agency, resort must be had to the specific terms of the act creating the agency, and especially to those provisions of the act which deal with the authority of the President to remove the principal officials charged with administration of the agency's functions.

Under this criterion, it is perhaps appropriate to examine the provisions of the Atomic Energy Act of 1946 with specific emphasis on those provisions dealing with the appointment of members of the Commission and the authority of the President to remove them.

The Atomic Energy Act of 1946 provides for the appointment of the members of the Atomic Energy Commission by the President, with the advice and consent of the Senate. But the members do not serve merely at the will of the Executive. Their tenure is fixed by law. The act specifically provides that the President can remove a member of the Commission only for "inefficiency, neglect of duty or malfeasance of office."

The act does provide that the President shall direct the Commission with respect to certain of its activities. Largely, these provisions deal with the military aspects of the atomic energy program. The law instructs the President to direct the Commission to deliver atomic weapons to the Armed Forces to the extent and for such uses as he deems necessary for national security. But I find no provision in the act, Mr. President, which authorizes the President to substitute his judgment for that of the Commission in a matter involving the administrative management of the agency; nor do I find any provision in the act which authorizes the President to direct the Commission to engage in transactions which are foreign to the atomic energy program, or to use the authority conferred on the Commission as a vehicle for the accomplishment of some so-called desirable objective.

Mr. MONRONEY. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. MONRONEY. I appreciate especially the point the junior Senator from Tennessee is making, in that the act is specific in stating that in case of disagreement within the Atomic Energy Commission or between the Commission and the military advisory group dealing with atomic weapons, an appeal can be taken to the President, to obtain his advice.

Under the rule of law which I have often heard stated in both Houses of Congress, in spelling out this specific power is it not clearly indicated that it is the only power in this field which Congress had in mind giving the President, in respect to obtaining his advice and consent?

Mr. GORE. Yes, for the general rule of construction, as I understand it, is that by enumerating certain powers, all others are excluded.

Mr. MONRONEY. Exactly. Therefore, if Congress had intended that, in addition to the power to settle disagreements between members of the Commission or between the Commission and the military, the President, or his Bureau of the Budget, acting for him, could direct the Atomic Energy Commission in regard to such extraneous matters as the purchase of power, as a broker for a private utility company, in the interest of TVA, would not the act then have specified that the President was to advise the Atomic Energy Commission on matters affecting the procurement of electricity or that the President would have the right to advise the Commission that it could acquire electricity for other agencies of the Government, if the President so advised?

Mr. GORE. I believe the answer must be in the affirmative.

Mr. MONRONEY. So, under the old rule of exclusion, by specifically referring to the President's right in that case, as a matter of law the act indicates that Congress did not expect the President to have other rights in connection with interfering with this independent agency; is not that correct?

Mr. GORE. Yes. The junior Senator from Oklahoma made a very eloquent speech on this point, last week. It is not within my capacity to discuss this question as ably as he did. However, I assure him that my feeling about it is just as strong as his.

Mr. MONRONEY. Let me say to my distinguished friend that, bad as this contract may be, and even with all the favoritism it may involve, and dangerous as is the precedent it might set in the matter of absorption of Federal income taxes, the principle of destruction of the independence of independent Government agencies, as exemplified by this ill-conceived and ill-advised contract, seems to me to be paramount in connection with this issue. In other words, if the Atomic Energy Commission can be directed for these purposes, although the act contains language delimiting its powers in almost every way, then, once violation of the independent status of the Atomic Energy Commission has been established by this precedent, any President in the future may wilfully direct or order the Atomic Energy Commission to do this or to do that. Thus, instead of having an independent Commission, which Congress provided for, and instead of having the outstanding advice, consideration, and judgment of Commissioners of experience in atomic-energy matters, we may have employees of the Bureau of the Budget, with little or no experience in this important field, assuming to direct the Atomic Energy Commission to do things which a majority of the Commission would not like to have done.

Mr. GORE. I remember the debate on the passage of the original Atomic Energy Act. Congress realized that a very great responsibility was being placed upon the Commission. For that reason, Congress created an independent Commission. Congress did not choose to place this vast responsibility in the hands of one man. The debate included many suggestions, including one from the Director for a commission of larger membership. Finally, it was concluded that a commission of five would be established.

I remember that during the debate it was suggested that 1 member might come from the industrial field; 1 from the scientific field; another member might have a very different background or interest—with the result that, in the overall view, the Commission would be better safeguarded by having a membership of 5 rather than to have only 1 person in charge.

On the other hand, if the Commission can be overruled, if the majority decisions of the Commission are to be rendered meaningless, will not the very purpose of the act have been defeated?

Mr. MONRONEY. It certainly would seem to me to be true that it has been defeated, and that this measure will restore one-man rule in a manner which is indirect and is unreachable by Congress itself—under the pattern for which the contract establishes a precedent.

Let me say I have read the history of the act. Congress expected the Commission to be independent and to use its power to grant licenses and to develop the new atomic-energy age. The history of the act does not lead me to believe that Congress meant to have the Atomic Energy Commission be a captive agency. From reading the very carefully prepared provisions of the original act and also from reading the various provisions of the pending bill, and in view of the fact that the Joint Committee on Atomic Energy is given the power to command the services of any agency of the Government, including the FBI, in doing the work with which the joint committee is charged—and it is charged to do that, not by the Senate's rules or by the rules of the House of Representatives, but by statutory law—in determining whether the provisions of the act are being faithfully carried out by the Atomic Energy Commission, it seems to me to be obvious that Congress intended the Commission to be entirely independent, and not to be a captive agency in any way, shape, or form.

Mr. GORE. Furthermore, the powers conferred upon the joint committee are only in connection with the atomic-energy program.

Mr. MONRONEY. That is correct.

However, if the Commission is to leave its moorings and is to engage in acts of largess to other Government agencies—regardless of whether they wish such treatment—or if the Commission can proceed on a contractual basis, using for authority, in that connection, the famous three little words "in connection with," then the power of the Congress or the power of the joint committee to delimit the activities of the Commission will no longer exist.

In my opinion, the important point is that the Atomic Energy Commission is either an independent commission, per se, or it is a part of the President's official family. If it had been intended to make it a part of the regular executive establishment, I think it would have been placed under a Cabinet officer. It would have been made a subsidiary of a previously existing Government department. If it were not intended to be independent, but were intended to be subservient to the executive department, and incorporated as a branch under some Cabinet office, would it not be very strange for the Congress to surround its activities and the activities of the executive with the unusual powers of the Joint Committee on Atomic Energy, as described last week by the distinguished vice chairman of the Joint Committee on Atomic Energy?

In other words, a Government agency cannot be both fish and fowl. If it is an independent agency, the inspection, investigation, and surveillance of an independent agency is quite in line with the theory of an independent agency acting largely as an arm of the Congress. Certainly we are not writing into our relations with the normal branches of Government, under Cabinet positions,

the same kind of surveillance we exercise with respect to the Atomic Energy Commission under the Atomic Energy Act.

Mr. GORE. I believe that Congress can be presumed to have intended to do what it did. We did not vest in the Department of Commerce authority and management functions with respect to the atomic-energy program. The Congress created by law an Atomic Energy Commission, and vested in that Commission management functions, the determination of policy, and responsibility for the execution of the law and the administration of the program, with certain specific responsibilities delegated to the President. I have previously made reference to them.

Now, however, we find that the law is being disregarded, and that the integrity and independence of this most vital agency in the free world are being subverted. As I have said—and I say again—that is the most important issue involved in this unfortunate directive to the Commission to negotiate the Dixon-Yates contract.

Mr. MONRONEY. Mr. President, will the Senator further yield?

The PRESIDING OFFICER (Mr. REYNOLDS in the chair). Does the Senator from Tennessee yield to the Senator from Oklahoma?

Mr. GORE. I yield.

Mr. MONRONEY. I quite agree with the distinguished Senator that anything which would raise suspicion, doubt, and fear on the part of the public that this agency was not following the clearly defined channel of legislative authority would tend to weaken America in the atomic-energy race. It would tend to create doubt as to the wisdom of the activities of the Atomic Energy Commission, and of all the other agencies of the Government. Because of its super-secret nature, which is necessary in order that it may operate in such a manner as to conceal from prying eyes our innermost atomic secrets, when there is doubt as to whether the law is being followed to the letter, page, chapter, and verse, or whether the authority is being exercised with scrupulous care, we are saddling the Atomic Energy Commission, in the world race for atomic supremacy, with added burdens which will far outweigh any value in a direction given to it by the Budget Bureau or the President, in an indirect and roundabout effort to invade the territory of the TVA. I think the invasion of the TVA area, important though it be, is one of the very minor aspects of this whole question. I agree that such a directive sacrifices the concept of an independent agency. The doubt and suspicion which must run against the Atomic Energy Commission as a result of the law stretching in connection with this bill are of far greater importance than the contract itself or the invasion of the TVA territory.

Mr. GORE. First, the impediment to the progress of the atomic-energy program, to which the distinguished Senator made reference, is indeed important.

The Commissioners have testified that the proposed contract would not be helpful to the Atomic Energy Commission, but rather that the making of the contract and the administration of the contract for the next 25 years would be an impediment. In view of the vast importance of the atomic-energy program, both for national defense and for civilian use, does the Senator think the United States Congress should approve the dumping of this contract upon the Commission against its will, thereby impeding the development of the program?

The Commission, after due deliberation, concluded that the Dixon-Yates proposal was completely foreign to the mission and responsibility of the Commission, and that it was of doubtful legality and contrary to the public interest. In effect, the Commission has been overruled, as I have said, by a letter signed by the Director of the Bureau of the Budget directing it, at the instigation of the President, to proceed with negotiations notwithstanding reservations by its members as to the propriety and legality of the transaction.

There are those who contend that the President has every right—and indeed the duty—to overrule the members of the Atomic Energy Commission when he differs with their views. On Friday of last week the junior Senator from Arkansas [Mr. FULBRIGHT] referred to what he considered a parallel situation, in which it is alleged that the President did, in fact, exercise such authority, without question from the Congress. He referred to the instance in which the President of the United States directed the Commission to proceed with the development of the hydrogen bomb despite certain reservations about the wisdom of the project on the part of some individual members of the Commission. The RECORD conclusively shows, however, that the President did not overrule the Commission in this matter, and did not instruct the Commission against its will. I read from page 790 of the hearings:

Representative HOLIFIELD. I will also suggest an occasion in the determination of whether the H-bomb program should be pursued when the Commission voted 3 to 2 against pursuing it, and the President made the decision that you might go ahead and make it—that you should go ahead and make it; is that true?

Dr. SMYTH. May I correct that, Mr. HOLIFIELD?

Representative HOLIFIELD. Yes, please do.

Dr. SMYTH. The Commission never voted 3 to 2. The Commission voted unanimously that this decision should be made by the President; that it involved so many different facets of the Government and was of such far-ranging importance that the Commission voted unanimously to send a paper to the President which suggested the various facets of the problem.

There were appended to that paper suggestions from the various Commissioners as to what might be the appropriate answer to this general question, but the Commission always recognized that the President should make the decision as to whether or not the H-bomb work should go forward.

I submit, Mr. President, that even though the President did, upon reference by members of the Commission, direct the Commission to pursue a certain course of action in this instance, it should be kept in mind that in so doing he was directing it to engage in a program of vital importance to our national security and which involves the military aspects of the atomic energy program, in which the President is instructed to direct the Commission by the Atomic Energy Act.

Mr. LEHMAN. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. LEHMAN. The reference to the President of this very important issue, the hydrogen bomb, by the Atomic Energy Commission was made, as I understand, on the initiative of the Atomic Energy Commission, and was a voluntary action, not in any way a decision which was imposed upon them against their will by the President of the United States.

Mr. GORE. That is true, with this additional important fact, namely, that it was in a field in which the act specifically delegates authority to the President of the United States.

Mr. LEHMAN. Because it is a weapon.

Mr. GORE. That is correct.

Mr. LEHMAN. As I understand—and I wish the Senator would correct me if I am not correct in my understanding—the law has given the President the right to make decisions with regard to weapons which are constructed or planned by the Atomic Energy Commission.

Mr. GORE. The law confers upon the President powers to direct the Commission in certain phases regarding the military features of the atomic energy program.

Mr. LEHMAN. That is specifically set forth in the statute.

Mr. GORE. That is correct. According to the rule of interpretation, the specified parts have the effect of excluding the parts not specified.

Mr. LEHMAN. I thank the Senator.

Mr. GORE. I appreciate the contribution made by the able Senator from New York.

That is a far different situation from that in which we find the President of the United States directing the members of the Commission to enter into a contract for the purchase of electric power, not for its own use, but for the use of some other agency of the United States Government, for an entirely different purpose.

If such a condition is allowed to go unchallenged by Congress, and if such an act remains unchallenged, then grave consequences may result. If the decision of an independent agency can be overruled on a question involving details of the management of a program which it has been directed to promote and empowered and made responsible to promote, as in this instance, it may be argued that the Executive has the same authority with respect to all the other agencies of Government. If Congress should have allowed this to go unchallenged—and of course it is being challenged on the floor of the Senate—we may be sure that other independent agencies would have been aware of the failure of Congress to defend and to protect against this invasion of the autonomy and integrity and independence of the Atomic Energy Commission.

I do not believe that anyone would seriously contend that the decisions of one of our regulatory agencies could or should be superseded by a telephone call from a member of the White House staff. I hope no such assertion will ever be made. However, unless this be challenged, then it might well be made. If the pending bill is enacted, the Atomic Energy Commission will itself take on many of the aspects of our regulatory commissions, such as the FPC. It will sit in judgment on applications for licenses and, in general, will be charged with supervision of the development by private enterprise of the atomic energy potential.

I say, Mr. President, that this Commission is vital, not only to our national security, but that it will play an increasingly important role in the development of an atomic economy. The Congress has a responsibility to make it clear beyond all doubt that in exercising their judgment on matters placed before them, the members of this Commission shall be free and independent so that they may reach their decisions on the basis of the facts as they may be developed.

I must insist, then, that section 164 is not sufficiently broad to authorize the execution of the proposed contract; nor is it sufficiently broad to give to the President the power to order the Commission, contrary to its will, to enter into a contract unrelated to its program, of doubtful illegality, and improvident in character.

If such power is asserted, then the Congress must meet that challenge.

During the course of this debate a number of things have been pointed out. Many more will need to be discussed.

Among other things, it has been pointed out that under this contract the Government would undertake to reimburse the contractor for all taxes incurred—State, local, and Federal—including income tax assessed on the profits of the contractor. Such a provision cannot be justified in any contract, whether it involves the generation of electricity or any other subject. Such a principle, if established, would be clearly contrary to the basic premise of private enterprise, which has been so vigorously defended on the floor of the Senate. Thirdly, those of us who oppose this proposal have insisted that the Atomic Energy Commission lacks statutory authority under the provisions of the Atomic Energy Act of 1946, as carried forward in section 164 of the pending bill, to execute the contract in question.

With introduction of the issue of legality of the contract, the debate has now taken a somewhat surprising turn. Subsection 12 (d) of the Atomic Energy Act of 1946 was added to the act during the first session of this Congress for the specific purpose of authorizing the Atomic Energy Commission to execute three contracts for the procurement of electric power to be used in its facilities at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio.

I have referred to the legislative history of this provision, and I have shown that the legislative intent was clear, namely, to limit the authority granted to the three specified plants.

Now the senior Senator from Michigan [Mr. FERGUSON] has offered an amendment, and with the offering of that amendment the question of legality, in the opinion of the junior Senator from Tennessee, has taken on a new meaning, and has taken a surprising turn. It appeared clear to me, as I have stated today, and to many of my colleagues, that this provision of the law could not reasonably be interpreted as authorizing the execution of the proposed contract without doing violence to the intent of Congress as reflected by the legislative history of the act, to which I have referred in detail.

On the other hand, proponents of the Dixon-Yates contract insisted vigorously that existing legislation provided ample statutory authority for the execution of the contract In so doing, they have argued that the power to be produced from the Dixon-Yates plant would be in connection with the operation of AEC's installation at Paducah, Ky., and perhaps at Oak Ridge, Tenn. Such a position was clearly untenable in the light of the record established during the hearings before the Joint Committee on Atomic Energy and during the debate on the floor of the Senate. Stripped of all camouflage, such a contention is reduced to nothing more than an assertion that procurement of power for use by TVA amounts to one and the same thing, as the procurement of power for use by AEC.

I am constrained to believe, Mr. President, that some of our colleagues who initially held a contrary view, are now convinced of the force and logic of our arguments and have recognized the inescapable fact that section 164 of the pending bill, in the form in which it was reported by the committee, is insufficient for the purposes for which the administration sought to use it—insufficient, in other words, to give legal authority to the contract.

On July 16, the senior Senator from Michigan introduced an amendment which has been made the pending business before the Senate. The Ferguson amendment clearly can have no purpose other than to provide statutory authority for the action which the administration has already directed. I do not concede that enactment of the Ferguson amendment would fully authorize consummation of the Dixon-Yates proposal which purports to authorize AEC to enter into contracts for something called "replacement power." I am not sure I understand just what that is. Certainly, the phrase is ambiguous, and I presume that the proponents of the amendment will clarify it during the course of the debate.

Nevertheless, I think it a valid assumption that the amendment has, for its purpose, a statutory authorization for the execution of the contract. In view of this fact, the Senate might well, in my opinion, pause to consider the implications of its introduction.

As I have previously indicated, the introduction of the Ferguson amendment constitutes an admission on the part of those sponsoring it that reenactment of section 164, in its present form, would fall short of the required authorization. I think it reasonable to presume that the decision to introduce such an amendment was made pursuant to discussion by the majority policy committee, though, of course, I have no direct knowledge of any position formally taken by that group or by the Senators who participated in any discussion which may have taken place.

Mr. MONRONEY. Mr. President, will the Senator from Tennesse yield?

Mr. GORE. I yield.

Mr. MONRONEY. Is the amendment to which the Senator has referred the one which is numbered 7–16–54–E?

Mr. GORE. I believe that is correct.

Mr. MONRONEY. It reads as follows:

On page 80, after the period in line 9, insert the following:

"The authority of the Commission under this section to enter into new contracts or modify or confirm existing contracts to provide for electric utility services includes, in case such electric utility services are to be furnished to the Commission by the Tennessee Valley Authority, authority to contract with any person to furnish electric utility services to the Tennessee Valley Authority in replacement thereof."

Mr. GORE. That is correct.

Mr. MONRONEY. Would not this amendment, which proposes to legalize the Dixon-Yates contract, apply, then, entirely around the perimeter of the Tennessee Valley area? The exclusive and lucrative contract and the precedent proposed to be set for the West Memphis bonanza would allow a complete group of little bonanzas completely to surround the TVA, because anyone who supplies electric ultility services to the TVA could receive this replacement advantage with no taxes? So it is entirely a new concept.

I grant it would give legal authority, but it seems to me to be as wide open as all outdoors. Can the Senator give me any idea of how much replacement authority this amendment, if agreed to, would open up? We are talking about 600,000 kilowatts which will cost $107 million on a 5-percent capital investment. Is it capable of being expanded? Can the Senator give us any idea of what the Ferguson amendment will do in the way of helping promoters of other companies? Surely, they are not going to lock the door and throw away the key on such an investment opportunity as this. Others will want to get in on the operation as well.

Mr. GORE. Others already plan to get in on the operation. In fact, as I have previously stated, this is the first move to dismember the TVA service area and to destroy it as an integrated operating utility.

The Senator inquires as to what extent the Ferguson amendment would authorize the Atomic Energy Commission to get into the power business. The TVA is now furnishing to the Atomic Energy Commission approximately 3 million kilowatts of electricity. The proposed Dixon-Yates contract is for 600,000 kilowatts. So the Senator will see that he was slightly in error in referring to the possibility of a few more small bonanzas. They could make four more such Dixon-Yates contracts. Incidentally, one concern has already selected its site. It proposes to move into East Tennessee and build a plant on the Holston

River, near Kingsport, to partake of another contract with the Atomic Energy Commission. If this example is followed—and the amendment of the senior Senator from Michigan would authorize it and approve it—then the TVA could be invaded with a plant the size of the Dixon-Yates plant from five different directions.

Mr. MONRONEY. While I respect the TVA and feel that its operation has been a great success and has served our defense needs well, I am not as conscious of the vast importance of the TVA maintaining its territorial integrity as are the good citizens of Tennessee. Of necessity I must approach it, as I know the distinguished junior Senator from Tennessee, who is so familiar with the entire operation of TVA, approaches it, not only from the standpoint of the danger of disintegration of the operation, but also the grave danger to the body politic, to the taxpayers. If the pending bill is bad, then, if I correctly understand the junior Senator from Tennessee, the energy replacement might run as high as 3 million kilowatts, if the plan should be developed as full blossom, and instead of having an annual loss of some $3,600,000, with four other such projects it could pyramid the losses to $12 million or $15 million a year.

Mr. GORE. Yes; and if there is tax reimbursement of $800,000 a year for Dixon-Yates, there could be tax reimbursement or tax immunity, if the 5 plants are included, which would be so great that we would have to borrow the money to give them tax reimbursement.

Mr. MONRONEY. I appreciate having the Senator's views on that point. I wonder if the Senator can tell me about the tax privileges of the companies which have contracted with the Atomic Energy Commission and have done such a spectacular job in developing the atomic energy idea from the very beginning—companies which took hold of it when it was merely in a nebulous stage in the brains of scientists and developed the atomic bomb to the proportions to which it has been developed and improved, and the hydrogen bomb, and the gaseous diffusions which have been referred to. Have these companies which have done such a spectacular job in nurturing and developing this energy until we are thinking about applying it to civilian uses, had a tax exemption on their contracts with the Atomic Energy Commission?

Mr. GORE. I know of no one—no corporation, business, or person—with sufficient income to meet the tax schedules, thereby incurring liability, who is given tax immunity. This is an innovation.

Mr. MONRONEY. So no tax privileges were given to the corporations which have served so well in this field, and have taken certain risks in building up personnel and operating organizations, have achieved some gains through technical know-how, which I am sure will serve them well in the years to come. But, after all, they were dealing in prime defense projects, and were working on one thing, and one thing alone. On the other hand, this contract provides for an extraordinary tax concession, plus a guaranty in case of cancellation. Incidentally, do the companies operating the atomic-energy plants have guaranties in case of cancellation? I do not mean the utility companies which supply the power; I am speaking about the big corporations, which have operated the plants for the Atomic Energy Commission.

Mr. GORE. I am not acquainted with the details of the cancellation provisions of the contract. I think it is reasonable to presume, though, that they have safeguarded their interests with proper provisions in the contracts.

Mr. MONRONEY. They perhaps did, but I rather doubt that the cancellation privileges are so lucrative as they are in this case, which makes me wonder how liberal we can become with the taxpayers' money in underwriting a 9-percent return on a 5-percent capital stock investment, together with guaranteed cancellation rights, and the like.

I can see more hazard in the investment of time and energy in the manufacture of atomic energy by the private contractors who have gone into the business, in fact, I can see more hazard in loss of investment to tank manufacturers or aircraft manufacturers, than I can see danger of loss to the Dixon-Yates group.

After all, electrical energy is like sugar in a grocery store. There is always a demand for it. Particularly, it is being used more and more in the Memphis area. The industrial load there is growing; the commercial load is growing. Yet, despite all the benefits which will be bound to accrue from a generating plant going into that area, one would think that this was something useful for only a specific, narrow field of our defense. If there is a power shortage in the area, the Dixon-Yates group actually will take very little loss, because they will receive so much in the way of tax absorption and protection against Federal income tax, and also the big cancellation fee which is provided.

Mr. GORE. Does the Senator know of any instance in which there is less risk involved than in a contract such as this?

Mr. MONRONEY. I cannot figure it out, because the power can be carried in any direction. It can be carried north, south, east, and west, to markets in the West Memphis area. If the company wants to install a 600,000-kilowatt power generator, I think it should have the right to do so. I would not be critical even if they wanted to write it off in 5 years, as is done by defense plants or aircraft plants, and others. But I do not believe the Atomic Energy Commission would be their sole customer. In fact, the Atomic Energy Commission would not be a customer at all; it would be only a dummy. The customer would be the TVA, which is a captive customer in this matter.

If we are going to say to the Dixon-Yates group, "You can get all this for building such a commonplace facility as a 600,000-kilowatt generating plant," are we going to say "No" to those who are really doing something unusual, exceptional, of a limited, narrow range in our defense activities?

Mr. GORE. I wanted to show the Senator from Oklahoma how the Budget Bureau meets itself coming back. In its statement to the press, on page 1, it refers to the possible difficulty of marketing surplus power in the Memphis area; but on another page it says that the load is growing, and there will be no difficulty in marketing surplus power in that area.

Mr. MONRONEY. I am glad the Senator from Tennessee has mentioned that, because it seemed incongruous to me that in one place in the letter of the Budget Bureau it spoke about the inadvisability of putting up more generating plants around the Paducah area. I can readily see that too much capacity might be built there. But the people who put up the plant there did not get tax exemptions, or benefits of that kind, as they undertook to oversupply that particular area.

Then when the Dixon-Yates group are allowed to select their own area and build their own plant, which would have the greatest possible utilization in the future for their own needs to supply power to their own companies, the Arkansas Power & Light Co. and associated companies, which have rapidly growing loads, and which wire up to the REA's, and other facilities, the group can pick an economy-sized package—economy sized to the Dixon-Yates people—and locate their plant where I think they want it.

Can the Senator from Tennessee tell me: Did the Atomic Energy Commission locate the plant at West Memphis? Is there any strategic reason of national defense why someone should have put the pin in the West Memphis area and have said, "This bit of made land"—which is washed over by the floods of the Mississippi—"is the best place for our defense needs," and for strategic reasons the plant should be located here?

Mr. GORE. I should be glad to read the statement of Mr. Nichols, General Manager of the Atomic Energy Commission, in this regard, which appears on page 971 of the hearings.

In regard to the President's message at the time we were then considering actually building a plant.

The Atomic Energy Commission actually was considering building a plant at Paducah.

In other words, we were dealing with EEI, and Mr. McAfee, and the suggestion at that time was that a plant be built right at or near the site of the Paducah plant.

The EEI is Electric Energy, Inc., the combine which built the plant at Paducah.

In that case it would have been releasing TVA from a commitment.

Subsequent study from an engineering point of view, and cost point of view, indicated that the best deal for the Government would be to locate the plant in a sound engineering area.

Exactly why it would cost less to build a plant on the alluvial soil in West Memphis than to build a plant at Paducah, I do not know. From what engineering point of view he was discussing or considering, I do not know. It could have been from the standpoint of value costs. It could not have been from the stand-

point of the site where the Atomic Energy Commission needed power. The Atomic Energy Commission has no plant at Memphis. It could not have been because there were engineering advantages—physical engineering advantages—at West Memphis which were not present at the Paducah site. I think we will have to go further to find the reasons. In other words, we would take the engineering solution which was in the best interests of the Government. What was the engineering problem he was discussing? I do not believe he was talking about an engineering problem, as I understand engineering.

The power combine wanted to get a corner on the Memphis service area. Why did they want to lay claim to the Memphis service area if the TVA service area is to be dismembered? Because, as the Senator knows, the most profitable power market is the concentrated power market. Memphis is a very large city. It is a very prosperous city, and a very fast-growing one. There was a very profitable, prosperous service area, and they wanted to lay claim to it. Then the growth in the TVA service area is enormous. The growing demand for electricity in the TVA service area has now reached approximately 750,000 kilowatts a year, 150,000 more a year than the plant under discussion would provide.

The Budget Bureau has stated it would be very bad for the TVA to build the plant near Memphis, because the TVA may have a surplus of power which it will not be able to market; therefore, it would be a dangerous investment for the Government. But, on another page, the Budget Bureau states that the reason for locating the Dixon-Yates plant near Memphis is that there is a growing demand for electric power in that area, that it will be an easy market, and there will be no danger of having surplus power.

What does the Senator think of that kind of reasoning? The Bureau of the Budget has been guilty of gross subterfuge and reprehensible attempts to mislead the American people in order to cloak this disgraceful deal with respectability. It is unworthy of the Bureau of the Budget.

I desire now to call to the attention of the senior Senator from Alabama a provision in the proposed contract to which I do not believe attention has been directed thus far in the debate. I refer to the testimony of General Nichols, and also to the provision in the directive by which it is made possible, if the proposal goes through, to dump the surplus power onto the TVA at higher rates still. Is the able Senator from Alabama aware of that? Let me read to him from page 949 of the testimony of General Nichols:

> Any capacity not absorbed by the sponsors after the 3-year notice period may be assigned by the Government to another governmental agency at a price to be approved by the Federal Power Commission.

Does not the able Senator see the implications of that? This contract, improvident as it is, may not by any means be a ceiling on what this outfit may get. Suppose the Atomic Energy Commission does conclude it does not need this power—as in fact it does not need it—and thereby the contract between the private outfit and the AEC is terminated. Then—and listen to this—

> Any capacity not absorbed by the sponsors—

That is, if there was power they did not want, power they could not sell within their own service area, what do they do with it?—

> may be assigned by the Government to another governmental agency—

Now, what other governmental agency is there to take electric power? The TVA—

> at a price to be approved by the Federal Power Commission.

And if this precedent for the action of the President of the United States stands, who will be used as an agent of the power trust in this instance? The Federal Power Commission, by giving to it the power to fix a different rate than that which was charged by the TVA. Does the Senator from Alabama see the implications there?

Mr. HILL. And at this time no one could know what the cost to the TVA might be.

Mr. GORE. That is punctuated by the fact that General Nichols testified, as appears on the same page, that this outfit has already said that they did not want to sell to TVA at the rates for which they propose to sell to AEC. So we are put on notice. I do not believe that particular point has been brought out in the debate before.

Mr. HILL. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield to the Senator from Alabama.

Mr. HILL. I am quite certain that this is the first time that provision in the contract has been analyzed and explored on the floor of the Senate.

Mr. GORE. I acknowledge it would be a devious procedure for the Atomic Energy Commission to make the contract which it is directed to make, for power which it does not need, and then sometime later—3 years, 1 year, or whatever number of years later—decide to cancel the contract because it no longer needed the power. It did not need it in the first place. I concede it would be a devious procedure to cancel the contract and then have the power assigned to the TVA at a rate fixed by some other agency. But I submit to the senior Senator from Alabama that this whole transaction is devious. That would be no more devious than the genesis and the consummation of the proposed contract.

(At this point Mr. GORE yielded to Mr. KUCHEL, who addressed the Senate on the subject of the Colorado River storage project. On request of Mr. KUCHEL, and by unanimous consent, his remarks were ordered to be printed in the RECORD following Mr. GORE's speech, where they appear under the appropriate heading.)

Mr. GORE. At any rate, it now becomes obvious, in the light of the offering of the Ferguson amendment, that in the absence of affirmative action by the Congress, the authority to proceed further with the Dixon-Yates contract will be even more doubtful. Indeed, I think it is clear that the proposal would be illegal. In other words, unless the Ferguson amendment is adopted, and unless the pending bill, modified to include the Ferguson amendment, is finally passed by the Congress, I do not believe there can be such a contract with the Dixon-Yates group.

Heretofore during the debate we have sought to convince our colleagues that the course of action advocated by the administration lacked congressional authorization. The admissions incident to the offering of the Ferguson amendment have operated to shift the burden of proof and the burden of action. On the proponents of this contract now rests the responsibility of demonstrating affirmatively to the Congress that the proposal is in the best interests of the United States, and that authority for the execution of this contract is essential to enable the Atomic Energy Commission to discharge the heavy responsibilities placed upon it by the pending bill. Thus the issue is now before the Congress in proper form.

In enacting the Atomic Energy Act of 1946 the Congress sought to vest in the Atomic Energy Commission such statutory authority as might be required by it to implement the atomic-energy program. Thereafter, in 1953, the Commission reported to the Congress that its contracting authority as contained in the act was not sufficiently broad to authorize the execution of contracts which were essential for the efficient operation of the Commission's production facilities. Upon the presentation of its case by the Commission, Congress speedily gave its consent. I am confident that Congress will always so respond upon presentation of facts justifying any proposal.

We are dealing here with a vital program, and with one of the most sensitive independent agencies of our Government. The Commission should be granted such authority as may be necessary to carry out its program—no more and no less.

For my part I eagerly await the affirmative presentation by the sponsors of the Ferguson amendment of the facts and purposes which justify this request for a further expansion of the Commission's authority to execute contracts. I am eager to receive factual information as to how the execution of the Dixon-Yates contract will facilitate the progress of the atomic-energy program in the quest for a successful formula by which the enormous potential of the atom may be made more readily available for our defense and to promote our economic prosperity. I shall be a most interested listener to such explanation as may be offered as to how a new philosophy of contracting authority embracing guaranteed profits, with little or no risk, and reimbursement of taxes, will enhance the traditional concept of private enterprise.

Thus the issue is before the United States Senate.

Mr. MONRONEY. Mr. President, will the Senator yield at that point?

Mr. GORE. I yield.

Mr. MONRONEY. If the Ferguson amendment should be adopted—and I believe the distinguished Senator has a

copy of it before him—the operation of the "double-play technique," from the Budget Bureau to the Atomic Energy Commission to the TVA, could, of course, be expanded to the west coast as well, could it not?

Mr. GORE. I see no reason why it could not.

Mr. MONRONEY. Do not projects in the Grand Coulee area supply vast quantities of electrical energy to the Atomic Energy Commission—or some quantity?

Mr. GORE. That is true.

Mr. MONRONEY. This opens a new field, because obviously if we act on the theory of replacement of power, almost anywhere in that area, if some energetic and ambitious utility holding company wished to have a new generating plant underwritten on the same terms, the Ferguson amendment would open the door by legitimatizing the transaction without any test of need or use by the Atomic Energy Commission for the power, but merely on the theory of the replacement of power which is being used.

Mr. GORE. I think I would have to disagree with the Senator's interpretation of the Ferguson amendment. The Ferguson amendment specifies so-called replacement of power. I still do not quite understand what is meant by that term, but the Ferguson amendment calls for replacement of power furnished by the TVA.

If the precedents of the Dixon-Yates contract were to stand without the Ferguson amendment, if it should finally be proved to be a legal contract under section 12 (d) of the law, then I believe that what the Senator envisions would be possible. The Ferguson amendment reads as follows:

> The authority of the Commission under this section to enter into new contracts or modify or confirm existing contracts to provide for electric utility services includes, in case such electric utility services are to be furnished to the Commission by the Tennessee Valley Authority, authority to contract with any person to furnish electric utility services to the Tennessee Valley Authority in replacement thereof.

Mr. MONRONEY. Mr. President, I understand what the Senator means. I had given my copy of the amendment to the junior Senator from Tennessee and did not have it before me. I understand that it would be limited by the Ferguson amendment. However, a precedent would be set which could be expanded, and undoubtedly would be expanded if the principle were legitimatized by the adoption of the Ferguson amendment, so that other areas could find this questionable connection between the Atomic Energy Commission and a dummy contracting party, and it could be used in the Far West as well.

Mr. GORE. I believe that is correct. However, the Ferguson amendment, as is plain from a reading of it, specifies that the Commission has the authority to contract with private utilities so long and only so long as they pipe power into the TVA area. Thus again we observe the discrimination. Under the Ferguson amendment it is not permitted in other areas, but it is all right for a private utility to invade the TVA area. The Commission is denied authority to generate electricity in commercial quantities by use of atomic energy, but it is all right if it wants to make contracts such as the Dixon-Yates contract with private utilities to invade TVA areas. Thus we see the philosophy and the effect of the proposed amendment. I do not believe that the amendment should be adopted.

I welcome its being offered, however, because I contend that its mere offering concedes the doubtful legality of the proposed contract. It concedes that there is not sufficient authority or at least that it is doubtful that there is sufficient authority in section 12 (d) for this proposed contract. For that reason I welcome the amendment.

If we must fight the issue on whether or not the private companies are going to dismember the TVA, we might as well fight them on the basis of 5 Dixon-Yates contracts instead of only 1 because then the Nation can see the broad outline of this attack to destroy the integrated quality of the TVA.

Of course, no proposal is yet made to sell the production facilities of the TVA—and that may never come—but when it is destroyed as an integrated operating utility with a sufficient grid network, then it is destroyed as an instrument which we have known all these years to be so successful.

Mr. President, I wish to read, not for the purpose of taking time, but because I believe it to be pertinent, an article which appeared in the Christian Science Monitor of July 15, 1954, to which some reference has already been made.

The article was written by Mr. Joseph C. Harsch and reads as follows:

> WASHINGTON.—President Eisenhower is having trouble, and is likely to have a great deal more before he is finished, with TVA.
>
> But it probably is not much easier for him than for the layman in such matters to understand all the fast and complex ramifications of an issue which cuts across not only partisan political lines in Congress but also across ideological and doctrinal lines as well, and is now building up in Washington into the most warmly fought domestic issue of the Eisenhower administration.
>
> The immediate question is whether the President is within his authority in ordering the Atomic Energy Commission to become the instrument for reviving private electrical power activity in what might be called the existing domain of the Tennessee Valley Authority.
>
> The President grasped the issue on June 17 when he instructed the Bureau of the Budget to instruct the AEC to conclude as rapidly as possible a contract with a chosen private power group to build a steam powerplant to feed electric power into TVA's grid of powerlines.
>
> The official purpose of the move is budget economy. More electric power is needed in the TVA area. Everyone seems to be agreed on that. TVA wanted to provide it by building more TVA owned and operated plants. But this would have put a charge on the budget for the capital costs. The President's alternative solution to the problem is to have AEC sign a contract under which a private power company will build a plant by borrowing most of the capital needed, using the contract as security for the loans.
>
> To call the problem a dilemma within a paradox is probably to be guilty of attempted oversimplification.
>
> The President himself has referred to TVA both as "creeping socialism" and as a "historical fact." He has promised to restrain TVA, but also to preserve it.
>
> Opponents on the specific issue of the contract have tended to state their arguments in doctrinal or ideological terms. However, there are many inconsistencies. For example, Senator J. W. FULBRIGHT, Democrat of Arkansas, usually has been regarded as one of the liberal or even New Deal members of the Democratic Party. But Senator FULBRIGHT is standing stanchly behind the President on this issue. His position is not unrelated to the fact that the private power plant contemplated by the President will be located in the State of Arkansas. Geography as well as doctrine is involved.
>
> New Englanders, whatever their doctrinal views, tend to side with the President, because the construction of the private plant is expected to raise the price of electric power in the TVA area and thus narrow the present gap between TVA and New England power rates. Cheap TVA power undoubtedly has been a magnet attracting industries to the TVA area.
>
> Conversely, many a private industrial interest is lined up with TVA because TVA does provide cheaper electric power.
>
> The selection of the Dixon-Yates group of private power interests to build the proposed new plant is defended on the ground of private enterprise. However, private enterprise normally implies the free operation of the competitive system. The Dixon-Yates group was selected without competitive bidding. It was picked as a "chosen instrument." The General Accounting Office has raised questions about the wisdom and propriety of this form of selection.
>
> The administration's attitude toward TVA is surrounded by paradox. When seeking a solution of Arab-Israel troubles in Palestine TVA was held up as a mighty example of what might be done, and the United States Government prepared a TVA-type plan for the development of the Jordan River. TVA may be creeping socialism at home, but it is considered an excellent export commodity for Arabs and Israel.
>
> Behind all this is, of course, one basic politico-economic fact. TVA has built a public electric power doman in the Tennessee Valley and the opportunity for making private profit out of electric energy has largely been excluded from that domain.
>
> The real issue is whether the frontiers of public power should be allowed to expand, should be stabilized, or should be broken and forced back. Private-power interests have been on the defensive for more than 20 years. The areas in which they were allowed to earn profits were being contracted by TVA and by other Federal projects throughout the West.
>
> Now the private-power interests are attempting to go over to the offensive and regain some of their lost provinces. It is a natural and inevitable historical phenomenon. Their hope is to drive a salient back into the Tennessee Valley.

Mr. SPARKMAN. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I shall be very glad to yield to the distinguished Senator from Alabama.

Mr. SPARKMAN. I note with interest the statement that the private-power interests want to regain some of their lost provinces—as if that territory had been taken away from the private-power interests.

Mr. GORE. And could be properly regarded as a province.

Mr. SPARKMAN. Yes; and that they, and they alone, have a right to serve it. But let me ask the Senator if this is not true: The Senator from Tennessee was a Member of the House of Representatives in 1939 when the bill was con-

sidered which divided the territory between TVA and the private-power companies in the TVA area generally.

Mr. GORE. That was my first year in Congress, and I voted for the bill.

Mr. SPARKMAN. As a matter of fact, I sponsored the bill in the House. The then Senator from Nebraska, Mr. Norris, sponsored it in the Senate. Long and thorough hearings were held. I am sure the Senator from Tennessee well recalls what happened. A witness for the bill and the principal proponents of the proposed legislation was none other than Mr. Wendell Willkie, who was president of the Commonwealth & Southern Co., the holding company for the power companies in that area. Does the Senator recall that.

Mr. GORE. I do, indeed.

Mr. SPARKMAN. It was the representative of the private power companies who urged that this division be made in order, as Mr. Willkie put it, that there might be peace in the valley. Prior to that time there were in some places—not in a great many, because the problem had been worked out peacefully—in some areas and municipalities competing distribution systems. It was thought advisable by all concerned, and certainly by Mr. Willkie himself, that there should be worked out a plan to insure against those competing distribution systems in the respective areas.

So it was that he proposed this plan which was written into law, and, under the law, an understanding was had as to what territory the private companies would serve thereafter and what territory the TVA would serve.

I am sure the Senator from Tennessee remembers that only last year in the hearings before the Senate Appropriations Committee a spokesman for the Southern Co. referred to the agreement under the act of 1939 and to the fact that since that date the agreement had been meticulously observed by both sides. The Senator from Tennessee was present when that statement was made.

Mr. GORE. I recall it.

Mr. SPARKMAN. I am certain he remembers it quite well.

Mr. GORE. Then why is there the charge that TVA, like an octopus, is trying to spread its vicious tentacles all over the Nation?

Mr. SPARKMAN. I am glad the Senator is bringing out that point, because it seems to me there is a great misunderstanding. Many expressions have been heard on the floor of the Senate about the TVA trying to expand. As a matter of fact, for the past 15 years the TVA has not expanded its province, if one may use that term. It has not expanded its territory one single mile.

Many areas in the general area, in my own State of Alabama, for instance, back in the early days, wanted to get TVA service, but they could not, because the act of 1939 drew the line. If the Senator will go back to that act, he will find that, so far as Alabama is concerned, every county which is served by the TVA is named in the act. There are only 12 counties and two additional municipalities in my State.

There is a limited number of counties in Mississippi, perhaps 15 or 20; something like that. All of the State of Tennessee is included, with the exception of the litle corner up in the northeastern part of the State.

All of that territory was embodied in the transfer of properties made at that time, and was provided for in the division of territory between the two different forces.

In view of that fact, does the Senator think it is a fair and reasonable statement to imply that provinces were taken away from the private power companies, and that they have a right to try to recover those provinces?

Mr. GORE. I do not. I do not believe the area can properly be regarded as a province of any group, either previously or in the future. I know that many demands are made upon TVA to extend its lines into additional territory. The TVA has resisted those demands. I have resisted them. I know of not a single instance in which I have urged the TVA to expand its territory. Upon many occasions, on the contrary, I have indicated to the TVA that I did not wish to see the territory of its service area expanded.

So the use of the words "expansion of TVA," when they take on the meaning of a geographical expansion of the service area, is entirely erroneous. This expansion which TVA has sought, and which I have advocated, is the same kind of expansion as has taken place in the case of Duke Power Co., Georgia Power Co., Alabama Power Co., Mississippi Power Co., Arkansas Power Co., Virginia Power Co., Niagara Power Co., and every utility in the United States. What is that expansion? It is growth—the addition of generating capacity within its own service area to meet the needs of its service area.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. SPARKMAN. What the Senator from Tennessee says is absolutely correct. The growth calls for expansion of service. That takes place not only as the population may grow or as industry may grow, but even as additional appliances are put into the individual homes, greater use is made of electricity.

As a matter of fact, is it not true that whereas many persons have thought of the yardstick as being something simply to measure the cost of power—what the cost should be as it is generated—Mr. Lilienthal has said, in his book regarding the TVA, that the real purpose of the yardstick is to get the people to use more electricity, and by the additional use of the electricity, to drive down the cost per unit of manufacture of the power, and that therein lay the real purpose of the yardstick?

Mr. GORE. That brings up the subject of the power policy of the TVA, which was written into the basic act, namely, a mass use; and a low rate makes for mass use.

Mr. SPARKMAN. A low rate made possible by mass use.

Mr. GORE. Or a mass use made possible by low rates.

Mr. SPARKMAN. The two go together.

Mr. GORE. The same principle is applied successfully in the automobile industry.

Mr. SPARKMAN. I know it is true in Alabama, and I am certain it is true in the other areas, that the very principle as advanced by the TVA has been followed by some small private-power companies, who have followed a similar policy, and therefore, we have seen, I dare say, in the Southeast, in the area around TVA, a greater stepup in the use of electricity, perhaps, than in any other section of the United States.

Mr. GORE. Has not that principle benefited particularly all the surrounding area, and generally all of the United States, also?

Mr. SPARKMAN. Certainly, it has; and in our own areas we have seen the rates of private companies come down as the use of power went up.

Mr. GORE. And the power companies have made more money.

Mr. SPARKMAN. They have made more money. I referred a few moments ago to the act of 1939, which was advocated by Mr. Willkie. I recall quite well those hearings, which were held before the House Committee on Military Affairs, of which I was a member, that committee having had jurisdiction, as the Senator may recall, of legislation pertaining to the TVA, because of its defense aspects.

I recall what happened to the value of stock in the Alabama Power Co. at that time. The Alabama Power Co. was a good company, doing a good job throughout the State of Alabama as a whole, but still operating under the more or less restrictive practices under which every private power company operated prior to the demonstration of the true yardstick of TVA.

Mr. GORE. In other words, one could get power if he was not more than four blocks from the nearest consumer.

Mr. SPARKMAN. Yes, and under similar conditions. But at that time stock in the Alabama Power Co. was being sold for about 50 cents on the dollar. After peace came to the valley, as Mr. Willkie expressed it, the value of the stock rose steadily until within, I should say, a year's time it was selling for 100 cents on the dollar, and even more.

I have mentioned that as an illustration of the point which the able Senator from Tennessee has just made. As a matter of fact, the private power companies themselves profited, as did the people living in that area.

Mr. GORE. The Senator from Alabama certainly challenges me in his reference to Mr. Willkie's statement that peace had come to the valley. Certainly peace between the TVA and the surrounding utilities has prevailed since the passage of the act of 1939 until now, when the private utilities are attempting to establish a beachhead in the TVA service area.

Mr. KNOWLAND. Mr. President, will the Senator from Tennessee yield at that point, without the Senator's losing his right to the floor?

Mr. GORE. I yield.

Mr. KNOWLAND. I am not constrained to make a point of order, but normally the Senator would be governed by the rules; and the Senator who has the floor can yield only for a question.

I could quite understand the delaying tactics last week, because there were absent certain Senators whom it was desired to have present to vote, but I think it is very apparent that there is in progress, whether it be called a filibuster or merely delaying tactics, an effort to prevent the Senate from voting on this amendment.

I had hoped that the liberal wing of the Democratic Party would not engage in a filibuster to prevent the Senate of the United States from functioning, but I must say, in all fairness, that I intend to ask that the rules be strictly enforced hereafter, and that Senators who have the floor may yield only for a question.

Mr. GORE. Mr. President, the observation by the distinguished majority leader requires some limited comment. The junior Senator from Tennessee was present in the Chamber at 3 minutes past 10 this morning, ready to address the Senate on the subject of the Ferguson amendment. I sat here until 1:20 this afternoon, while colloquy and debate occurred on the other side of the aisle. Finally, at 1:20, I obtained the floor and proceeded to make my first speech on the pending bill in opposition to the Ferguson amendment. I have not yet completed my first address on this amendment, because it is a very far-reaching provision. It is broader than the Dixon-Yates contract. It proposes to put the Atomic Energy Commission into the power business to the extent of five times the amount of power contplated in the Dixon-Yates contract. I should like to inform the Senator that if this misuse of power, this distortion of the authority granted to the Atomic Energy Commission, in a collateral matter, this misusing of the Atomic Energy Commission for a wrong purpose, a purpose unrelated to its program, is an example of what we can expect in the administration of the atomic-energy program, then there are many provisions in the bill which will require extended consideration.

I have not addressed myself to the licensing provisions, which I think are very important. I have not yet discussed the provisions in the bill by which patents for profits can be handed out to the companies that have been, by contract, on the inside of the operation of this program.

It is not my purpose to conduct a filibuster. That is beyond my capacity to manage singlehandedly. I do expect to seek, in a parliamentary way, an opportunity to discuss the very far-reaching provisions of the bill, and the fact that the administration has sought to misuse the Atomic Energy Commission as a vehicle to drive the private power trust back into the TVA service area. I think that requires additional discussion and additional examination, because the proposal has triggered an explosion of mistrust and of suspicion that clouds the whole program.

Mr. KNOWLAND. Mr. President, will the Senator yield for a question?

Mr. GORE. I yield to the Senator from California for a question.

Mr. KNOWLAND. Does the Senator not know that there is also a great deal of additional important proposed legislation which will not be taken up, obviously, until the pending bill is disposed of? Does the Senator not also know that the consideration of the bill will be continued until the Senate has had an opportunity to vote it up or down? I am sure the Senator from Tennessee thoroughly understands that the bill is not going to be laid aside for any other proposed legislation.

Mr. GORE. The junior Senator from Tennessee is quite well aware of the important legislation which is pending. The junior Senator from Tennessee is not aware of any pending legislation, or any legislation with which this Congress has dealt, which approaches the pending bill in importance. Here is the most important bill with which this Congress will deal, and the majority leader seems bent upon haste.

Why was there not some haste when we spent 5 weeks on the Bricker amendment? Why was there not some haste when we were meeting 3 days a week? Why was there not some haste when we were adjourning at 3:30 in the afternoon, with practically nothing to do? Why must there be haste now, when the Dixon-Yates deal is under examination? I shall yield for a further question if the Senator desires to comment in the form of a question.

Mr. KNOWLAND. The Senator knows, does he not, that, as compared with any other session of the Congress in recent years, the Senate has met practically daily throughout the session? The workload had been spread throughout the entire session. The distinguished Senator himself, when he indicated last week that some of the Senators were necessarily absent from the city and wanted to be present to vote, gave what the majority leader thought was a very clear indication that he would be prepared to vote come Monday of this week. I may have misunderstood the distinguished Senator, but I certainly had no reason to believe that the liberal wing of the Democratic Party would engage in a filibuster which would prevent the Senate of the United States from coming to a vote on any of the amendments.

Mr. GORE. The able majority leader for the second time has identified the junior Senator from Tennessee with the liberal wing of the minority party. I think I might be called a switch-hitter. I will hit from the right side of the plate when I like that position, and from the other side of the plate when I like that position. I do not wish to be typed as a liberal or a conservative, or as belonging to any wing. I am a Member of the United States Senate, and I take my position as I see it. I swing at the ball as I see it.

I am not advised as to the plans of the majority leader with respect to this bill or other bills, but I must say I do not see that any great harm is going to be done if the Congress adjourns on August 15 instead of July 31. The American people are not too concerned about 2 weeks' time. Our constituents may be glad to see us, but they will be just as glad to see us on August 15 as they will be to see us on August 1. So far as I am concerned, I expect to seek whatever time is necessary adequately to discuss the provisions of the bill; and the deal that is sought to be consummated requires a more careful examination of the bill than would otherwise be the case.

Mr. SPARKMAN. Mr. President, will the Senator from Tennessee yield for a question?

Mr. GORE. I yield to the Senator from Alabama for a question.

Mr. SPARKMAN. A short time ago the Senator from Tennessee was discussing the matter of expansion of power within the TVA area. The Senator has already explained that the expansion was necessary to meet the normal growth of the community, but is it not true that the greater part of the required expansion came as a result of power being requisitioned by the Atomic Energy Commission, until, within another year, 2 years, or 3 years, about 55 to 60 percent of all the power generated by the TVA will be used by the Atomic Energy Commission?

Mr. GORE. That is true. That is particularly true also of other national defense establishments. Much has been made by critics of the fact that, whereas once the power produced in the valley was predominantly hydroelectric, and a minority steam, now we are tending toward a majority of the power being produced by means of steam plant generation. The specific reason for the production of that kind of generation has been the demands at Oak Ridge and Paducah, and the other national defense establishments in that area.

Mr. KNOWLAND. Mr. President, will the Senator from Tennessee yield for a question?

Mr. GORE. I yield to the Senator from California.

Mr. KNOWLAND. If I am not mistaken, and the Senator may correct me if I am, did I not understand him to say, when I suggested that a filibuster was in operation, that the time spent on the bill was not particularly great, and that we had had, during other and earlier days of the session, perhaps a light workload? Would the Senator be interested in my placing in the RECORD a comparison between this session and prior sessions of the Congress, and the amount of time consumed by both sides of the aisle during debate on the bill, and up to the time of the obvious filibuster which is in operation to prevent the Senate voting on even a single amendment?

Mr. GORE. Mr. President, I ask unanimous consent that I may yield to the distinguished senior Senator from California [Mr. KNOWLAND], for the purpose of enabling him to request unanimous consent for the insertion in the RECORD of whatever material he desires to have inserted, and to have that done without prejudicing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KNOWLAND. Mr. President, I ask unanimous consent to have printed in the RECORD, at the conclusion of this colloquy, data on the legislative activity from the start of the session through June 30, and also a memorandum on the number of pages and the number of lines of the CONGRESSIONAL RECORD used to date by the debate on the proposed revision of the Atomic Energy Act of 1946.

There being no objection, the data and memorandum were ordered to be printed in the RECORD, as follows:

Data on legislative activity from start of session through June 30—Senate

	83d Cong. 2d sess.	83d Cong. 1st sess.	82d Cong. 2d sess.	82d Cong. 1st sess.	81st Cong. 2d sess.	81st Cong. 1st sess.

Vetoes overridden						

[1] These figures on measures reported include all placed on calendar or acted on by Senate even if there was no accompanying report. A total of 641 reports has been filed in the Senate; a total of 602 has been filed in the House.
[2] This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed." Reported measures not acted on include measures reported during 1st session.

Mr. KNOWLAND. Mr. President, I wish to thank the Senator from Tennessee.

Mr. GORE. Mr. President, I thank the Senator from California.

Mr. SPARKMAN. Mr. President, will the Senator from Tennessee yield for a question?

Mr. GORE. Yes, as soon as I make this brief statement:

Mr. President, I have certainly been glad to yield to the majority leader, to enable him to insert in the RECORD whatever material he desires to have inserted. I hope it will show the 5 weeks spent on the Bricker amendment. I am not sure it will show the number of days on which we did nothing, and the number of days when we had practically nothing but the Consent Calendar. I know, as the majority leader has said, that that is rather typical of every session, not only of the Senate, but also of the House of Representatives. We persist in acting like schoolboys—loafing during the first part of the session, and then cramming for the final examination.

But here is the most important piece of proposed legislation to come before this session, and it involves issues of national and of international importance. I do not think it should be unduly rushed.

Mr. President, I yield now to the Senator from Alabama, for a question.

Mr. SPARKMAN. Mr. President, I wonder whether the Senator from Tennessee can distinguish between the debate on the so-called Bricker amendment—which, according to the Senator's statement, required 5 weeks—and the debate on the pending bill, which now has been going on for 1 week, has it not? It began last Monday, did it not?

Mr. GORE. No; I believe it began last Tuesday.

Mr. SPARKMAN. Perhaps it did begin on last Tuesday. So the discussion has been going on for 1 week; and we who wish to speak on the bill are charged with conducting a filibuster. However, the Bricker amendment debate lasted for 5 weeks, when the majority leader very ably was trying to kill it or stop it. Yet did the Senator from Tennessee ever hear the majority leader refer to the 5 weeks of debate of the Bricker amendment as a filibuster?

Mr. GORE. I do not recall that he did.

I should like to point out that, as I recall, the only debate we had on the pending bill on Tuesday—and the majority leader can correct me if I am in error—was a statement of about 15 or 20 minutes duration, late in the evening on Tuesday. So we really have not had a week's debate on this bill; we are yet 1 day short of a week, I believe. Late on Tuesday evening, the junior Senator from New Mexico [Mr. ANDERSON] made a short statement, in order to place certain material in the RECORD; that is my recollection.

But be that as it may, the debate on this bill has not been extended—not as extended as I think it should be.

As a matter of fact, when the distinguished majority leader asked me to yield, I had about concluded the speech I had expected to make today against the amendment of the senior Senator from Michigan. If there is no objection on the part of any Senator, I shall now proceed to summarize that speech; and then I shall suggest the absence of a quorum.

Mr. President, the amendment submitted by the senior Senator from Michigan [Mr. FERGUSON] is a concession to the doubtful legality of the Dixon-Yates contract. The amendment concedes, I believe, that section 12 (d) of the act does not contain sufficient authority for the contract.

Mr. President, why does the senior Senator from Michigan think the amendment is necessary? I would rather have him explain it himself. In a speech earlier in the day he gave his reasons, which the RECORD will show; and he listed specifically that the reason why he was submitting the amendment was the doubt that had been raised as to the legality, as to the authority contained in this section of the act. However, his amendment would do far more than quiet the doubt as to the extent of the authority of this section, for his amendment would authorize the Atomic Energy Commission to go into the power business to the extent of 3 million kilowatts a year. Let all Senators read his amendment, Mr. President. So, not only would one Dixon-Yates contract be authorized by the amendment, but 5 times that much would be authorized, if the amendment were adopted.

Mr. President, why do I object to the proposed procedure? First, because the order of the President overrides a majority decision of the Atomic Energy Commission to the contrary; and that overriding requires the making of an improvident contract of at least doubtful legality, for a purpose unrelated to the Atomic Energy Commission's program, and for a purpose which would serve to profit unduly a specially privileged group.

Second, it shocks and does violence to the confidence of Congress and the intent of Congress—by stretching a statute far beyond its intended meaning and far beyond the reasonable interpretation of the legal language.

Third, it proposes an unprecedented contract which would give complete reimbursement of all taxes. If that were used as a precedent, it would lead to disastrous consequences to the Treasury, and to favoritism to corporations. If it were not followed as a precedent, it would result in inequitable treatment and unfair privilege to this one corporation, selected from all corporations.

Fourth, it would violate the "peace in the valley" to which the junior Senator from Alabama [Mr. SPARKMAN] has referred, abrogating agreements reached between the Tennessee Valley Authority and the utilities in the area by establishing, with Government subsidy, a beachhead of the private power trust in the Tennessee Valley. I say that this example has triggered an explosion of distrust, doubt, and suspicion which requires meticulous examination of the other vast power proposed to be conferred by the bill.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. GORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

During the delivery of Mr. GORE'S speech,

Mr. GOLDWATER. Mr. President, on July 17, in discussing this controversial subject, the junior Senator from Oregon [Mr. MORSE], during the course of his remarks, made the statement:

> There is no public power yardstick in the pending bill. In fact, sometimes I wonder what kind of stick is in this bill.

He was referring to the yardstick which we hear discussed so much in the course of this debate. He further stated that he was an admirer of Bobby Jones as a golfer, but he said also:

> I am not blind to the fact, however, that he is also a director of one of the great power companies, the Southern Co., and I also know that it is a major member of the Dixon-Yates combine.

The Senator from Oregon went on to say that he wondered "if what we are doing is substituting the golf stick for the public power yardstick."

Mr. President, being a devotee of golf myself, I had occasion yesterday to measure a golf stick, a putter. It is 36 inches long. It is a true yardstick. It contains all the inches that are prescribed by the Bureau of Standards. However, the power yardstick we have been hearing about is a phony yardstick. It is only 18 inches long. I am sure that any golfer in the country would like to use a TVA yardstick, because his drives would measure twice as long.

I do not know what the junior Senator from Oregon was driving at in that particular statement. I think it might be one of three things. However, I seriously doubt, in fact, I refuse to believe, that he would impugn the character of one of the greatest sportsmen of this era, Bobby Jones, by inferring that possibly Bobby Jones' association with the President might have resulted in the situation of this contract.

I likewise refuse to believe that the Senator from Oregon would impugn the character of the President of the United States by suggesting that the President would take advantage of the friendship of such a great sportsman as Bobby Jones.

Third—and this is the one that I should like to think the Senator from Oregon was driving at—is the fact that the President plays golf.

That is not unusual. We have had Presidents in our time who have hunted, we have had Presidents who have been yachtsmen, and we have had Presidents who have played some poker. We have likewise had some Senators who have engaged in some extracurricular activities when they have had the time for them.

Some of us play golf, some like boating or yachting, some enjoy hunting, and some enjoy raising show horses or black angus cattle.

If the remarks of the junior Senator from Oregon were directed to the fact that the President plays golf for recreation, he is echoing a criticism of the CIO, and I would just like to suggest that those who live in glass houses should not cast stones. Very few Senators and very few Representatives—and certainly it is true of the occupant of the White House—find it possible to complete their daily chores in 8 hours. We do not get overtime pay for working 12 hours or 18 hours, and sometimes 24 hours a day. We get the stipend that is outlined by law, but no overtime. The members of the CIO collect overtime after 8 hours of work. They play golf, too. I am glad they do, because millions of Americans play golf and enjoy it.

If that is what the junior Senator from Oregon was directing his remarks at, he was in error, because the President certainly is entitled to some spare time to spend with his family and in pursuit of the recreation he enjoys.

Mr. President, I am not surprised that the suggestion of a phony yardstick should come from the members of the New Deal. In the past 20 years they have given us a phony peace; they have given us a phony dollar, which is worth a little more than 50 cents; they have given us a phony farm plan that does not work, and they have certainly given us a lot of phony characters around the city of Washington. Now they want to substitute a phony 18-inch yardstick for the real thing, and are trying to show that its use has resulted in lower power costs to the people of America. That is not true.

Mr. President, I ask unanimous consent to have included, as a part of my remarks, a statement which I have prepared showing, among other things, a bigger reduction in the cost of electricity before the development of TVA and Bonneville.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR GOLDWATER

Back in 1892 when the electric-power industry was in its infancy, the average selling price was 22 cents per kilowatt-hour. By 1912 this average price had been reduced to 9.1 cents per kilowatt-hour, a reduction of 60 percent in this 20-year period.

In 1912 the average rate per kilowatt-hour for 100 kilowatt-hours per month was 8 cents. In 1932 the average rate for 100 kilowatt-hours per month was 4.6 cents per kilowatt-hour, a reduction of 42½ percent. In 1952 the average rate was 3.7 cents for 100 kilowatt-hours per month, or a reduction in the 20-year period of 19.6 percent. For 250 kilowatt-hours per month the average rate in 1912 was 7.8 cents per kilowatt-hour and in 1932 it was 3.8 cents per kilowatt-hour, a reduction of 51.3 percent. In 1952 the average rate was 2.8 cents per kilowatt-hour, a reduction of 26.3 percent.

In 1953 the average domestic customer in the United States used 2,350 kilowatt-hours, so his average requirements would lie between the 100 kilowatt-hours per month and the 250 kilowatt-hours per month. In other words, for the 20-year period prior to the advent of TVA and the great public power expansion, the decrease in rates for those using 100 kilowatt-hours per month was 42½ percent, and the following 20-year period, in which public power has shown its greatest growth, the decrease was 19.6 percent. For the domestic customer using 250 kilowatt-hours per month, in the 20-year period prior to the public power expansion, the decrease in rate was 51.3 percent as against 26.3 percent for the 20-year period in which public power showed most rapid expansion.

In 1932 the Federal tax against the utility companies amounted to 3 percent of their gross revenue. In 1952 the Federal tax amounted to 14 percent of the gross revenue. In other words, in this latter 20-year period the taxes against the privately financed electric industry have increased 11 cents out of each gross dollar of revenue, or 367 percent, a tax which governmentally owned and operated electric utilities avoid.

In addition to this, labor, fuel, and a good many other costs have approximately doubled in the last few years. And still the electric companies continue to reduce their rates for electric service.

The expansion of governmentally owned electric facilities has not been responsible for the reduction in rates. Technological development, which has been accomplished entirely by free enterprise, has resulted in the rate reductions. On this the governmentally developed electric systems have taken a free ride. At a matter of fact, Government activity in the electric power field has no doubt held up the average rate for electricity over the country rather than contributing to the reduction. There is no doubt but that Federal developments in this

field have materially increased taxes and the electric industry is one of the heaviest taxed of all industries. A Federal development, and other segments of Government in the electric power industry, dodge taxes on initial development and operating revenues, and shift the tax burden to taxpaying free enterprise operations.

When it is considered that every $1 increase in taxes requires more than $2 of additional revenue, it can readily be seen that the tremendous increase in Federal taxes has had a material influence on the rates that must be charged by private enterprise undertakings. The privately financed utility companies could have done a better job than they have done in reducing rates if they had not had to face the tremendous tax increase which the public power boys succeed in dodging.

The technological advancement has resulted in reducing generation, transmission, and distribution costs and has provided new devices, inventions, etc., which have materially increased the use of power which in turn contributes to the reduction in rates. As an example, when Edison first started his plant, it took approximately 10 pounds of coal to produce 1 kilowatt-hour. Modern plants today use about three-fourths of a pound. In the beginning power could only be transmitted from 2 to 3 miles, which required construction of numerous small generating plants. Today it can be transmitted at high voltage for hundreds of miles. This permits the construction of great central station plants. The tremendous number of new devices which have been developed permit the increase in use of electric power. The refrigerators, the ranges, television, radios, air conditioners, and any number of devices used around the home have contributed to the increase in use. No one could have used very much electricity just for lighting, even in a large residence. The research and manufacture of these items and improvements in generation and transmission have been accomplished by the manufacturers and by the private electric industry. They are the ones who have contributed, not the Government, and therefore they are the ones who have been responsible for the tremendous increase in the use of electricity and for the reduction in rates.

One reason that governmentally operated facilities may distribute power at a lesser cost is because they dodge taxes, and because they have available cheaper interest—and at times no interest, such as TVA—on money required to develop the facilities.

I keep hearing the public power advocates refer to utility companies as monopolies. They are not monopolies, as those making such references well know. They cannot restrain trade and they cannot raise or lower prices at will. They are natural single suppliers. The only true monopolies are the unregulated Government power operations, of which TVA is the largest. Since these public power advocates know that the privately financed utility is highly regulated and therefore not a monopoly, the only reason I can see for them referring to private industry as a monopoly is because of public prejudice against monopolies, and by making such references they hope to prejudice the public against the privately financed operations.

Mr. GOLDWATER. Mr. President, I ask unanimous consent to have printed in the RECORD at this point a table entitled "Residential Electricity and Cost of Living," published in the Statistical Bulletin for 1952, published by the Edison Electric Institute.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 47.—*Cost trends of electric light and power construction* [1] *by geographic divisions*

[1] As determined by the Federal Power Commission in its electric rate surveys since 1936 and according to the study of W. G. Vincent, vice president and executive engineer, Pacific Gas & Electric Co. for earlier years. (See EEI Bulletin, June 1936, p. 224.)

The Federal Power Commission's figures cover rate schedules as of Dec. 31 in all cities with populations of 50,000 or more. Mr. Vincent's figures represent the weighted (by population) average bills for domestic electric service in the 51 cities represented in the U. S. Bureau of Labor Statistics cost of living data.

[2] "Index numbers" are percentages of the average of the 5 years 1935 to 1939, inclusive. A new series has been prepared by the U. S. Bureau of Labor Statistics based on the average of the 3 years 1947 to 1949, inclusive. For a description of the components and characteristics of this index, see the February 1953, Monthly Labor Review of the Bureau of Labor Statistics. The "Consumers' Price Index for Moderate-Income Families" is sometimes called the "cost of living index."

[3] The Consumers' Price Index measures the changes in prices of a standard budget of commonly purchased goods and services. Electricity is one of these components. Thus, the index does not reflect the overall effect of the increased use of electricity by residential customers—for which see "Average revenue for all residential kilowatt-hours used," col. 2 of this table; also, see tables 32, 33, and 48 of this bulletin.

Mr. GORE. Mr. President, I ask unanimous consent that the speech of the Senator from Arizona be printed at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

SERIOUS ISSUES INVOLVED IN COLORADO RIVER STORAGE PROJECT

During the delivery of Mr. GORE's speech,

Mr. KUCHEL. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield to the Senator from California for a question.

Mr. KUCHEL. I wonder whether the Senator will yield with the understanding that he will not lose the floor, so that I may make a very short statement, with the understanding that my comments will appear at the conclusion of his speech.

Mr. GORE. In order to accommodate the junior Senator from California, I ask unanimous consent that I may yield to him for the purpose of his making a brief statement, without prejudicing the right of the junior Senator from Tennessee to the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. KUCHEL. Mr. President, on Saturday, last, my friend the senior Senator from Utah [Mr. WATKINS], made some comments directed to the measures introduced in the House and the Senate, providing for the development of the upper Colorado River Basin.

Mr. President, some 2 weeks ago a series of hearings was concluded in a Subcommittee of the Senate Committee on Interior and Insular Affairs, on S. 1555 authorizing the Colorado River storage project and participating projects. As a member of the committee, but not as a member of the subcommittee conducting the hearing, I attended the subcommittee sessions and participated in the various discussions.

I may say that the bill which contemplates the development of that area by the construction of various reservoirs—running in number, I believe, from 13 to a considerably higher potential group, still would need to run the gamut of the full Senate committee, before any such measure would come to the Senate and before the Senate could act upon it. So I make the point that it is impossible for me, or indeed, any Senator to state accurately and exactly what the Colorado River storage project bill actually is until final action on it by the full Senate Committee on Interior and Insular Affairs.

However, in discussing the proposed legislation, which my friend, the senior Senator from Utah [Mr. WATKINS], supports generally, he has suggested that the Sierra Club in California is guilty of sending out "vicious" propaganda against any type of development in that area by the Federal Government.

I wish very respectfully to say that the Senator is mistaken. I deny that that is the true situation; and I wish affirmatively to state, Mr. President, that in my judgment those in my State and elsewhere who are raising serious questions and objections with respect to the Upper Colorado River Basin bill in all its ramifications deserve to have their questions and their recommendations given careful study.

The Sierra Club is located in San Francisco. It is an honorable and unselfish organization. Its position with respect to this entire controversy is reflected, in part, in the remarks of the senior Senator from Utah [Mr. WATKINS], as they appear in the CONGRESSIONAL RECORD for Saturday, July 17, 1954:

> From time to time our national park system has been threatened with schemes for dams and other inappropriate developments within the boundaries of areas dedicated for the enjoyment of all Americans. Today the Bureau of Reclamation has plans, big plans, to drown Dinosaur National Monument with two dams that would inundate its mighty canyons for a hundred miles.
>
> This plan is the most serious and determined effort we have ever seen by a Government agency to appropriate unnecessarily a unit of the national parks system to make it a part of a huge irrigation, power, and flood-control project.

Here are serious charges which deserve the serious attention of the Congress and, indeed, of the country. They deserve more, Mr. President, than being discussed as vicious. They are either correct or incorrect, but for the purposes of these remarks of mine today, I urge only that they were made in good faith. They need to be answered in the same fashion.

Mr. President, on Wednesday, July 7, there was published in the San Francisco Chronicle an editorial which voices some objections along the same lines as those of the Sierra Club. I ask unani-

mous consent that the editorial from that estimable newspaper be printed at this point in the RECORD as a part of my remarks.

The PRESIDING OFFICER (Mr. GOLDWATER in the chair). Is there objection?

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE CASE AGAINST ECHO PARK DAM

It is the conviction of this newspaper's David Perlman, based on a firsthand study of the terrain as well as the points at issue, that Dinosaur National Monument ought to be preserved in its present scenic splendor.

He reports that it represents "a magnificent and irreplaceable heritage of the earth's primeval splendor," and pleads against its destruction or alteration in any way. Thus, he agrees with the Sierra Club and with numerous other conservationist groups that are vigorously opposing the Interior Department's proposal to put a $175 million dam on the Echo Park site—where the resulting reservoir would drown many of the natural wonders of this unique area.

It has been argued with considerable force that the purpose of the Echo Park Dam could be better and more cheaply served by dams and powerplants erected elsewhere in the upper Colorado Basin. Spokesmen for the Interior Department have waved aside all such arguments as unsound, but their offhand blanket rejections appear to need examination.

They have asserted, for instance, that alternate dam sites would entail losses of water by evaporation "sufficient to supply a city the size of Denver." Then, by degrees, they receded from this estimate—from 200,000 acre-feet, to 100,000, to 75,000 to 25,000.

Such findings serve to confirm us in the belief we expressed some months ago in opposing the project: It needs careful, thorough reexamination.

Our concern is not only that the Interior Department, in its headlong rush to build a dam at Echo Park, may be perpetrating a colossal blunder in which national wealth and natural beauty may alike be squandered.

There is also the fear that the Echo Park Dam may set a dangerous precedent, pointing the way for storage reservoirs and hydroelectric plants in such hitherto untouchable national beauty spots as Yosemite or Glacier or Grand Canyon National Parks.

The reclamation bill that embraces the Echo Park project is currently under consideration by both Houses of the Congress. Public opposition to the project, to be effective, must make itself known to Members of the Congress at once.

Mr. KUCHEL. Mr. President, it so happens that some time ago the State of Arizona, whose able junior Senator is presently presiding over the Senate, filed a lawsuit against the State of California. The basic issues raised in Arizona against California relate to water and the rights to water as between those two great commonwealths. On Saturday, when my friend, the senior Senator from Utah [Mr. WATKINS] was discussing this matter, he said, in part:

The California defendants in the case of Arizona against California, now before the Supreme Court, have moved to join as necessary and indispensable parties the States of Colorado, New Mexico, Utah, and Wyoming. This is a suit brought against California interests by Arizona, in 1952, and concerns the use of Colorado River water in the lower basin.

And, further, my friend, the able senior Senator from Utah, said:

I may say that the filing of the motion with the Supreme Court on July 15 of this year is an indication on the part of the State of California, which is the principal defendant in that case, that it will do all it can to defeat the project to put to beneficial consumptive use of the waters of the upper Colorado River. If it had been planned deliberately, it could not have come at a more timely occasion to help defeat the project authorization by the present Congress. If the State of California is not opposed to the project and is not seeking to defeat it, it could have waited at least until Congress adjourned before filing its motion with the Supreme Court to include these particular upper-basin States.

Mr. President, it is true that the Attorney General of California on July 15 made a motion in the United States Supreme Court to have included as parties defendant the States of the upper Colorado River Basin. It is also true, as you, Mr. President, will recall, that after Arizona filed the action against California, the United States Government intervened and made its position known in the lawsuit. The sovereign commonwealth of Nevada then asked and received permission to become a party to the controversy. Now the State of California has, Mr. President, requested, by appropriate motion, that the upper Colorado Basin States likewise be made parties to the action.

It is also true, Mr. President, that representatives of the State government and of political subdivisions of California are fearful and genuinely apprehensive of much that is involved in the proposed legislation. They have raised questions of the utmost seriousness respecting California's rights to water of the Colorado River. They have a right in this country of ours to raise those questions. Indeed, Mr. President, they have a duty to raise them.

Mr. President, is it my view, here on the floor of the Senate, to urge that that position of the government of California is in entire good faith. I want this RECORD to indicate clearly the reasons which prompted the State of California to ask the Supreme Court to bring in as parties defendant these additional States. Therefore, I now ask unanimous consent to have included at this point in the RECORD, as part of my remarks, portions of the motion on the part of California to join, as parties defendant, the States of Colorado, New Mexico, Utah, and Wyoming; and to include the portion of the same motion entitled "Exhibit A—Summary of the Controversy," which applies directly to the motion made by the State of California.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

IN THE SUPREME COURT OF THE UNITED STATES—OCTOBER TERM, 1953

State of Arizona, complainant, *v.* State of California, Palo Verde Irrigation District, Imperial Irrigation District, Coachella Valley County Water District, Metropolitan Water District of Southern California, City of Los Angeles, Calif., City of San Diego, Calif., and County of San Diego, Calif., defendants; United States of America, intervener; State of Nevada, intervener.

MOTION TO JOIN, AS PARTIES, THE STATES OF COLORADO, NEW MEXICO, UTAH AND WYOMING

To the Honorable, the Chief Justice, and the Associate Justices of the Supreme Court of the United States:

Defendants State of California, Palo Verde Irrigation District, Imperial District, Coachella Valley County Water District, the Metropolitan Water District of Southern California, the city of Los Angeles, the city of San Diego and county of San Diego, by their duly authorized attorneys, respectfully move this court to order the joinder of the States of Colorado, New Mexico, Utah, and Wyoming as additional parties to this action, and that, in furtherance of said order, a summons be issued to said States through their respective governors and attorneys general, directing them to appear as parties to this action at a time to be fixed in said summons, and that the court direct that all pleadings filed herein be served on said officials.

This motion is made upon the grounds that each of said States is a necessary and indispensable party to this action, for the following reasons:

I

The four absent States of Colorado, New Mexico, Utah, and Wyoming are parties to the Colorado River compact. Nevada sought leave to intervene in this case as a party to the compact, and her motion was granted. The meaning and effect of the Colorado River compact are in controversy in the present case. No decree determining the meaning and effect of that compact, considered as a contract, can be fully effective in the absence of the other four parties to it. The principal issues of interpretation of the Colorado River compact affecting the four absent States are stated in defendants' exhibit A, summary of the controversy, appended hereto and incorporated by reference as a part of this allegation as though here fully set out.

II

Two of the absent States, New Mexico and Utah, have a dual interest with respect to the rights and obligations of parties to the Colorado River compact, being States of the upper division (a status which they share with Colorado and Wyoming), as well as States which are in part within the lower basin (in common with Arizona, California, and Nevada). Nevada sought leave to intervene not only as a party to the compact but as an indispensable party to this action in her capacity as a lower basin State, and her motion was granted. The absent States of New Mexico and Utah, similarly to Nevada, are indispensable parties to the full resolution of the controversy among the States of the lower basin. As States lying in part within the lower basin, Utah and New Mexico participate in undetermined amounts in the right to beneficial consumptive use of a common fund of water available for use in the lower basin under the Colorado River compact. No decree determining the rights of the present parties to this proceeding can be fully effective without the presence, as parties, of the other States having the right to participate in the use of said common fund of water.

III

The four absent States, in like manner as Nevada and Arizona, are named as third party beneficiaries of the statutory compact between the United States and California evidenced by the Boulder Canyon Project Act and the California Limitation Act. The meaning and effect of that statutory compact are in controversy in the present cause. No decree determining the rights and obligations of the United States and California as principals, and of Nevada and Arizona as 2 of the third-party beneficiaries of said statutory compact, can be fully

effective in the absence of the other 4 beneficiaries. The principal issues of interpretation of that statutory compact which affect the four absent States are stated in defendants' exhibit A, Summary of the Controversy, appended hereto and incorporated by reference as a part of this allegation as though here fully set out.

IV

The United States asserts claims "as against the parties to this cause," which are independent of, and adverse to, rights derived from or controlled by the Colorado River compact. These claims of the United States affect all States in the Colorado River Basin, not merely the States of Arizona, California, and Nevada. The absent States of Colorado, New Mexico, Utah, and Wyoming are necessary and indispensable to the determination of these claims of the United States and of the effect thereof upon each of the seven States. The principal issues which arise from the claims of the United States and require the presence of all seven States are stated in exhibit A, Summary of the Controversy, appended hereto and incorporated by reference as a part hereof as though here fully set out.

V

This motion is based upon the records, files, and pleadings herein.

EXHIBIT A

SUMMARY OF THE CONTROVERSY

I. THE QUANTITIES OF WATER IN CONTROVERSY

The United States seeks to quiet title to rights to the use of water, consumptive and otherwise, "as against the parties to this cause," for Federal purposes, in unstated amounts.

Arizona seeks to quiet title to the beneficial consumptive use of 3,800,000 acre-feet per annum of the waters of the Colorado River System (measured by "man-made depletion of the virgin flow of the main stream") and to enjoin California's right to permanently use any water in excess of approximately 3,800,000 acre-feet per annum (measured by diversions less returns to the river), that being the effect of (1) reducing 4,400,000 acre-feet of III (a) water by reservoir losses, and (2) denying California any permanent right to use excess or surplus waters.

California asserts a right to the beneficial consumptive use in California of 5,362,000 acre-feet per annum of the waters of the Colorado River system (measured by diversions less returns to the river) under contracts with the United States, comprising 4,400,000 acre-feet of the waters apportioned by article III (a) of the Colorado River compact and 962,000 acre-feet per annum of the excess or surplus waters unapportioned by the compact, including in such excess or surplus the increase of use permitted to the Lower Basin by article III (b) of the compact.

Nevada seeks to quiet title to 539,100 acre-feet per annum (measured in part by both methods) of the beneficial consumptive uses apportioned by article III (a) of the Colorado River compact, and to not less than a total of 900,000 acre-feet from all classes of water.

As the States differ in their definition of beneficial consumptive use, their claims require restatement in terms of a common denominator in order to evaluate their effects. Thus:

The quantity to which Arizona seeks to quiet title, 3,800,000 acre-feet per annum, measured by the method she urges, "depletion of the virgin flow of the main stream occasioned by the activities of man," is equivalent to more than 5,000,000 acre-feet measured by consumption at the site of use, or "diversions less returns to the river," the standard established by the Boulder Canyon Project Act and asserted by California. The difference is due primarily to the fact that under Arizona's interpretation, the compact deals with the virgin flow in the main stream only and that the use of water salvaged by man is not charged as a beneficial consumptive use, whereas under California's interpretation the Compact deals with the waters of the entire river system and such salvage is so charged.

Conversely, the aggregate of the California contracts, 5,362,000 acre-feet per annum, measured by diversions less returns to the river, is equivalent to only about 4,500,000 acre-feet measured by man-made depletion (without charge for salvage water). If Arizona's prayer should be granted, California's rights would be reduced to about 3,800,000 acre-feet per annum, measured by "diversions less returns to the river," or to about 3,000,000 acre-feet measured in terms of "depletion of the virgin flow of the main stream."

The impact of Nevada's claims on those of the other States is not readily evaluated.

II. ULTIMATE ISSUES

The ultimate issues, in the sense of the results sought by each party, may be grouped as follows:

The United States

Does the United States have rights, "as against the parties to this cause, to the use of water in the Colorado River and its tributaries" in the following categories?

1. For consumptive use of all projects in the lower basin, which it asserts independently of any rights claimed by the States in which such projects are located;

2. To fulfill its obligations arising from international treaties and conventions; but this involves, with respect to the burden of the Mexican Water Treaty, the obligations as between the States of the upper division and the States of the lower division under articles III (c) and III (d) of the Colorado River Compact, and involves also the effect of the so-called escape clause of article 10 of that treaty, which allows reduction in the guaranteed deliveries to Mexico, in the event of extraordinary drought, in the same proportion as consumptive uses in the United States are reduced, "consumptive uses" being defined in article 1 of the treaty;

3. To fulfill all its contracts for the delivery of water and electric power, 1 .e., with or in Arizona, California, and Nevada; but it alleges that the water available is not sufficient to satisfy all these obligations;

4. To fulfill the Government's obligations to Indians and Indian tribes; but this involves not only the questions of the magnitude and priorities of these claims but the questions of whether or not they are chargeable under the Colorado River Compact to the basin and State in which such uses are made, what the obligation of the upper division States may be to release water for use by Indians in the lower basin, and what rights the United States may have to withhold water in reservoirs in the upper basin for use by Indians in both basins;

5. To protect its interests in fish and wildlife, flood control and navigation; but such rights as it may have for these purposes may require the impounding and release of water from reservoirs in both basins, and not merely reservoirs bordering or within Arizona and California, and again involves the question of accounting under the compact; and

6. For use of the National Park Service, Bureau of Land Management, and Forest Service; but if the United States has claims "as against the parties to this cause" for these functions, such claims apply to all the waters of the Colorado River System in both basins.

The adjudication of these claims of the United States requires consideration and resolution of: Questions of fact, referred to later; the power of the United States to impound and dispose of water independently of rights derived from the States; the extent of its obligations under treaties and contracts; the impact and effect of its treaties upon rights of domestic water users; how its claims to the use of water shall be measured; the location, magnitude and priorities of Indian claims, and claims for other alleged Federal purposes; the extent to which its rights and obligations are controlled by the Colorado River Compact; and the extent to which its claims may be exercised in futuro in derogation of intervening rights and uses.

Arizona

Is Arizona entitled to a decree:

(1) Quieting title to 2,800,000 acre-feet per annum of the beneficial consumptive uses apportioned to the lower basin by article III (a) of the Colorado River Compact, substantially all to be taken from the main stream, and measured in terms of manmade depletion of the virgin flow of the main stream?

(2) Quieting title to all of the 1 million acre-feet per annum by which the lower basin is permitted to "increase its use" by article III (b) of the Colorado River Compact (notwithstanding the decision of this Court in *Arizona* v. *California et al.*, 292 U. S. 341 (1934)), to the exclusion of the other States of the lower basin, all to be taken from the waters flowing in the Gila River, and to be measured in terms of manmade depletion of the virgin flow of the main stream?

(3) Reducing California's right to the uses apportioned by article III (a) of the Colorado River Compact to approximately 3,800,000 acre-feet per annum, in consequence of reservoir losses?

(4) Enjoining California's right to receive and permanently use under its Government contracts 962,000 acre-feet per annum, or any part thereof, in excess of 4,400,000 acre-feet ber annum?

The determination of Arizona's claims involves: The questions of fact, later referred to; the standing of Arizona to seek a declaratory decree quieting title to a "block" of water for projects not yet constructed or authorized (about 1,600,000 acre-feet per annum of the 2,800,000 claimed from the main stream); the source of title to Arizona's claims to 2,800,000 acre-feet of III (a) water and 1 million acre-feet of III (b) water; the status of the uses on the Gila; the measurement of uses thereof and of the main stream; whether Arizona's status is that of a party to the Colorado River Compact or that of a third party beneficiary of the statutory compact between the United States and California, and if so, whether Arizona is bound by the interpretations placed thereon by the principal parties thereto in its formulation and administration; and the validity and effect of Arizona's water delivery contract with the United States.

Most of the questions posed by Arizona's claims revolve around the issue of whether the Gila River shall be treated as a part of the Colorado River system for all purposes, or shall receive special treatment in respect of (1) the identification of uses thereon with the waters referred to in artice III (b); (2) the corollary exemption of "rights which may now exist" on the Gila from any charge under article III (a); and (3) the devaluation of the charge for beneficial consumptive uses from the quantity which is in fact consumed on the Gila (alleged by California to be about 2 million acre-feet per annum) to the lesser quantity represented by the resulting depletion in the virgin flow of the main stream (alleged by Arizona to be about 1 million acre-feet per annum).

California

Are the contracts between the United States and the defendant public agencies of California for the storage and delivery of water valid and enforceable? Inasmuch as these contracts are, in terms, for permanent

service, but subject to the Colorado River compact, the Boulder Canyon Project Act and the California Limitation Act, the issue is whether these enactments, considered together as a statutory compact established by reciprocal legislation, authorize and permit the Secretary of the Interior to presently contract for the storage and delivery for permanent beneficial consumptive use in California of 4,400,000 acre-feet per annum of the waters apportioned by article III (a) of the Colorado River compact plus one-half of the excess or surplus waters unapportioned by the compact, including in such excess or surplus the "increase of use" permitted to the lower basin by article III (b) of the compact. The aggregate of these contracted quantities, subject to physical availability of the amounts of excess or surplus waters, which vary from year to year, is 5,362,000 acre-feet per annum.

The determination of California's claims involves the questions of fact, later referred to; the extent to which rights have vested in both the United States and California under the statutory compact; whether Arizona is estopped by her previous conduct from asserting her present position; whether the limitation is net of reservoir losses; how California's uses shall be measured; whether California is chargeable with the use of salvaged water; the effect of California's appropriations, in their relation to the expressions "rights which may now exist" and "present perfected rights" in the compact and Project Act; the definition of the Project Act term "excess or surplus waters unapportioned by" the Colorado River compact; the availability of such waters for permanent service; the intent of Congress with respect to the waters referred to in article III (b); and the relation between California's contracts and the later agreements which the Secretary of the Interior has entered into with others.

Nevada

Is Nevada entitled to a decree:

1. Quieting title to 539,100 acre-feet per annum of the beneficial consumptive uses apportioned to the lower basin by article III (a) of the Colorado River compact?

2. Reserving for a future agreement the disposition of the use of the 1 million acre-feet referred to in article III (b) of the Colorado River compact, and preserving to Nevada an equitable share thereof?

3. Assuring Nevada the ultimate beneficial consumptive use of not less than 900,000 acre-feet per annum, from all classes of water?

The determination of Nevada's claims requires the consideration and resolution of the questions of fact later referred to; the questions of interpretation previously mentioned; the question of whether Nevada's share of III (a) waters has been determined or limited to 300,000 acre-feet per annum; whether, as to stored waters, Nevada may claim any quantity in excess of her contracts with the United States; and the source of title to her claims to 539,100 acre-feet per annum of III (a) water and not less than 900,000 acre-feet per annum from all sources.

Interests of other States

There remains the question whether the the claims of the United States, Arizona, California, and Nevada can be effectively determined without concurrently determining the rights and obligations of Utah and New Mexico with respect to the waters of the lower basin, and the rights and obligations of those States and Colorado and Wyoming with respect to other waters of the Colorado River system, to the extent that they are affected by the issues in controversy here.

In more detail, these ultimate issues depend upon the resolution of the following questions of fact and of the interpretation of the Colorado River compact, the Boulder Canyon Project Act, the statutory compact between the United States and California, and the Mexican Water Treaty.

III. FACTUAL ISSUES

There are substantial issues of fact, raised by the pleadings to date. These include, but are not limited to, determination of:

1. The investments and obligations undertaken by the parties in the construction of works and in the performance of their contracts with the United States, and the investments and obligations undertaken by the United States in reliance upon such contracts;

2. The location, magnitude, and priorities of the water rights necessary to enable the United States to perform its obligations to Indians and Indian tribes pursuant to article VII of the compact;

3. The requirements of the United States for (a) flood control, (b) navigation, (c) fish and wildlife, and (d) the other claims which it makes;

4. The quantities of water physically available for beneficial consumptive use in the lower basin, assuming full use by the upper basin of its compact apportionment, full regulation of the supply available to the lower basin, and full performance of the Mexican Water Treaty;

5. The uses, present and potential, on the main stream and on each tributary, determined as of the place of use, as California contends is the proper method, and the effect of those uses in terms of man-made depletion of the virgin flow of the main steam, as Arizona contends is the proper method;

6. The quantities of water salvaged by the activities of man, on the main stream and on the tributaries;

7. Reservoir losses, present and potential, gross and net;

8. Appropriative rights, priorities, and uses thereunder, on the main stream and tributaries;

9. The extent and place of use of "rights which may now exist" and which under article III (a) of the compact, are to be charged as uses of water apportioned by article III (a), and of "rights which may now exist" in California, within the meaning of section 4 (a) of the project act; and

10. The extent and place of use of "present perfected rights" protected by article VIII of the compact and directed by the Boulder Canyon Project Act to be satisfied in the operation and management of the project.

IV. THE ISSUES OF INTERPRETATION OF THE COLORADO RIVER COMPACT, THE BOULDER CANYON PROJECT ACT, THE STATUTORY COMPACT, AND THE MEXICAN WATER TREATY

Questions relating primarily to article III (a) of the Colorado River compact include the following: Whether the Colorado River compact deals only with the main stream or treats with Colorado River system waters wherever they may be found; whether the uses apportioned by article III (a) to the lower basin are to be taken only from "water present in the main stream and flowing at Lee Ferry," as Arizona contends, or from the tributaries as well, as California and Nevada contend; whether the 7,500,000 acre-feet referred to in article III (a) is related to the 75 million acre-feet referred to in article III (d), as Arizona contends, or whether the latter figure includes excess or surplus waters unapportioned by the compact, as California contends; by what process Arizona claims to have acquired an apportionment of 2,800,000 acre-feet of III (a) water, to be taken from the main stream; whether the apportionment of 7,500,000 acre-feet per annum is a statement of a maximum, or of an average, and, if the latter, over what period of years; the definition and measurement of "beneficial consumptive use"; the accounting for water added to and withdrawn from storage on the main stream and tributaries; whether the use of water salvaged by man on the main stream and tributaries is to be charged under the compact; the definition of "rights which may now exist," which are to be included in charges to water apportioned by article III (a) and their magnitude on the main stream and tributaries; the date to which this last expression refers; whether, in the absence of a compact among the lower basin States, the division of water among them is to be affected by appropriative rights, i. e., rights which may now exist; whether Indian rights, and other Federal claims to consumptive use, are included within that expression and are to be charged under the compact; whether reservoir losses are chargeable as beneficial consumptive uses, and if so, their classification under the compact and their relation to other uses.

Questions relating primarily to article III (b) of the Colorado River compact include the following: The questions relating to the definition of "beneficial consumptive use" and "per annum" previously stated in connection with article III (a); whether the "increase of use" permitted to the lower basin by article III (b) is an apportionment in perpetuity as in article III (a), as Arizona contends, or a license to acquire rights by appropriation and contracts under the Project Act in excess or surplus waters unapportioned by the compact, as California contends; whether this right to increased use is identified solely with the water found flowing in the Gila River, as Arizona contends, or is identified with the first 1 million acre-feet of increased use (above 7,500,000) per annum throughout the lower basin, as California and Nevada contend; whether this right is available to all five States of the lower basin, or to Arizona alone, as she contends (notwithstanding the decision of this Court in *Arizona* v. *California et al.* (292 U. S. 341 (1934))); the status of uses in New Mexico on the Gila; the status of uses on other tributaries; and to what degree reservoir losses are chargeable to this increase of use. Reference to the relation of the Mexican Treaty burden to the uses under article III (b) appears below in connection with article III (c).

Questions relating primarily to article III (c) of the Colorado River compact include the following: Whether the waters to be supplied Mexico are "apportioned" thereby (this bears upon the determination of the meaning of the expression "excess or surplus waters unapportioned by" the Colorado River compact, appearing in the Boulder Canyon Project Act, infra); whether, if the quantities in excess of those specified in articles III (a) and III (b) are insufficient to supply the deliveries to Mexico, the burden, with respect to the lower basin, falls first upon the uses referred to in article III (b), as California contends, or upon those referred to in article III (a), as Arizona contends; and the relation of the escape clause in article 10 of the treaty, which permits reduction in deliveries to Mexico in case of extraordinary drought in proportion to the reduction in consumptive uses in the United States. The relation of article III (c) to articles III (d) and III (a), with respect to the obligations of the upper division States, is referred to below in connection with article III (d).

Questions relating primarily to article III (d) of the Colorado River compact include the following: As a corollary to one of the questions stated with reference to article III (a), whether the 75 million acre-feet referred to in article III (d) is related to the 7,500,000 acre-feet apportioned by article III (a) to the lower basin, or whether the 75 million acre-feet include excess or surplus waters available for delivery to Mexico or use in the lower basin; the resulting effect on the obligation of the States of the upper division stated in article III (c) to furnish additional water to meet the deficiency if surplus above the quantities specified in

articles III (a) and III (b) is insufficient to supply Mexico; and whether the lower basin is entitled to demand release of this 75 million acre-feet notwithstanding the consequent inability of the upper basin to make beneficial consumptive use of 7,500,000 acre-feet per annum.

Questions relating primarily to article III (e) of the Colorado River compact include the following: Whether, if excess or surplus waters are appropriated (or contracted for) in the lower basin, their release from storage in the upper basin may be required; whether, if Indian uses are not subject to the Colorado River compact, the United States may require release of water from reservoirs in the upper basin to satisfy them, in addition to the water which the States of the upper division are required to release in performance of articles III (c) and III (d) of the compact; so also with respect to the other Federal claims asserted by the United States "as against the parties to this cause," for use of water in the lower basin.

Questions relating primarily to articles III (f) and III (g) of the Colorado River compact include the following: Whether the provisions in these articles with reference to a compact to be made after October 1, 1963, are permissive or mandatory; whether, in the light of the statutory compact, these provisions preclude the acquisition of rights in excess or surplus waters by appropriation and by contract with the United States in the interim, subject only to further apportionment as between basins by such a future compact; and whether, in the event of competing interstate claims to such excess or surplus waters, in the absence of a compact apportioning them, priority of appropriation, including contracts with the United States, controls.

Questions relating to article VII of the Colorado River compact include the following: Whether uses by Indians are subject to the Colorado River compact; whether Indian uses are chargeable under the compact to the basin and the State in which they are situate; if not, whether they are prior and superior to the apportionments made by the compact, or are in competition with appropriations of others which are subject to the compact; the location, magnitude, and asserted priority of Indian claims; their effect upon the quantities available to non-Indian users under articles III (a), III (b), etc., their effect on the distribution of the Mexican Treaty burden; and their effect on the obligations of the States of the upper division under articles III (c) and III (d).

Questions relating primarily to article VIII of the Colorado River compact include the following: The date to which the expression "present perfected rights" relates, i. e., 1922, 1929, or some other date; the definition of said terms; whether such definition is to be determined under the law of the State under which the right arose; whether the assurance against impairment extends to quality as well as quantity; the extent of these rights in each State; their relation to the expression "rights which may now exist," as used in article III (a) of the compact and section 4 (a) of the Project Act; and the impact of reservoir losses when present "perfected rights" attach to, and are satisfied from stored waters, pursuant to the direction in article VIII.

Questions relating primarily to the Boulder Canyon Project Act and the resulting statutory compact between the United States and California include the following: Whether the alternative consent given in the Project Act to a 7-State or 6-State compact became final on June 25, 1929, in establishing the latter; whether Arizona could, or did, effectively ratify a 7-State compact thereafter; if so, whether the statutory compact authorized by the Project Act as a corollary to a 6-State compact remains in effect; if it does, whether Arizona can claim the benefits of both; whether the statutory compact authorized contracts to be made with the California defendants for the permanent service (in addition to 4,400,000 acre-feet of III (a) waters) of one-half of the excess or surplus waters unapportioned by the compact for use in California; whether it included therein the waters referred to in article III (b), or precluded California from use of such waters; whether the "excess or surplus," of which California may use one-half, is to be reckoned before or after deduction of the quantity required to be delivered to Mexico; the effect on California's right to "excess or surplus" of a future compact apportioning such waters; whether the limitation "for use in California" is net of reservoir losses, or is subject to further reduction in consequence of such losses; whether the definition of consumptive uses applicable to California is applicable to Arizona, and vice versa; whether California is free to make use of salvaged waters without charge under the compact or the Limitation Act; the effect of California's appropriations; the meaning and effect of the reference to "rights which may now exist" in section 4 (a) of the Project Act; the extent of California's "present perfected rights" as referred to in section 6 of the Project Act; whether by the Project Act, or otherwise, the shares of Nevada or Arizona in the waters of the Colorado River system have been determined; and the construction and effect of the water delivery contracts held by those States.

Mr. KUCHEL. Mr. President, some who appeared at the hearings before the subcommittee endeavored to indicate their apprehension as to to the economic feasibility of the project. Because I want Senators to have in mind the argument which has been made by some witnesses who appeared before the committee. I ask unanimous consent to have printed at this point in the RECORD, also as a part of my remarks, a news story entitled "Colorado River Project Subsidy Dangers Told," which was published in the Los Angeles Times of July 15, 1954, being this is in great part, a reference to a statement by Mr. Samuel B. Morris, general manager and chief engineer of the Los Angeles Department of Water and Power.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COLORADO RIVER PROJECT SUBSIDY DANGERS TOLD

Federal handouts amounting to $7,520 an acre for farmlands in the upper Colorado River storage project have been pointed out to the Senate committee holding hearings on the controversial reclamation plan, it was announced here yesterday by the Colorado River Association.

The new figure on the magnitude of concealed subsidies involved in the project bill was included in a statement presented to the Senate Interior and Insular Affairs Committee by Samuel B. Morris, general manager and chief engineer of the Los Angeles Department of Water and Power, the association said.

Morris is one of the southern California public utility authorities who are opposing the bill because it presents a serious threat to the Colorado River water and power supplies of this area.

"Taxpayers of the United States will have to pay $782,393,000 for interest charges alone on just one of the so-called participating projects included in Senate bill 1555," Morris' report showed. He referred specifically to the proposed Shiprock irrigation project, in New Mexico, as a glaring example of the sin of concealed subsidies.

The United States Reclamation Bureau plans to spend $178,825,000 of Federal funds to build an irrigation system to serve the project area which contains only 104,000 acres. By putting off until the year 2020 the start of any substantial repayments of the construction cost, the compound interest charges at 2½ percent over the long period of years add up to the $782,393,000 figures cited, Morris said.

Morris said the process of filling proposed reservoirs in the upper portions of the Colorado River with 37 million acre-feet of water would take possibly 15 years. In that time the power output at Hoover Dam and other downstream plants might be reduced to 60 percent of normal. This would have a direct effect on power supplies for southern California and would also be reflected in impaired financial operations of Hoover Dam, now the outstanding example of a soundly financed Federal powerplant, Morris added.

Another objection, Morris said, is the refusal to take into account the probable effect of atomic energy on future power costs. Under the terms of the bill, power rates at Glen Canyon powerplant are set artificially high and its earnings are counted on to subsidize irrigation.

"This planned continuance of high power charges for 80 years in spite of the probable reduction in cost of power through atomic energy or other inventions seems indefensible because there may be no market for power at those rates," Morris said.

Mr. KUCHEL. I make no prepared argument today against any specific piece of legislation on this subject; none is before us. I make this statement merely by way of respectful reply to the comments on Saturday of my colleague from Utah.

Mr. President, I have conceived my responsibilities, during the time I have been a Member of the Senate, to be both to the people of the United States and to the people of the State of California.

It seems to me I have a right to say, speaking for the people of California, that that which is theirs by law or by agreement ought to remain theirs under the law or the agreement and it is my duty to see that their rights are respected. By the same token, speaking as a Member of the United States Senate, I want every State in the American Union to receive that to which it is justly entitled; and I wish to participate, along with my fellow Senators, in building up the economy and the resources of the United States, and in approving—in those instances where they can be found to be feasible and fair and in the public interest—projects which the Government of the United States can approve, and in the building of which it can participate. That is the basis upon which I ask Senators to listen to the arguments pro and con with respect to the legislation upon which my friend from Utah [Mr. WATKINS] commented Saturday, and upon which I wish briefly to comment today.

I wish to make no argument on this occasion against the legislation to which my friend from Utah has previously adverted, but I do wish to keep the record straight. It was not upon the basis of any "vicious" desire to defeat any legislation in the present session of the Congress that the State of California asked the Supreme Court, by way of a motion, to bring in other parties to a law-

suit. I hope that in any future discussions we may have on the floor or in committee regarding this particular legislation, those of us from all the States which are involved in this controversy may be given credit among ourselves and by other Members of the Senate for acting in good faith, not alone in the best interests of our respective States, but also in the best interests of our country.

Mr. President, I appreciate the courtesy of the Senator from Tennessee in yielding to me, and I now yield back the floor.

NATIONAL ADVISORY COMMITTEE ON EDUCATION — CONFERENCE REPORT

Mr. COOPER. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7434) to establish a National Advisory Committee on Education. I ask unanimous consent to the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of today.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. GORE. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. GORE. I take it that the Senator has not discussed this matter with the minority leader.

Mr. COOPER. I have been informed by the distinguished senior Senator from Alabama [Mr. HILL], who was one of the conferees, that he consulted with the minority leader and that it is perfectly in order to consider the conference report at this time.

Mr. HILL. As the Senator from Kentucky has stated, I was one of the members of the conference committee which agreed on the report the Senator from Kentucky is asking the Senate to consider at this time. The Senator from Montana [Mr. MURRAY] was the other minority member of the conferees appointed on the part of the Senate. We both signed the report. We also advised distinguished minority leader, the Senator from Texas [Mr. JOHNSON] of the report. He has no objection to them. Certainly we have no objection to them.

Mr. COOPER. I thank the Senator from Alabama.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

WHITE HOUSE CONFERENCE ON EDUCATION — CONFERENCE REPORT

Mr. COOPER. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7601) to provide for a White House Conference on Education. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of today.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. HILL. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. HILL. I believe the Senator from Kentucky will agree that the Senate conferees came out pretty well on these conference reports. I wonder whether the Senator would make a very brief statement relating to what was done in conference and how well the Senate conferees fared.

Mr. COOPER. On the conference report now before the Senate, the purpose of which is to provide for a White House Conference on Education, the conference agreed upon an authorization of a million dollars for that purpose. Previously the House had refused to make such an authorization. I believe the authorization adds a great deal to the bill.

Mr. HILL. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. HILL. It was the Senate that added the authorization. Is that correct?

Mr. COOPER. That is correct.

Mr. HILL. It was thought by the Senate that for the Conference to be successful it would be necessary to make such an authorization. Is that correct?

Mr. COOPER. We thought so. Without it, we thought the Conference would not be held, and that the bill would have very little meaning. Now we believe that the States will hold conferences and that they will present their findings to the White House in a national conference.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

COOPERATIVE RESEARCH IN EDUCATION—CONFERENCE REPORT

Mr. COOPER. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 9040) to authorize cooperative research in education. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of today.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. HILL. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. HILL. Will the Senator make a brief statement about this conference report, and indicate how well the conferees on the part of the Senate fared in connection with this conference report?

Mr. COOPER. Although I do not consider these three bills to be major bills, I should state that in each instance after the conference the result was a much better bill. The conference report now under consideration authorizes cooperative research in education. It would establish a group consisting of nine persons to advise with the Secretary of Health, Education, and Welfare on national programs affecting education. The conference report bill would authorize the Department of Health, Education, and Welfare to enter into agreements with various bodies for research on technical problems, which is something that has not been done thus far. I believe the three measures will enable the Department of Health, Education, and Welfare to establish a much broader program in the field of education. I cannot say what the immediate results will be, but at least it is the beginning of a program which should have results of consequence in this field.

Mr. SMITH of New Jersey. Mr. President, will the Senator yield for a brief remark from me, as chairman of the Committee on Labor and Public Welfare?

Mr. COOPER. I yield.

Mr. SMITH of New Jersey. As chairman of the Committee on Labor and Public Welfare, I wish to express my appreciation for the work of the entire committee in connection with these bills, particularly the work done by the subcommittee under the chairmanship of the distinguished Senator from Kentucky [Mr. COOPER].

We went into the studies very carefully, and they were worked on with the Department of Health, Education, and Welfare. All the bills were recommended unanimously by our committee. Then when they were passed by the Senate and went to conference with the House, the conferees quickly arrived at an agreement on these bills. So I express my compliments to the chairman of the committee and my appreciation of the fact that the bills are being passed this year.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

CONSTRUCTION OF NAVAL VESSELS—CONFERENCE REPORT

Mr. SALTONSTALL. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8571) to authorize the construction of naval vessels, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The Chief Clerk read the report.

(For conference report, see House proceedings of today.)

The PRESIDING OFFICER (Mr. BARRETT in the chair). Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. SALTONSTALL. Mr. President, Members of the Senate may recall that H. R. 8571 authorized the construction of approximately 14,000 tons of naval vessels in the mine warfare and patrol categories. It also increased the appropriation authorization provided for in the basic Naval Construction Act of 1950 from $350 million to $500 million.

The Senate amended the bill by reducing the appropriation increase from $500 million to $450 million. The House agreed to Senate changes.

The Senate also amended the bill by inserting the following language:

To the extent that any ships authorized under this act are constructed in private shipyards, such contracts shall be awarded to the lowest competitive bidder insofar as national security requirements will permit and such award is practical.

The House conferees strongly held to the position that such language, by implication, set aside or amended the Armed Forces Procurement Act of 1947 and the so-called Vinson-Trammell Act.

The Senate conferees felt that it was quite clearly not the intent of the Senate language to amend or set aside existing law, and for that reason added to the Senate amendment language which specified that contracts authorized under the act should not be inconsistent with either the Armed Services Procurement Act of 1947 or the Vinson-Trammell Act.

In effect, therefore, the Senate language remains as it was with the following phrase added at the end of the sentence: "and is not inconsistent with the provisions of the Armed Services Procurement Act of 1947 or the Act of March 27, 1934 (ch. 95, 48 Stat. 503), as amended."

With that amendment added, the House accepted the Senate language, and the conference report was unanimously adopted.

Mr. HILL. Mr. President, will the Senator yield?

Mr. SALTONSTALL. I yield.

Mr. HILL. What is the effect of the admendment dealing with the Procurement Act?

Mr. SALTONSTALL. The Senator from Delaware [Mr. WILLIAMS] offered and there was agreed to an amendment providing for the acceptance of the lowest competitive bid, which we agreed to take to conference and insist upon if it was practical. The amendment which the conferees agreed upon provides that bidding shall be consistent with the Vinson-Trammell Act, which, as we know, is the Naval Procurement Act.

Mr. HILL. Does that mean there does not have to be competitive bidding?

Mr. SALTONSTALL. There is competitive bidding, but the Vinson-Trammell Act allows 16 exceptions to the provision for letting the contract to the lowest competitive bidder, after certain decisions are made that a straight competitive bid would be impracticable.

Mr. HILL. When the Senator states that 16 exceptions are made, does he mean there are 16 different phases of a contract?

Mr. SALTONSTALL. No; there are 16 different situations, any one of which might arise to make it difficult to have straight competive bidding. The original law was the act of 1935, which was prepared with a great deal of care by Representative Vinson, who was at that time Chairman of the Committee on Naval Affairs of the House.

Mr. HILL. Will the Senator advise us as to one of the 16 exceptions, merely as an illustration?

Mr. SALTONSTALL. The clearest example would be a contract involving the construction of a new type ship which had never been built before, or a new naval airplane of a type never built before.

Mr. HILL. The new ship might have certain features which had never been embodied in other ships, such as different engines, or new armament, or a difference in the construction of the deck. In other words, the construction might be in the nature of a somewhat new enterprise. Is that correct?

Mr. SALTONSTALL. That is correct.

Mr. HILL. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

AMENDMENT OF FEDERAL REGULATION OF LOBBYING ACT

Mr. KENNEDY. Mr. President, I ask unanimous consent to introduce for appropriate reference a bill to revise and strengthen the present Federal regulation of the Lobbying Act.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

The bill (S. 3775) to amend the Federal Regulation of Lobbying Act, introduced by Mr. KENNEDY, was received, read twice by its title, and referred to the Committee on the Judiciary.

Mr. KENNEDY. Mr. President, on June 7, 1954, the United States Supreme Court in a split decision upheld the constitutionality of the present Lobbying Act. But it did so only with some difficulty, requiring a majority opinion which narrowly interpreted or "rewrote" many provisions of the act, and a minority opinion which strongly criticized the language or constitutionality of other provisions. Upon the announcement of this decision, as they had done many times previously, the Nation's press and other expert observers insisted that the present Regulation of Lobbying Act be drastically revised. It is, of course, impossible to give this problem the attention it deserves in the closing hectic days of Congress; but I am introducing this bill at this time in the hope that it will receive thorough analysis and criticism from experts and all concerned before the 84th Congress convenes.

The bill which I have introduced today represents the work of many committee, governmental, and private specialists over a period of time prior to the Court decision, and in addition has attempted to meet the objections raised by the opinion of the Supreme Court. Recommendations of the House Select Committee on Lobbying were also helpful.

This bill contains the following major improvements:

First. Enforcement: A copy of all registration and reporting documents would go to the Attorney General, who is charged with the responsibility for the enforcement of the act. The use of more precise terms, the expansion of such definitions as "legislative agent" and extension of the terms of the act to make certain that it is not evaded by those at whom it is aimed, will, I hope, facilitate its enforcement and thereby augment its significance on the national legislative scene.

Second. Constitutionality: Items of dubious constitutionality, including those which had to be stretched by the Supreme Court in order to prevent infringement of free speech, and those which the Supreme Court had to "rewrite," according to some, in order to make sufficiently clear to meet the standards of certainty, have been eliminated or rewritten under this bill. The coverage of "indirect" lobbying is omitted; the prohibition of any lobbying either after a conviction or prior to registration is omitted; radio and TV stations are added to newspapers and regularly published periodicals under the exemption clause; and other provisions seek to remove constitutional objections to the law and thus facilitate its administration.

Third. Contingent fees: This bill seeks for the first time to prohibit contingent fee lobbying contracts, whereby the compensation of lobbyists is dependent upon their "success" in securing the passage or defeat of particular measures. This practice, which is a serious reflection upon the legislative process and those who seek to influence it, is already outlawed under the lobby control laws of many States; and such a provision was recommended by the Buchanan committee and others.

Fourth. Draftsmanship: This bill attempts to meet criticisms of the language of the old law by rewriting it in what, in my opinion, is clear, more comprehensive, more consistent, better integrated, more practical and more up-to-date terminology. Those definitions which have been termed "loose" are made clearer and more concise, and other definitions have been added in order to clarify the intent of the law. Reporting or coverage requirements concerning the amount of contributions or expenditures under the act are set at levels which balance practicality with adequacy of coverage. The word "regulation" is removed from the title, to reemphasize the point that no stigma should be attached to those registering under the act. Internal conflicts and confusion have been eliminated.

I have introduced this bill at this time in the hope that before Congress meets again it will receive the careful consideration and constructive criticism of other Members of Congress and the public. Certainly if we are to be worthy of the

trust confided in us, we must make certain that we neither impair the right of petition nor permit abuses and undisclosed pressures to interfere with the legislative process.

I am glad that the Senator from Oklahoma is on the floor, because he played a major part in writing the provisions of this act into the Reorganization Act of 1946.

Mr. MONRONEY. I wish to compliment the junior Senator from Massachusetts for his diligence and effort to place the proposed act before the country for study. In writing the Reorganization Act we recognized the difficulty of defining lobbying activities and activities associated with lobbying, particularly when it is necessary to connect up efforts for hire, so to speak, to influence legislation in Congress with a penalty clause which would carry an enforcement provision under which a jail term could be imposed for failure to register or to file reports. Therefore, I am delighted to note the thoroughness and energy with which the junior Senator from Massachusetts has endeavored to meet and correct this need.

It will certainly be very helpful to have the bill before the country to permit ample discussion and to project hearings when the 84th session of Congress opens.

One of the defects of the Lobbying Act was due to the fact that it was made a part of the Reorganization Act, which embodied approximately 34 reforms of a somewhat major nature, and to have complete and exhaustive testimony on that one phase was not possible within the limited time which was available, and therefore Congress passed it largely in the hope that it would be refined.

The act has been on the books since 1946. Certainly in that period of time, and now with the decision of the Supreme Court as a guidepost as to what provisions might be incorporated in it to make such a law effective, the introduction of the bill by the junior Senator from Massachusetts will prove to be a very distinct advantage. Particularly is it necessary, in connection with big lobbying activities, not to prevent the activities themselves, but to identify the sources and pressures, and the sources of the amounts of money which are spent in influencing proposed legislation. The public should have the truth. We have a right to expect the truth to be forthcoming. In that way I believe we can have a successful identification and a placing of certain limits on excessive lobbying or excessive pressures on Congress.

Mr. KENNEDY. I am grateful to the Senator from Oklahoma particularly because he was a coauthor of the Reorganization Act. I am aware what a difficult problem Congress was confronted with in 1946. The 8 years of experience we have had with the act and the recent Supreme Court decision may well assert their influence on the Subcommittee on Reorganization of the Committee on Government Operations when it considers this entire problem.

As the Senator has suggested, the problem of coordinating lobbying regulations with a desire to preserve the right of citizens to petition Congress is a very difficult and delicate operation. I believe that the 8 years of experience we have had under that section of the Reorganization Act since 1946 should prove beneficial in considering it at the beginning of the next Congress.

ADDITIONAL REPORTS OF A COMMITTEE

The following additional reports of a committee were submitted:

By Mr. LANGER, from the Committee on the Judiciary, without amendment:

S. 1061. A bill for the relief of Norman F George (Rept. No. 1914);

S. 3305. A bill to authorize payment of certain war claims, including payment of certain claims arising out of the sequestration by the Imperial Japanese Government of credits of members of the military and naval forces of the United States and other United States nationals in the Philippines (Rept. No. 1915);

H. R. 1975. A bill to amend section 2201 of title 28, United States Code, to extend the Federal Declaratory Judgments Act to the Territory of Alaska (Rept. No. 1916);

H. R. 1976. A bill to amend title 28, United States Code, to permit the registration of judgments in or from the District Court for the Territory of Alaska (Rept. No. 1917);

H. R. 3557. A bill for the relief of Capt. Walter C. Wolf (Rept. No. 1918);

H. R. 3757. A bill for the relief of Dorothy Kilmer Nickerson (Rept. No. 1919);

H. R. 7140. A bill for the relief of Robert A. Duval (Rept. No. 1920); and

H. R. 7411. A bill for the relief of Mrs. Esterlee Hutzler Weinhoeppel (Rept. No. 1921).

By Mr. LANGER, from the Committee on the Judiciary, with an amendment:

S. 417. A bill conferring jurisdiction upon the United States District Court for the District of New Mexico to hear, determine, and render judgment upon certain claims arising as a result of the construction by the United States of Elephant Butte Dam on the Rio Grande (Rept. No. 1922);

S. 1737. A bill for the relief of certain former employees of the Inland Waterways Corporation (Rept. No. 1923);

S. 3166. A bill for the relief of the city of Sandpoint, Idaho (Rept. No. 1924);

S. 3214. A bill for the relief of Mrs. Marie Monchen (Rept. No. 1925);

S. 3293. A bill for the relief of Lt. P. B. Sampson (Rept. No. 1926);

H. R. 1370. A bill for the relief of Guy H. Davant (Rept. No. 1927);

H. R. 2032. A bill for the relief of Clarence D. Newland (Rept. No. 1928);

H. R. 3222. A bill for the relief of Martin Luther Johnson (Rept. No. 1929);

H. R. 4474. A bill for the relief of Frederick Joseph Buttaccio and others (Rept. No. 1930); and

H. R. 4638. A bill for the relief of David W. Wallace (Rept. No. 1931).

By Mr. LANGER, from the Committee on the Judiciary, with amendments:

S. 2496. A bill for the relief of Harvey Schwartz (Rept. No. 1932);

S. 3436. A bill for the relief of Laurie Dea Holley (Rept. No. 1913);

H. R. 1665. A bill for the relief of Carl Piowaty and W. J. Piowaty (Rept. No. 1933); and

H. R. 7413. A bill for the relief of Harold J. Davis (Rept. No. 1934).

By Mr. WILEY, from the Committee on the Judiciary, without amendment:

S. 2559. A bill to amend title 17, United States Code, entitled "Copyrights" (Rept. No. 1936);

H. R. 5420. A bill to amend section 161, title 35, United States Code, relating to the patenting of plants (Rept. No. 1937); and

H. R. 6280. A bill to extend temporarily the rights of priority of nationals of Japan and certain nationals of Germany with respect to applications for patents (Rept. No. 1938).

TOM HELLANDER CO., SUPERIOR, NEBR.—REFERENCE OF SENATE BILL 1613 TO COURT OF CLAIMS—ADDITIONAL REPORT OF A COMMITTEE

Mr. LANGER. Mr. President, from the Committee on the Judiciary, I report an original resolution to refer the bill (S. 1613) for the relief of Tom Hellander Co., Superior Nebr., to the Court of Claims, and I submit a report (No. 1935) thereon.

The PRESIDING OFFICER. The report will be received, and the resolution will be placed on the calendar.

The resolution (S. Res. 286) was placed on the calendar, as follows:

Resolved, That the bill (S. 1613) entitled "A bill for the relief of the Tom Hellander Co., Superior, Nebr.", now pending in the Senate, together with all accompanying papers, is hereby referred to the United States Court of Claims pursuant to sections 1492 and 2509 of title 28, United States Code; and said court shall proceed expeditiously with the same, in accordance with the provisions of said sections, and report to the Senate, at the earliest practicable date, giving such findings of fact and conclusions thereon as shall be sufficient to inform the Congress of the nature and character of the demand, as a claim legal or equitable, against the United States, and the amount, if any, legally or equitably due from the United States to the claimant.

REVISION OF THE ATOMIC ENERGY ACT OF 1946

The Senate resumed the consideration of the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

Mr. SPARKMAN. Mr. President, a few days ago I had the privilege of speaking briefly on the bill, but when the majority leader was ready to recess the Senate I stated that I had not been able to cover all the subjects I wanted to cover. There are in the bill many things which require very careful consideration by the Senate. I think it is unfortunate that early in the consideration of the bill the misconception gained some headway that the only subject concerned in the bill was the Dixon-Yates contract. There are many other subjects. There is the patent section, the one with respect to licenses, the one relating to international agreements, the question of monopoly, and other questions. All of them ought to be explored. I hope before consideration of the bill is concluded they will be explored.

Mr. President, I have said in the discussion so far, and I know the able Senator from Tennessee has said many times in the course of his discussion, that whereas the TVA was involved, it was not involved in the primary question. In fact, in setting forth the different matters of concern, the Senator from Tennessee listed TVA as the third consideration.

I believe all of us who have been discussing the bill have been in agreement

that the first consideration is the manner in which an independent agency of the Government of the United States has been dealt with by being ordered directly by the President of the United States to enter into a contract which a majority of the Commissioners of that independent agency did not want to enter into. They expressed themselves as not wanting to enter into the purchase of power which was not to be used by the Atomic Energy Commission and not to be used as is provided in the law in connection with the construction or operation of the installations of the Atomic Energy Commission at either of the three places designated.

I wish to emphasize the importance of that attitude. The question of the TVA has been brought in. Of course, TVA is involved because it is made more or less the innocent bystander in the matter.

The order of the President directed that power be bought from a company, not yet incorporated, not yet organized, but one that it is anticipated will be organized. After it is organized, it is to build a powerplant, and AEC would buy power from that powerplant and TVA would distribute that power, not to the TVA, not to the Atomic Energy Commission, but to the people of Tennessee.

Even the Ferguson amendment, which is the pending question, provides that the power contract may be entered into for the purpose of buying power to replace power supplied by the TVA to the Atomic Energy Commission. However, there is something in the Dixon-Yates contract to which I wish to call attention; that is, it does not replace 1 single kilowatt of power supplied by the TVA to the Atomic Energy Commission.

Three Commissioners—a majority of the Commission—two of them in a letter to the Director of the Budget and the third in testimony before the joint committee, stated that the contract did not change the status, and that the power to be generated was not to be used in connection with the operation of the Atomic Energy Commission, although the only authority given by law is for the use of such power in connection with the AEC. All three Commissioners stated that it would not be used in connection with the operations of the Atomic Energy Commission, and they said that the President was directing the Commission to go far afield of its functions and to do things that Congress never intended it should do.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. SPARKMAN. I will yield only for a question.

Mr. MONRONEY. Could the Senator advise the Senate as to who located the plant in West Memphis? What I am concerned about is whether there was open bidding and whether it was a well-advertised negotiated bid, whether those who were to supply this power from private sources were under any limitation as to where the plant would be built, what the terms of the proposed deal were, whether there was any kind of competitive bidding, and whether the Government had the right to determine in these negotiations where the plant was to be located. Did the Atomic Energy Commission, as the prime mover in this contract, have anything to say as to where the plant was to be located?

Mr. SPARKMAN. I am glad the Senator from Oklahoma asked me that question. In my opinion, not only was there no open bidding or competition, but there was not even any open information. The first notice, so far as I know, that Congress had that anything such as this was pending was when the President delivered his message to Congress—I believe it was his budget message—in which he said that in dealing with the problems of TVA it was hoped that some plan could be devised whereby TVA would be relieved of supplying—I think his message said—some half million kilowatts of power to the Atomic Energy Commission.

When that statement was made in the budget message, I remember a newspaperman asked me what I thought about it. I said, "Naturally it sounds good to hear the President talk about relieving the TVA of having to serve so much power to the Atomic Energy Commission, because if that is what they are actually to do it will give us relief. However," I said, "I would rather wait and see the plan that is submitted."

When the plan was submitted, it apparently not only was a surprise to a great many people, but it was a surprise apparently to the Atomic Energy Commission.

I call attention to the fact that two of the Commissioners addressed a letter to the Director of the Budget. They are Dr. Smyth and Mr. Zuckert. As I recall, the letter was written in April 1954. In that letter they made reference to a letter of December 24, 1953, which the Director of the Budget had written, in which he had requested the Atomic Energy Commission to explore the possibility of reducing existing commitments of the TVA to the Commission. They explored that possibility. It was on April 16, 1954, that the two Commissioners wrote to the Director of the Budget, and they made a very strong objection to the proposal. First of all, they stated, in substance, that they had not been able to find another plan which was better than the plan they had with TVA; therefore, it was their recommendation that they continue the arrangement they had with the TVA. In a later letter a new proposal was made, and that was that the Atomic Energy Commission contract for power. Apparently, that is the letter in which it was first proposed that the Commission enter into the contract with Dixon-Yates, the company to be, for power, because they make a very significant statement. I shall quote from the letter, and I should like the Senator from Oklahoma to listen to it, because it is a very significant statement. Let me first, read the sentence bearing out my former statement. They say they had made the exploration which was requested. I read:

> In the course of the exploration, it was determined to be unwise to disturb the arrangements on which our production schedules depend. Since that determination the explorations have taken a different course.

Listen to this:

> The present proposal would create a situation whereby the Atomic Energy Commission would be contracting for power not 1 kilowatt of which would be used in connection with the Commission's production activities.

It is significant, I think, that they use the phrase "in connection with," because that same phrase is used in the law which gives the Atomic Energy Commission the authority to buy power to be used in connection with the construction and operation of its installations in the three areas named. The Commissioners point out that not 1 kilowatt of this power would be so used. They might have gone further and pointed out that not 1 single kilowatt would have been taken under the commitments which the TVA had to supply power to the Atomic Energy Commission. Therefore, any statement to the effect that this carries out the President's promise in his budget message to reduce the amount of the commitment of the TVA to supply power to the Atomic Energy Commission simply does not comport with the facts, because the TVA's commitment to deliver power to the Atomic Energy Commission remains undiminished by a single kilowatt.

I desire to say a further word with reference to the power arrangements in the TVA area. I live in that area, and I wish to emphasize again that the TVA is not the primary consideration in this matter at all, but is brought in more or less as an innocent bystander. Many persons have referred from time to time to the expansion of power in the TVA. I believe very few persons understand that of all the power generated in the TVA some 55 percent, in another year or so, will be going to the Atomic Energy Commission, and a great part of the remainder will go to defense installations and defense-related installations.

At the beginning of World War II, practically all the aluminum manufactured in the United States was manufactured in the Tennessee Valley by the Aluminum Co. of America. It was not until shortly before our entry into World War II that we began to expand our aluminum production. If I remember correctly, in 1940 the production of aluminum in this country was 300 million pounds a year. The first company that went into the manufacture of aluminum, besides the Aluminum Co. of America, was the Reynolds Metals Co. That company expanded, and production went up to 600 million pounds, then 1.2 billion pounds, and then on beyond that. Aluminum is now manufactured in a good many sections of the country, but still a great part of the aluminum industry is centered in the Tennessee Valley.

Mr. ANDERSON. Mr. President, will the Senator from Alabama yield for a question?

Mr. SPARKMAN. I yield for a question.

Mr. ANDERSON. Many persons have expressed the thought that TVA may draw industry away from other areas. Did it draw industry away from any other area?

Mr. SPARKMAN. Not at all. As a matter of fact, Alcoa was already there. It was there before the TVA was ever established. It simply expanded as the demand for aluminum expanded.

The Reynolds Metals Co. went there because power was available at that particular time. That was before we entered into the war. Later on the industry expanded in the Pacific Northwest, and still later in Arkansas, and later in Texas, and in numerous other places where power was available. It expanded as the demand for aluminum became greater.

But, certainly, there is no other industry, or, certainly, there are few, if any, other industries more closely connected with the national defense and national security than is the aluminum industry. In addition to that is the tremendous engineering development in Tennessee. I do not know what prompted industries to locate there. The Government owned a great reservation where a military camp had been established, and industries require an enormous amount of power. There is located at my home town the guided missile research center of the Army, and there are other installations closely associated with the national security which use a great amount of that power.

So, Mr. President, when we speak of the great expansion of development, it has come about very largely because of the demands of our defense set-up for the additional supply of power.

When we speak of expansion on a geographic basis, I believe everyone should be aware of the fact that since the act of 1939 TVA has not expanded a single mile.

I remember the TVA legislation quite well. I was the sponsor of it. I was a Member of the House of Representatives at that time. I was on the Military Affairs Committee which had jurisdiction over all legislation pertaining to TVA, and I sponsored the measure.

The principal witness and proponent of the measure was Mr. Wendell Willkie, who was president of the Commonwealth & Southern Co., which owned the Tennessee Power Co., the Mississippi Power Co., and other companies. He argued for the proposed legislation, and it was passed very much as he asked for it, to allow the sale of TVA power to all the State of Tennessee except a small corner in the northeastern part, and to a certain section in northern Alabama. There were 12 counties, plus two cities near Birmingham, which had built their own transmission lines which could get TVA power. Those counties and the cities of Tarrant and Bessemer were named in the law. The same is true of certain counties in Mississippi.

We voted $5½ million worth of bonds with which to purchase the necessary properties.

From that time until this, the TVA has not expanded a single mile, nor have any of the private power companies serving in the area which it was decided by the act should be served by the TVA.

Only last year, in testifying before the Committee on Appropriations, a representative of the utilities in that area made a rather significant statement when referring to the agreement under the act of 1939. He said that since that date both sides have meticulously observed the agreement. That is true.

Our area grows. I do not know that it grows any faster than any other area in the United States. Every area in the United States develops. It is entitled to have normal development. As normal development occurs, naturally the power demand grows with it. Certainly we are entitled in our area to have a sufficient amount of power to meet the normal growth. The growth has been normal. It has not been as a result of the siphoning of any industry from other parts of the country. Even the President of the United States has been quoted as saying something to the effect that industry has been siphoned from New England into the Tennessee Valley area.

But the facts will show that not a single New England industry has moved into the TVA area since the establishment of the TVA about 20 years ago. The development simply has not worked out in that way. The development which has taken place has not been something unusual. It is a development which has occurred in every other area of the United States where power was available. Such development may be expected in the future in every section of the United States where those things which are necessary to promote industrial development may be found.

Mr. President, I wish to speak a little about some of the features of the Dixon-Yates contract. The able Senator from Oklahoma a while ago asked me if there was any open competition. I stated that not only was there no open competition, but that there was not even any open knowledge or information. As we go further and further into the question, I think we learn more and more that certainly will not stand the light of day.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield for a question only.

Mr. FULBRIGHT. I certainly hope the Senator will discuss the Dixon-Yates contract, because we are all very curious to hear about it. Nothing has been said about it so far.

Mr. SPARKMAN. If the Senator's statement is in the form of a question, I will say to the able Senator from Arkansas that I certainly think the Dixon-Yates contract ought to be discussed over and over, until the people of the country see it in the light of day and understand the great—I should like to use the word "fraud," but I will not say "fraud," but the terrible mistake which was about to be perpetrated upon the people of the Nation.

Mr. FULBRIGHT. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. I yield for a question.

Mr. FULBRIGHT. Which version is the Senator going to discuss? The TVA estimate, the AEC estimate——

Mr. SPARKMAN. I do not care.

Mr. FULBRIGHT. The Senator yielded for a question. I wanted to ask him a question. Which version does the Senator intend to discuss? The TVA version, the AEC version, or the facts as presented by Mr. Nichols in the committee hearing, which I presented the other day?

Mr. SPARKMAN. Is the Senator's question whether I accept the TVA version, the AEC version, or the Fulbright version?

Mr. FULBRIGHT. That is the question.

Mr. SPARKMAN. It does not matter to me which version we accept. Each is as bad as the other. As a matter of fact, I am willing to take the version of the Budget Bureau. I believe a figure was given by the Budget Bureau, certainly by the Atomic Energy Commission itself. The Atomic Energy Commission made an estimate.

I doubt seriously that anyone could question the version made by the Atomic Energy Commission. But even if we took the Fulbright version, which, in my opinion, leaves out of consideration many very important factors, I do not think the contract could stand when the light of day was turned upon it, so far as the interests of the American taxpayers are concerned.

Mr. FULBRIGHT. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. I yield.

Mr. FULBRIGHT. Does the Senator mean that the $282,000 is too big a price to pay for the contract, if that is the price?

Mr. SPARKMAN. I do not admit that that is the price, but I should say that even that, coupled with many of the other provisions, would be too big a price. For instance, the Senator from Arkansas has not even mentioned many of the other factors, such as the guaranty against loss, the guaranty of a net return on the earnings, exemption from taxation, and a cancellation indemnity, which may run, according to the very able and distinguished Senator from New Mexico, who certainly has given great study to the question—more than I have, and I imagine more than has the Senator from Arkansas—as high as $40 million. If I correctly recall, the Senator from New Mexico said that the indemnity on cancellation might run as high as $40 million.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. FULBRIGHT. In fact, the last statement, about the cancellation, is the only point the Senator from New Mexico made in which there is much or in which there is any truth. The other statement was quite in error. There is no guaranty of 90 percent.

Mr. SPARKMAN. I did not say 90 percent.

Mr. FULBRIGHT. Nine percent. There is no guaranty of 9 percent at all.

Mr. SPARKMAN. On the equity.

Mr. FULBRIGHT. Certainly not. It is only in ideal conditions that it would be 9 percent.

Mr. SPARKMAN. Oh, I realize there is an "if" in the provision that if the cost runs above the estimate. But if the cost comes out in accordance with the estimate which has been made, then there is a return of 9 percent on the equity investment. That is all I mean.

Mr. FULBRIGHT. If the Senator will yield further, that is very different from saying there is a guaranty in any event. The only "if" with respect to large dividends depends upon large earnings. If there are no earnings, there are no dividends. If there are earnings, there will be. That is different from a guaranty.

How the Senator can say, if there is a guaranty, that I intended to say if it was earned on this basis, it will be 9 percent, I cannot imagine. Those are two conflicting diametrically opposed concepts.

Mr. SPARKMAN. I certainly do not want the Senator from Arkansas to put words in my mouth. I did not say it in just that way. I said that if the cost comes out according to the estimate that has been made——

Mr. FULBRIGHT. Correct.

Mr. SPARKMAN. My understanding is that the cost as agreed to in the contract is——

Mr. FULBRIGHT. It is an estimate.

Mr. SPARKMAN. I cannot say it is agreed to by Dixon-Yates, because there is no Dixon-Yates, but by representatives of the company which hopes to be. My understanding is that that is the figure they would use in going before the Securities and Exchange Commission to be allowed to market the securities. If those estimates are correct, then they would be given a return of 9 percent on the equity.

Mr. FULBRIGHT. Did not the Senator say just prior to that that there was a guaranty of 9 percent?

Mr. SPARKMAN. I said that, and then I said that would be the return, provided the estimates which they have submitted are adhered to and are not exceeded.

Mr. FULBRIGHT. I have just one other point. I do not want to reiterate——

Mr. SPARKMAN. I yield for a question, please.

Mr. FULBRIGHT. I desire to ask a question, Mr. President.

Has not the Senator also misled the Senate with regard to the $40 million? That also is a maximum penalty in case the market for electricity in this area collapses, and nobody wants the power. Then the maximum would be $40 million, which no person really anticipates. That is the extreme case of complete collapse; is it not?

Mr. SPARKMAN. Yes.

Mr. FULBRIGHT. Is not that true?

Mr. SPARKMAN. Yes; I suppose it would be fair to say that it might run up to that figure.

Mr. FULBRIGHT. That is correct.

Mr. SPARKMAN. I was quoting the Senator from New Mexico.

Mr. FULBRIGHT. If the Senator will yield, I wanted to make that point, because the Senator from New Mexico previously made the flat statement——

Mr. SPARKMAN. I certainly did not intend to say that there would be $40 million. I said in the event of cancellation there might be indemnity of as much as $40 million.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. FULBRIGHT. The Senator is doing a great service in clarfying the misinformation left in the RECORD by the Senator from New Mexico on that point.

Mr. SPARKMAN. I am glad the Senator from Arkansas is in such a friendly, give-and-take frame of mind tonight and admits that the Dixon-Yates contract has at least one weakness, and that is the $40 million contingent——

Mr. FULBRIGHT. Oh, no.

Mr. SPARKMAN. Questions only. Questions only.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield for a question.

Mr. FULBRIGHT. The Senator does not really think I admitted that was a weakness, does he?

Mr. SPARKMAN. I thought that is what the Senator from Arkansas said a few moments ago.

Mr. FULBRIGHT. No; it is a fact.

Mr. SPARKMAN. It is a fact.

Mr. FULBRIGHT. It is not a weakness. I did not say it was a weakness.

Mr. SPARKMAN. I hope the Senator will read in the RECORD his remarks of a little while ago.

Mr. FULBRIGHT. If I said "weakness," I was mistaken. I certainly did not intend to say it was a weakness.

Mr. SPARKMAN. What the Senator said amounted to a statement on his part that that was the one point I had made that had substance to it.

Mr. FULBRIGHT. Oh, no; that had any accuracy or truth in it at all.

Mr. ANDERSON. Mr. President, will the Senator from Arkansas yield for a question?

Mr. FULBRIGHT. Yes.

Mr. SPARKMAN. Mr. President, I have the floor. I yield for a question only.

Mr. ANDERSON. Does the Senator realize that if we could produce the prepared copy and it indicated that there might be termination costs running as high as $40 million, it would not actually be too bad a misstatement, would it?

Mr. SPARKMAN. As a matter of fact, I must have been terribly in error a while ago, because I understood the Senator from Arkansas clearly to say that was one bad part of this contract, one criticism that had substance. That is certainly the way I understood the Senator's remarks.

Mr. ANDERSON. Mr. President, will the Senator from Alabama yield to me for a question?

Mr. SPARKMAN. Yes.

Mr. ANDERSON. If the Senator will direct his attention to page 949 of the hearings, he will read:

> The total maximum cost of cancellation to the Government, assuming the plant is idle—in other words, you don't use it at all—anybody—from the date of notice of cancellation is estimated at $40 million, plus fair and reasonable expenses payable to third parties.

Mr. SPARKMAN Yes; that appears at the bottom of page 949. I should like to suggest to the Senator from Arkansas that he read that part of the hearings. I had read that statement.

Mr. FULBRIGHT. Mr. President, will the Senator from Alabama yied for a question?

Mr. SPARKMAN. In a moment. I had heard the very able discussion by the Senator from New Mexico a couple of days ago. By the way, in that connection, I should like to say for the RECORD that many people seem to think this debate has been running a long time. Do my colleagues realize that this is only the fifth day of the debate? The debate on the Bricker amendment ran for 5 weeks, and during that time I never heard the charge of filibuster made. Yet this debate has been going on for less than 5 days, with many other matters disposed of during that time. For instance, today the Senate met at 10 o'clock a. m. Yet it was not until nearly 1:30 p. m. that any Senator had a chance to say a single word on the bill, which is of such tremendous importance to the United States.

Mr. FULBRIGHT. Will the Senator yield?

Mr. SPARKMAN. I yield for a question.

Mr. FULBRIGHT. I have two questions. The first question is on the last point the Senator made. Does not the Senator realize that whether or not a discussion is called a filibuster sometimes depends on how much reiteration there is in a discussion? The Senator has noticed that, has he not?

Mr. SPARKMAN. No; I do not think that is the gage of whether a debate is a filibuster at all. For instance, I have spoken for about an hour on the bill prior to this occasion. A couple of days ago I was speaking—I believe it was Friday evening—when the majority leader came to me and asked me if I would mind letting him make a motion to recess. I told him I would not mind, but I stated at that time that there were some other matters in the proposed legislation I wanted very badly to discuss. No; I think the question of whether debate is a filibuster depends very largely on whether individual Senators discuss the measure before them in the manner in which each one feels for himself it ought to be discussed. I happen to know that several Senators have prepared addresses they desire to make and have been waiting for several days to discuss the bill. No doubt one or two other Senators could have completed their statements today had it not been for the fact that from 10 o'clock to about 1:30, a period of almost 3½ hours, the time was taken up with extraneous matters.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. SPARKMAN. Yes, for a question.

Mr. FULBRIGHT. The Senator knows I am not criticizing the debate as a filibuster, does he not?

Mr. SPARKMAN. I know that. I was not directing my remarks to the Senator from Arkansas. Before the Senator from Arkansas came on the floor this evening—I suppose it was while he was at dinner—our very genial, able, and forceful majority leader made the suggestion that a filibuster was in progress.

I may say to the Senator from Arkansas that one reason why I was so guarded when he asked me to yield, and stated I would yield for a question only, was that the majority leader had suggested that if Senators did not observe the rules he might call them to order, and I wanted to be certain I am protected.

Mr. President, I may say, in that connection, that every time I yield I shall yield only for a question. I want to be protected in that. The Senator to whom I yield will be held to asking a question, so that I shall not have the floor taken away from me.

Mr. FULBRIGHT. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. I yield for a question.

Mr. FULBRIGHT. Does the Senator recognize any difference between a statement which alleges or states that the cancellation clause in the proposed contract provides for a maximum or no more than $40 million, under the most adverse conditions, and a statement that it provides for a $40 million payment in case of cancellation? Does the Senator see any difference in the two statements?

Mr. SPARKMAN. I do not know from what the Senator draws his contrast, because I do not know where the two statements were made. I said the proposal provided for as much as $40 million indemnity. That is the term I used; and it does.

Mr. FULBRIGHT. Does not the Senator know that the Senator from New Mexico stated in his original speech, and in his colloquy with me, that the contract provides for a $40 million payment in case of cancellation, and he referred to an analogous provision which he said was in a contract with the EEI at Paducah, which contract he said provided for a $40 million penalty payment in case of cancellation.

Mr. SPARKMAN. I am not going to pass judgment on the statement of the Senator from New Mexico.

Mr. FULBRIGHT. The Senator was here, was he not?

Mr. SPARKMAN. I was here when the Senator from New Mexico made his statement and I understood fully what he was saying. I am certain that if the Senator from Arkansas will check the RECORD, he will find that the Senator from New Mexico used the term "a maximum." Of course, we all know, when we speak of an indemnity being provided, that that does not mean the full amount. For instance, a man might carry $50,000 insurance on his automobile against bodily injury to someone else. We do not always take pains to say that is the maximum the insurance company will pay; we simply say he has $50,000 insurance. The company may not be called upon to pay all of that at all.

Mr. FULBRIGHT. The Senator from Alabama is trying to say that in that discussion he and the Senator from New Mexico were not very precise in the way they discussed the question.

Mr. SPARKMAN. I certainly do not intend to say that.

Mr. FULBRIGHT. Is that not what he did say?

Mr. SPARKMAN. I had no difficulty in understanding what the Senator from New Mexico was saying. I certainly feel that all 94 of the other Senators understood. If the Senator from Arkansas failed to understand, I am sorry. I would suggest that hereafter the Senator from New Mexico spell it out down to the last comma, dot, and crossing of the "t," so the Senator from Arkansas will be able to understand correctly.

Mr. FULBRIGHT. Do the Senator from New Mexico and the Senator from Alabama have some special language they use?

Mr. SPARKMAN. Not at all. Even though the Senator from Arkansas may not have understood the remarks when the Senator from New Mexico was speaking, I think if he went back to the RECORD, he would understand.

Mr. ANDERSON. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. I yield for a question.

Mr. ANDERSON. Does the Senator from Alabama recognize that under the proposal of Dixon-Yates, which is not formalized into a contract, for the first 3 years the total charge could be $8,775,000?

Mr. SPARKMAN. I am willing to accept those figures as accurate. I do not have the exact figures before me, but I have seen some statement to that effect, although I do not remember the exact amount at the present time.

Mr. ANDERSON. Does the Senator from Alabama have any reason to doubt that the termination provision, which was set forth as item 7, reads:

7. Termination:

(a) After commencement of full-scale operation, termination will be allowed on 3 years' notice, during which period assignment may be made to another governmental agency, at contract rates, including all taxes and other adjustments.

Does the Senator from Alabama recognize that that provision states it can be assigned only to another governmental agency?

Mr. SPARKMAN. Yes. In fact, I was about to discuss some of the provisions of the contract, when the Senator from Arkansas started quizzing me.

Mr. ANDERSON. Did not the Senator from Arkansas suggest that we should be specific?

Mr. SPARKMAN. Yes; very specific.

Mr. ANDERSON. Does not the Senator from Alabama think that, under the challenge of the able Senator from Arkansas, this would be a good time to be specific?

Mr. SPARKMAN. I think that now, when the Senator from Arkansas is sitting here, we should be quite specific.

Mr. ANDERSON. Then does the Senator from Alabama realize that if the cancellation notice is confined to 3 years, the maximum cost per annum will be $8,775,000; and does not the Senator from Alabama believe we should also include the figure for the cost in the fourth year, which would be $7,314,000? Does not the Senator from Alabama think that should be added to it?

Mr. SPARKMAN. Yes; it would have to be added to it.

Mr. ANDERSON. Under the termination provisions, does the Senator from Alabama recognize that clause (b) of the proposed contract says that "In any event" the seller will absorb capacity in the amount of at least 100,000 kilowatts in each year, "absorbing associated proportions of costs"? Does not the Senator from Alabama think that should be taken into consideration, and also that specific figures for that should be given?

Mr. SPARKMAN. I certainly do; and I have prepared a statement dealing with those very costs, and I had just started to give them when the Senator from Arkansas stated that he wanted additional information.

Mr. ANDERSON. Does the Senator from Alabama feel that, having calculated the cancellation cost for a period of 4 years, we should also state for the RECORD the maximum cancellation cost in the fifth year, when the annual charge would be $5,853,000? Does he believe that figure has been carefully calculated on the basis discussed by the Atomic Energy Commission; and does he further believe that, being a proper figure, it should be taken into consideration?

Mr. SPARKMAN. I certainly do. I think we must do so if we are to understand the contract and the contingencies.

Mr. ANDERSON. Mr. President, will the Senator from Alabama yield further?

Mr. SPARKMAN. I yield for a question only.

Mr. ANDERSON. Does the Senator from Alabama believe that then we should pass to the cost for the 6th year and, in the interest of being specific, we should note the amount, namely, $4,392,000 for that year?

Mr. SPARKMAN. If that is the figure that has been estimated for the Atomic Energy Commission, I think we certainly should state it.

Mr. ANDERSON. And does the Senator from Alabama think we should omit stating the figure for the following year, which is $2,931,000?

Mr. SPARKMAN. We cannot afford to leave out the figure for any year of the life of the contract.

Mr. ANDERSON. Then am I correct in assuming that we should also state the figure for the eighth year, which is $1,470,000?

Mr. SPARKMAN. By all means it should be stated.

Mr. ANDERSON. Then, as the Senator from Alabama figures these amounts, as I have stated them, do I correctly understand that the total comes to $48,285,000?

Mr. SPARKMAN. That is precisely correct.

Mr. ANDERSON. And, inasmuch as the Senator from Alabama agrees that I have figured correctly thus far, does the Senator from Alabama think we should state for the RECORD that, under provision 7 (d), we find that—

In event buyer relinquishes right to capacity after termination, base capacity charge (including adjustments) will be thereafter reduced $1,500,000; proportionally in case of partial reductions.

And does the Senator think we should also state that it could apply to 5 years; and does not the Senator from Alabama feel it would be only fair to deduct the $7,500,000, for 5 years, from the $48,285,000, so we would come out with a figure slightly in excess of $40,000,000?

Mr. SPARKMAN. Yes, and that would bring it down to the figure originally given by the Senator from New Mexico.

Mr. ANDERSON. Would not the Senator from Alabama think that would be definitely specific, for the purposes of the Senator from Arkansas?

Mr. SPARKMAN. It seems to me to be a perfectly accurate mathematical calculation.

Mr. ANDERSON. I thank the Senator from Alabama.

Mr. ERVIN. Mr. President, will the Senator from Alabama yield to me?

Mr. SPARKMAN. I am glad to yield to the distinguished Senator from North Carolina, formerly my colleague in the House of Representatives.

Mr. ERVIN. While we are talking about figures, let me inquire whether I correctly assume that the taxpayers of the United States have already advanced $1,800,000,000 to the TVA?

Mr. SPARKMAN. Let me say to the Senator from North Carolina that I will not vouch for the exact figure, but I assume that is approximately correct for the overall development of the TVA.

Of course, if the Senator from North Carolina wishes to go into a discussion of that, we might compare the cost of TVA with the cost of some of the reclamation projects. Furthermore, we might go into the fact that the TVA has been making a return of approximately $4,500,000 a year to the Treasury of the United States, on the part of the TVA that was put to power use.

Furthermore, under the TVA's own amortization rate, as set by Congress, in 40 years' time, the TVA will repay all the money invested in power.

Mr. ERVIN. I am interested only in the figures.

Mr. SPARKMAN. Yes.

Mr. ERVIN. As I understand, the TVA has repaid, out of the $1,800,000,000, the sum of approximately $111 million.

Mr. SPARKMAN. That may be correct; yes. It has been running at about 4½ percent a year, as I understand; and in 40 years' time the TVA will repay all the money that has been put in it for the purpose of developing power. That is true.

Mr. FULBRIGHT. Mr. President, will the Senator from Alabama yield at this point?

Mr. SPARKMAN. I yield.

Mr. FULBRIGHT. Will the TVA also repay all the money it milks out of the Atomic Energy Commission, through overcharges?

Mr. SPARKMAN. Mr. President, if there is any charge that has been made on this floor during the debate that is completely without foundation in fact, it is the charge or suggestion or insinuation that the TVA has overcharged the Atomic Energy Commission. The facts we have put into the RECORD, as submitted at the hearings, completely negate such an insinuation.

Furthermore, when this charge was first made, four of the Commissioners protested, and said they had investigated the situation ever since December 1953—I believe that was the date; and they had come up with the proposal—let me say to the Senator from Arkansas, for I am afraid he has not been here all the time, and he may have missed that information——

Mr. FULBRIGHT. Mr. President, while the Senator is looking for the figure, will he yield again to me?

Mr. SPARKMAN. I yield for a question, only.

Mr. FULBRIGHT. Has not Mr. Nichols, the General Manager of the Atomic Energy Commission, stated, according to the memorandum I placed in the RECORD, that according to his calculations the Atomic Energy Commission is being overcharged $3 million a year?

Mr. SPARKMAN. I do not know what Mr. Nichols may have stated——

Mr. ANDERSON. Mr. President, at this point will the Senator from Alabama yield to me?

Mr. SPARKMAN. I yield for a question.

Mr. ANDERSON. Does not the Senator from Alabama recall that the statement by Mr. Nichols, the General Manager of the Atomic Energy Commission, was that if the charge continued at the present rate, which is now based upon coal at about 18 cents, and if coal finally dropped to 15½ cents, and if TVA did not reduce its rates, it would then be overcharging at a certain rate—far in the future, but it was not a statement that TVA was currently overcharging at the rate of $3 million a year, was it?

Mr. SPARKMAN. I think the Senator from New Mexico is correct. However, I shall not discuss these details.

I do recall that in connection with one statement he made, the Senator from Arkansas placed in the RECORD two different tables, one showing a price for coal of 19 cents per million B. t. u.'s, and another showing a price of 15 or 15½ cents.

Mr. ANDERSON. It was 15½ cents; was it not?

Mr. SPARKMAN. Yes.

Of course, if the cost figures are shifted—if 19 cents is used as the basis for one table, and if 15½ cents is used as the basis for another table—different figures will be obtained. I have noted that discrepancy. Whether it was included in the statement of Mr. Nichols, I do not know.

But I do know that when a majority of the Atomic Energy Commission—an agency that Congress said should be an independent agency, but an agency which, as a result of the Presidential order, becomes simply a vehicle, according to its own statement, and an instrument by which to do something the President wants done, that has no connection whatsoever with the operations of the Commission, and the Commissioners said so—that when the Commission was asked to do that, a majority of the Commissioners said that was asking them to do something they had no business doing.

In answer to the insinuation made by the Senator from Arkansas, namely, that TVA was overcharging the Atomic Energy Commission for its power, I wish to say that two of the Commissioners, Dr. Smith and Mr. Zuckert, in their letter said that following the receipt of the letter of December 24, 1953, requesting the AEC to explore the possibility of reducing the existing commitments of TVA to the Commission, they made that exploration, but it was determined to be unwise to disturb the AEC's arrangements with TVA, upon which the Commission's production schedules depend. I am not willing to say that a majority of the Atomic Energy Commission would sit there, being overcharged by TVA, and decide, after the President had asked them to explore the possibility of getting power somewhere else, that, "We ought to continue to buy power from TVA under the arrangement we have." I do not believe those men are so indifferent to the oath of office they took as to allow the Atomic Energy Commission to be overcharged, and yet say, "We have decided that it would be unwise to change."

Mr. ANDERSON and Mr. FULBRIGHT addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Alabama yield; and if so, to whom?

Mr. SPARKMAN. I yield first to the Senator from New Mexico, and then I shall be glad to yield to the Senator from Arkansas.

Mr. ANDERSON. Does the Senator remember, in connections with the question of overcharge, that while he was in the Chamber I read into the RECORD the testimony from page 1036, where it was pointed out that for the first 3 months of this year TVA was charging at a rate such that the Atomic Energy Commission could say, "We bought this power at 4.86;" and does not the Senator recall that Mr. Nichols, who has just been quoted, testified that power was bought from the private companies at 5.08?

Mr. SPARKMAN. Yes; I remember that quite well.

Mr. ANDERSON. Does the Senator feel that if 4.86 is an overcharge, 5.08 is robbery?

Mr. SPARKMAN. Frankly, I do not think either one was an overcharge.

Mr. ANDERSON. Neither do I. Let me ask the Senator if he remembers that further on Mr. Nichols testified that when everything was running according to their contracts—not guesswork—the price would favor TVA by a margin of about 10 percent?

Mr. SPARKMAN. Yes.

Mr. ANDERSON. Does that sound like overcharging?

Mr. SPARKMAN. I cannot see how anybody could say that was overcharging. I believe, if I recall correctly, that the Senator from New Mexico stated that that was the statement of Mr. Nichols himself.

Mr. ANDERSON. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. I yield.

Mr. ANDERSON. Does not the Senator recognize that that page, page 1036 of the hearings, shows Mr. Nichols as giving the testimony? So it had to be testimony from Mr. Nichols himself.

Mr. SPARKMAN. Yes. Mr. Nichols testified that the power from TVA was cheaper.

There is one thing that many persons overlook. I will not say that this is really not a proper part of the discussion, because I think everything that bears upon the subject is a proper part. However, after all, it does not have any great bearing upon this particular contract, except that the Senator from Arkansas [Mr. FULBRIGHT] injected it into the debate; and since it has been injected, one thing that should be remembered is that when the Atomic Energy Commission asked the TVA for a certain amount of power at Paducah the TVA was not able immediately to furnish all that power. It must be understood that the Atomic Energy Commission has virtually the power of requisition. It is not actually that, but there is a responsibility on the TVA to give priority in supplying power to Federal agencies, as there ought to be. In fact, the act of Congress so specified. I think it ought to be that way. So the Atomic Energy Commission virtually has the right to requisition power from TVA, and when it notified TVA that it wanted a certain quantity of power at Paducah, the TVA was not able immediately to furnish all that power, even when coupled with the production of power at Joppa and Shawnee—the EEI group. What TVA had to do was to go out and buy power wherever it could get it. It bought power from the Arkansas Light & Power Co., probably from the private utility operating in Kentucky, and from other private utilities. It bought power in blocks, wherever it could get it, but that power was sold to the Atomic Energy Commission, or transmitted to the Atomic Energy Commission, at exactly the price which TVA had to pay for it.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. SPARKMAN. In a moment. Let me finish this thought.

With respect to the power which TVA is under a firm contract to supply to the Atomic Energy Commission, the TVA has supplied it at the price specified at all times. When it went out to buy power, it told the Atomic Energy Commission the arrangements under which it would have to be done. That is the reason why the price varies from quarter to quarter, because there is thrown into the stream the power which the TVA must buy on the fringes, at whatever price it has to pay for the power. If only the power which the TVA had contracted to sell were involved, the charge would be uniform, if I correctly understand.

I now yield to the Senator from Arkansas for a question.

Mr. FULBRIGHT. Does not the Senator know that for many years—I think since TVA began—it has bought power from outside the TVA?

Mr. SPARKMAN. Yes. There has been an interchange.

Mr. FULBRIGHT. Does not the Senator also know that the figures which I introduced into the RECORD the other day, which were taken from the Federal Power Commission records, show that the TVA charged approximately 70 percent more for the interim power it sold to the Atomic Energy Commission at Paducah than the average it paid for all the bought power from outside its system? The Senator does not challenge the accuracy of those figures, does he?

Mr. SPARKMAN. The figures stated by the Senator from Arkansas mean nothing. It is like trying to compare a dozen oranges with one hundred sheep. They do not compare.

Mr. FULBRIGHT. Does not the Senator——

Mr. SPARKMAN. Just a moment.

Mr. FULBRIGHT. I cannot follow the Senator unless he will yield for a question.

Mr. SPARKMAN. It depends upon the type of power that is obtained. Some of the power bought by the TVA is dumped power. Some of it is firm power. The Senator talks about the average paid for all that power. The TVA might buy from a private company a great block of dumped power which it would transmit to the Reynolds Metals Co., which could use it on a dumped-power basis. Certainly it is not fair to run that in as a part of the average price paid for all power, and compare it with the price of firm power, which it had to supply to the Atomic Energy Commission. The two cannot be compared in any such manner.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. SPARKMAN. That is the unfortunate——

Mr. FULBRIGHT. Will the Senator yield for a question?

Mr. SPARKMAN. I shall be glad to yield in just a moment.

That is the unfortunate part about the tables used by the Senator from Arkansas and placed in the RECORD by him. I am surprised that he was taken in by them, if he really was. I am surprised that he should put them into the RECORD expecting other Members of the Senate to be taken in by them. Anyone who knows anything about power, anyone who knows the difference between firm power and dumped power, and who knows the difference in power demands by various industries and various lines of activity, would know from looking at those tables that they represent no showing at all.

Mr. FULBRIGHT. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. I yield.

Mr. FULBRIGHT. Is the Senator trying to leave the impression—perhaps I am wrong—that there is a difference between a kilowatt which is produced in Kentucky and one which is produced in Alabama, or that one cannot compare a kilowatt from one source with a kilowatt from another, any more than he could compare an orange with an apple? Is that what the Senator is trying to say?

Mr. SPARKMAN. No.

Mr. FULBRIGHT. Do kilowatts differ in degree or character?

Mr. SPARKMAN. No.

Mr. FULBRIGHT. Do they differ in any respect?

Mr. SPARKMAN. Yes.

Mr. FULBRIGHT. Will the Senator describe the difference between a kilowatt manufactured in a Kentucky plant and one manufactured in a plant in Florida or Alabama?

Mr. SPARKMAN. There, again, the Senator is trying to impose limitations which do not exist. The great difference is between firm power and secondary power.

Mr. FULBRIGHT. I did not ask the Senator that.

Mr. SPARKMAN. The great difference is between firm power and secondary power, both with respect to the quantities in which they are bought and the quantities in which they are produced.

Mr. FULBRIGHT. I did not ask the Senator about firm power and secondary power.

Mr. SPARKMAN. I know the Senator did not. That is the reason I tried to get him back on the track.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield for a question.

Mr. ANDERSON. Does not the Senator from Alabama recognize that the TVA has made available to anyone who is curious for the truth the circumstances of delivery of power under its contract, which brought about the rates quoted by the Senator from Arkansas?

Mr. SPARKMAN. There has been some discussion about it. I am not sure whether the entire statement has been placed in the RECORD or not.

Mr. ANDERSON. I do not think it has. Would the Senator from Alabama believe me if I said that included in those figures are the figures for power from the old Wilson Dam, which was forced back into operation because of the requirements of the Government for this power for its purposes, and that the rate, therefore, jumped to more than 20 mills?

Mr. SPARKMAN. Let me correct the Senator. I do not believe he means Wilson Dam. I think he means the steam plant at Wilson Dam. Yes, that is true. The Senator will remember that back in 1939 and 1940, when the TVA bought out the power companies of the Tennessee Electric Power Co., that company had quite a number of steam plants. So they went into the TVA system. Practically every one of those steam plants is antiquated. However, they are being maintained, because there comes a time when it is necessary to pour that power into the stream. When that is done, the cost of generating power goes up sharply That is what happens when it becomes necessary to meet the unusual demands of the Atomic Energy Commission.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield for a question.

Mr. FULBRIGHT. That power has special application for the AEC, I take it. However, before I sit down——

Mr. SPARKMAN. Not necessarily. It depends on whether or not——

Mr. FULBRIGHT. They have first call on high-priced power, in other words.

Mr. SPARKMAN. Not at all. It depends on whether or not that is over and above the contract the TVA had to meet the supply of power. In other words, it is whether it is extra power. Even in that case they have said, "We must put

into operation the steam plant, for instance, at Wilson Dam." That would mean high-priced power.

Mr. FULBRIGHT. Mr. President, will the Senator yield for a question? Then I shall desist. I shall desist from further questioning because I know the Senator from New Mexico is much more agreeable to the Senator from Alabama. However, before I sit down——

Mr. SPARKMAN. No, no. Let me disabuse the Senator's mind, before he goes any further, because I know of no one on the floor who is more pleasant or agreeable than the able Senator from Arkansas.

Mr. FULBRIGHT. I mean the questions of the Senator from New Mexico are more agreeable to the Senator from Alabama.

Mr. SPARKMAN. Oh, no. I am glad to have the Senator from Arkansas propound his questions. I am glad to set him straight on many things about which he has been apparently laboring under a false impression.

Mr. FULBRIGHT. I would appreciate it if the Senator would let me propound one more question.

I am sure that there is a great deal of confusion about the difference between watts, and I want to get the RECORD clear. Will the Senator describe—I know he is a great authority on electricity—what is meant by a watt, and how it comes into being and how it gets around. What is a watt? How fast does it move. How long does it take a watt to go from Paducah to Memphis, Tenn.? What is an ampere, for example?

Mr. SPARKMAN. Back in high school and in college I studied those things in physics. I am sure the Senator from Arkansas did likewise. He probably remembers just as well as I do what is meant by those terms. I do not believe it is necessary to answer those questions. They are elementary questions, which I do not believe the average Senator or the average person needs to have defined. I know, although I am not an authority on power, that there is a great difference between what we call dump power and what we call firm power. I know that there is a great deal of difference in the cost of power generated at a modern, up-to-date steam plant like the one at New Johnsonville, for instance, which was built only 3 or 4 years ago——

Mr. FULBRIGHT. I know; I voted for it.

Mr. SPARKMAN. For which the Senator from Arkansas voted.

Mr. FULBRIGHT. That is correct.

Mr. SPARKMAN. There is a great deal of difference between that power and the power generated at an old, inefficient plant, like the one at Muscle Shoals, which was built in 1918. I think the Senator from Arkansas will admit that he believes there is a difference in the cost of power generated at the two plants.

Mr. FULBRIGHT. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. For a question; yes.

Mr. FULBRIGHT. To introduce the question, let me say that I did not ask the Senator about the cost. I asked him about the difference between——

Mr. SPARKMAN. The Senator from Arkansas asked me an elementary question.

Mr. FULBRIGHT. The Senator said a moment ago that there was no comparison between the kilowatts bought in one place and the kilowatts bought in another place; that they were different; that it was impossible to compare them. Is it not a fact that they are exactly identical in character? Is it not true that the difference goes to the cost of production, but otherwise they are all the same?

Mr. SPARKMAN. It is the same power, and it goes with the same surge, and it travels at the same rate over the same distance.

Mr. FULBRIGHT. That is what I wanted the Senator to admit.

Mr. SPARKMAN. The characteristics are exactly the same.

Mr FULBRIGHT. That is what I wanted the Senator from Alabama to admit.

Mr. SPARKMAN. But one costs more than the other.

Mr. FULBRIGHT. That is correct.

Mr. SPARKMAN. Or one may be more valuable because much comes at one time when the demand is not so great. It depends upon whether the power is necessary to meet the demand and whether it is ready at all times, 24 hours a day.

Mr. FULBRIGHT. Does not the Senator believe it is very interesting that for some reason or other these kilowatts or watts or amperes or volts, which are all the same——

Mr. SPARKMAN. I believe it is necessary to multiply one by the other.

Mr. FULBRIGHT. It always happens that the Atomic Energy Commission is charged a higher rate than is charged to Memphis, Tenn., for the identical watt. Is that not a matter of interest to the Senator from Alabama?

Mr. SPARKMAN. It is a matter of interest that the Senator from Arkansas should try to draw any such comparison, because many factors enter into the charge for power. There is the efficiency of generation, for instance. There is the question of whether it comes at a time when there is a surplus of power, or whether it is firm or demand power that is available at all times. Certainly there is a difference. I am sure the Senator from Arkansas recognizes that there is a difference between the power that is furnished to me to light my home and the power that is furnished to the machine shop down the street to run machines.

Mr. ANDERSON. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. I yield for a question.

Mr. ANDERSON. Does not the Senator recall that we have in our Government a General Accounting Office?

Mr. SPARKMAN. Yes.

Mr. ANDERSON. Does the Senator from Alabama know that every bill the TVA renders to the Atomic Energy Commission is audited by the General Accounting Office?

Mr. SPARKMAN. I assume that is the case because the General Accounting Office audits the accounts of the Atomic Energy Commission.

Mr. ANDERSON. If the Senator from Arkansas has evidence of an overcharge, does not the Senator from Alabama believe that the place to suggest that there is an overcharge is the General Accounting Office?

Mr. SPARKMAN. Of course, it is hard for me to believe that the Senator from Arkansas could really be sincere in his statement that there have been overcharges. The Senator from Arkansas knows that if there was a real overcharge he would immediately go to the General Accounting Office. He is so much concerned about the welfare of the people of the country that he would go there immediately.

Mr. FULBRIGHT. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. I yield.

Mr. FULBRIGHT. Does not the Senator from Alabama know that the very day I received my information I brought it to the floor of the Senate?

Mr. SPARKMAN. I am talking about going to the General Accounting Office.

Mr. FULBRIGHT. But I announced on the floor that I had received the information only within the last hour, and the very industrious Senator from New Mexico [Mr. ANDERSON] immediately submitted it to the Atomic Energy Commission and asked the Commission, "Is what the Senator from Arkansas said true?" I do not know why he should doubt my word. It only illustrates the deterioration in our relations, that he should immediately submit a formal questionnaire to the Atomic Energy Commission, which he put into the RECORD, and in reply to which the Atomic Energy Commission confirmed what I had said, that that was the latest information; and in their statement they said that either the Atomic Energy Commisson is being overcharged or the estimate for the Fulton plant was in error, and that TVA could not be charging the Atomic Energy Commission what they are charging and producing power at Fulton at the very low price that was estimated. Somewhere something is wrong. There is no question about it.

Mr. SPARKMAN. It is rather difficult for me to understand it when Congress has twice refused to appropriate funds for a Fulton plant. There is no Fulton plant.

Mr. FULBRIGHT. I refer to the estimates submitted by the TVA.

Mr. SPARKMAN. In the event power was supplied from that plant?

Mr. FULBRIGHT. I am sure the Senator from Alabama has been following the discussion on the floor. He knows that TVA has made an estimate that they could save $5½ million as compared to the cost of Dixon-Yates power.

Mr. SPARKMAN. Yes; the Atomic Energy Commission figured out that it would be about $2 million.

Mr. FULBRIGHT. $282,000.

Mr. SPARKMAN. I believe the Senator from Arkansas made that calculation.

Mr. FULBRIGHT. The Bureau of the Budget and the Atomic Energy Com-

mission made the calculation, and the Senator from Arkansas agreed with them.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield for a question.

Mr. ANDERSON. Does the Senator from Alabama recognize that in the material which I put into the RECORD on this direct question the Atomic Energy Commission admitted that it was not the Bureau of the Budget figures that had been used, but material that they had supplied to the Bureau of the Budget and which the Bureau of the Budget had taken blindly, and that all of it was taken by the AEC to prove the case?

Mr. SPARKMAN. I am glad the Senator from New Mexico has recalled the point.

Mr. ANDERSON. Does not the Senator recognize the fact that the question of costs was argued time after time, and after it had been exposed and the $282,000 figure had been challenged, the AEC withdrew the first report and submitted the second report, which showed a wholly different figure of approximately $3 million?

Mr. SPARKMAN. I am glad the Senator recalls those figures, because I stated a few minutes ago that my understanding was that the figure finally given by the Atomic Energy Commission was something like $3 million a year.

Mr. KNOWLAND. Mr. President, will the Senator from Alabama yield for a unanimous-consent request?

Mr. SPARKMAN. I yield for that purpose.

ORDER FOR RECESS

Mr. KNOWLAND. Mr. President, I ask unanimous consent that when the Senate complete its labors this evening it stand in recess until 10 o'clock tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

REVISION OF THE ATOMIC ENERGY ACT OF 1946

The Senate resumed the consideration of the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

Mr. SPARKMAN. Mr. President, a while ago, I had started to discuss some of the items of the Dixon-Yates contract. I had written out my remarks for the sake of saving time. Some of the matters have already been covered in the questioning by the able and distinguished Senator from New Mexico, but I wish to invite the Senate's attention to some of the points involved.

Among the many boobytraps in the proposed Atomic Energy Commission-Dixon-Yates contract is one possible development which has not as yet been discussed. A letter under date of April 10, 1954, signed by Mr. E. H. Dixon, president of the Middle South Utilities, and Mr. J. M. Barry, chairman of the executive committee of the Southern Co., was sent to the Atomic Energy Commission, attention of Gen. K. D. Nichols, General Manager. The concluding paragraph of the letter reads as follows:

> The attached appendix sets forth an outline of additional matters in our proposal, including the more important provisions which will be embodied in a contract growing out of it. We are ready to negotiate a definitive contract at your early convenience.

On page 5 of the appendix referred to, under paragraph (7), entitled, "Termination," subparagraphs (a) and (b), the following language occurs:

> (a) After commencement on full-scale operation, termination will be allowed on 3 years' notice, during which period assignment may be made to another governmental agency, at contract rates, including all taxes and other adjustments.
>
> (b) Upon termination, seller shall be entitled to and will absorb capacity at least as rapidly as load growth will permit, but in any event in the amount of at least 100,000 kilowatts in each year, absorbing associated proportions of costs. Buyer may assign any balance to another governmental agency at an increase price to be approved by FPC, such price to include recognition of any increased costs then encountered or foreseen by seller. To extent such capacity is not used by buyer or assignee, buyer will reimburse seller for pro rata proportion of base capacity charge, as adjusted, and taxes.

Note that in subparagraph (a), after the new plant starts full-scale operation, the Dixon-Yates group grants to the Atomic Energy Commission: first, the right to give a 3-year termination notice; and second, the Atomic Energy Commission is given the right during the 3-year termination notice period to assign to "another Government agency, at contract rates, including all taxes and other adjustments."

Now we turn to subparagraph (b). After the 3-year notice period has expired, several privileges and obligations are in order.

First. Dixon-Yates shall be entitled to and will absorb capacity as rapidly as load growth will permit. This could allow Dixon-Yates to absorb, for its own use, the complete capacity of its plant, 600,000 kilowatts, in the fourth year of its full-scale operation, with Atomic Energy Commission concurrence.

Second. But, in any event, it will absorb 100,000 kilowatts in the fourth year and 100,000 kilowatts a year for 5 successive years. This formula permits legally complete recapture of plant capacity in one fell swoop, immediately after the end of the 3-year notice period—or gradual absorption of capacity from the fourth to the ninth year by Dixon-Yates.

Third. During this absorption period, of from 1 to 6 years, the Atomic Energy Commission is permitted to assign the unabsorbed capacity to another Government agency, obviously the TVA, as no other Government agency could use such residue, but not at contract prices, "at an increased price to be approved by the FPC."

Mr. ANDERSON. Mr. President, will the Senator from Alabama yield for a question?

Mr. SPARKMAN. I yield for a question.

Mr. ANDERSON. Does the Senator see any reason why the Government should be guaranteeing this contract? If there were to be a tranfer, it would be done at an increased price to be settled by another Government agency.

Mr. SPARKMAN. I fail to see any reason for it whatsoever.

Mr. ANDERSON. Are not the lots all alike?

Mr. SPARKMAN. Yes. The Senator from Arkansas did not hear that. It would give them the right to transfer to another Government agency at an increased price to be approved by the Federal Power Commission, and in setting the increased price it must "include recognition of any increased costs then encountered or 'foreseen'" by Dixon-Yates. This is an amazing provision, in view of the fact that the "other conditions" clause on page 3 of the appendix would allow additional increases authorized by the Arkansas Public Utilities Commission, as well as any increase coming under the vague clause "other conditions."

The increased costs encountered are foreseen by whom? By Dixon-Yates.

It is hard for me to believe that the distinguished Senator from Arkansas could possibly have read that provision and not have found some cause to object to it.

This means, in effect, that TVA can be put in the position of building a $9 million transmission line from the Dixon-Yates terminal to its distributive area, use the 600,000 kilowatt capacity for 3 years, and then have a gun placed to its head through legal right to withdraw the 600,000 kilowatts unless TVA agrees to pay the increased rates allowed under the wide-open clauses noted heretofore in the contract.

Surrender to the threat would force the costs of the TVA and its customers upward, and would destroy the TVA yardstick on rates.

Once the TVA yardstick is padded upward and destroyed, the private utilities throughout the South would reap millions of dollars out of the pockets of electric energy users.

It may be argued that such a development is unlikely, and that it would involve another collusive agreement on the part of the Atomic Energy Commission and Dixon-Yates.

The answer to that is that the contract makes it possible legally. The policy of the administration is anti-TVA, and I believe the independence of the Atomic Energy Commissioners is no longer to be relied on—when they are directed by the President to carry out his policy. This is evident from the testimony given before the Joint Committee on Atomic Energy, which, in my opinion, shows a lack of courage to object to a clear violation of the language and legislative history pertaining to section 12 (d) of the Atomic Energy Act of 1946, as amended.

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield to the distinguished vice chairman for a question only.

Mr. HICKENLOOPER. I wish to ask the Senator from Alabama about the distinction between the watts which will

flow through the line from either Dixon-Yates or from TVA. I wish to ask the Senator whether there is not a distinction in the Senator's mind and in the minds of those who support his contention between the watts which would flow from TVA and those which would flow from Dixon-Yates under the proposed contract.

I wonder if the Senator does not agree with me that the watts which flow from TVA will be a white power, because of the Government's subsidy which surrounds them, and that those from Dixon-Yates, because they are generated by private enterprise, under the American private enterprise system, may be tinged with color and odium. So perhaps the watts can be distinguished when they flow through the system.

I am simply wondering about the purity of the watts, on one side of the argument, and the coloration of the watts, on the other side, one being generated with a Government subsidy, and the other being generated by the free private enterprise system, which has made this country great.

Mr. SPARKMAN. There had been a discussion of the difference between the watts a little earlier in the evening, but it was not drawn quite on this basis. It is hard for me to believe that the distinguished Senator from Iowa can say that one watt is subsidized, and the other is not; or that he can say that any of the watts which would be produced under the proposal of the nonexistent Dixon-Yates Co., for the purchase of power from a nonexistent plant, would not be subsidized, or that it would represent private enterprise in the manner which we usually understand.

I think of private enterprise as being something which competes on an equal basis with other concerns engaged in the same type of business.

Here is a proposal made by a so-called private company; and, of course, the company would be organized as a private company, but that is about as far as it would get. There is no risk involved. The Government would underwrite the whole proposal. The Government would guarantee it.

The Senator from Arkansas [Mr. FULBRIGHT] differed with me a while ago in the use of the term "guarantee," so I shall not use it. But the proposal includes in it a suggestion or a provision that the return on the equity shall be 9 percent.

There is an exemption, or a virtual exemption, if not an actual exemption, from the payment of taxes. How in the world anyone can say that that represents private enterprise, I do not understand.

Furthermore, Dixon-Yates did not compete for this contract; someone merely reached out and gave it to them, with no competition whatsoever. I cannot follow the able Senator from Iowa when he refers to that as being private enterprise. Certainly, if it is Government help, if it is a Federal subsidy that changes the complex of the watt as it goes through the distribution system, I certainly think there would be no difference in the color as between the two.

Mr. HICKENLOOPER. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. I yield for a question.

Mr. HICKENLOOPER. I do not wish to prejudice the Senator's right to the floor. The Senator says there is no competition. Yes, there has been competition. There have been at least two offers in this matter. Only one of them is practical or sound or privately competitive. The other is purely a brokerage proposition, in which the Government assumes all the risk.

I am now laying the premise for my question, in order to protect the Senator in his right to the floor.

The Dixon-Yates proposition is not entirely protected by the Government. The facts do not so show. At the end of 25 years, there still will be $31 million worth of obligations against an obsolete plant—and it will be obsolete at the end of 25 years. The Senator himself acknowledged only a moment ago in his argument that the TVA still, occasionally, in an emergency, uses old, obsolete plants. But in this discussion it has been admitted, time and again, that the obsolete plants are very high-cost plants, only emergency plants, plants to be used only in time of exceptional need.

At the end of 25 years, the so-called windfall plant will have $31 million worth of obligations against it, and it will be obsolete. It will not be a plant completely protected or completely guaranteed by the Government.

The connotation with respect to that matter, which has crept through this debate, is utterly wrong. I think it is wrong to give to the people of the United States the impression that this windfall plant is guaranteed by the Government. The facts do not bear that out.

My question is, Does not the Senator think so?

Mr. SPARKMAN. I am glad the Senator has brought that point out, and I am also glad that he has expressed it in the form of a question.

Mr. HICKENLOOPER. I thought I was obligated to.

Mr. SPARKMAN. I think the Senator has amply protected me, because he said in the beginning that he was laying the predicate for a question with which he would end his statement.

Certainly I would not wish to leave the impression that the plant would be fully paid for at the end of 25 years. The Senator is correct. There would be an unpaid balance of about $31 million, to give a figure offhand.

Mr. HICKENLOOPER. If I may ask the Senator another question, does he not realize that at the end of 25 years there will remain approximately $25 million of bonds on the plant still unpaid, plus $5½ million equity capital invested, which will not be recouped or returned to the investor? That amounts to between $30½ million and $31 million still obligated against the plant, which cost, in its original building, $107 million. It would be an obsolete plant, with 20 years of service——

Mr. SPARKMAN. Twenty-five years.

Mr. HICKENLOOPER. Twenty-five years. By any yardstick of obsolescence in the public utility business, it is very doubtful whether it would be worth anywhere near $31 million, unless a great deal more money had been put into it by the company, without Government reimbursement, to keep the plant in any reasonable state of modern production.

Mr. SPARKMAN. I go along with most of what the Senator from Iowa has said. I certainly would not have wanted to create the impression that the plant would be fully paid for in 25 years. It will not be. But in 25 years it would have enjoyed a tax exemption status, which, if I understand the figures correctly, would amount to more than the $31 million unfinished payment on the plant.

Mr. HICKENLOOPER. Will the Senator kindly repeat that statement?

Mr. SPARKMAN. It would have enjoyed a tax benefit or tax exemption status which would have amounted to more than $1,500,000 a year for 25 years, if I understand the figures correctly.

Mr. HICKENLOOPER. Mr. President, will the Senator yield for another question?

Mr. SPARKMAN. I yield.

Mr. HICKENLOOPER. I wish to ask the Senator if the measurement does not include more than taxes. It measures the so-called $3 million to $3½ million more a year which the AEC would pay for electricity under the Dixon-Yates proposal than on the estimated cost—not the proposal to furnish, but the estimated cost which TVA sets up.

But under the TVA plan, the Government would have to put up $107 million right now in investment, and would be in possession all the time.

Under the Dixon-Yates contract, the excess cost over the 25-year period would be $90 million. So the cost would be approximately $20 million less under the Dixon-Yates proposal over a 25-year period than under the TVA proposal.

Mr. SPARKMAN. Of course, one thing which should be remembered is that in the first place, at the end of 25 years the plant would belong to the Government. In this case the Dixon-Yates Co. will continue to own it.

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. SPARKMAN. No. If the Senator will permit me, I do not want him to think I am overlooking a very important fact which he brought out in his statement. That is, if, of course, in 25 years the plant will have run down greatly. I would not be willing to say it would be obsolete.

Mr. HICKENLOOPER. Still, there would be $31 million worth of obligations against it. The property would not be free and clear.

Mr. SPARKMAN. I have accepted the statement of the able Senator from Iowa, but the Senator from New Mexico seems to be somewhat in doubt as to the derivation of the figure of $31 million. I can understand the figure of $5 million equity capital. Of course, that equity capital would still be there, but it would be earning a 9-percent dividend.

Mr. HICKENLOOPER. Will the Senator yield for another question?

Mr. SPARKMAN. Yes.

Mr. HICKENLOOPER. The way we arrived at the figure of $31 million is that at the end of 25 years, under the proposal, there will still be 24.6 percent of the bond issue unpaid. Only 75.4 percent of the outstanding bond issue will have been amortized and paid at the end of 25 years, leaving 24.6 percent unpaid, which is a charge against the property, and leaving the $5½ million worth of the original invested equity capital in there, and that makes somewhere in the neighborhood of $31 million, roughly, which is a charge against the capital assets of the plant.

Mr. SPARKMAN. I wonder if the Senator from Iowa can tell me where the 24.6-percent figure appears in the hearings. May I ask the Senator from Iowa if that appears in the hearings?

Mr. HICKENLOOPER. It is contained in the general proposal. It is the plan for the funding and the financing.

Mr. SPARKMAN. I was wondering if that was brought out in the hearings.

Mr. HICKENLOOPER. I shall try to locate it.

Mr. SPARKMAN. I have before me a copy of the general proposal which the Senator from New Mexico handed me, and if the figure is in that proposal, I should like to have it pointed out.

While that is being looked up, let me say, with reference to the question of having an obsolete plant, that the plant at Muscle Shoals to which I referred was built in 1918. It is 36 years old. Yet the TVA uses it, when it has to. Production in that plant is high priced; the Senator from Iowa is correct in that statement. But, remember, remarkable changes have taken place since 1918. The Alabama Power Co. has a great steam plant at Gorgas, Ala. I do not remember when the plant was built, but it must have been about 25 years ago. However, it has some of the most modern equipment available today. That plant has been kept up to date; it is one of our best plants, and is running full time as a part of the generating equipment of the Alabama Power Co. The mere fact that a plant is 25 years old does not mean it is not worth anything. I certainly would not like to leave that impression tonight. My guess is the plant would be worth $31 million, considering that there was an equity investment of $5½ million.

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. SPARKMAN. I will if I may get that information from the Senator from Iowa.

Mr. HICKENLOOPER. I should like to ask the Senator if he is aware of the fact that in the Bureau of the Budget analysis and finding on the proposal of the Dixon-Yates group, on page 5 of that analysis, under paragraph 5, the Bureau of the Budget stated:

> In addition, the plant is not completely amortized at the end of the 25-year contract. There is 24.6 percent of the debt not retired at the end of 25 years.

So the rate under the proposal does not provide for completely amortizing the plant over the 25-year period. That is the governmental source for the analysis of the figures which I quoted the Senator. In addition, there is no question about the $5½ million equity capital being still in there.

Mr. SPARKMAN. I understand that. As I understand, that is comprised of stock. While he is giving that information, I wonder if the Senator will help me further by telling me where in the hearings that question is discussed.

Mr. HICKENLOOPER. I have asked the staff to look it up. I am not sure that this part of the Budget Bureau's finding was inserted in the hearings. It is, however, the authentic report of the Budget Bureau. It may appear in the hearings, but I cannot assure the Senator at this moment that it does.

Mr. SPARKMAN. I thank the Senator from Iowa for giving us that information. It seems to me that somewhere in the hearings those facts would have been discussed, whether that very memorandum was inserted or not. It seems to me that facts relating to that phase of the question would have been included in the record, and if the Senator or his staff find later in the evening or tomorrow that it was discussed in the hearings, I hope he will let us know. Of course, the Senator from Iowa realizes that I have not had access to that information, and I assume that is true of the average Member of the Senate.

Mr. HICKENLOOPER. I do not know about the Senator from Alabama, but Representative JONAS of North Carolina released the report to the press, and the Senator from New Mexico [Mr. ANDERSON] saw fit to use the report in quotations and discussion with the Senator from Arkansas. I am quite sure it is an authentic release by the Bureau of the Budget.

Mr. ANDERSON. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. I yield for a question.

Mr. ANDERSON. Does the Senator recognize that the first set of figures, supposedly Budget Bureau figures, ended up not being Budget Bureau figures? Therefore, some of us wonder whether these are Budget Bureau figures. They came from the Atomic Energy Commission. Nobody is sure who is back of them, who analyzed them, or where they came from.

Mr. SPARKMAN. I am glad to have that suggestion. I was about to say that Representative JONAS sent us a copy, but that is not correct. However, I remember briefly seeing a copy of it.

I may say first to the distinguished Senator from Iowa that I think there is something in what the Senator from New Mexico has said, not only about these figures, but about so much pertaining to the proposal. It is hard to find where each part of the information originated, and who it is that has been pushing this part or that part of the proposal. The whole proposal to me seems unusual, and it seems to misuse an independent agency, and particularly the most sensitive of all independent agencies, the Atomic Energy Commission, as an errand boy to buy power for somebody else to use, not a single kilowatt of which will ever be used in connection with the operations of the Atomic Energy Commission. That is what the Commissioners themselves say. The proposal seems to me very unusual. Then, too, as we try to explore the matter and try to find out where different parts of the information come from, we cannot find out.

Mr. HICKENLOOPER. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. I yield for a question.

Mr. HICKENLOOPER. With reference to the document from which I just read, and which was introduced by Representative JONAS, is the Senator from Alabama aware that authenticity has been officially given to it on the floor of the Senate by the Senator from New Mexico? I should like to read the preliminary statement by the Senator from New Mexico when he authenticated this document and introduced the whole document into the RECORD at page 10381 on July 13, 1954. In his authentication and introduction of this document into the RECORD, he said:

> I hold in my hand a copy of the report, originating from the Bureau of the Budget, which Representative JONAS released. On page 3 of the section of this report entitled "Detailed Analysis of the Middle South-Southern Proposal" I am struck by the similarity of the figures presented which show identically the same breakdown, as I mentioned a few minutes ago, as was given by Mr. Nichols, General Manager of the Atomic Energy Commission, before the joint committee fully 3½ weeks ago. From a very detailed analysis, it gives a difference in cost of $3,685,000 more to the Government if it accepts the Dixon-Yates proposal than the cost estimated by TVA for doing the same job at the Fulton steam-plant site.
>
> I ask unanimous consent that this document be inserted in the RECORD at this point.

It was so included. It is the document I quoted; and it has, I believe, at least a stamp of accepted authenticity. So I was not quoting anything that had not been introduced in the RECORD by the Senator from New Mexico; and from his statement I assumed that he assumed it to be an actual release from the Bureau of the Budget, as originally made public by Representative JONAS.

Mr. SPARKMAN. Let me say to the Senator from Iowa that I do not make a great to-do about the $25 million or $24.6 million or whatever it may be, because I am quite certain that some of the bonds will not have been retired. But the point is that the firm will own a going concern, a fine powerplant, which, with the use of ordinary maintenance and upkeep, I am certain will be fairly well up to date at the end of that time, and not obsolete, as some would have us believe.

Mr. MONRONEY. Mr. President, will the Senator from Alabama yield?

The PRESIDING OFFICER (Mr. BEALL in the chair). Does the Senator from Alabama yield to the Senator from Oklahoma?

Mr. SPARKMAN. I yield for a question.

Mr. MONRONEY. Does the Senator also believe that some of the $5,500,000 of equity capital, enjoying the strangest and most unusual tax advantages of any securities in the United States, might

not pass on to other buyers, in connection with the sale and exchange of securities? In other words, there would be a guaranteed profit of 9 percent, and no income tax would have to be paid by the corporation. So perhaps the owners of the original equity stock might find it advantageous to sell it at a distinct gain, so that whatever of the $5,500,000 equity capital was outstanding at the end of 25 years would probably have changed hands several times.

Mr. SPARKMAN. That is possible; but I am of the opinion that if I held any of that stock, I would hold on to it, because it will be most unusual stock, occupying a favored position on the part of the taxpayers, and having a 9 percent return guaranteed. Perhaps I should not use the term "guarantee," for the Senator from Arkansas objected to it, earlier in the evening—but, at least, a projected return of 9 percent, let us say, and one almost certain to be realized. If I bought such stock, I would wish to keep it.

Of course, it will be remembered that a year or so ago, the Government engaged in the fiasco of issuing 3¼ percent bonds, which hit the market with a thud. Someone told me a few years ago, they were selling at 109. I do not know how many times those bonds may have been transferred since their issuance, but certainly someone made plenty of money on them. Again, I feel that if I had any of those bonds, I would hold on to them, because since that time the administration has eased the money market. The other day I read that the Government is borrowing more money, on tax-anticipation certificates, I believe; of course they are short-term loans. But the Government is finally talking about reducing the interest rate.

So it is rather hard to speculate as to what would happen to good stock like that, just as it is hard to speculate as to what would happen to the 3¼ percent Government bonds that were issued a year ago.

Mr. ANDERSON. Mr. President, will the Senator from Alabama yield for a question?

Mr. SPARKMAN. I yield for a question only.

Mr. ANDERSON. Does not the Senator from Alabama think that after the statements made here about watts, amperes, and volts, a simple statement made by members of the staff would be helpful to an understanding; and, if so, would the Senator from Alabama object to my reading it now, so as to have in the RECORD a "watts what," insofar as we are concerned, namely, that watts are not flow, but amperes are flow; and that volts times amperes equal watts.

Mr. SPARKMAN. That is correct. A watt is a measure of quantity, a volt is a measure of power, and an ampere is a measure of flow.

Mr. ANDERSON. Amperage is current; voltage is pressure; and amperage times voltage equals wattage, which is work done.

Mr. SPARKMAN. That is correct. In fact, I think I could pass a test on the physics lesson the Senator from Arkansas tried to give me a little while ago.

Mr. ANDERSON. Mr. President, will the Senator from Alabama yield for another question?

Mr. SPARKMAN. I yield for a question.

Mr. ANDERSON. Does the Senator from Alabama think I could have passed it?

Mr. SPARKMAN. Certainly. In fact, I think the Senator from New Mexico has passed it now.

Mr. President, I never did finish reading about some of the provisions of the Dixon-Yates contract we were talking about.

Surrender to the threat would force the costs of the TVA and its customers upward, and would destroy the TVA yardstick on rates.

Once the TVA yardstick is padded upward and destroyed, the private utilities throughout the South would reap millions of dollars out of the pockets of electric energy users.

It may be argued that such a development is unlikely, and that is would involve another collusive agreement on the part of the Atomic Energy Commission and Dixon-Yates.

The answer to that is that the contract makes it possible legally. The policy of the administration is anti-TVA, and I believe the independence of the Atomic Energy Commissioners is no longer to be relied upon—when they are directed by the President to carry out his policy. This is evident by the testimony given before the Joint Committee on Atomic Energy, which, in my opinion, shows a lack of courage to object to a clear violation of the language and legislative history pertaining to section 12 (d) of the Atomic Energy Act of 1946, as amended.

Mr. President, let me remind the Senate again that three of the Commissioners did object. It is true that in the final sentence of their letter they said that of course if the President insisted on this, they would go through with it. The able Senator from Tennessee touched on that point earlier, when he pointed out that neither one of the Commissioners, insofar as he knew, was a lawyer, and that probably they did not understand just what the implication was or what the conflict was as between such a statement and their oath to carry out the objective and purpose for which the Commission—an independent agency—had been created.

Mr. MONRONEY. Mr. President, will the distinguished Senator from Alabama yield to me for a question?

Mr. SPARKMAN. I yield for a question.

Mr. MONRONEY. Does the distinguished Senator from Alabama know of any place in the act under which the Atomic Energy Commission is operating where there is any provision for such dictation to the Commissioners or an admonition that the Commissioners are to follow such direction on the part of the Executive?

Mr. SPARKMAN. No; not at all. As a matter of fact, it was the intent of Congress—and the Senator from Oklahoma knows it; he was in Congress at the time when the Atomic Energy Act was passed; at that time he was a Member of the House. I was a Member of Congress at that time, too; I was a member of the committee that had this measure under its jurisdiction. The Senator from Oklahoma and I recall that the congressional intent was that the Atomic Energy Commission should be an independent agency, free from direction from anyone, except insofar as the Commission was required by law to carry out certain functions and certain duties.

Mr. MONRONEY. Mr. President, will the Senator yield for a further question?

Mr. SPARKMAN. I yield.

Mr. MONRONEY. If it had been even remotely the intention of the Congress that this program should be directed by the President, as the holding of the general counsel for the Atomic Energy Commission seems to imply, or the statement that the Atomic Energy Commissioners would salute and obey if directed by the President to do this or that, would not the Congress, careful of its duty in this new field, have specifically spelled out Presidential powers? Would it not have provided that the President should be an ex officio member of the Atomic Energy Commission, or would not Congress have put it under the National Security Council, or one of the many other agencies over which the President exercises power?

Mr. SPARKMAN. Or one of the regular executive departments.

Mr. MONRONEY. But when it is placed in an independent agency, and placed under such close supervision and surveillance as was described by the distinguished vice chairman of the Joint Committee on Atomic Energy the other day, that is certainly indicative of the intention of Congress. It was not meant to be a puppet on the end of a telephone line.

Mr. SPARKMAN. I agree with what the able Senator from Oklahoma has said. For example, if the President of the United States were to direct an order to the Interstate Commerce Commission that it must decide a certain issue in a certain way, everyone would condemn such action. We would immediately say it was silly to think of such a thing. Of course it is. The President would not do it. Yet the Atomic Energy Commission was intended to be the same type of agency, so far as independence is concerned, as is the Interstate Commerce Commission.

The President would never say to the Commissioners of the Interstate Commerce Commission, "You shall do thus and so, even though it is not in your field of operations." To issue a directive of this sort to the Atomic Commission is just as far afield, so far as legal right or logic of governmental operations is concerned, as would be an order to the Interstate Commerce Commission to decide a certain issue in a certain way.

Mr. MONRONEY. Mr. President, will the Senator yield for a further question?

Mr. SPARKMAN. I yield for a question.

Mr. MONRONEY. Is it not a fact that one of the few cases in the courts dealing with the power of independent commissions involves the effort of the late President Franklin D. Roosevelt to re-

move from office a member of the Federal Trade Commission?

Mr. SPARKMAN. Yes.

Mr. MONRONEY. After hearing all the evidence the court said that it was not within the power of the President to remove at will, or to enforce in any way his control over the Federal Trade Commission. The Senator is no doubt familiar with that case.

Mr. SPARKMAN. I am.

Let me point out another case which holds to the same effect, although it involved something else. I refer to the case of the TVA, when President Franklin D. Roosevelt tried to remove the Chairman of the TVA. There was one ground on which he could remove him, and that was contumacy. There had to be specific grounds for removal. The President could not remove him at will. That was the holding of the Supreme Court.

I am sure the Senator from Oklahoma and other Senators in the Chamber will recall the one time when President Truman made a decision in the case of atomic weapons. His action is often referred to as having overriden the board of the Atomic Energy Commission. That decision related to the production of the hydrogen bomb. We have seen reference to it in the newspapers many times. It is said that a majority of the Commission were opposed to producing the hydrogen bomb, but that President Truman overrode the Commission. I am sure the Senator from Oklahoma will recall that in that case members of the Commission voted unanimously to ask the President to step in and decide the question for them. That was not a case of the President handing down an order and saying, "Regardless of what you think, I say that you are to do thus and so." Instead the members of the Commission asked the President to come in and decide the question for them. However, in this case the President said to the Commission, "Even though a majority of you are opposed to it, you will do this," which is clearly outside the field for which the Atomic Energy Commission was established.

Mr. MONRONEY. Mr. President, will the Senator yield for one further question?

Mr. SPARKMAN. I yield.

Mr. MONRONEY. Is it not a fact that in the case in which the President was asked to make the decision by request of members of the Atomic Energy Commission, the decision was made in accordance with a specific provision in the Atomic Energy Act? In case of disputes over atomic weapons, the decision can go to the President.

Mr. SPARKMAN. Yes. In that case the Commissioners voted unanimously to refer the decision to the President, so his intervention was requested.

This procedure is indicated, not only by a legal provision, but by Commission intent; and as proof of my charge I invite attention to a letter dated April 15, 1954, addressed to Joseph M. Dodge, Director, Bureau of the Budget, and signed by Lewis Strauss, Chairman of the Atomic Energy Commission. On page 2, paragraph 4, under the heading, "Cancellation Is Provided as Follows:", subparagraph (a) reads:

(a) For TVA to continue to receive and AEC to pay for power at the contract rates during a 3-year notice period. This period should be sufficient to permit TVA to make other arrangements for the meeting of the requirements of the Memphis area.

It is obvious that when the 3-year notice period is announced, TVA is put on notice "to make other arrangements for meeting the requirements of the Memphis area."

What other arrangements could TVA make? Could it come to Congress, during this anti-public-power administration, and obtain an authorization for the originally contemplated Fulton steam plant? Would TVA not be told that it had better negotiate a definitive contract with Dixon-Yates?

This is the boobytrap designed for TVA by cunning legal minds. Afraid to come out in the open and make a frontal attack, they have resorted to devious and tricky methods to accomplish their end.

Their end is to prevent TVA from building the Fulton plant; use the credit and administrative devices of the Government to subsidize a favorite private utility; pad upward the TVA yardstick rate; and thereby extort from the pockets of the American people many hundreds of millions of dollars annually for the benefit of private utility groups operating under monopoly franchises.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. SPARKMAN. Let me say this, first: There has been a great deal of interrogation and interpolation during the time I have been reading this statement. I therefore ask unanimous consent that there be printed at this point in the RECORD the statement in its entirety.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

DIXON-YATES CONTRACT CONTAINS A "BOOBY TRAP" FOR TVA

Among the many booby traps in the proposed Atomic Energy Commission-Dixon-Yates contract, is one possible development which has not as yet been discussed.

A letter under date of April 10, 1954, signed by Mr. E. H. Dixon, president of the Middle South Utilities and Mr. J. M. Barry, chairman of the executive committee of the Southern Co., was sent to the Atomic Energy Commision, attention: Gen. K. D. Nichols, general manager. The concluding paragraph of the letter reads as follows:

"The attached appendix sets forth an outline of additional matters in our proposal, including the more important provisions which will be embodied in a contract growing out of it. We are ready to negotiate a definitive contract at your early convenience."

On page 5 of the appendix referred to, under paragraph (7), entitled "Termination," subparagraphs (a) and (b), the following language occurs:

"(a) After commencement of full-scale operation, termination will be allowed on 3 years' notice, during which period assignment may be made to another Government agency, at contract rates, including all taxes and other adjustments.

"(b) Upon termination seller shall be entitled to and will absorb capacity at least as rapidly as load growth will permit, but in any event in the amount of at least 100,000 kilowatts in each year, absorbing associated proportions of costs. Buyer may assign any balance to another governmental agency at an increased price to be approved by FPC, such price to include recognition of any increased costs then encountered or foreseen by seller. To extent such capacity is not used by buyer or assignee, buyer will reimburse seller for pro rata proportion of base capacity charge, as adjusted, and taxes."

Note that in subparagraph (a), that after the new plant starts full-scale operation, the Dixon-Yates group grants to the Atomic Energy Commission (1) the right to give a 3-year termination notice; and (2) the Atomic Energy Commission is given the right during the 3-year-termination-notice period to assign to "another Government agency, at contract rates, including all taxes and other adjustments."

Now, we turn to subparagraph (b). After the 3-year-termination-notice period has expired, several privileges and obligations are in order.

1. Dixon-Yates "shall be entitled to and will absorb capacity as rapidly as load growth will permit"; this could allow Dixon-Yates to absorb, for its own use, the complete capacity of its plant (600,000 kilowatts) in the fourth year of its full-scale operation, with Atomic Energy Commission concurrence.

2. "But in any event," it will absorb 100,000 kilowatts in the fourth year and 100,000 kilowatts per year for 5 successive years. This formula permits legally, complete recapture of plant capacity in one fell swoop, immediately after the end of the 3-year notice period—or gradual absorption of capacity from the fourth to the ninth year by Dixon-Yates.

3. During this absorption period, of from 1 to 6 years, the Atomic Energy Commission is permitted to assign the unabsorbed capacity to another Government agency (obviously the TVA, as no other Government agency could use such residue), but not at contract prices—"at an increased price to be approved by the FPC." The FPC, in setting this increased price, must "include recognition of any increased costs then encountered or 'foreseen'" by Dixon-Yates. This is an amazing provision, in view of the fact that "other conditions" clause on page No. 3 of the appendix would allow additional increases, authorized by the Arkansas Public Utilities Commission, as well as any increase coming under the vague clause "other conditions."

This means, in effect, TVA can be put in the position of building a nine-million-dollar-transmission line from the Dixon-Yates terminal to its distributive area; use the 600,000 kilowatts capacity for 3 years, and then have a gun placed to its head through legal right to withdraw the 600,000 kilowatts, unless TVA would agree to pay the increased rates allowed under the wide open clauses noted heretofore in the contract.

Surrender to the threat would force the costs of the TVA and its customers upward, and would destroy the TVA yardstick on rates.

Once the TVA yardstick is padded upward and destroyed, the private utilities throughout the South would reap millions of dollars out of the pockets of electric-energy users.

It may be argued that such a development is unlikely, and that it would involve another collusive agreement on the part of the Atomic Energy Commission and Dixon-Yates.

The answer to that is that the contract makes it possible legally. The policy of the administration is anti-TVA, and I believe the independence of the Atomic Energy Commissioners is no longer to be relied on—when they are directed by the President to carry out his policy. This is evident by the testimony given before the Joint Committee on Atomic Energy, which, in my opinion, shows

a lack of courage to object to a clear violation of the language and legislative history pertaining to section 12 (d) of the Atomic Energy Act of 1946, as amended.

This procedure is indicated not only by legal provision but by Commission intent; and as proof of my charge I call your attention to a letter dated April 15, 1954, addressed to Joseph M. Dodge, Director, Bureau of the Budget, and signed by Lewis L. Strauss, Chairman of the Atomic Energy Commission. On page 2, paragraph (4), under the heading "Cancellation is provided as follows:", subparagraph (a):

"(a) For TVA to continue to receive and AEC to pay for power at the contract rates during a 3-year notice period. This period should be sufficient to permit TVA to make other arrangements for the meeting of the requirements of the Memphis area."

It is obvious that when the 3-year notice period is announced TVA is put on notice "to make other arrangements for meeting the requirements of the Memphis area."

What arrangements could TVA make? Could TVA come to Congress during this antipublic-power administration, and obtain authorization for the originally contemplated Fulton steam plant? Would TVA not be told that it had better "negotiate a definite contract with Dixon-Yates"?

This is the booby trap designed for TVA by cunning legal minds.

Afraid to come out in the open and make a frontal attack, they have resorted to devious and tricky methods to accomplish their end.

Their end is to prevent TVA building the Fulton plant; use the credit and administrative devices of the Government to subsidize a favorite private utility; pad upward the TVA yardstick rate; and thereby extort from the pockets of the American people many hundreds of millions of dollars annually for the benefit of private-utility groups operating under monopoly franchises.

Mr. SPARKMAN. I am glad now to yield to the Senator from Arizona for a question only.

Mr. GOLDWATER. For how many years has the TVA been asking for the Fulton steam plant?

Mr. SPARKMAN. I believe this is the second year.

Mr. GOLDWATER. This is the third year, is it not?

Mr. SPARKMAN. My recollection is that last year was the first year the request was rejected. Last year and this year the request was rejected.

Mr. GOLDWATER. Congress, in its wisdom, has seen fit to turn it down.

Mr. SPARKMAN. Congress has turned it down twice.

Mr. GOLDWATER. Does the Senator doubt the wisdom of that action?

Mr. SPARKMAN. I certainly do.

Mr. GOLDWATER. Is there anything that would give the Senator from Alabama confidence that the Congress might agree to this or other steam plants in the TVA area?

Mr. SPARKMAN. Yes; I have great confidence that, after the November elections, next year a new Democratic Congress will provide for meeting the needs which President Eisenhower promised to meet when he was campaigning, and on the basis of which he obtained very strong support from much of the TVA area.

Mr. GOLDWATER. Did the President specifically promise that there would be additional steam plants in TVA?

Mr. SPARKMAN. Oh, no.

Mr. GOLDWATER. Did not the President in effect say that nothing would be done to impair the efficiency of TVA?

Mr. SPARKMAN. And its maintenance and operation at maximum efficiency.

Let me add that in the mind of every person in that great TVA area those words are fixed. He said that he would do everything to maintain TVA at its maximum efficiency. They remember those words.

Mr. GOLDWATER. Every kilowatt of electricity that is being developed by TVA today is being utilized, is it not?

Mr. SPARKMAN. Yes; I am quite sure that is correct.

Mr. GOLDWATER. Therefore the President, in effect, has not gone back on what the Senator assumes to be his word.

Mr. SPARKMAN. The Senator is talking about today. It is necessary to plan a program 3 years ahead of time. The one that was asked of Congress last year was to meet the need in 1956. The program asked for this year is to meet the need in 1957.

Mr. GOLDWATER. But if the TVA is now producing to full capacity and it is being utilized, is it not natural to believe that, consonant with the expected growth of the TVA area, TVA's output will continue to be 100 percent utilized?

Mr. SPARKMAN. Yes; I feel quite certain that TVA's output will continue to be 100 percent utilized. However, I wish to say to the Senator from Arizona that I hope Arizona will not stand still; I hope it will grow year by year, and that, as it grows, it will need more power. I believe that is true of every area in the United States. Certainly it is true of the Tennessee Valley. The only thing we have ever asked for in the Tennessee Valley—we who were set aside by an act of Congress at the request of Mr. Wendell Wilkie, representing private utilities, and given the right to look to the TVA for the power we need—is the power that we need to meet normal growth and development, which is the same kind of growth and development which I hope the Senator's great State of Arizona enjoys.

Mr. GOLDWATER. I should like to ask the Senator a question. In connection with that point, does the Senator feel that the area in which he lives should be treated any different from my State of Arizona in connection with its power needs?

Mr. SPARKMAN. I do not believe so.

Mr. GOLDWATER. The Senator must, because he is continually asking the Federal Government to do it.

Mr. SPARKMAN. The fact is that there is a great river in the Tennessee Valley, and Congress 21 years ago decided that the best way to develop that river was to develop it under the plan of the TVA. Fifteen years ago Congress decided, by passing a law, that this certain area should be served by TVA; that TVA should not move out into the other territory served by private utilities, and the private utilities should not move into the TVA area. We have looked to TVA for power ever since.

It is about the same as the development of some of the great rivers in the Senator's area, and the great reclamation projects. I never did object to building Boulder Dam and the manner in which power is generated there, and the manner in which the water is made useful to the people at most favorable rates. I think that is fine. I have always gone along with those projects, because I believe they are good for the sections of the country in which they operate, and therefore they are good for the Nation as a whole.

I believe in growth and development in every part of the United States, and I have always tried to support programs to that end.

All we ask for in the Tennessee Valley area is that we be allowed to continue to get power sufficient to meet the demand of normal growth and development, the same kind that every other area in the United States expects to have.

I remind the Senator from Arizona again that by 1956, 55 percent of the power generated by the TVA will be taken up by the Atomic Energy Commission, and another big block—I do not know what percentage, but it would be interesting to know—will be taken up by the defense installations in that area.

Those institutions have priority. We cannot get sufficient power for industries and for the expansion of the industries already located there, if we are to stand still and be content with the formula the Senator from Arizona seems to have in mind; that is, of continuing to operate the present maximum capacity and using the present maximum capacity.

Mr. GOLDWATER. The Senator from Alabama is a little confused.

Mr. SPARKMAN. Mr. President, I yield for a question only.

Mr. GOLDWATER. I may have to develop a little prolog to the question.

Mr. SPARKMAN. Mr. President, I ask the Chair to protect me. I yield only for a question.

Mr. GOLDWATER. The Senator from Alabama will admit, will he not, that the original intent of TVA was navigation and flood control.

Mr. SPARKMAN. Oh, no, no, no.

Mr. GOLDWATER. That was not the original intent of TVA?

Mr. SPARKMAN. No; TVA started at Wilson Dam. It was a defense undertaking. It was created for the purpose of generating power for use in our defense back in World War I. That was the derivation of it. I explained it earlier in the evening, when the Senator from Arizona may not have been in the Chamber. When I spoke about the 1939 act, I made mention of the fact that TVA legislation on the House side was always handled by the Military Affairs Committee, because of its origin as a defense measure. I was a member of that committee for 10 years, while I served in the House of Representatives.

Mr. GOLDWATER. I shall put this in the form of a question, Mr. President. Is it not true that a majority of the power in the TVA area is developed by steam plants, and that the additional need, if there is additional need, can be met substantially only by steam plants?

Mr. SPARKMAN. I am not sure that of the present generating capacity a

majority is steam generated, but it is fast moving in that direction. Undoubtedly when the present program is finished—I will not say undoubtedly—it is possible that the majority will be steam power. The Senator is right. The main stream and its tributaries have been developed, I assume, to their practical capacity. Therefore, if we are to get additional electric energy in the Tennessee Valley, it must come from steam plants. I believe that is a fair statement.

Mr. GOLDWATER. Does the Senator from Alabama understand what occurs in most of the other States when that situation exists? To broaden the question, I will refer to Hoover Dam. First, I should like to ask the Senator if he does not recall that the 80th Congress corrected an earlier mistake by naming the dam Hoover Dam, as it properly should be named?

Mr. SPARKMAN. I voted for the measure naming it Hoover Dam.

Mr. GOLDWATER. I am sure the Senator did.

Mr. SPARKMAN. I thought it was perfectly appropriate.

Mr. GOLDWATER. To get back to my question, is the Senator aware of the fact that in the other States of the Union, when additional power is needed, private enterprise develops the power, and private enterprise works with federally developed power, and it becomes a team, a two-way street and both operate together. All the other States, I might add to my question, with the exception of 1 or 2 States, depend on private enterprise. Is the Senator from Alabama aware of that fact?

Mr. SPARKMAN. I have never measured it, but I assume that in the United States as a whole by far the greater part of the Nation is served by private utilities. The greater part of my State is served by private utilities. The Alabama Power Co. serves, I believe, 80 percent of my State. Perhaps it is more than that. I do not know. It has done a great job. A short time ago my senior colleague and I supported a measure to deauthorize a Federal project there.

Mr. GOLDWATER. The Coosa River project.

Mr. SPARKMAN. Yes; the Coosa River project. The Alabama Power Co. had stated back in 1945, when it was authorized, "We cannot develop the Coosa River with our own money." It was one of those that asked the Federal Government to develop it. Oh, yes; we have had a fine working cooperation there.

The Alabama Power Co. was not able to finance the development, but they knew the need for power. The Alabama Power Co. joined in asking the Federal Government to undertake the project. Almost 10 years later, times have improved, and they have now decided that they want to finance it. They have come to the members of the Alabama delegation and have said, "Back in 1945 we all worked to get this project federally authorized. We were not able to develop it then, but we are able now, and if we can get the chance to develop it we are ready to go ahead and develop it." It operates in only one State. So our delegation, after very carefully considering it, and spending many hours on it, worked out legislation to make certain that the interests of the public would be protected.

When an agreement as between the power company and our delegation representing the people of Alabama, was reached, a bill was introduced on the House side and a similar one in the Senate. It went through quickly, and the project was authorized. They are getting ready to go before the Power Commission to ask for a permit with the promise that probably within 12 months they will actually be pouring concrete.

I have never been a public-power advocate to the exclusion of private power. As a matter of fact, I have always said that there is ample room in this country for both public and private power. We need all the power we can get, both public and private power. It so happens that the Coosa River is in an area served exclusively by the Alabama Power Co. I assume that even had the Government built the dam and sales would have been primarily by the Alabama Power Co. Some rural cooperatives might have bought at the bus bar, but I think most of the power would have been sold by the Alabama Power Co. A few municipalities may own their own distribution systems, but I do not have in mind a single one at this time. There are many rural cooperatives there, but even they are served by the Alabama Power Co.

So it was an ideal arrangement for private-power generation, and I was glad to help get the plan in operation.

Under the act of Congress of 1939 in the TVA area—and the line is well drawn—TVA would supply the power and the private power companies would stay out.

Only last year Mr. J. M. Barry, who, by the way, used to be president of the Alabama Power Co.—he is now, if I remember correctly, president of the Southern Co.—testified before the Appropriations Committee and said, "You will remember that in 1939 the territory was divided, and from that day until this the agreement has been meticulously kept by both sides."

That is true. There was an agreement between the private utilities and the TVA, ratified by Congress, that all this area should be served in future by TVA. If TVA did not have to furnish an immense amount of power to the Atomic Energy Commission, we would not have any trouble in getting sufficient power.

Mr. GOLDWATER. Mr. President, will the Senator yield for a further question?

Mr. SPARKMAN. I yield for a question.

Mr. GOLDWATER. I agree with what the Senator has said, but I should like to ask this question: In view of the fact that TVA has been more or less prescribed by the Congress, and it has been quite apparent in at least one Congress that the Government has no intention of providing further steam-plant development, does not the Senator from Alabama feel that free enterprise should now be given a chance to go into the area and assist the Government by the development of additional power?

Mr. SPARKMAN. In answer to the able Senator from Arizona I wish to say, in all frankness, that I have been concerned as to what would happen in the future, certainly until we get to the point of production of power by atomic energy. But rather than for me to discuss that, I should like to suggest to the Senator from Arizona that he read a very able presentation which deals with that very subject. It was made on the floor of the Senate a few days ago by the distinguished and learned Senator from Kentucky [Mr. COOPER]. He discussed the various alternatives with which the TVA might be confronted. I should like to recommend a most careful reading of his statement. There are some problems involved. It is not easy to answer yes or to answer no. It does raise a rather complicated problem. I might have my opinion and someone else might have his opinion. But we would not have any trouble if a tremendous amount of power were not requisitioned from the TVA by the Atomic Energy Commission.

I have stated for a long time—I never offered an amendment to the bill when it was pending, either in the House or in the Senate—that I rather felt that our atomic-energy installations should have powerplants along with the installations. I know there is a powerplant at Oak Ridge, but I believe it supplies only a very small part of the power which is required. I know, too, that we run into practical questions when we figure on the source of power for the Atomic Energy Commission. But there is one thing that must be remembered, namely, that if the TVA area is to be fairly treated within the law which Congress has passed, the first claimant for the power is the Government to the extent of well over half the power generated.

Mr. GOLDWATER. The hour is getting late, and I have only a few more questions, because I want to draw from the Senator his true feelings regarding free enterprise.

Is the Senator aware that all over the country, regardless of whether the area may be one of federally developed power or one of private enterprise or private power, the cost of power, the finished product, is less than 1 percent, regardless of whether it is TVA, Bonneville, the Arkansas Public Service Co., or the Southern California Edison Co.?

Mr. SPARKMAN. Is the Senator referring to the production cost?

Mr. GOLDWATER. Yes.

Mr. SPARKMAN. If the Senator says that is correct, I am willing to go along with him. It varies according to the industry. It may very well be that that would be true in the textile industry, but I would assume it is not true in the reduction of bauxite into aluminum.

Mr. GOLDWATER. I would agree that in the case of aluminum and magnesium it is a very small amount.

I should like to ask another question relating to home use of electricity, because we hear so much about protecting the little man. Regardless of whether it is the little man, the big man, or the middle man, does the Senator realize that the total cost of utilities in the home today runs approximately from 3

to 3.2 percent, which includes water, gas, coal, oil, electricity, and all the other utilities?

Mr. SPARKMAN. I have not seen the figure. If the Senator says that is correct, I am willing to accept his word. It sounds reasonable to me.

Mr. GOLDWATER. In both industry and in the home we are talking about a very, very small part of the budget. Is not that correct?

Mr. SPARKMAN. Yes, that is true; if we average it. But let me say that in some lines of industry it certainly is a large enough factor to cause plants to go to certain sections. For instance, even though we think of TVA power as being low in price, I can tell the Senator of an industry which I tried very hard to get for my State. It went to Texas, where it could use natural gas as its energy or its fuel. That was an aluminum company plant, and it has a big plant. Its first plant was in the district which I formerly represented in Congress. It is near my home. I have been told that when the plant was first built, it was one of the most completely integrated aluminum plants in all the world.

When the time came for a rather large expansion, naturally I hoped it would be at that location. As an alternative, I suggested that the plant might be located in Walker County, a great coal-mining county. They could buy their own coal lands and build a plant at the mouth of the mine, so that coal could be immediately available. For a while I thought that was what they were going to do, but they finally said to me, "We have studied all the figures, but we can save money by building the plant in East Texas and using natural gas."

Mr. GOLDWATER. I would agree with the Senator about that. I might go further and state that plants which need large amounts of electricity which they can develop themselves would be better off by going to States like Oklahoma, Texas, New Mexico, and California, where there are large supplies of natural gas.

Mr. SPARKMAN. If that were the principal factor.

Mr. GOLDWATER. If that were the principal factor, yes. But it is not the principal factor, and it has never been proved so.

The Senator in his earlier remarks referred to the dangers of private enterprise becoming a giant monopoly and charging the people exorbitant prices for power. Does not the State of Alabama regulate the prices charged by the public utilities, and then regulate the profits?

Mr. SPARKMAN. Yes.

Mr. GOLDWATER. Is the Senator afraid that the State of Alabama in the future might weaken and become dominated by a monopoly, so that the monopoly could make so-called exorbitant profits?

Mr. SPARKMAN. Experience, it is said, is the best teacher. However, when TVA came into existence, we had a new experience.

My home town, by the way, let me say to the Senator from Arizona, in order that he may understand fully, was the location of the north Alabama headquarters of the Alabama Power Co. My law firm, I may say, represented the Alabama Power Co. when I was first elected to Congress. Nevertheless, I was a strong advocate of the TVA, and I have been ever since it has come into being.

Sometime after I came to Congress, following the passage of the 1939 act, question arose about the purchase of the distribution system in my home town. The TVA proposed to purchase all of it and to provide for the cities, towns, and rural cooperatives to purchase in turn. I helped with the negotiations for the purchase of the properties in my home town. A good price was paid for them. They were bought as a going property, a going concern, and the price was a good one.

The city, after it had obtained its distribution system, reduced the rates charged to the users of power by about 40 percent. Yet the city was able, from the profits derived from the distribution system, to retire the entire cost of the system in less than one-half the time originally agreed upon. I believe it was about one-third of the time that was proposed when the property was bought. My recollection is that the city proposed to retire the whole cost in 20 years, but it was retired in about 6 or 7 years. The profits have been piling up, and payments in lieu of taxes have been made to the city and the school districts, just as was the case formerly.

In addition, they not only took over what we might call the gravy part of the distribution system, but they took over the whole county. That is pretty thin pickings when one gets out into the rural sections.

In addition to all that has been saved, the lines have been extended out over the county until today the county is nearly 100 percent electrified as the area can be.

Let me go a step further. Not only did my city, with my hometown's distribution system, reduce its rates about 40 percent, but gradually, over a period of a few years, the Alabama Power Co., throughout the State, reduced its rates probably not as much, but there is not such a great variation, I believe, between the rates charged by the power company in the rest of the State, and by TVA.

What actually happened? The yardstick, as defined by David Lilienthal, worked. The TVA idea was to make power available to the people in such a way as to encourage them to use it; and the more they used, the cheaper their rate could be.

I wish to illustrate that point, and the difference between TVA attitude and the attitude of the Alabama Power Co. A good many of the people in the Alabama Power Co. are my personal friends. One day I was speaking with the manager of the Huntsville office of the Alabama Power Co. He is now the vice president of the company, and has been for a good many years.

We first began to talk about the sale of appliances. I asked him why the company insisted on adding a profit to the appliances it sold. I said, "It seems to me that you should be glad to sell them at a discount, because they use more power."

His reply to me was, "Do you know how many electric ranges and how many electric power heaters are on the line that goes out your street? If we had 3 or 4 more, it would be necessary for us to build a new line."

In other words, his attitude was not to encourage the purchase of additional appliances, because it would mean that the company would have to put in new and stronger lines.

The TVA came along with just the opposite idea. Their plan was to put the lines and the power there, and the people would buy appliances and use the power. The Alabama Power Co. adopted the same policy. No wonder they were able to reduce their rates. In the course of doing so, as I mentioned earlier this evening, the value of their stock went from about 50 cents on the dollar to full par value, and even above par.

Mr. GOLDWATER. I have one more question to ask, but before I do so I wish to invite the attention of the Senator from Alabama to the CONGRESSIONAL RECORD which will be available tomorrow, in which today I inserted a comparison of rates, going back, I believe, to 1896, which shows that the greatest reduction in power rates occurred before 1932. It makes very interesting reading, because the percentage of reduction since that time has been relatively small.

In view of the fact that the Senator from Alabama has agreed that there is not much difference between private utility rates and TVA rates, is there any condition which the Senator from Alabama can imagine under which he would agree that free enterprise power should come into the TVA in competition with the TVA?

Mr. SPARKMAN. As I said earlier, Congress is the entity which divided the area. Congress must reach the final solution.

There have been set up, we might say, to take the State of Alabama as an example, two power monopolies. One of them is the TVA, serving 12 counties and 2 municipalities, together with certain other rural cooperatives. The other is the Alabama Power Co., which serves the rest of the State.

Congress has said that the people living in the TVA area would be supplied power by the TVA. The TVA operations would have been ample to supply that power had it not been for the requisition which the Government made for its agencies in the valley. I have not quarreled with the idea of relieving the TVA of some of the commitment it is under to the Atomic Energy Commission. That is what the President, in his budget message, said he was going to do. The letter of December 24, 1953, to the Atomic Energy Commission directed the Commission to explore the possibility of relieving the TVA of some of its commitments to the Atomic Energy Commission.

But the Commissioners wrote back and said, "We have explored that possibility, and we have decided that it is best to retain the arrangements we have with TVA at the present time."

As they so well point out in their letter, a new tack was taken, a new course was set, and they were directed to buy power

from a private concern for the purpose of supplying the people of Memphis, Tenn.; not for the purpose of relieving TVA in any of its commitments to furnish power to the Atomic Energy Commission.

The TVA is not relieved of the commitment of a single kilowatt of power to the AEC. As the Commissioners point out, the power which they obtain has no connection with their operations. I may say that it is not even in replacement of power served by the TVA to the Atomic Energy Commission. It replaces no part whatsoever of that power. Even the amendment offered by the Senator from Michigan would seek to give authority to the Atomic Energy Commission to purchase power in replacement of power served by TVA, but the proposal replaces not 1 single kilowatt. Therefore, even if the amendment offered by the Senator from Michigan were enacted into law today, it would not authorize this proposal legally.

Mr. FERGUSON. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield to the Senator from Michigan.

Mr. FERGUSON. When the building of the new Johnsonville plant was being discussed, did not the Senator from Alabama argue that the plant was required to fill in all the lines so that the Atomic Energy Commission could get additional power, even though there was no direct connection? Did not the Senator argue that?

Mr. SPARKMAN. My recollection is that the new Johnsonville steam plant was needed to firm up the power for the whole TVA system.

Mr. FERGUSON. That is correct.

Mr. SPARKMAN. So that a great quantity could go to the Atomic Energy Commission. The Senator is correct.

Mr. FERGUSON. Yes.

Mr. SPARKMAN. However, at that time a great deal of the TVA power was secondary power, and with a steam plant pouring into the system power that could be regulated as it was needed in the area, we could firm up that power for the whole system, and thereby the AEC would be able to get a greater amount of power.

Mr. FERGUSON. But did not the Senator argue that when the system was inaugurated it was to firm up all the power, and even though none of the power would get to a particular plant, for instance a military plant, yet it was essential for the whole program?

Mr. SPARKMAN. To firm up the power, that is correct.

Mr. FERGUSON. Would not the same situation obtain if the plant were built in Arkansas, and power put into the whole system? Would it not take care of Memphis as well as other areas, because other power would not have to be fed into Memphis?

Mr. SPARKMAN. What it amounts to is taking Memphis out of the TVA system, but the proposal will not relieve the TVA of one single kilowatt of its obligation to supply power to the Atomic Energy Commission. Furthermore, in case of cancellation, the Government would carry the load. Furthermore, the proposal gives such unusual benefits as to make it a most extraordinary contract. As I have stated many, many times, the TVA part of the proposal, as I view it, is incidental. The important feature is the subjection of an independent agency, and the most sensitive of all independent agencies, to direct order of the Executive. Congress never intended that should be done, and I do not believe Congress ought to sit by and see it done.

There are several unexplained factors to this Dixon-Yates situation which cast a dark shadow over the innocent protestations of its proponents.

First, I have yet to hear a satisfactory explanation of why the Tennessee Valley Authority was not instructed by the President to enter into this contract, rather than the Atomic Energy Commission. I pose that question not because I would have approved that action, because, again, the TVA is an independent agency; but the question I am putting is, Why this roundabout method? No wonder the Commission said the proposal created for it an awkward situation. Of course it was awkward. The whole thing is awkward. It is awkward when one tries to explain it, and, naturally, it must have been awkward and embarrassing to those conscientious members of the Atomic Energy Commission who were asked to do something which they said was completely outside the functions for which the agency was intended.

After all, no one can dispute that the Atomic Energy Commission performs no real function here. The private utilities will construct a plant and generate power. The power will go into the TVA transmission lines and, indeed, will be contracted for by TVA. What function, then, does the Atomic Energy Commission have? It is simply a middleman. It is a broker. It has no real function in this setup. Can it be that this complicated arrangement has been set up to confuse the situation and to take the focus away from the fear of the administration that TVA really has no legal right to enter into arrangements with private utilities?

Secondly, although there has been much talk about statistics and figures, we do not know how the construction of the plant at West Memphis is to be financed. We only know that it will cost approximately $107 million, unless the cost estimates are wrong; that the Dixon-Yates group will put up only approximately $5 million equity financing; that the cost to the Government of power over the life of the contract may be half a billion dollars greater than it would be if TVA furnished the power. But no one has told us how the Dixon-Yates group is going to finance the project and raise the rest of the money necessary for its completion. So far as we know, neither the Director of the Bureau of the Budget, Mr. Hughes, nor the Atomic Energy Commission have inquired into this. This is a startling fact, indeed.

Surely one would think that the Government, embarking on a project of such vast dimensions, would want to know who was going to put up the money, and where it was going to come from. If the money is going to come from the sale of bonds and stocks, the Government ought to know what investment banking firms would underwrite this issue, what terms they have procured, on what basis such an issue would be offered to the public, and generally whether or not the Dixon-Yates group have substantial and definitive agreements with underwriting houses to assure the Government that they really will raise the necessary capital. I cannot recall a single instance during the many years I have spent in the Government of a large contract being made by the Government without its finding out in advance who is going to put up the money and on what terms.

This mystery is a deep one. Can it be that the Government has not asked those questions? Or if the Government has asked about this, why do they not make this information public? Is something being concealed from us? And if so, what is being concealed and why?

These are serious questions, and we have had no answer to them. That fact alone should preclude any Senator from lending his voice to hasty and ill-considered approval of this proposition.

Of course, Mr. President, one thing I have pointed out, from time to time, has been the fact that this whole proposal is shrouded in—I started to say in mystery. I do not know that it is shrouded in mystery, but it is certainly shrouded in a lack of information. A company is proposed to be set up; and in order to set it up, its representatives have to go before the Public Utilities Division of the Securities and Exchange Commission, in order to show that the company will not be in violation of the various provisions of the securities law. Representatives of the company must show that its stock, that will be issued, will meet the requirements of the Securities and Exchange Commission. Also, the proposal is that the company do its job without anyone's being given a chance to compete, and without even making known the specifications. Even those representing the company itself have said they have never to this day seen any specifications. It seems to me that for some reason, I know not what, little information has been given regarding this whole proposal.

Mr. President, let me say that I am prepared to continue to speak if the majority leader wishes that to be done. I have several other subjects which I think some Senators should cover during the debate on this subject. I have finished with the subject I have been discussing, but there are other subjects I wish to discuss, and I am prepared to do so if the majority leader wishes me to continue. If not, I shall be prepared to continue at another time.

Mr. KNOWLAND. Mr. President, I have been interested in the remarks of the Senator from Alabama. If he is about to complete them at this point, I shall expect to have the Senate take a recess. But I do not wish to hurry the Senator from Alabama; and if he is prepared to speak further——

Mr. SPARKMAN. Of course, I assume there will be plenty of time for me to present my views, because other amendments will be pending, and each of them will be subject to debate.

I have not wanted to prolong the discussion, although one subject in which I am greatly interested is that of patents licensing. Another subject in which I have been greatly interested, and on which I have had material prepared for some time, ready for the discussion, is the monopoly aspects of this matter.

As the Senator from California will recall, the other evening I made a very brief statement; and at that time I said I hoped that in the course of the debate, some Senator would discuss those particular features. I hope that will be done.

If it is done by other Senators, then of course I shall not feel that it is necessary for me to discuss them. But I certainly hope something will be said on those particular subjects before the debate ends on this most important piece of proposed legislation.

Mr. President, I could let these remarks end my first speech, and suggest the absence of a quorum.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER (Mr. THYE in the chair). The Senator from Alabama will state it.

Mr. SPARKMAN. If I should cease at this time, and should suggest the absence of a quorum, I would be entitled, would I not, upon the ascertainment of the presence of a quorum, to begin my second speech on the pending amendment?

The PRESIDING OFFICER. That is correct.

Mr. SPARKMAN. Then, Mr. President, I shall stop at this point, and I now suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE NATIONAL HIGHWAY PROGRAM

Mr. FERGUSON. Mr. President, I ask unanimous consent to have printed at this point in the RECORD, as a part of my remarks, an editorial entitled "Good United States Roads Program at Last." The editorial was published in the Detroit Times of July 15. The Detroit Times has been a pioneer in the fight for good roads; and its views on the subject are well worth-while, both for the Senate and for others who read the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

GOOD UNITED STATES ROADS PROGRAM AT LAST

The news that President Eisenhower wants to spend an additional $5 billion a year on roads for the next 10 years is as surprising as it is welcome.

It is welcome because the sums mentioned demonstrate a realistic understanding of the job that must be done if our highways are to be adequate and a determination to get on with the job.

The program comes as somewhat of a surprise because the administration supported a Federal highway bill in this session of Congress that was obviously inadequate and which could have been substantially increased if the administration so desired.

The Hearst newspapers, almost daily, pointed out the serious flaws in the bill and tried until the day the President signed it to have it improved.

Now that the viewpoint of the administration has changed, the past can be forgiven and forgotten.

The governors' conference, to which President Eisenhower's remarks were made through Vice President NIXON, promptly reiterated its somewhat moldy stand that the Federal Government get out of the highway business and let 48 governors take over.

They are beating a busted drum in a parade in which they are the only marchers.

The highway situation requires national supervision and coordination. The supervision comes with the power to tax and to make Federal grants.

Do away with one and you have done away with the other. The result would be something to make even the governors shudder.

We will be watching with great interest now to see how the President intends to implement his program and when he intends to do it.

There would not normally be a Federal highway bill again until 1956, but, we feel certain the President does not intend to wait until then.

We believe that the President now comprehends the scope and urgency of the highway program and that he will act with speed and enthusiasm.

AMENDMENT OF RULE RELATING TO PROCEDURE FOR STANDING COMMITTEES

Mr. FERGUSON. Mr. President, I send to the desk, for appropriate reference, a resolution; and I wish to have it considered as a notice under rule XL of the Senate Rules.

The resolution (S. Res. 287) was received and referred to the Committee on Rules and Administration, as follows:

Resolved, that rule XXV of the Standing Rules of the Senate is amended by deleting the title "Standing Committees" and inserting in lieu thereof "Senate Committees."

SEC. 2. Subsection 3 of such rule XXV is amended to read as follows:

"3. Except as provided in paragraph (d) of subsection 5, each standing committee, and each subcommittee of any such committee, is authorized to fix the number of its members (but not less than one-third of its entire membership) who shall constitute a quorum thereof for the transaction of such business as may be considered by said committee, subject to the provisions of section 133 (d) of the Legislative Reorganization Act of 1946."

SEC. 3. Such rule is further amended by inserting at the end thereof the following:

"5. The following shall be rules of the standing, select, and special committees of the Senate (except the Majority and Minority Policy Committees) and subcommittees thereof, and the term 'committee' as used in this subsection (except in paragraph (b)) means any such committee or subcommittee:

"(a) A subcommittee of any committee may be authorized only by a majority vote of the committee.

"(b) No investigation shall be initiated unless specifically authorized by the Senate or by majority vote of a standing, select, or special committee having jurisdiction.

"(c) Unless otherwise provided by a majority vote of the committee taken at a meeting called for such purpose, subpenas shall be issued only by authority of the committee.

"(d) No committee shall hear subpenaed witnesses or take sworn testimony unless a quorum is present or such lesser number of members as the committee provides by majority vote to constitute a quorum for the purpose of this paragraph, except that any such lesser number shall include at least one majority and one minority member.

"(e) Committee interrogation of witnesses shall be conducted only by members and authorized staff personnel of the committee.

"(f) A witness subpenaed to appear before a committee may be accompanied by counsel of his own choosing and may be advised of his legal rights by such counsel while testifying.

"(g) If a committee is unable to meet because of the failure or inability of its chairman to call a meeting, or for any other reason, the committee's next senior majority member able to act shall call a meeting of the committee within 10 days after the receipt by the Secretary of the Senate of a written request for a meeting of such committee which request shall state the purpose for such meeting and shall be signed by a majority of the members of the committee.

"(h) No confidential testimony taken or confidential material presented in an executive hearing of a committee, and no report of the proceedings of such a hearing, shall be made public either in whole or in part or by way of summary unless authorized by a majority vote of the committee.

"(i) No committee hearing shall be scheduled in any place outside of the District of Columbia except by a majority vote of the committee."

LEGISLATIVE PROGRAM

Mr. KNOWLAND. Mr. President, I wish to make an observation or two before I move that the Senate take a recess, under the prior order, until 10 o'clock tomorrow morning.

I call the attention of Members of the Senate to section 132, which appears on page 59 of the Senate Rules, taken from the Congressional Reorganization Act. Section 132 reads:

Except in time of war or during a national emergency proclaimed by the President, the two Houses shall adjourn sine die not later than the last day (Sundays excepted) in the month of July of each year unless otherwise provided by the Congress.

While I recognize that both in this body and in the other body, points of order have been raised as to whether that language is mandatory or is permissive, and although I realize that the rulings of the presiding officers of the respective Houses in those several instances have been that Congress has to act by resolution, nevertheless the language at least appears to be mandatory. I do not know whether this matter has ever been tested in the courts. So far as I know, the other body will be prepared to conclude its labors by the end of July, and the 435 Members of that body will perhaps have some desire to return home, even though Senators may desire, for various reasons, to remain in Washington.

I point out that we have a very heavy legislative schedule. We not only have the atomic energy bill, which is now the unfinished business before the Senate, and which is an important piece of legislation which ties in with President Eisenhower's proposal for a world pool of atomic power for peaceful purposes; but we have immediately following that the very important farm legislation, which

is of great importance to almost every State of the Union in one way or another. We have the foreign aid authorization bill, and the unemployment compensation extension. We have, also, the foreign aid appropriation bill, and the supplemental appropriation bill, which includes a great many items of great national importance, as well as of some local interest. By naming only those few measures I do not mean to exclude many other bills which are either now on the calendar or may soon be on the calendar.

In addition, we have for consideration a number of highly important conference reports, including the conference report on the tax bill, the conference report on the housing bill, and many others which must be acted upon.

In the list of bills on the calendar, and the list of those which are in process of coming out of committee are many bills of regional importance, or of great importance to a particular State of the Union. I should like to have the Senate able to handle as many of those bills as possible during the session before Congress adjourns sine die. But I must say in all candor that as each day passes it means that more of those bills of necessity will be left on the calendar when we complete the session. Each day that passes probably means that a number of bills of great importance to individual Members, and which the very mechanics of our legislation session will not permit us to handle, will be left on the calendar.

Personally, I have never objected, and no person should object, to an ample discussion of any piece of legislation before the Senate. But I wish respectfully to say that last week when the discussion started there was some hope that perhaps we could obtain a unanimous-consent agreement to vote on the bill either last Saturday, on Monday, or possibly on Tuesday. That request was objected to, and indications were made that there would be objection if any further such requests were made.

So far as the date in the Reorganization Act is concerned, we are in the concluding 2 weeks of the session. One day of that 2-week period has passed. Normally we do not meet on Sunday, so that means that we have only 12 days left in which to operate.

I respectfully request that the Senate be not denied the opportunity to vote on the amendments to this bill. There are quite a number pending. I believe that there has been rather full and adequate discussion. I hope that we are not witnessing a filibuster. Others might call it a delaying tactic. Whatever it may be called, I hope we shall not have, day after day, a situation in which 96 Members of the Senate are prevented from casting their votes upon various policy matters covered by the bill.

We may honestly differ as to the proper course which should be taken in connection with this and other proposed legislation, but I hope we shall not be denied, as representatives of our respective States and of the people of the United States, the opportunity to cast our votes and get on with the people's business.

I do not like these late night sessions. The minority leader and I have on many occasions discussed the heavy burdens Senators are carrying, particularly at the end of a long session, which has lasted for 7 months. Senators have worked very hard. We have had excellent cooperation from the Democratic side of the aisle. Without the cooperation we have had from Members on the other side of the aisle as well as from the minority leader, it would not have been possible to accomplish the legislative program which has been accomplished.

I make the special plea to some Senators who have been engaged in this delaying tactic that they permit the Senate to begin voting tomorrow. I feel that is not asking too much in view of the heavy program of legislation ahead of us, in fairness to Senators who are interested in that program, as well as in fairness to numerous Senators on both sides of the aisle who have spoken to me about individual bills which have no national significance, but are vital to particular Senators in particular States, to see if I could not find some way of having those bills considered before final adjournment.

It may well be that we shall not adjourn, no matter how long it takes, until we dispose of the top priority legislation. No one should be under any illusions about holding 96 Senators here to consider what some may call secondary legislation. Therefore the longer we delay in taking care of the high priority legislation the less opportunity there will be to take care of other bills which should, as a matter of equity, be acted upon.

I make a special plea that, starting tomorrow, the delaying tactics be concluded. Of course, there should be some additional debate on each of the amendments, but when it has been concluded let us vote and pass on to the next amendment, and get a vote on that. I think we owe it to the country, to ourselves, and to the other House, the Members of which should not be asked to remain here while we are delaying the legislative function of the Government.

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. KNOWLAND. I yield.

Mr. HICKENLOOPER. What I wish to say is with the most complete respect for those Members of the Senate who have participated in this debate and who have been in attendance consistently during the sessions of the Senate. I respect them. I do not criticize them, but I think it is very significant that those who are the most vociferous in their objection to bringing this bill or the amendments to the bill to a vote are the most noted for their continuous and almost complete absence from sessions of the Senate while this bill has been under consideration.

I think that is a tragedy. Senators who are so eager to block a vote on the bill should be here participating in the debates and taking part in the consideration of the bill.

I honor the distinguished Senator from Alabama [Mr. SPARKMAN], who has carefully discussed the bill today from his viewpoint. I may disagree with him, but the discussion is beneficial. The majority leader has been in constant attendance. I notice the presence of the Senator from Oklahoma [Mr. MONRONEY]. The Senator from Michigan [Mr. FERGUSON] is present, as are the Senator from California [Mr. KNOWLAND], the Senator from Arizona [Mr. GOLDWATER], and the Senator from Delaware. I have noted the presence of other Senators who have been in quite constant attendance during the debates, including the distinguished occupant of the chair, the Senator from Minnesota [Mr. THYE].

However, I notice that Senators who rise and speak so readily about defending the rights of the people in a free forum are the most consistently absent from these deliberations. It is noted throughout almost every situation of that kind which occurs. The most vociferous objectors to getting on with the business of the Senate and voting are the most consistent absentees. Apparently they have other activities, curricular or extracurricular, which take their time and occupy their attention in other places.

I wished to make that statement tonight in deference and honor, not only to Senators who are present this evening at this late hour, but to other Members of the Senate who have participated today in the debates all the way through. I respect them. I do not criticize them for their differences of opinion with me. I hope they respect my own sincere opinions to the same degree; and I am sure they do.

I thank the Senator from California. I could not refrain from calling this subject to the attention of the Senate and of the people of the United States.

Mr. BEALL. Mr. President, will the Senator yield?

Mr. HICKENLOOPER. I yield.

Mr. BEALL. I wish to make one correction. I am very fond of the State of Delaware, but Delaware is only a part of the eastern shore of Maryland. [Laughter.]

Mr. HICKENLOOPER. I abjectly apologize to my beloved friend, the Senator from Maryland.

Mr. JOHNSON of Texas. Mr. President, like the able majority leader, I should like to give every Member of the Senate an opportunity to say all he has to say on this extremely important subject, and get on with other business.

I appreciate the problem that confronts the majority leader. I am aware of the burdens he bears, and bears so well, and I should like to lighten them in any way I can, but I believe it might be wise at this time not to call on any absent Senators to return to the Chamber, as has been indicated by the Senator from Iowa [Mr. HICKENLOOPER], because it seems to me that we have had about all the speeches today we should have, and when he confuses——

Mr. HICKENLOOPER. Mr. President——

Mr. JOHNSON of Texas. When it gets to the point that the Senator from Iowa confuses the Senator from Maryland with the Senator from Delaware, it

is time for us to go home. We can come back in the morning and start all over. I hope that any Members of the Senate who have remarks to make on the bill will come to the Chamber and say their piece as long and as loud and as persuasively as they may be able to do so, whether they be on this side of the aisle or on the other side of the aisle, and in that way ultimately we will get to a vote.

I know of no Senator who is trying to delay the bill. Certainly I am not trying to delay it. As the majority leader knows, the other day the minority leader and Members on this side of the aisle agreed to a unanimous-consent request, and proposed one.

I know that some Members on this side of the aisle feel very deeply about the bill, and believe a tragic mistake is being made in attempting to pass the bill in its present form.

We need have no illusions about Congress adjourning by July 31. We will have to consider conference reports on the tax bill and the housing bill. We will also discuss at some length, I believe, the very important farm bill, and the social-security bill. We will be here until after July 31 without any reference whatever to the important subject the Senator from Vermont [Mr. FLANDERS] will bring to our attention tomorrow, and a little later.

However, I want to cooperate with the majority leader, and I believe most Members on this side of the aisle want to do so.

We have a staff to consider. A Senator can take 2, or 3, or 4 hours off a day, as I have been doing in the last few days, but the staff must stay here every hour. It is now 25 minutes to midnight. By the time the staff members get home it will probably be 1 o'clock for many of them. In order to meet in the morning it will be necessary for the members of the staff to leave their homes very early, to make preparation for their work tomorrow morning.

I do not see how the Senate can stay in session much longer than it has been doing. If we have a chance to vote and pass the bill, I have no objection to staying an extra hour or two. However, when we work from 10 to 10 I believe we are doing all we can.

I hope that every Senator will be prepared to come to the Chamber tomorrow and say what he has to say, and that we can continue until the bill is finished, and then get along with the other business of the Senate.

I do not believe we will meet the July 31 deadline. It is a worthy objective to have, and a good goal to seek, but we will have to lay aside a part of the President's program or extend the time. We might as well be realists. If we are to pass the legislation on the program between now and July 31, it will not be very well considered.

Like the majority leader, I appeal to all Senators to keep in good humor to say what they have to say and what needs to be said, and no more, to try to get all the necessary legislation passed at the earliest possible date, and to stay here until it is all passed.

Mr. KNOWLAND. I thank the distinguished minority leader. I certainly have made it amply clear, both in my statement tonight and on prior occasions, that I have a very great appreciation and high regard for the cooperation which he has rendered in endeavoring to expedite the public's business; and nothing in any way, directly or indirectly, in my remarks was meant to be inferred differently. I believe on both sides of the aisle there has been a desire to cooperate. I fully agree with the remarks of the Senator from Iowa [Mr. HICKENLOOPER] in regard to the very able presentation, from his point of view, made by the Senator from Alabama [Mr. SPARKMAN]. Although he is not present at the moment, the Senator from New Mexico [Mr. ANDERSON] has been in the Chamber in almost regular attendance, and I believe he has contributed a great deal to the discussion that has taken place.

I will say that the distinguished Senator from New Mexico told me either last Friday or Saturday that he had no desire to have any undue delay in voting on amendments.

I hope that the Senators who seek enlightenment—and there have been some very able speeches made on both sides of the question—will be here promptly, and in that way all of us could save some time.

We lose considerable time in calling a quorum; perhaps over the course of a week we lose several hours in the calling of quorums. I hope that Senators will attend promptly and at least in that way save some time, so that we can complete as soon as possible after July 31 the legislative program which we have undertaken.

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. KNOWLAND. I yield.

Mr. HICKENLOOPER. I wish to keep the record straight, Mr. President, by saying that the Senator from Iowa is no more confused in confusing the Senator from Maryland with the Senator from Delaware than the Senator from Texas is confused when he says the Senator from Iowa suggested that any Senator be requested to return tonight or be brought back tonight.

Mr. KNOWLAND. Mr. President, I should like to say, in conclusion, that we do have a heavy program. It is absolutely necessary to meet for the long hours until we can finish the program, unless we can get some votes on the pending bill.

The PRESIDING OFFICER (Mr. THYE in the chair). What is the pleasure of the Senate?

RECESS TO 10 A. M. TOMORROW

Mr. KNOWLAND. Mr. President, in accordance with the order previously entered, I move that the Senate stand in recess until 10 o'clock a. m. tomorrow.

The motion was agreed to; and (at 11 o'clock and 37 minutes p. m.) the Senate took a recess, the recess being, under the order previously entered, until tomorrow, Tuesday, July 20, 1954, at 10 o'clock a. m.

NOMINATIONS

Executive nominations received by the Senate July 19 (legislative day of July 2), 1954:

COMMISSIONER OF SOCIAL SECURITY

Charles Irwin Schottland, of California, to be Commissioner of Social Security of the Department of Health, Education, and Welfare.

UNITED STATES MARSHAL

Charles Swann Prescott, of Alabama, to be United States marshal for the middle district of Alabama, vice Benjamin Franklin Ellis, removed.

HOUSE OF REPRESENTATIVES

MONDAY, JULY 19, 1954

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Most merciful and gracious God, who art closer than breathing, nearer than hands and feet, we desire to begin, and to continue and to end this new week with Thee.

May our thoughts and activities always be permeated and controlled by a noble and magnanimous spirit, and may we be loyally joined in mind and heart with all who are earnestly striving to establish peace on earth.

Grant that there may be nothing in the work of any day of which we shall be ashamed when the sun has set or at the eventide of life when Thou dost call us to Thyself.

Inspire us with obedience and fidelity to the divine commandment to do justly, to love mercy, and to walk humbly with the Lord, our God.

Hear us in Christ's name. Amen.

The Journal of the proceedings of Thursday, July 15, 1954, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H. R. 4928. An act to authorize the Secretary of Agriculture to convey a certain parcel of land to the city of Clifton, N. J.;

H. R. 6263. An act to authorize the Secretary of Agriculture to convey certain lands in Alaska to the Rotary Club of Ketchikan, Alaska;

H. R. 6882. An act to amend the act of September 27, 1950, relating to construction of the Vermejo reclamation project;

H. R. 6975. An act authorizing the Secretary of the Interior to convey certain lands to the Siskiyou Joint Union High School District, Siskiyou County, Calif.;

H. R. 7012. An act for the relief of Nicole Goldman;

H. R. 7466. An act to authorize the Secretary of the Interior to execute an amendatory repayment contract with the Pine River Irrigation District, Colorado, and for other purposes;

H. R. 8026. An act to provide for transfer of title to movable property to irrigation districts or water users' organizations under the Federal reclamation laws; and

H. R. 8549. An act granting the consent of Congress to the Breaks Interstate Park Compact.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H. R. 130. An act to amend section 1 of the act approved June 27, 1947 (61 Stat. 189);

H. R. 6786. An act authorizing the Secretary of the Interior to purchase improvements or pay damages for removal of improvements located on public lands of the United States in the Palisades project area, Palisades reclamation project, Idaho; and

H. R. 8983. An act to provide for the conveyance of certain lands by the United States to the city of Muskogee, Okla.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 3339. An act to authorize the Farm Credit Administration to make loans of the type formerly made by the Land Bank Commissioner;

S. 3561. An act authorizing the Administrator of Veterans' Affairs to convey certain property to the Armory Board, State of Utah;

S. 3630. An act to permit the city of Philadelphia to further develop the Hog Island tract as an air, rail, and marine terminal by directing the Secretary of Commerce to release the city of Philadelphia from the fulfillment of certain conditions contained in the existing deed which restrict further development; and

S. 3713. An act to give effect to the International Convention for the High Seas Fisheries of the North Pacific Ocean, signed at Tokyo, May 9, 1952, and for other purposes.

The message also announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 2987. An act to provide for the transfer of hay and pasture seeds from the Commodity Credit Corporation to Federal land-administering agencies.

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 3458) entitled "An act to authorize the long-term time charter of tankers by the Secretary of the Navy, and for other purposes"; requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. SALTONSTALL, Mr. BRIDGES, and Mr. RUSSELL to be the conferees on the part of the Senate.

The message also announced that the Senate recedes from its amendments Nos. 1, 2, and 3 to the bill H. R. 2846, an act authorizing the President to exercise certain powers conferred upon him by the Hawaiian Organic Act in respect of certain property ceded to the United States by the Republic of Hawaii, notwithstanding the acts of August 5, 1939, and June 16, 1949, or other acts of Congress.

Resolved, That the Senate recedes from its amendment to the title to the above-entitled bill.

The message also announced that the Senate agrees to the reports of the committees of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bills of the House of the following titles:

H. R. 4854. An act to authorize the Secretary of the Interior to construct, operate, and maintain the irrigation works comprising the Foster Creek division of the Chief Joseph Dam project, Washington; and

H. R. 5185. An act for the relief of Klyce Motors, Inc.

SPECIAL ORDERS GRANTED

Mr PELLY asked and was given permission to address the House for 15 minutes on tomorrow, following the legislative program and any special orders heretofore entered.

Mrs. ROGERS of Massachusetts asked and was given permission to address the House for 5 minutes on tomorrow, following the legislative program and any special orders heretofore entered.

Mr. YOUNGER asked and was given permission to address the House for 30 minutes on tomorrow, following the legislative program and any special orders heretofore entered.

KLYCE MOTORS, INC.

Mr. BURDICK submitted a conference report and statement on the bill (H. R. 5185) for the relief of Klyce Motors, Inc.

COMPENSATION OF CERTAIN PERSONS DAMAGED BY REASON OF FLUCTUATIONS IN WATER LEVEL OF LAKE OF THE WOODS

Mr. BURDICK submitted a conference report and statement on the bill (H. R. 2089) to provide for the compensation of certain persons whose lands have been flooded and damaged by reason of fluctuations in the water level of the Lake of the Woods.

SPECIAL ORDER GRANTED

Mr. BAILEY asked and was given permission to address the House for 40 minutes on Wednesday next, following any special orders heretofore entered.

CHIEF JOSEPH DAM PROJECT

Mr. MILLER of Nebraska submitted a conference report and statement on the bill (H. R. 4854) to authorize the Secretary of the Interior to construct, operate, and maintain the irrigation works comprising the Foster Creek division of the Chief Joseph Dam project, Washington.

PALISADES PROJECT AREA, IDAHO

Mr. MILLER of Nebraska. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 6786) authorizing the Secretary of the Interior to purchase improvements or pay damages for removal of improvements located on public lands of the United States in the Palisades project area, Palisades reclamation project, Idaho, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 2, line 3, after "him", insert ": *Provided*, That no part of any payment provided for herein shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection therewith, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

The Senate amendment was concurred in, and a motion to reconsider was laid on the table.

AMENDING SECTION 1 OF THE ACT APPROVED JUNE 27, 1947

Mr. MILLER of Nebraska. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 130) to amend section 1 of the act approved June 27, 1947 (61 Stat. 189), with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 4, after line 2, insert:

"SEC. 2. Said act approved June 27, 1947 (61 Stat. 189), is hereby further amended by adding at the end thereof a new section to be designated section 3 and to read as follows:

" 'SEC. 3. Jurisdiction is hereby conferred on the Court of Claims to determine, notwithstanding any statute of limitations or laches, in any suit instituted pursuant to section 1 of this act, (1) whether the assignment dated December 1, 1942, accepted and approved December 17, 1942, of oil and gas lease 149-ind-5337, covering the lands denominated "1942 lands" in section 4 of said agreement dated December 1, 1945, as amended, should in law or in equity, taking into consideration such fiduciary relationship as may exist between the United States and the Navaho Tribe, have been accepted by the United States for the account of the Navaho Tribe instead of for its own account, and, if such assignment should have been so accepted, whether the property interest or any part thereof covered by such assignment was taken by the United States from the said tribe at any time prior to the effective date of said agreement; (2) whether, and in what amount, if any, the Navaho Tribe is entitled on the basis of such determination to compensation for the acquisition or taking, by the United States, of the property interest or any part thereof covered by such assignment; and (3) whether, and in what amount, if any, the United States is entitled to credit against such compensation for rentals on such lease or for other expenditures, borne by the United States, for the benefit of such lease prior to any such acquisition or taking by the United States; and to enter judgment in accordance with such determination. No offsets shall be deducted by the court from any net sum, and the interest thereon, if any, that the court awards under this section. The provisions of the last two sentences of section 1 of this act shall be applicable to any judgment entered pursuant to this section'."

Amend the title so as to read: "An act to amend the act approved June 27, 1947 (61 Stat. 189)."

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

The Senate amendments were concurred in, and a motion to reconsider was laid on the table.

COMMITTEE ON RULES

Mr. BROWN of Ohio. Mr. Speaker, I ask unanimous consent that the Rules Committee have until midnight tonight to file rules, if granted, on H. R. 9936, H. R. 9859, Senate 3589, and H. R. 9756.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

QUESTION OF PRIVILEGE OF THE HOUSE

Mr. HALEY. Mr. Speaker, I rise to a question of the privilege of the House.

The SPEAKER. The gentleman is recognized.

Mr. HALEY. Mr. Speaker, I have been subpenaed to appear before the Circuit Court for the County of Sarasota, State of Florida, to give testimony on August 3, 1954, at 10 o'clock a. m., in a matter before said court wherein the County of Sarasota, State of Florida, is plaintiff and the State of Florida and the taxpayers, and so forth, is defendant. I am unable to comply with this summons without the consent of the House, the privileges of the House being involved. I, therefore, submit the matter for the consideration of this body.

Mr. Speaker, I send to the desk the subpena.

The Clerk read the subpena, as follows:

THE STATE OF FLORIDA.

To All and Singular the Sheriffs of the State of Florida—Greeting:

You are hereby commanded to subpena Hon. JAMES A. HALEY, to be and appear before the judge of our circuit court for the County of Sarasota, State of Florida, at the court house in Sarasota, on August 3, 1954, at 10 o'clock a. m., to testify and the truth to speak in behalf of the plaintiff in a certain matter before said court pending and undetermined, wherein County of Sarasota, Fla., is plaintiff, and State of Florida and the taxpayers, etc., is defendant. And this you shall in no wise omit.

Witness, W. A. Wynne, clerk of our said court, and the seal of our said court, at the clerk's office at Sarasota aforesaid this 17th day of July A. D. 1954.

W. A. WYNNE,
Clerk, Circuit Court.
By PRESTON KNAPP,
Deputy Clerk.

Mr. ARENDS. Mr. Speaker, I offer a resolution (H. Res. 640).

The Clerk read the resolution, as follows:

Whereas JAMES A. HALEY, a Representative in the Congress of the United States, has been served with a subpena to appear as a witness before the circuit court of the State of Florida for Sarasota County to testify at 10 o'clock a. m., on the 3d day of August 1954, in the case of the *County of Sarasota, Florida,* v. *State of Florida and the Taxpayers, Etc.;* and

Whereas by the privileges of the House of Representatives no Member is authorized to appear and testify but by the order of the House: Therefore be it

Resolved, That Representative JAMES A. HALEY is authorized to appear in response to the subpena of the Circuit Court of the State of Florida for Sarasota County on Tuesday, August 3, 1954, in the case of the *County of Sarasota, Florida,* v. *State of Florida and the Taxpayers, Etc.;* and be it further

Resolved, That a copy of these resolutions be transmitted to the said court as a respectful answer to the subpena of the said court.

The SPEAKER. The question is on the adoption of the resolution.

The resolution was agreed to, and a motion to reconsider was laid on the table.

CONSENT CALENDAR

The SPEAKER. This is Consent Calendar day. The Clerk will call the first bill on the Consent Calendar.

TAX REFUNDS ON CIGARETTES LOST IN THE FLOODS OF 1951

The Clerk called the bill (H. R. 4319) to authorize tax refunds on cigarettes lost in the floods of 1951.

Mr. BYRNES of Wisconsin. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

Mr. SCRIVNER. Reserving the right to object, Mr. Speaker, this is a meritorious bill. It merely provides authority for the Treasury Department to set up procedure under which cigarette dealers who lost their entire stocks of merchandise in the flood of 1951 in Kansas City and other communities on the Kansas River who can prove their loss to the satisfaction of the Treasury Department can be reimbursed taxes which they had paid. The bill was reported favorably by the Committee on the Judiciary. There seems to be some conflict with the Committee on Ways and Means, although this is not a revenue matter.

This is the last opportunity for any such legislation to be adopted, and I had hoped that objection would not be made at this time or that it would not be passed over.

Mr. BYRNES of Wisconsin. Mr. Speaker, will the gentleman yield?

Mr. SCRIVNER. I yield.

Mr. BYRNES of Wisconsin. I am certainly in sympathy with the general objectives of the gentleman. However, the Committee on Ways and Means itself has hoped to be able to get into this whole subject of refunds on excise taxes where the tax has been paid and then the item has been destroyed for some reason prior to the retail sale. However, as the gentleman knows, the committee has not gotten to that subject. In asking that the bill be passed over I am acting here on the general request of that committee.

Mr. SCRIVNER. Is there any information we can have at this time as to whether or not the Committee on Ways and Means will act on this type of legislation before the end of the session?

Mr. BYRNES of Wisconsin. I could not say definitely to the gentleman, but I think he could sort of suspect from the time that we expect to have left before adjournment that the likelihood is not very good.

Mr. SCRIVNER. I withdraw my reservation of objection, Mr. Speaker.

Mr. McCORMACK. Reserving the right to object, Mr. Speaker, and of course I cannot object, I know about this bill and I have studied it. It seems to me to be very meritorious legislation. It would be most unfortunate if it did not pass at this session. It is simply giving to certain businesses consideration to which they are entitled. The situation arose through no fault of the beneficiaries of this bill. They are asking only what seems to me to be not only justice, but from the angle of morality, what they are entitled to.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

STATUTORY AWARD FOR CERTAIN SERVICE - CONNECTED DISABILITIES

The Clerk called the bill (H. R. 7712) to amend the veterans' regulations to provide an increased statutory rate of compensation for veterans suffering the loss or loss of use of an eye in combination with the loss or loss of use of a limb.

Mr. BYRNES of Wisconsin. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

ADDITIONAL COMPENSATION FOR CERTAIN VETERANS

The Clerk called the bill (H. R. 7851) to amend the veterans' regulation to provide additional compensation for veterans having the service-incurred disability of loss or loss of use of both buttocks.

Mr. FORD. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

INCREASED PENSIONS FOR MEDAL OF HONOR HOLDERS

The Clerk called the bill (H. R. 8900) to increase the rate of special pension payable to certain persons awarded the Medal of Honor.

Mr. FORD. I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

RETIRED PAY OF CERTAIN MEMBERS OF FORMER LIGHTHOUSE SERVICE

The Clerk called the bill (H. R. 1843) to increase the retired pay of certain members of the former Lighthouse Service.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the annual rate of retired pay received by any person who was retired on or before June 30, 1950, under section 6 of the act of June 20, 1918, as amended and supplemented (33 U. S. C., secs. 763–765), shall be increased by $288, effective on the first day of the calendar month following enactment of this act.

With the following committee amendments:

Page 1, line 4, strike out "1950" and in lieu thereof, insert "1953."

Page 1, line 6, strike out the words "by $288" and in lieu thereof, insert a comma.

Page 1, line 8, before the period at the end of the sentence, insert a comma and the following: "by 15 percent or $264, whichever is the lesser: *Provided*, That no retired pay shall be increased to an amount in excess of $2,160 by reason of this act: *And provided further*, That the increases provided herein shall terminate, without subsequent resumption, on June 30, 1955."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EXTENDING TIME FOR INITIATING TRAINING UNDER PUBLIC LAW 550

The Clerk called the bill (H. R. 9395) to amend the laws granting education and training benefits to certain veterans to extend the period during which such benefits may be offered.

Mr. SPRINGER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice. We are getting closer to agreement on this matter, in which many Members of the House have expressed a very keen interest, and I think it will be worked out.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

TERMINATION OF FEDERAL SUPERVISION OVER CERTAIN INDIANS IN UTAH

The Clerk called the bill (S. 2670) to provide for the termination of Federal supervision over the property of certain tribes, bands, and colonies of Indians in the State of Utah and the individual members thereof, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. METCALF. Mr. Speaker, reserving the right to object, I would like to ask the chairman of the committee, or some of the other members of the committee, some questions about this bill. Inasmuch as it is indicated that this bill will serve as a pattern for other bills designed, as the committee says in its report on page 2, "to terminate trust relationships with tribes, groups and individual Indians as rapidly as the circumstances of each tribe, group or individual will permit," and since I am very much concerned over the impact and effect of this bill on the Flathead Reservation of the Kootenai and Salish tribes, I would like to know if, when the committee says that they will take into consideration as one of the criteria the attitude of the tribe toward termination, that means that they will get the consent of the tribe before they adopt a termination bill.

Mr. BERRY. The 4 groups who are in the bill now have consented, and the 2 groups that were taken out were taken out because they asked to be taken out. We are speaking only as to this bill.

Mr. METCALF. That is correct. I feel that the groups that were taken out because they did not want to come under this termination legislation should have been taken out. But, I wonder if in the future such action is going to be taken with other Indian tribes?

Mr. BERRY. This has been applicable in every bill that has been reported. What will be done in the future, of course, is impossible to say.

Mr. METCALF. I would also like to have the committee's attitude toward consultation and consent of the Governor and administrative officers of the State as well as the local agencies.

Mr. BERRY. In every instance, on any of these withdrawals, the State and local governments and organizations have been brought in. They have all testified. They have all either given their assent or have told why they did not wish that this legislation should pass. As a matter of fact, the California withdrawal bill has not gone forward because there was some objection from the State.

Mr. METCALF. I thank the gentleman.

Mr. Speaker, I have two more questions which are specifically directed to section 4, which section provides that rights in the tribal assets of those persons on the tribal rolls shall constitute a vested personal property interest. Section 3 declares that the decision of the Secretary of the Interior on the inclusion or exclusion of any persons from the rolls shall be final. Inasmuch as property rights are created by membership on the roll, a question arises as to whether an appeal to the courts by the tribe or aggrieved individual should not be allowed as, for instance, in the Menominee bill, which was recently passed.

Mr. BERRY. My recollection is that the decision of the Secretary is final as this bill has been written.

Mr. METCALF. That is right. It is final, and I question the proposition of due process in this bill, if an administrative official is given the final right to adjudicate personal property rights. I feel there should be a provision here for an appeal to the court from the decision of the Secretary.

Mr. BERRY. I think you will find in most of these tribal matters that the final appeal has been to the administrative officer, the Secretary of the Interior. In all other matter, or rather almost all other matters, his decision is final. This is just following a pattern that has been used for many, many years.

Mr. METCALF. However, there is a vested property right involved here.

Mr. BERRY. There is in all trust property.

Mr. METCALF. That is right.

Mr. BERRY. And there is no provision for an appeal to a court from trust property.

Mr. D'EWART. Mr. Speaker, will the gentleman yield?

Mr. METCALF. I yield.

Mr. D'EWART. Section 3 deals with who shall be put on the rolls, and the determination of the rolls, and it is the permission of the Secretary in certain instances to determine. That is necessary in order to ever get a final roll, and to know who is interested in the private property. Under the present law title does not rest in the individual, but title cannot be bequeathed nor can it be inherited. If we recognize that when these withdrawal acts were in force we have to realize that the Indian himself does have a property right in the tribal assets, which he does not have before the determination takes effect. It is to take care of that situation, to recognize that property right which did not heretofore exist.

Mr. MILLER of Nebraska. Mr. Speaker, will the gentleman yield?

Mr. METCALF. I yield.

Mr. MILLER of Nebraska. On page 6 some of the trust agreements are taken care of, beginning in line 2, for instance, "*Provided*, That the trust agreement shall provide for the termination of the trust not more than 3 years from the day last prescribed, unless the term of the trust is extended by order of a judge of the court of record designated in the trust agreement." So the court does have some supervision.

Mr. METCALF. That is right, if the trust agreement is adopted, but the point I am making is, as my colleague from Montana [Mr. D'EWART], has said, heretofore there has not been a vested personal property right. This bill gives to the individual Indian a vested personal property right by virtue of inclusion in the roll. Now, if the Secretary refuses to include a person in the tribal roll, then such person is deprived of his interest in the tribal property, and it seems to me due process should require an appeal to the court.

Mr. MILLER of Nebraska. I think that is true, but this applies to only about 200 Indians and most of them do not live on the reservation.

Mr. METCALF. That is right, but I bring this out at this time in order to inform the House that when subsequent termination bills come up, which affect hundreds of Indians over a large area, I will be constrained to object unless there is a court appeal.

I would like to point out one thing more. Section 5 limits the organization of the tribe to individual entities. Indian tribes are a unique organization in our society. I do not know what the State law of Utah is, but the various organizations under the law of Montana that would affect a tribe are not adaptable to the requirements of the Indian organizations. The question arises as to whether there should not be some Federal organization continued in order to carry on this unique organization of the tribal communal system.

Mr. D'EWART. The committee recognizes that it should consider each tribe or group of tribes as an individual case, and also the law and the State officials and the taxing body. We tried to do that. Recently we dealt with the Klamath case. There is great difficulty with carefully working out with the tribal attorney, when that bill was agreed to, and we had a complete agreement with the tribe and the tribal attorney as

to the steps taken. The committee is going very slowly in these determination bills, trying to work out each individual case, as we did in the Klamath case, to fit the State law and the wishes of the tribe, and to do it so that we will retain the value of these assets to the Indians.

Mr. METCALF. I am grateful for the assurance of my colleague from Montana.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the purpose of this act is to provide for the termination of Federal supervision over the trust and restricted property of certain tribes and bands of Indians located in the State of Utah and the individual members thereof, for the disposition of federally owned property acquired or withdrawn for the administration of the affairs of such Indians, and for a termination of Federal services furnished such Indians because of their status as Indians.

SEC. 2. For the purposes of this act—

(a) "Tribe" means any of the following tribes or bands of Indians located in the State of Utah: Shivwits, Kanosh, Koosharem, and Indian Peaks Bands of the Paiute Indian Tribe, Skull Valley Band of the Shoshone Indian Tribe, and the Washakie Band of the Northwestern Band of Shoshone Indians.

(b) "Secretary" means the Secretary of the Interior.

(c) "Lands" mean real property, interests therein, or improvements thereon, and include water rights.

(d) "Individual Indian" means any individual Indian whose name appears on the final roll prepared pursuant to section 3 of this act.

(e) "Tribal property" means any real or personal property, including water rights, or any interest in real or personal property, that belongs to the tribe and either is held by the United States in trust for the tribe or is subject to a restriction against alienation imposed by the United States.

SEC. 3. Each tribe shall have a period of 6 months from the date of this act in which to prepare and submit to the Secretary a proposed roll of the members of the tribe living on the date of this act, which shall be published in the Federal Register. If a tribe fails to submit such roll within the time specified in this section, the Secretary shall prepare a proposed role for the tribe, which shall be published in the Federal Register. Any person claiming membership rights in the tribe or an interest in its assets, or a representative of the Secretary on behalf of any such person, may, within 60 days from the date of publication of the proposed roll, file an appeal with the Secretary contesting the inclusion or omission of the name of any person on or from such roll. The Secretary shall review such appeals and his decisions thereon shall be final and conclusive. After disposition of all such appeals by the Secretary, the roll of the tribe shall be published in the Federal Register, and such roll shall be final for the purposes of this act.

SEC. 4. Upon publication in the Federal Register of the final roll as provided in section 3 of this act, the rights or beneficial interests in tribal property of each person whose name appears on the roll shall constitute personal property which may be inherited or bequeathed, but shall not otherwise be subject to alienation or encumbrance before the transfer of title to such tribal property as provided in section 5 of this act without the approval of the Secretary. Any contract made in violation of this section shall be null and void.

SEC. 5. (a) The Secretary shall, within 6 months after the publication of each final membership roll, notify the tribe of the period of time during which the tribe may study means of disposition of tribal property, real and personal, under supervision of the United States. Such period shall not be less than 3 months and not more than 2 years, including any authorized extension of the original periods. The Secretary is authorized to provide such reasonable assistance as may be requested by the tribe in the formulation of a plan for the disposition or future control and management of the property, including necessary consultations with representatives of Federal departments and agencies, officials of the State of Utah and political subdivisions thereof, and members of the tribe. During such period, the tribe may elect—

(1) to apply to the Secretary for the transfer to a corporation or other legal entity organized by the tribe in a form satisfactory to the Secretary of title to all or any part of the tribal property, and the Secretary is authorized to make such transfer: *Provided,* That the Secretary of the Interior shall not approve any form of organization that provides for the transfer of stock or an undivided share in corporate assets as compensation for services of agents or attorneys unless such transfer is based upon an appraisal of tribal assets that is satisfactory to the Secretary;

(2) to apply to the Secretary for the transfer to one or more trustees designated by the tribe of title to all or any part of the tribal property, real and personal, the title to be held by such trustee for management or liquidation purposes under terms and conditions prescribed by the tribe, and the Secretary is authorized to make such transfer if he approves the trustees and the terms and conditions of the trust;

(3) to apply to the Secretary for the sale of all or any part of the tribal property, and for the pro rata distribution among the members of the tribe of all or any part of the proceeds of sale or of any other tribal funds, and the Secretary is authorized and directed to sell such property upon such terms and conditions as he deems proper and to make such distribution among the members of the tribe after deducting, in his discretion, reasonable costs of sale and distribution; and

(4) to apply to the Secretary for a division of all or any part of the tribal land into parcels for members and for public purposes, together with a general plan for the subdivision showing the approximate size, location, and number of parcels, and the Secretary is authorized to issue patents for that purpose.

(b) Title to any tribal property that is not transferred in accordance with the provisions of subsection (a) of this section shall be transferred by the Secretary either to all members of the tribe as tenants in common or to one or more trustees designated by him for the liquidation and distribution of assets among the members of the tribe under such terms and conditions as the Secretary may prescribe: *Provided,* That the trust agreement shall provide for the termination of the trust not more than 3 years from the date of such transfer unless the term of the trust is extended by order of a judge of a court of record designated in the trust agreement.

(c) When approving or disapproving the selection of trustees in accordance with the provisions of subsection (a) of this section, and when designating trustees pursuant to subsection (b) of this section, the Secretary shall give due regard to the laws of the State of Utah that relate to the selection of trustees: *Provided further,* That the trust agreement shall provide that at any time before the sale of tribal property by the trustees the tribe may notify the trustees that it elects to retain such property and to transfer title thereto to a corporation, other legal entity, or trustee in accordance with the provisions of paragraphs (1) and (2) of subsection (a) of this section, and that the trustees shall transfer title to such property in accordance with the notice from the tribe if it is approved by the Secretary.

(d) Notwithstanding any other provision of this section, the Secretary is directed to reserve subsurface rights in tribal property from any sale or division of such property, and to require any trustee or trustees to whom title to tribal property is transferred to retain title to the subsurface rights in such property for not less than 10 years.

SEC. 6. (a) The Secretary is authorized and directed to transfer within 2 years after the date of this act to each member of each tribe unrestricted control of funds or other personal property held in trust for such member by the United States.

(b) All restrictions on the sale or encumbrance of trust or restricted land owned by members of the tribe (including allottees, heirs, and devisees, either adult or minor) are hereby removed 2 years after the date of this act, and the patents or deeds under which titles are then held shall pass the titles in fee simple, subject to any valid encumbrance: *Provided,* That the provisions of this subsection shall not apply to subsurface rights in such lands, and the Secretary is directed to transfer such subsurface rights to one or more trustees designated by him for management for a period not less than 10 years. The title to all interests in trust or restricted land acquired by members of the tribe by devise or inheritance 2 years or more after the date of this act shall vest in such members in fee simple, subject to any valid encumbrance.

(c) Prior to the time provided in subsection (b) of this section for the removal of restrictions on land owned by more than one member of a tribe, the Secretary may—

(1) upon request of any of the owners, partition the land and issue to each owner a patent or deed for his individual share that shall become unrestricted 2 years from the date of this act;

(2) upon request of any of the owners and a finding by the Secretary that partition of all or any part of the land is not practicable, cause all or any part of the land to be sold at not less than the appraised value thereof and distribute the proceeds of sale to the owners: *Provided,* That any one or more of the owners may elect before a sale to purchase the other interests in the land at not less than the appraised value thereof, and the purchaser shall receive an unrestricted patent or deed to the land; and

(3) if the whereabouts of none of the owners can be ascertained, cause such lands to be sold and deposit the proceeds of sale in the Treasury of the United States for safekeeping.

SEC. 7. (a) The act of June 25, 1910 (36 Stat. 855), the act of February 14, 1913 (37 Stat. 678), and other acts amendatory thereto shall not apply to the probate of the trust and restricted property of the members of a tribe who die 6 months or more after the date of this act.

(b) The laws of the several States, Territories, possessions, and the District of Columbia with respect to the probate of wills, the determination of heirs, and the administration of decedents' estates shall apply to the individual property of members of the tribe who die 6 months after the date of this act.

SEC. 8. The Secretary is authorized, in his discretion, to transfer to a tribe or any member or group of members thereof any federally owned property acquired, withdrawn, or used for the administration of the affairs of the tribe which he deems necessary for Indian use, or to transfer to a public or nonprofit body any such property which he deems necessary to public use

and from which members of the tribes will derive benefit.

SEC. 9. No property distributed under the provisions of this act shall at the time of distribution be subject to Federal or State income tax. Following any distribution of property made under the provisions of this act, such property and any income derived therefrom by the individual, corporation, or other legal entity shall be subject to the same taxes, State and Federal, as in the case of non-Indians: *Provided*, That for the purpose of capital gains or losses the base value of the property shall be the value of the property when distributed to the individual, corporation, or other legal entity.

SEC. 10. Nothing contained in this act shall deprive any Indian tribe, band, or other identifiable group of American Indians of any right, privilege, or benefit granted by the Indian Claims Commission Act of August 13, 1946 (ch. 959, 60 Stat. 1049), including the right to pursue claims against the United States as authorized by said act.

SEC. 11. Nothing in this act shall abrogate any valid lease, permit, license, right-of-way lien, or other contract heretofore approved. Whenever any such instrument places in or reserves to the Secretary any powers, duties, or other functions with respect to the property subject thereto, the Secretary may transfer such functions, in whole or in part, to any Federal agency with the consent of such angency and may transfer such function, in whole or in part, to a State agency with the consent of such agency and the other party or parties to such instrument.

SEC. 12. Nothing in this act shall abrogate any water rights of a tribe or its members.

SEC. 13. Prior to the transfer of title to, or the removal of restrictions from, property in accordance with the provisions of this act, the Secretary shall protect the rights of members of a tribe who are minors, non compos mentis, or in the opinion of the Secretary in need of assistance in conducting their affairs by causing the appointment of guardians in courts of competent jurisdiction, or by such other means as he may deem adequate.

SEC. 14. Pending the completion of the property dispositions provided for in this act, the funds now on deposit, or hereafter deposited, in the United States Treasury to the credit of the tribe shall be available for advance to the tribe, or for expenditure, for such purposes as may be designated by the governing body of the tribe and approved by the Secretary.

SEC. 15. The Secretary shall have authority to execute such patents, deeds, assignments, releases, certificates, contracts, and other instruments as may be necessary or appropriate to carry out the provisions of this act, or to establish a marketable and recordable title to any property disposed of pursuant to this act.

SEC. 16. The Secretary is authorized and directed to cancel any indebtedness payable to the United States by the tribe arising out of any loan made by the United States to such tribe, and any indebtedness, whether payable to the United States or to the tribe, arising out of a loan made from the proceeds thereof to an individual Indian.

SEC. 17 (a) Upon removal of Federal restrictions on the property of each tribe and individual members thereof, the Secretary shall publish in the Federal Register a proclamation declaring that the Federal trust relationship to the affairs of the tribe and its members has terminated. Thereafter individual members of the tribe shall not be entitled to any of the services performed by the United States for Indians because of their status as Indians, all statutes of the United States which affect Indians because of their status as Indians shall no longer be applicable to the members of the tribe, and the laws of the several States shall apply to the tribe and its members in the same manner as they apply to other citizens or persons within their jurisdiction.

(b) Nothing in this act shall affect the status of the members of the tribe as citizens of the United States, or shall affect their rights, privileges, immunities, and obligations as such citizens.

SEC. 18. (a) Effective on the date of the proclamation provided for in section 17 of this act, the corporate charter issued pursuant to the act of June 18, 1934 (48 Stat. 984), as amended, to the Kanosh Band of Paiute Indians of the Kanosh Reservation, Utah, and ratified by the band on August 15, 1943, and to the Shivwits Band of Paiute Indians of the Shivwits Reservation, Utah, and ratified by the band on August 30, 1941, are hereby revoked.

(b) Effective on the date of the proclamation provided for in section 17 of this act, all powers of the Secretary or other officer of the United States to take, review, or approve any action under the constitution and bylaws of the tribe are hereby terminated. Any powers conferred upon the tribe by such constitution which are inconsistent with the provisions of this act are hereby terminated. Such termination shall not affect the power of the tribe to take any action under its constitution and bylaws that is consistent with this act without the participation of the Secretary or other officer of the United States.

SEC. 19. The Secretary is authorized to issue rules and regulations necessary to effectuate the purposes of this act, and may in his discretion provide for tribal referenda on matters pertaining to management or disposition of tribal assets.

SEC. 20. All acts or parts of acts inconsistent with this act are hereby repealed insofar as they affect the tribe or its members. The act of June 18, 1934 (48 Stat. 984), as amended by the act of June 15, 1935 (49 Stat. 378), shall not apply to the tribe and its members after the date of the proclamation provided for in section 17 of this act.

SEC. 21. If any provision of this act, or the application thereof, to any person or circumstance is held invalid, the remainder of the act and the application of such provision to other persons or circumstances shall not be affected thereby.

SEC. 22. (a) Not later than 2 years after the date of this act, the management and operation of irrigation works for Indian lands of the tribe by the Bureau of Indian Affairs shall be discontinued. Upon such discontinuance, the Secretary shall cancel the unpaid irrigation operation and maintenance assessments and reimbursable irrigation construction charges against such lands.

(b) The Secretary may transfer the title to such irrigation works to water users, water user's associations organized for such purpose, or to corporations organized, or trustees designated, as provided in section 5.

SEC. 23. Prior to the issuance of a proclamation in accordance with the provisions of section 17 of this act, the Secretary is authorized to undertake, within the limits of available appropriations, a special program of education and training designed to help the members of the tribe to earn a livelihood, to conduct their own affairs, and to assume their responsibilities as citizens without special services because of their status as Indians. Such program may include language training, orientation in non-Indian community customs and living standards, vocational training and related subjects, transportation to the place of training or instruction, and subsistence during the course of training or instruction. For the purposes of such program the Secretary is authorized to enter into contracts or agreements with any Federal, State, or local governmental agency, corporation, association, or person. Nothing in this section shall preclude any Federal agency from undertaking any other program for the education and training of Indians with funds appropriated to it.

With the following committee amendment:

Page 2, strike all of lines 5, 6, and 7, and insert in lieu thereof the word "Tribe."

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONVEYANCE OF CERTAIN HOUSING UNITS

The Clerk called the bill (H. R. 8783) to provide for the conveyance of certain housing units owned by the United States to the Housing Authority of St. Louis County, Mo.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Housing and Home Finance Administrator is authorized and directed to convey, to the Housing Authority of St. Louis County, Mo., all of the right, title, and interest of the United States in and to the 156 housing units in Public Housing Project No. MO-V-23153.

With the following committee amendments:

After the word "That" insert a comma and the following: "notwithstanding the provisions of subdivision (2) of subsection 601 (b) of the act entitled 'An act to expedite the provision of housing in connection with national defense, and for other purposes,' approved October 14, 1940, as amended."

After the word "convey", insert the following: ", without monetary consideration."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ACCEPTANCE OF CONDITIONAL GIFTS TO FURTHER THE DEFENSE EFFORT

The Clerk called the bill (S. 3197) to authorize the acceptance of conditional gifts to further the defense effort.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That to further the defense effort of the United States—

(a) the Secretary of the Treasury is authorized to accept or reject on behalf of the United States any gift of money or other intangible personal property made on condition that it be used for a particular defense purpose; and

(b) the Administrator of General Services is authorized to accept or reject on behalf of the United States any gift of other property, real or personal, made on condition that it be used for a partciular defense purpose.

SEC. 2. The Secretary of the Treasury may convert into money, at the best terms available, any such gift of intangible property other than money; and the Administrator of General Services may convert into money, at the best terms available, any such gift of tangible property, or transfer to any other Federal agency without reimbursement such property as he may determine usable for the particular purpose for which it was donated.

SEC. 3. There shall be established on the books of the Treasury a special account into

which shall be deposited all money received as a result of such gifts.

SEC. 4. The Secretary of the Treasury, in order to effectuate the purposes for which gifts accepted under this act are made, shall from time to time pay the money in such special account to such of the various appropriation accounts as in his judgment will best effectuate the intent of the donors, and such money is hereby appropriated and shall be available for expenditure for the purposes of the appropriations to which paid.

SEC. 5. The Secretary of the Treasury and the Administrator of General Services shall consult with interested Federal agencies in carrying out the provisions of this act.

SEC. 6. Nothing in this act shall be construed to modify or repeal the authority to accept conditional gifts under any other provision of law.

With the following committee amendment:

Correct the spelling of the word "particular" as it appears on page 2, line 1.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PREPARATION OF ROLLS OF PERSONS OF INDIAN BLOOD, ETC.

The Clerk called the bill (H. R. 4118) to authorize the preparation of rolls of persons of Indian blood whose ancestors were members of certain tribes or bands in the State of Oregon, and to provide for per capita distribution of funds arising from certain judgments in favor of such tribes or bands.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior, hereafter referred to as the "Secretary," is hereby authorized and directed to prepare separate rolls of the Indians of the blood of the Confederated Bands of Umpqua and Calapooias of the Umpqua Valley, and of the Tillamook, Coquille, Tootootoney, Chetco, and Mollallas or Molel Tribes of Oregon, living on the date of this act. Applications for enrollment shall be filed within such times as may be prescribed by the Secretary, and his determination of eligibility for enrollment shall be final and conclusive. No person shall be entitled to be enrolled on more than one roll.

SEC. 2. The Secretary is authorized and directed to withdraw the funds on deposit in the Treasury of the United States to the credit of the respective tribes or bands, including those funds appropriated by Public Law 253 (82d Cong.) approved November 1, 1951, in satisfaction of judgments obtained by the tribes or bands in the cases of *Alcea Band of Tillamook, et al.*, v. *United States* (115 Ct. Cl. 463), and *Rogue River Tribes of Indians et al.*, v. *United States* (116 Ct. Cl. 454), and to make appropriate and equitable per capita payments therefrom to each person whose name appears on said approved rolls.

SEC. 3. (a) The share of a deceased enrollee shall be distributed to his heirs or devisees determined by the laws of the domicile of said decedent, and each share shall be treated for the purpose of distribution as personal property owned by the decedent at the time of his death. Payment to the heirs or devisees of any deceased enrollee shall be made upon proof of death and of heirship satisfactory to the Secretary, and his findings upon such proof shall be final and conclusive.

(b) Payment shall be made directly to the enrollee or his heirs or devisees, except that payments due persons under 21 years of age or persons under legal disability shall be made under such rules and regulations as the Secretary may prescribe. No part of any payment shall be subject to any debt or debts created prior to the date of this act by a beneficiary of Indian blood. Payment to enrollees, heirs, or devisees shall be completed within 1 year after establishment of the tribal rolls.

SEC. 4. All costs incurred by the Secretary in the preparation of such rolls and the payment of such per capita shares shall be paid by appropriate withdrawals out of the fund or funds on deposit in the Treasury of the United States arising out of such judgments.

SEC. 5. The Secretary is authorized to prescribe the necessary rules and regulations to carry out the purposes of this act.

With the following committee amendments:

Page 2, lines 1 through 4, delete the sentence beginning with the word "Applications" and ending with the word "conclusive" and insert in lieu thereof the following language: "Applications for enrollment shall be filed within 1 year of the date of approval of this act. The determination of the Secretary of the eligibility of an applicant for enrollment shall be final and conclusive."

Page 2, line 17, change the period to a colon and add the following language: *"Provided*, That any amounts paid to or for individual members, or distributed to or for the legatees or next of kin of any enrollee, as provided in this act, shall not be subject to Federal tax."

Page 2, line 18, strike all of section 3 through page 3, line 9, and insert in lieu thereof the following new language:

"SEC. 3. (a) The Secretary shall make payments directly to a living enrollee. The Secretary shall distribute the share of a person determined to be eligible for enrollment, but who dies subsequent to the date of approval of this act and on whose behalf an application is filed and approved, and the share of a deceased enrollee, directly to his next of kin or legatees as determined by the laws of the domicile of the decedent, upon proof of death and inheritance satisfactory to the Secretary, whose findings upon such proof shall be final and conclusive.

"(b) Payments due persons under 21 years of age or persons under legal disability shall be made in accordance with laws applicable to such persons in the State of domicile of the payee. The Secretary may apply to any court of competent jurisdiction for the appointment of a guardian to receive and administer payments due a person under 21 years of age or under legal disability, and may take such other action as he deems appropriate for the protection of the interests of any such person in connection with payments hereunder.

"(c) No part of any payment hereunder shall be subject to any debt or debts created prior to the date of this act by a beneficiary of Indian blood. Payment to living enrollees, unless under 21 years of age or under legal disability, shall be completed within 1 year after approval of the tribal rolls. Payment to next of kin and legatees, and payment for the account of persons under 21 years of age or under legal disability shall be completed within the same period of time to the maximum extent possible."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DESIGNATING NATIONAL NURSE WEEK

The Clerk called the resolution (H. J. Res. 359) designating the first full week in October 1954 as National Nurse Week and providing for the establishment of a Central Council to coordinate the observance of such week.

There being no objection, the Clerk read the resolution, as follows:

Whereas the nursing profession plays a vital role in the health care of the Nation; and

Whereas a continued renewal and extension of its ranks through the attraction of young people to the profession is of the first importance to the Nation's future health and welfare; and

Whereas there are many problems facing the nursing profession which can only be solved through the aid of an informed and sympathetic public; and

Whereas it is proper and fitting that national attention and recognition should be focused on the great contributions, past and present, that the nursing profession in all its branches has made to the national welfare and security: Therefore be it

Resolved, etc., That the period begining October 4, 1954, and ending October 9, 1954, is hereby designated as National Nurse Week, in honor of the professional nurses of America and in recognition of the vitally important service they have faithfully rendered in the promotion of the national health and welfare. The President is authorized and requested to issue a proclamation calling upon all the people of the United States to cooperate in the observance of such week, under the guidance of the Central Council created pursuant to section 2, with appropriate proceedings and ceremonies designed to emphasize the significant role of professional nurses in the advancement of human welfare and to encourage increasing support of the nursing profession.

SEC. 2. (a) The Secretary of Health, Education, and Welfare shall appoint and serve as the Chairman of a Central Council, whose duty it shall be to coordinate and supervise the nationwide observance of National Nurse Week. The Central Council shall—

(1) develop a plan of action for the observance of such week, providing in the case of each participating group for appropriate activities at the national, regional, and local levels;

(2) prepare a program for the promotion and publicizing of such week through national newspaper, magazine, radio, and television coverage, and make all necessary arrangements with respect to the timing and substance of the material to be presented in connection with such program; and

(3) prepare outlines of suggested local activities for the celebration of such week, designed to stimulate and facilitate local planning.

(b) The persons appointed as members of the Central Council shall be selected so as to provide adequate representation for the Executive Office of the President, the Congress of the United States, the surgeons general of the Armed Forces, the Advertising Council, the American Medical Association, the American Hospital Association, and the various national nursing organizations.

(c) In carrying out its functions under this section, the Central Council shall utilize clerical personnel, facilities, information, and other necessary assistance made available to it by the groups and organizations represented on the Council.

With the following committee amendments:

On page 2, lines 3 and 4, strike out "October 4, 1954, and ending October 9, 1954,"

and insert in lieu thereof "October 11, 1954, and ending October 16, 1954."

On page 2, line 10, substitute a period for the comma following the word "week" and strike out all of the joint resolution thereafter beginning with the word "under" in line 10, page 2, and ending with the word "Council", line 19, page 3.

The committee amendments were agreed to.

The resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "Joint resolution designating the period from October 11 to October 16, inclusive, of 1954, as National Nurse Week."

A motion to reconsider was laid on the table.

PERMITTING CITY OF PHILADELPHIA TO FURTHER DEVELOP HOG ISLAND TRACT

The Clerk called the bill (H. R. 9577) to permit the city of Philadelphia to further develop the Hog Island tract as an air, rail, and marine terminal by directing the Secretary of Commerce to release the city of Philadelphia from the fulfillment of certain conditions contained in the existing deed which restrict further development.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of Commerce is authorized and directed to release the city of Philadelphia from the fulfillment of any and all conditions of a deed of the United States, acting through the United States Shipping Board, dated the 23d day of July 1930, relating to a tract of land, known as Hog Island, situate partly in the township of Tinicum in the county of Delaware and State of Pennsylvania and partly in the 40th ward of the city of Philadelphia, comprising 951 acres more or less; and to execute in proper form a full and complete release and discharge of the yearly ground rent reserved to the United States under and pursuant to said deed, and relieving the city of Philadelphia from the fulfillment of any and all covenants, conditions, and trusts set forth in said deed.

SEC. 2. The execution of the aforesaid release shall be made without consideration therefor and upon condition that the aforesaid tract shall be held, used, and developed as and for an air, rail, and marine terminal for the promotion and furtherance of the interstate and foreign commerce of the United States, and for industrial purposes related thereto: *Provided further*, That the premises shall not be disposed of by the city of Philadelphia by conveyance or sale except in furtherance of the public purposes herein set forth. The release shall contain a further provision that whenever the Congress of the United States shall declare a state of war or other national emergency the United States shall have the right to enter upon the premises and use the same or any part thereof owned by the city of Philadelphia for a period not to exceed the duration of such state of war or national emergency plus 6 months, and upon cessation of such use said premises shall revert to the city of Philadelphia: *Provided, however*, That the United States shall be responsible during the period of such use for the maintenance of all of the property so used, and shall pay a fair rental for the use of any structures or other improvements which have been added thereto, said rental to include all debt service charges or other obligations arising out of the financing of all structures or improvements on the aforesaid premises.

With the following committee amendments:

Page 1, line 5, strike out "of" where it first appears, and insert in lieu thereof "for the benefit of the United States set forth in."

Page 2, line 8, after "trusts" insert "for the benefit of the United States."

Mr. CUNNINGHAM. Mr. Speaker, the bill S. 3630 is an identical bill which passed the Senate on July 17. I therefore ask unanimous consent to substitute the Senate bill in lieu of the House bill.

Mr. WALTER. Mr. Speaker, reserving the right to object, and I shall not, is it not a fact that the city of Philadelphia has paid the entire amount agreed upon for this tract of land by way of payments and interest throughout the years?

Mr. SCOTT. Mr. Speaker, if the gentleman will yield, I can say that as for the city of Philadelphia, it has more than paid the sum agreed on. The city finds itself unable to expand its harbor facilities either in Pennsylvania, Delaware, or south Jersey, until this ground rent is extinguished.

Mr. WALTER. This is part of the program of the mayor of the city of Philadelphia for the expansion of the port of Philadelphia and the Delaware Valley.

Mr. SCOTT. It is part of the program of the chamber of commerce, the mayor, and the legislative delegation here in Congress. I know of no objection to it. I may say also that the Secretary of Commerce has approved it.

Mr. WALTER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the Senate bill?

There was no objection.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider, and a similar House bill, H. R. 9577, were laid on the table.

AMENDING SECTION 87 OF NATIONAL DEFENSE ACT OF 1916

The Clerk called the bill (H. R. 6223) to amend section 87 of the National Defense Act of June 3, 1916, as amended (32 U. S. C. 47), to relieve the States from pecuniary liability for property lost, damaged, or destroyed through unavoidable causes and to authorize the States to be relieved from accountability in any case except where it shall appear that the loss, damage, or destruction of the property was due to carelessness or negligence or could have been avoided by the exercise of reasonable care.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That section 87 of the National Defense Act of June 3, 1916, as amended (32 U. S. C. 47), is amended to read as follows:

"DISPOSITION AND REPLACEMENT OF DAMAGED PROPERTY, AND SO FORTH

"SEC. 87. All military property issued to the National Guard and Air National Guard as herein provided shall remain the property of the United States. Whenever any such property issued to the National Guard or Air National Guard in any State or Territory, or the District of Columbia shall have been lost, damaged, or destroyed, or become unserviceable or unsuitable by use in service or from any other cause, it shall be examined by a disinterested surveying officer of the Army of the United States, Air Force of the United States, or the National Guard or Air National Guard detailed by the appropriate Secretary, and the report of such surveying officer shall be forwarded to the appropriate Secretary or to such officer as he shall designate to receive such reports. The appropriate Secretary is hereby authorized to relieve the State, or Territory, or the District of Columbia from further accountability for such property in any case except where it shall appear that the loss, damage, or destruction of property was due to carelessness or neglect, or that its loss, damage, or destruction could have been avoided by the exercise of reasonable care, in which case the money value of such property shall be charged to the accountable State, Territory, or District of Columbia to be paid from State, Territory, or District funds, or any funds other than Federal. If the articles so surveyed are found to be unserviceable or unsuitable, the appropriate Secretary shall direct what dispositon by sale or otherwise shall be made of them; and, if sold, the proceeds of such sale, as well as stoppages against officers and enlisted men, and the net proceeds of collections made from any person or from any State, Territory, or District to reimburse the Government for the loss, damage, or destruction of any property, shall be deposited in the Treasury of the United States: *Provided*, That if any State, Territory, or the District of Columbia shall neglect or refuse to pay, or to cause to be paid, the money equivalent of any loss, damage, or destruction of property charged against such State, Territory, or the District of Columbia by the appropriate Secretary after survey by a disinterested officer appointed as hereinbefore provided, the appropriate Secretary is hereby authorized to debar such State, Territory, or the District of Columbia from further participation in any and all appropriations for the National Guard or Air National Guard, as appropriate, until such payment shall have been made: *Provided further*, That property issued to the National Guard and Air National Guard and which has become unserviceable through fair wear and tear in service, may, after inspection thereof and finding to that effect made by an officer of the Army of the United States, Air Force of the United States, or the National Guard or Air National Guard detailed by the appropriate Secretary, be sold or otherwise disposed of, and the State, Territory, or the District of Columbia accountable shall be relieved from further accountability therefor; such inspection, and sale or other disposition, to be made under regulations prescribed by the appropriate Secretary, and to constitute as to such property a discretional substitute for the examination, report, and disposition provided for elsewhere in this section."

With the following committee amendments:

Page 2, line 7, insert a comma after the word "State", delete the first "or", and immediately following the word "Territory", insert the following: ", the Commonwealth of Puerto Rico."

Page 2, lines 11 and 12, delete "Army of the United States, Air Force of the United States" and insert in lieu thereof "United States Army, United States Air Force."

Page 2, line 16, following the word "Secretary", insert "or his designated representative."

Page 2, line 17, insert a comma after the word "State", delete the word "or", and immediately following the word, "Territory" insert the following: ", Commonwealth of Puerto Rico."

Page 2, line 18, following the word "accountability", add "and pecuniary liability."

Page 2, line 24, following "Territory," add "Commonwealth of Puerto Rico."

Page 2, line 25, following "Territory," add "Commonwealth."

Page 3, line 2, following "Secretary", add "or his designated representative."

Page 3, line 7, following "Territory," add "the Commonwealth of Puerto Rico", following "or" add the word "the", and following "District" add the words "of Columbia."

Page 3, line 10, following "Territory," add "the Commonwealth of Puerto Rico."

Page 3, line 13, following "Territory," add "the Commonwealth of Puerto Rico."

Page 3, line 17, following "Territory," add "the Commonwealth of Puerto Rico."

Page 4, line 3, following "Territory," add "Commonwealth of Puerto Rico,."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to amend section 87 of the National Defense Act of June 3, 1916, as amended (32 U. S. C. 47), to relieve the States from accountability and pecuniary liability for property lost, damaged, or destroyed except in cases where it shall appear that the loss, damage, or destruction of the property was due to carelessness or negligence or could have been avoided by the exercise of reasonable care."

A motion to reconsider was laid on the table.

AMEND THE NATIONAL DEFENSE ACT

The Clerk called the bill (H. R. 7734) to amend section 47 of the National Defense Act to relieve State-operated educational institutions, under stated conditions, from giving bond for certain property issued by the United States for use by Reserve Officers' Training Corps units maintained at such institutions.

There being no objection, the Clerk read the bill, as follows:

Be it enacted etc., That section 47 of the National Defense Act, as amended (10 U. S. C. 389), is amended by adding at the end thereof the following new sentence: "No such bond shall be required of any institution operated by any State so long as that institution provides such measures for the care and safekeeping of nonexpendable property as the Secretary of the Army, or the Secretary of the Air Force in the case of property issued by the Department of the Air Force, shall determine as a result of periodic inspection to be adequate to protect the interest of the United States therein."

With the following committee amendment:

Strike all after the enacting clause and insert the following: "That section 47 of the National Defense Act, as amended (10 U. S. C. 389), is further amended by deleting the last sentence thereof and substituting in lieu thereof the following:

" 'The Secretary of the Army, or the Secretary of the Air Force in the case of property of the Department of the Air Force, shall require a bond or other indemnity in such amount as he considers appropriate for the care and safekeeping of all such Government property issued to an educational institution, except uniforms, expendable articles, and supplies expended in operation, maintenance, and instruction.' "

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to amend section 47 of the National Defense Act concerning the requirement for bond covering certain property issued by the United States for use by Reserve Officers' Training Corps units maintained at educational institutions."

A motion to reconsider was laid on the table.

TRANSFER OF LAND IN SALT LAKE CITY

The Clerk called the bill (H. R. 9482) authorizing the Administrator of Veterans' Affairs to convey certain property to the Armory Board, State of Utah.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. CUNNINGHAM. Mr. Speaker, the bill, S. 3561, is an identical bill to the House bill and I ask unanimous consent that it be considered in lieu of the House bill.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There being no objection, the Clerk read the Senate bill, as follows:

Be it enacted, etc., That the Administrator of Veterans' Affairs is authorized and directed to convey, without monetary consideration and subject to the conditions in section 2 of this act, to the Armory Board, State of Utah, all right, title, and interest of the United States in and to a tract of 35 acres of land, more or less, situated in the western end of the Veterans' Administration hospital reservation, Fort Douglas Station, Salt Lake City, Utah, the exact legal description of which shall be determined by the Administrator of Veterans' Affairs.

SEC. 2. The deed of conveyance authorized under the provisions of this act shall—

(a) provide that such tract shall not be alienated in the whole or in part by the Armory Board and shall be used only for training, civic, and related purposes;

(b) provide that, if such tract is so used in any manner that, in the judgment of the Administrator of Veterans' Affairs or his designate, interferes with the care and treatment of patients in the Veterans' Administration hospital located on land contiguous to such tract, such interference shall cease immediately upon notice thereof to the Armory Board by the Administrator or his designate;

(c) provide that, if either of the conditions prescribed in clauses (a) and (b) of this section are violated, title to such tract shall revert to the United States; and

(d) shall reserve all mineral rights, including gas and oil, to the United States, and contain such additional terms, conditions, reservations, and restrictions as may be determined by the Administrator of Veterans' Affairs to be necessary to protect the interests of the United States.

The bill was ordered to be read a third time, was read the third time, and passed.

A similar bill (H. R. 9482) was laid on the table.

A motion to reconsider was laid on the table.

SOUTHEASTERN INTERSTATE FOREST FIRE PROTECTION COMPACT

The Clerk called the bill (H. R. 9345) granting the consent and approval of Congress to the Southeastern Interstate Forest Fire Protection Compact.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. CUNNINGHAM. Mr. Speaker, the bill, S. 2786, is an identical bill and I ask unanimous consent that it be considered in lieu of the House bill.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There being no objection, the Clerk read the Senate bill, as follows:

Be it enacted, etc., That the consent and approval of Congress is hereby given to the Southeastern Interstate Forest Fire Protection Compact, as hereinafter set out. Such compact reads as follows:

SOUTHEASTERN INTERSTATE FOREST FIRE PROTECTION COMPACT

Article I

The purpose of this compact is to promote effective prevention and control of forest fires in the Southeastern region of the United States by the development of integrated forest fire plans, by the maintenance of adequate forest fire fighting services by the member States, by providing for mutual aid in fighting forest fires among the compacting States of the region and with States which are party to other regional forest fire protection compacts or agreements, and for more adequate forest protection.

Article II

This compact shall become operative immediately as to those States ratifying it whenever any two or more of the States of Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia, which are contiguous have ratified it and Congress has given consent thereto. Any State not mentioned in this article which is contiguous with any member State may become a party to this compact, subject to approval by the legislature of each of the member States.

Article III

In each State, the State forester or officer holding the equivalent position who is responsible for forest fire control shall act as compact administrator for that State and shall consult with like officials of the other member States and shall implement cooperation between such States in forest fire prevention and control.

The compact administrators of the member States shall coordinate the services of the member States and provide administrative integration in carrying out the purposes of this compact.

There shall be established an advisory committee of legislators, forestry commission representatives, and forestry or forest products industries representatives which shall meet from time to time with the compact administrators. Each member State shall name 1 Member of the Senate and 1 Member of the House of Representatives who shall be designated by that State's commission on interstate cooperation, or if said commission cannot constitutionally designate the said members, they shall be designated in accordance with laws of that State; and the governor of each member State shall appoint 2 representatives, 1 of whom shall be associated with forestry or forest products industries to comprise the membership of the advisory committee. Ac-

tion shall be taken by a majority of the compacting States, and each State shall be entitled to one vote.

The compact administrators shall formulate and, in accordance with need, from time to time, revise a regional forest fire plan for the member States.

It shall be the duty of each member State to formulate and put in effect a forest fire plan for that State and take such measures as may be necessary to integrate such forest fire plan with the regional forest fire plan formulated by the compact administrators.

Article IV

Whenever the State forest fire control agency of a member State requests aid from the State forest fire control agency of any other member State in combating, controlling, or preventing forest fires, it shall be the duty of the State forest fire control agency of that State to render all possible aid to the requesting agency which is consonant with the maintenance of protection at home.

Article V

Whenever the forces of any member State are rendering outside aid pursuant to the request of another member State under this compact, the employees of such State shall, under the direction of the officers of the State to which they are rendering aid, have the same powers (except the power of arrest), duties, rights, privileges, and immunities as comparable employees of the State to which they are rendering aid.

No member State or its officers or employees rendering outside aid pursuant to this compact shall be liable on account of any act or omission on the part of such forces while so engaged, or on account of the maintenance, or use of any equipment or supplies in connection therewith; *Provided*, that nothing herein shall be construed as relieving any person from liability for his own negligent act or omission, or as imposing liability for such negligent act or omission upon any State.

All liability, except as otherwise provided hereinafter, that may arise either under the laws of the requesting State or under the laws of the aiding State or under the laws of a third State on account of or in connection with a request for aid, shall be assumed and borne by the requesting State.

Any member State rendering outside aid pursuant to this compact shall be reimbursed by the member State receiving such aid for any loss or damage to, or expense incurred in the operation of any equipment answering a request for aid, and for the cost of all materials, transportation, wages, salaries, and subsistence of employees and maintenance of equipment incurred in connection with such request: Provided, that nothing herein contained shall prevent any assisting member State from assuming such loss, damage, expense or other cost or from loaning such equipment or from donating such service to the receiving member State without charge or cost.

Each member State shall provide for the payment of compensation and death benefits to injured employees and the representatives of deceased employees in case employees sustain injuries or are killed while rendering outside aid pursuant to this compact, in the same manner and on the same terms as if the injury or death were sustained within such State.

For the purposes of this compact the term employee shall include any volunteer or auxiliary legally included within the forest fire-fighting forces of the aiding State under the laws thereof.

The compact administrators shall formulate procedures for claims and reimbursement under the provisions of this article, in accordance with the laws of the member States.

Article VI

Ratification of this compact shall not be construed to affect any existing statute so as to authorize or permit curtailment or diminution of the forest fire-fighting forces, equipment, services or facilities of any member State.

Nothing in this compact shall be construed to limit or restrict the powers of any State ratifying the same to provide for the prevention, control and extinguishment of forest fires, or to prohibit the enactment or enforcement of State laws, rules or regulations intended to aid in such prevention, control and extinguishment in such State.

Nothing in this compact shall be construed to affect any existing or future cooperative relationship or arrangement between any Federal agency and a member State or States.

Article VII

The compact administrators may request the United States Forest Service to act as a research and coordinating agency of the Southeastern Interstate Forest Fire Protection Compact in cooperation with the appropriate agencies in each State, and the United States Forest Service may accept responsibility for preparing and presenting to the compact administrators its recommendations with respect to the regional fire plan. Representatives of any Federal agency engaged in forest fire prevention and control may attend meetings of the compact administrators.

Article VIII

The provisions of articles IV and V of this compact which relate to mutual aid in combating, controlling or preventing forest fires shall be operative as between any State party to this compact and any other State which is party to a regional forest fire protection compact in another region: Provided, that the legislature of such other State shall have given its assent to such mutual aid provisions of this compact.

Article IX

This compact shall continue in force and remain binding on each State ratifying it until the legislature or the Governor of such State, as the laws of such State shall provide, takes action to withdraw therefrom. Such action shall not be effective until 6 months after notice thereof has been sent by the chief executive of the State desiring to withdraw to the chief executives of all States then parties to the compact.

SEC. 2. Without further submission of the compact, the consent of Congress is given to any State to become a party to it is accordance with its terms.

SEC. 3. The right to alter, amend, or repeal this act is expressly reserved.

The bill was ordered to be read a third time, was read the third time, and passed.

A similar bill (H. R. 9345) was laid on the table.

A motion to reconsider was laid on the table.

CONTRACT RESEARCH

The Clerk called the bill (S. 2367) to amend the act of June 29, 1935 (the Bankhead-Jones Act), as amended, to strengthen the conduct of research of the Department of Agriculture.

There being no objection, the Clerk read the Senate bill, as follows:

Be it enacted, etc., That the act of June 29, 1935 (the Bankhead-Jones Act), as amended (7. U. S. C. 427–427j), is amended by adding at the end of section 10 thereof the following:

"(e) Appropriations for research work in the Department of Agriculture shall be available for accomplishing such purposes by contract through the means provided in subsection (a) hereof."

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING BANKS FOR COOPERATIVES TO ISSUE CONSOLIDATED DEBENTURES

The Clerk called the bill (S. 3487) to authorize the Central Bank for Cooperatives and the regional banks for cooperatives to issue consolidated debentures, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. McCORMACK. Mr. Speaker, reserving the right to object, this seems to be a rather broad bill, if not a rather far-reaching bill, and I would like to have a member of the committee state why it should be passed by unanimous consent. It seems to me this is a bill that should come up under the regular rules of the House or under suspension of the rules.

Mr. HOPE. Mr. Speaker, I shall be very glad to explain the bill.

Mr. McCORMACK. I know what the bill is. I have read it, but it seems to me this is not a bill that should be passed without some debate. I have no objection to the bill myself; however, some bills should come up under conditions where there is opportunity for Members to debate the matter. Will the gentleman state why he thinks this is not one of those bills?

Mr. HOPE. I am not going to argue with the gentleman over the question of whether this is or is not an important bill. It is a bill of some importance as far as financing the banks for cooperatives is concerned. It is a bill which I understand has no opposition, at least I know of none and in the closing days of the session our committee felt it was important to get the bill passed as expeditiously as possible. For that reason we had it put on the Consent Calendar.

Mr. JOHNSON of Wisconsin. I have spoken to the chairman of the committee, the gentleman from Kansas [Mr. HOPE], and I am sure that this bill is satisfactory.

Mr. McCORMACK. I have no objection to the bill myself. Is it not of such importance that it should come up under the rules of the House which afford Members some opportunity of debate rather than to be passed on the Consent Calendar?

Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

ROTATION OF COMMODITY CREDIT CORPORATION STOCKS

The Clerk called the bill (S. 1381) to amend the Agricultural Act of 1949.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That section 407 of the Agricultural Act of 1949, as amended, is amended by adding at the end thereof the following: "Nor shall the foregoing restrictions apply to sales of commodities the disposition of which is desirable in the interest of the effective and efficient conduct of the Corporation's operations because of the small quantities involved, or because of age, location, or questionable continued storability, but such sales shall be offset by such purchases of commodities as the Corporation determines are necessary to prevent such sales from substantially impairing any price-support program, but in no event shall the purchase price exceed the then current support price for such commodities."

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

INDEMNITIES FOR SWINE DESTROYED IN 1952

The Clerk called the bill (S. 2583) to indemnify against loss all persons whose swine were destroyed in July 1952 as a result of having been infected with or exposed to the contagious disease vesicular exanthema.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of Agriculture is authorized and directed to indemnify in an amount equal to 50 percent of their loss, but not exceeding the indemnity paid by the State, all persons whose swine were destroyed under authority of law in July 1952 as a result of having been infected with or exposed to the contagious disease vesicular exanthema.

SEC. 2. The payment of indemnities under the provisions of this act shall be limited, in the absence of Federal appraisal, to those losses where required proof of such losses has been made to the State and 50 percent of said loss has been paid by such State.

SEC. 3. Payments made pursuant to the provisions of this act shall be made from funds currently available to the Department of Agriculture.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SOUTH CENTRAL INTERSTATE FOREST FIRE PROTECTION COMPACT

The Clerk called the bill (H. R. 6393) granting the consent and approval of Congress to an interstate forest fire protection compact.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the consent and approval of Congress is hereby given to any two or more of the States of Arkansas, Louisiana, Mississippi, Oklahoma, and Texas to enter into the following compact relating to the prevention and control of forest fires in the south central region of the United States.

The compact reads as follows:

"SOUTH CENTRAL INTERSTATE FOREST FIRE PROTECTION COMPACT

"Article I

"The purpose of this compact is to promote effective prevention and control of forest fires in the south central region of the United States by the development of integrated forest fire plans, by the maintenance of adequate forest fire fighting services by the member States, by providing for mutual aid in fighting forest fires among the compacting States of the region and with States which are party to other regional forest fire protection compacts or agreements, and for more adequate forest development.

"Article II

"This compact shall become operative immediately as to those States ratifying it whenever any two or more of the States of Arkansas, Louisiana, Mississippi, Oklahoma, and Texas which are contiguous have ratified it and Congress has given consent thereto. Any State not mentioned in this article which is contiguous with any member State may become a party to this compact, subject to approval by the legislature of each of the member States.

"Article III

"In each State, the State forester or officer holding the equivalent position who is responsible for forest fire control shall act as compact administrator for that State and shall consult with like officials of the other member States and shall implement cooperation between such States in forest fire prevention and control.

"The compact administrators of the member States shall organize to coordinate the services of the member States and provide administrative integration in carrying out the purposes of this compact.

"There shall be established an advisory committee of legislators, forestry commission representatives, and forestry or forest products industries representatives which shall meet from time to time with the compact administrators. Each member State shall name one Member of the Senate and one Member of the House of Representatives, and the Governor of each member State shall appoint one representative who shall be the chairman of the State forestry commission or comparable official and one representative who shall be associated with forestry or forest products industries to comprise the membership of the advisory committee. Action shall be taken by a majority of the compacting States, and each State shall be entitled to one vote.

"The compact administrators shall formulate and, in accordance with need, from time to time, revise a regional forest fire plan for the member States.

"It shall be the duty of each member State to formulate and put in effect a forest fire plan for that State and take such measures as may be necessary to integrate such forest fire plan with the regional forest fire plan formulated by the compact administrators.

"Article IV

"Whenever the State forest fire control agency of a member State requests aid from the State forest fire control agency of any other member State in combating, controlling, or preventing forest fires, it shall be the duty of the State forest fire control agency of that State to render all possible aid to the requesting agency which is consonant with the maintenance of protection at home.

"Article V

"Whenever the forces of any member State are rendering outside aid pursuant to the request of another member State under this compact, the employees of such State shall, under the direction of the officers of the State to which they are rendering aid, have the same powers (except the power of arrest), duties, rights, privileges, and immunities as comparable employees of the State to which they are rendering aid.

"No member State or its officers or employees rendering outside aid pursuant to this compact shall be liable on account of any act or omission on the part of such forces while so engaged, or on account of the maintenance or use of any equipment or supplies in connection therewith: *Provided*, That nothing herein shall be construed as relieving any person from liability for his own negligent act or omission, or as imposing liability for such negligent act or omission upon any State.

"All liability, except as otherwise provided hereinafter, that may arise either under the laws of the requesting State or under the laws of the aiding state or under the laws of a third State on account of or in connection with a request for aid, shall be assumed and borne by the requesting State.

"Any member State rendering outside aid pursuant to this compact shall be reimbursed by the member State receiving such aid for any loss or damage to, or expense incurred in the operation of any equipment answering a request for aid, and for the cost of all materials, transportation, wages, salaries, and maintenance of employees and equipment incurred in connection with such request: *Provided*, That nothing herein contained shall prevent any assisting member State from assuming such loss, damage, expense, or other cost or from loaning such equipment or from donating such service to the receiving member State without charge or cost.

"Each member State shall provide for the payment of compensation and death benefits to injured employees and the representatives of deceased employees in case employees sustain injuries or are killed while rendering outside aid pursuant to this compact, in the same manner and on the same terms as if the injury or death were sustained within such state.

"For the purposes of this compact the term employee shall include any volunteer or auxiliary legally included within the forest-fire-fighting forces of the aiding State under the laws thereof.

"The compact administrators shall formulate procedures for claims and reimbursement under the provisions of this article, in accordance with the laws of the member States.

"Article VI

"Ratification of this compact shall not be construed to affect any existing statute so as to authorize or permit curtailment or diminution of the forest-fire-fighting forces, equipment, services, or facilities of any member State.

"Nothing in this compact shall be construed to limit or restrict the powers of any State ratifying the same to provide for the prevention, control, and extinguishment of forest fires, or to prohibit the enactment or enforcement of State laws, rules, or regulations intended to aid in such prevention, control, and extinguishment in such State.

"Nothing in this compact shall be construed to affect any existing or future cooperative relationship or arrangement between the United States Forest Service and a member State or States.

"Article VII

"The compact administrators may request the United States Forest Service to act as the primary research and coordinating agency of the South Central Interstate Forest Fire Protection Compact in cooperation with the appropriate agencies in each State, and the United States Forest Service may accept the initial responsibility in preparing and presenting to the compact administrators its recommendations with respect to the regional fire plan. Representatives of the United States Forest Service may attend meetings of the compact administrators.

"Article VIII

"The provisions of article IV and V of this compact which relate to mutual aid in combating, controlling, or preventing forest fires shall be operative as between any State

party to this compact and any other State which is party to a regional forest-fire protection compact in another region: *Provided*, That the legislature of such other State shall have given its assent to such mutual-aid provisions of this compact.

"Article IX

"This compact shall continue in force and remain binding on each State ratifying it until the legislature or the Governor of such State takes action to withdraw therefrom. Such action shall not be effective until 6 months after notice thereof has been sent by the chief executive of the State desiring to withdraw to the chief executives of all States then parties to the compact."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GOVERNMENTAL USE OF INTERNATIONAL TELECOMMUNICATIONS

The Clerk called the resolution (S. J. Res. 96) to strengthen the foreign relations of the United States by establishing a Commission on Governmental Use of International Telecommunications.

There being no objection, the Clerk read the resolution, as follows:

Whereas the overseas information program as carried on through the media of telecommunications is of continuing and increasing importance in carrying out and supporting the foreign policies of the United States; and

Whereas in his state of the Union message February 2, 1953, the President asserted the necessity "to make more effective all activities related to international information": Therefore be it,

Resolved, etc., That there is hereby established a commission to be known as the Commission on Governmental Use of International Telecommunications (in this act referred to as the "Commission").

MEMBERSHIP OF THE COMMISSION

SEC. 2. Number and appointment: The Commission shall be composed of nine members as follows:

(1) Five appointed by the President of the United States, of whom at least 1 shall be appointed from the telecommunications industry and at least 1 from the field of education and of whom not more than 3 shall be from the same political party;

(2) Two appointed from the Senate by the President of the Senate of whom not more than one shall be from the same political party; and

(3) Two appointed from the House of Representatives by the Speaker of the House of Representatives of whom not more than one shall be from the same political party.

ORGANIZATION OF THE COMMISSION

SEC. 3. The Commission shall choose its Chairman and Vice Chairman from among its members and shall establish its own procedure.

QUORUM

SEC. 4. Five members of the Commission shall constitute a quorum.

COMPENSATION OF MEMBERS OF THE COMMISSION

SEC. 5. (a) Members of Congress: Members of Congress who are members of the Commission shall serve without compensation in addition to that received for their services as Members of Congress; but without regard to any other provision of law they shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the Commission and reasonable advances may be made to them for such purposes.

(b) Members of the executive branch: Any members of the Commission who may be in the executive branch of the Government shall receive the compensation which he would receive if he were not a member of the Commission, but without regard to any other provision of law they shall be reimbursed for travel, subsistence and other necessary expenses incurred by them in the performance of the duties vested in the Commission and reasonable advances may be made to them for such purposes.

(c) Members from private life: The members from private life shall receive not to exceed $75 per diem when engaged in the performance of duties vested in the Commission, plus reimbursement for travel, subsistence, and other necessary expenses incurred by them in the performance of such duties.

STAFF OF THE COMMISSION

SEC. 6. The Commission shall have power to appoint a Secretary General at a salary of not to exceed $15,000 per annum, and an Assistant Secretary General at a salary of not to exceed $12,500 per annum, and such other personnel in accordance with the Classification Act of 1949, as amended, or to obtain assistance from Government agencies on a reimbursable basis. The Commission is further authorized to employ experts and consultants for temporary and intermittent personal services, but at rates not to exceed $75 per diem for each individual. The Commission is authorized without regard to any other provision of law to reimburse employees, experts, and consultants for travel, subsistence, and other necessary expenses incurred by them in the performance of their official duties and to make reasonable advances to such persons for such purposes.

EXPENSES OF THE COMMISSION

SEC. 7. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, not to exceed $250,000 to carry out the provisions of this act.

REPORT—EXPIRATION OF THE COMMISSION

SEC. 8. (a) Report: On or before December 31, 1954, the Commission shall make a reports of its findings and recommendations to the Congress. It may submit such interim reports as it deems desirable.

(b) Expiration of the Commission: Ninety days after the submission to the Congress of the report provided for in subsection (a) of this section 8, the Commission shall cease to exist.

DUTIES OF THE COMMISSION

SEC. 9. The Commission is directed to examine, study, and report on the objectives, operations, and effectiveness of our information programs, with respect to the prompt development of techniques, methods, and programs for greatly expanded and far more effective operations in this vital area of foreign policy through the use of foreign telecommunications.

POWERS OF THE COMMISSION

SEC. 10. (a) The Commission or, on the authorization of the Commission, any subcommittee or member thereof, shall have power to hold hearings and sit and act at such times and places in the United States and abroad, to require by subpena or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, and to take such testimony, as the Commission or such subcommittee or member may deem advisable. Subpenas shall be issued under the signature of the Chairman of the Commission and shall be served by any person designated by him.

(b) The Commission may authorize the Chairman or the Vice Chairman to make the expenditures herein authorized and such other expenditures as the Commission may deem advisable: *Provided, however*, That when the Commission ceases its activities it shall submit to the Appropriations Committee of the Senate and the House of Representatives a statement of its fiscal transactions properly audited by the Comptroller General of the United States.

(c) The Commission is authorized to secure from any department, agency, or independent instrumentality of the Government any information it deems necessary to carry out its functions under this act; and each such department, agency, and instrumentality is authorized and directed to furnish such information to the Commission, upon request made by the Chairman or by the Vice Chairman when acting as Chairman.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EXTENSION WORK AMONG INDIAN TRIBES AND MEMBERS THEREOF

The Clerk called the bill (S. 3385) to provide for more effective extension work among Indian tribes and members thereof, and for other purposes.

Mr. MARSHALL. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

AMEND SECTION 73 OF HAWAIIAN ORGANIC ACT

The Clerk called the bill (H. R. 5832) to amend section 73 of the Hawaiian Organic Act.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That section 73 (1) of the Hawaiian Organic Act, as amended, be further amended by adding a new proviso to the second sentence thereof to read as follows: *"Provided, however*, That the commissioner shall give to every lessee, sublessee, or permittee under a revocable permit of public lands, being a citizen of the United States, or to any such person who has legally declared his intention to become a citizen of the United States and herefater becomes such, who has, or whose predecessors in interest have, or the combination thereof, occupied said lands for an aggregate period of not less than 10 years, a right to purchase so much of said lands as shall be used for a house lot or for agricultural or business purposes, but not to exceed one-half acre and such adjoining lands as may reasonably be required for a right-of-way to a government road, upon the payment of a fair and reasonable price, which price shall be determined by one or more but not more than three disinterested appraisers to be appointed by the Governor. The term 'predecessors in interest' as applied to a permittee under revocable permit shall be construed to include such permittee, his assignor or his devisor occupying said lands under a lease or a sublease immediately prior to the issuance of the revocable permit. In the determination of such purchase price, the improvements thereon shall be valued at $1, if such improvements were made or purchased by the lessee, sublessee, or permittee. If the commissioner shall deem it to be of public interest, he may substitute in place of such parcel selected by the purchaser public lands of similar character, value and area situated on the lands occupied under said lease or

revocable permit and such purchaser shall pay for the relocation of any improvements thereto. No person shall be entitled to this right of purchase of public lands who has exercised said option under any other lease, sublease, or revocable permit or the combination of both."

SEC. 2. This act shall take effect on and after the date of its approval.

With the following committee amendment:

Strike out all after the enacting clause and insert "That any provision of section 73 of the Hawaiian Organic Act, as amended, or of the Land Laws of Hawaii, as amended, to the contrary notwithstanding, the Commissioner of Public Lands of the Territory of Hawaii, with the approval of the Governor and two-thirds of the members of the Board of Public Lands, in his discretion, may transfer and convey to any applicant who is a citizen of the United States, or who has heretofore legally declared his intentions to become a citizen of the United States, upon his becoming such,

"(1) who upon the date of approval of this act held public lands in the Territory of Hawaii, by lease or revocable permit,

"(2) who on the said date, had, or whose predecessors in interest, or the combination of both, had occupied such land for an aggregate period of not less thn 5 continuous years,

"(3) who while still holding such land by lease or revocable permit, applies for a transfer and conveyance of such public land to himself, and

"(4) who complies with all rules and regulations duly promulgated with regard to such public land,

not more than one-half acre of such land as was in use by the applicant for a house lot or for business purposes, or both, as the case may be, and such adjoining land as may be reasonably required for a right-of-way to a government road, upon the payment of a fair and reasonable price, which price shall be determined by disinterested appraiser or appraisers, but not more than three, to be appointed by the Governor of Hawaii, all improvements thereon made or purchased by the applicant or his predecessors in interest to be valued at $1.

"SEC. 2. Not more than 3 acres of public lands immediately adjacent to any cemetery now in existence may, with the consent of such person or persons, if any, as could qualify under section 1 for the purchase of said land, be sold to the owner or owners of said cemetery. This act, with the exception of paragraphs (1), (2), and (3) of section 1, shall apply to any such sale made to the owner or owners of a cemetery.

"SEC. 3. In the case of an applicant giving his consent to a sale to a cemetery pursuant to section 2, or when the Commissioner of Public Lands shall deem it to be in the public interest, he may substitute in place of the lands used by the applicant, or in place of the portion thereof requested by him, as the case may be, other appropriate public lands of no greater area or value, the applicant to bear the cost of the relocation on the substituted land of any improvements.

"SEC. 4. No sale shall be made hereunder to any applicant who has already acquired public land pursuant to the provisions of this act, or to any applicant whose application is not filed within 2 years from the date of approval of this act, or such shorter period as shall be specified by rule or regulation.

"SEC. 5. The term 'predecessor in interest' includes any individual or individuals, partnership, corporation, or other legal entity, and in the case of an applicant who is a permittee under a revocable permit shall include such applicant occupying under a lease or a sublease immediately prior to the issuance of the revocable permit and the person from whom the applicant acquired such lease or sublease."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to authorize the Commissioner of Public Lands of the Territory of Hawaii to sell public lands to certain lessees, permittees, and others."

A motion to reconsider was laid on the table.

ACQUISITION OF LAND WITHIN NATIONAL PARK SYSTEM

The Clerk called the bill (H. R. 6814) to facilitate the acquisition of non-Federal land within areas of the national park system, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WILLIAMS of Mississippi. Mr. Speaker, reserving the right to object, I would like to have a brief explanation of this bill.

Mr. D'EWART. Mr. Speaker, if the gentleman will yield, this is a bill made necessary for the Park Service to match certain funds that have been given or offered it to acquire land inside of existing parks. They oftentimes have donations of funds to acquire these lands on condition that the Federal Government matches those funds. This legislation is necessary so that the Committee on Appropriations can appropriate the funds necessary to match those that have been donated.

Mr. WILLIAMS of Mississippi. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, in order to consolidate Federal land ownership within the areas of the national park system and to encourage the donation of funds for that purpose, the Secretary of the Interior is authorized to enter into contractual obligations on behalf of the United States for the acquisition of lands and interests in lands within such areas providing for the expenditure of Federal funds in an amount equal to the funds that may be donated for such purposes: *Provided*, That the obligation of Federal funds hereunder shall not exceed $500,000 annually: *Provided further*, That the contractual authorization for each year provided for herein shall remain effective following the end of that year until actually exercised, to the extent that donated funds have been received for that year.

With the following committee amendment:

Page 1, line 6, after "to", strike out down to and including the word "year" on page 2 and insert "accept and to use in his discretion funds which may be donated subject to the condition that such donated funds are to be expended for purposes of this act by the Secretary only if Federal funds in an amount equal to the amount of such donated funds are appropriated for the purposes of this act. There are authorized to be appropriated such funds as may be necessary to match funds that may be donated for such purposes: *Provided*, That the amount which may be appropriated annually for purposes of this act shall be limited to $500,000."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

OLD KASAAN NATIONAL MONUMENT, ALASKA

The Clerk called the bill (H. R. 7912) to abolish the Old Kasaan National Monument, Alaska, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Old Kasaan National Monument, in Alaska, is hereby abolished, and the lands thereof shall hereafter be administered as a part of the Tongass National Forest.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EXCHANGE RIGHT-OF-WAY FOR 6 ACRES ADJOINING PARK

The Clerk called the bill (H. R. 8205) to authorize the conveyance by the Secretary of the Interior to Virginia Electric & Power Co. of a perpetual easement of right-of-way for electric transmission-line purposes across lands of the Richmond National Battlefield Park, Va., such easement to be granted in exchange for, and in consideration of, the donation for park purposes of approximately 6 acres of land adjoining the park.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized to grant and convey to Virginia Electric & Power Co. a perpetual easement of right-of-way for electric transmission-line purposes over, upon, and across fifty-five one-hundredths of an acre of land on the western side of Parker's battery site in the Richmond National Battlefield Park, Va., subject to such terms and conditions as the Secretary may deem desirable, and to accept in exchange therefor the donation of six and fifty-seven one-hundredths acres of land adjoining the Parker's battery area, Richmond National Battlefield Park.

With the following committee amendment:

Page 2, line 4, strike out "donation" and insert "conveyance."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to authorize the conveyance by the Secretary of the Interior to Virginia Electric & Power Co. of a perpetual easement of right-of-way for electric transmission-line purposes across lands of the Richmond National Battlefield Park, Va., such easement to be granted in exchange for, and in consideration of, the conveyance for park purposes of approximately 6 acres of land adjoining the park."

A motion to reconsider was laid on the table.

HAWAIIAN FARM LOAN BOARD

The Clerk called the bill (H. R. 7568) to authorize and direct the Farm Loan Board of Hawaii to convey certain land and to ratify and confirm certain acts of said Farm Loan Board.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That any limitations imposed by section 73 of the Hawaiian Organic Act, as amended (31 Stat. 141), to the contrary notwithstanding, the Farm Loan Board of Hawaii is authorized and directed to convey by quitclaim deed to Martha Kelilkuli, whose residence and post office address is in care of Kahuku Ranch, Kahuku, city and county of Honolulu, T. H., the following described parcel of land, together with buildings and other improvements thereon, subject to the provisos hereinafter set forth:

Lot 14, Puuepa-Kokoiki homesteads, North Kohala, Hawaii, being all of grant 7582 to Ernest K. Kanehailua, Registered Map Numbered 2495, Second Land District. Beginning at a post at the northeast corner of this lot and the southeast corner of lot 18 and on the west side of Ilikini Road, said point being two thousand five hundred twenty-one and three-tenths feet south and three thousand one hundred eighty and five-tenths feet east of Government Survey Trig. Station "Kehoni", as shown on Government Survey Registered Map Numbered 2495, and running by true azimuths:

(1) Three hundred forty-six degrees thirty minutes, six hundred thirty-seven and four-tenths feet along Ilikini Road and lot 13 to a post; (2) seventy-six degrees thirty minutes, three hundred and seventy-eight feet along lot 13 to a post; (3) one hundred forty degrees thirteen minutes thirty seconds, seven hundred nine and eight-tenths feet along the land of Upolu to a post; (4) two hundred fifty-six degrees twenty-six minutes, six hundred ninety-three and seven-tenths feet along lots 21, 20, 19, and 18, to the point of beginning; area seven and one-half acres: *Provided, however,* That said land or any part thereof or interest therein or control thereof shall not, without the written consent of the Commissioner of Public Lands and Governor, be, or be contracted to be in any way, directly or indirectly, by process of law or otherwise, conveyed, mortgaged, leased or otherwise transferred to or acquired or held by or for the benefit of any alien or corporation, or, to or by or for the benefit of any person who owns, holds, or controls, directly or indirectly, other lands or the use thereof, the combined area of which and the land in question exceeds eighty acres: *Provided further,* That these prohibitions shall not apply to transfers or acquisitions by inheritance or between tenants in common. In the event of violation of the foregoing provisions, said land shall forthwith be forfeited and resume the status of public land and may be recovered by the Territory or its successors in an action of ejectment or other appropriate proceedings.

SEC. 2. Sales of land heretofore made by the Farm Loan Board of Hawaii, and deeds covering such sales heretofore executed by any two members of the Farm Loan Board of Hawaii as provided in section 11 of Act 225, Session Laws of Hawaii 1919, and like sections contained in the Revised Laws of Hawaii, for and on behalf of said board shall not be held invalid or void for or on account of want of power to make such sale or deed, and the same are hereby ratified and confirmed to he extent set forth.

SEC. 3. This act shall take effect upon its approval.

With the following committee amendments:

Page 4, line 1, strike out "power" and insert "authority of any such members of said Board."

Page 4, strike out line 5.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REGISTRATION OF COMMUNIST PRINTING PRESSES

The Clerk called the bill (H. R. 9690) to amend section 7 (d) of the Internal Security Act of 1950, as amended.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. VELDE. Mr. Speaker, I ask unanimous consent that a similar Senate bill, S. 2766, be considered in lieu of the House bill.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That section 7 (d) of the Internal Security Act of 1950, as amended (50 U. S. C. 786 (d)), is amended by adding after paragraph (5) the following:

"(6) A listing, in such form and detail as the Attorney General shall by regulation prescribe, of all printing presses and machines including but not limited to rotary presses, flatbed cylinder presses, platen presses, lithographs, offsets, photo-offsets, mimeograph machines, multigraph machines, multilith machines, duplicating machines, ditto machines, linotype machines, intertype machines, monotype machines, and all other types of printing presses, typesetting machines or any mechanical devices used or intended to be used, or capable of being used to produce or publish printed matter or material, which are in the possession, custody, ownership, or control of the Communist-action or Communist-front organization or its officers, members, affiliates, associates, group, or groups in which the Communist-action or Communist-front organization, its officers or members have an interest."

Mr. McCORMACK. Mr. Speaker, I move to strike out the last word.

Mr. Speaker, I just want to make a few observations. I was chairman of the special committee that investigated communism, nazism, fascism, and bigotry in 1934. My committee recommended what is now known as the Smith Act. I introduced legislation to carry out the recommendations of the committee, and for 3 or 4 years I could not get a hearing before the then Committee on the Judiciary on the ground that the recommendation of my special committee violated State rights. I was very happy when it was incorporated in the Smith bill.

My committee also recommended the Foreign Agents Registration Act which became law, and recommended other legislation. I think the time has arrived when we should meet the issue head on and outlaw the Communist Party. We have a bill in here, the effect of which would be to outlaw the infiltration of organizations, and yet we permit the Communist Party to continue to exist. I think the time has arrived when we ought to meet the issue head on and pass a bill outlawing the Communist Party.

Mr. WALTER. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield.

Mr. WALTER. Mr. Speaker, I am very happy to be able to report to the distinguished gentleman from Massachusetts [Mr. McCORMACK] that the subcommittee having under consideration the proposal the gentleman has mentioned will, in all probability, report the Graham bill today.

Mr. McCORMACK. Fine. I am very glad to hear that.

Also, I want to compliment the gentleman from Pennsylvania [Mr. WALTER] because he introduced a bill to outlaw the Communist Party, and also the gentleman from Texas [Mr. DIES]. I also want to compliment my friend, the distinguished gentleman from Pennsylvania, Judge GRAHAM, the chairman of the subcommittee, who in cooperation with the gentleman from Pennsylvania [Mr. WALTER] is taking the leadership in committee and elsewhere of this matter. I hope the bill will be brought out of the committee and be brought before the House before this session is over.

Mr. DONDERO. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman.

Mr. DONDERO. I am very happy to join my friend from Massachusetts [Mr. McCORMACK] in what he has said. I want to report to him that my State of Michigan has already taken the Communist Party off the ballot, which is a step in the direction which the gentleman seeks to follow.

Mr. McCORMACK. May I say that every special committee from the time of my special committee and prior thereto, the Fish special committee down to the Velde committee has found the Communist Party to be an international conspiracy; that it is not a political party in the sense that we think of America political parties, but, as I say, a part of an international conspiracy to conquer the world and enslave all the peoples of the world.

Mr. VELDE. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield.

Mr. VELDE. Mr. Speaker, I want to say to my distinguished friend that I am sympathetic toward his request. I realize this, too, that the Communist Party was declared a conspiracy during the time that the gentleman was majority leader and the Democratic Party was in power. I asked the gentleman why it was that the bill to outlaw the Communist Party was not considered at that time.

Mr. McCORMACK. Is the gentleman asking me why it was not considered then?

Mr. VELDE. Yes.

Mr. McCORMACK. That is water over the dam. We were at war then. The conditions now are entirely different. At least they were somewhat different then. Most people had the hope

then that we could live with the Soviet Union, after the war was over. I was not one of those. I was not one who thought that; but most Americans did. We now know, as a result of our experiences subsequent to the war, that they have not changed one iota.

The gentleman's question is a fair one. It is a difficult one to answer, I realize; but I think the circumstances in 1954 are entirely different from what they were during the war, or immediately following the war. There were some people who thought and hoped that we could live in a world with the Soviet Union, but they now know that we cannot. I never thought we could.

Mr. VELDE. Mr. Speaker, I thank the gentleman for his very frank answer. I have not introduced a bill outlawing the Communist Party because I felt that we ought to give the McCarran-Wood bill a chance to operate, to see whether the situation could be handled under that bill without it being necessary to make it a crime to belong to the Communist Party. But it appears as time goes on that the McCarran-Wood bill does not handle the situation as we Americans would like to have it handled. More and more I am becoming impressed with the necessity of passing a bill to outlaw the Communist Party, as the gentleman has suggested.

Mr. McCORMACK. I think the sentiments expressed by the gentleman from Illinois [Mr. VELDE] represent my own state of mind and my own growing feelings and convictions. I appeared a few months ago before the Subcommittee on the Judiciary in support of such legislation. My feeling and the journey of my mind is pretty much as the gentleman from Illinois [Mr. VELDE] has stated is the journey of his mind. I think the time has now arrived, as the gentleman does, for us to meet the issue head on.

Mr. PRICE. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from Illinois.

Mr. PRICE. Commenting on the statement of the gentleman from Michigan that the State of Michigan has removed the Communist Party from the ballot there, may I point out that back in 1942 there were over 40,000 Communist votes cast on the ballot in Illinois. In 1944 the Communist Party was removed from the ballot of the State of Illinois by action taken under the administration of Gov. Henry Horner.

Mr. McCORMACK. I am glad to get that information. I hope the bill will be reported out and that the House and Senate will act on it before this session of Congress is over.

Mr. RABAUT. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. RABAUT. Mr. Speaker, there is no question but that the subject of communism is and should be an object of universal concern, not only to Members of both Houses of the Congress, but also down to the humblest citizen of our Nation. Both our foreign and our domestic policy is geared to the all-encompassing conflict against communism. Our minds and our senses are alerted to the nature of its cancerous growth. In short, we cannot do enough to check its advance and to stifle its growth. But, despite present moves here to checkmate the spread of communism, it is well to remember that we began, in this House, over a dozen years ago, to curb the advancement of alien concepts and practices, which included communism, as well as other "isms," some of which took a bloody war finally to eradicate.

I speak of the clause, found in every appropriations bill which has emanated from the committee since 1941, in one or another amended forms, which provides that none of the funds available for expenditures under the particular act, shall be used to pay the salary of any person who advocates, or is a member of an organization that advocates the overthrow of the Government of the United States by force or violence. There are other pertinent provisions in this clause, which establish other protective procedures—and none of them are new. Nor is fighting communism something that is relatively new to Members of this House, especially to long-time Members of the Committee on Appropriations.

We ought to continue this fight against communism with an increased vigor and application and with a diminished hysteria.

The section, which has been in every appropriations bill since 1942, follows:

No part of any appropriation contained in this act, or of the funds available for expenditure by any corporation included in this act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this or any other act shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than 1 year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provision of existing law.

The SPEAKER. The question is on the passage of the bill.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H. R. 9690) was laid on the table.

AMENDMENT OF CIVIL AERONAUTICS ACT

The Clerk called the bill (H. R. 8898) to amend section 401 (e) (2) of the Civil Aeronautics Act, as amended.

Mr. TRIMBLE. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

Mr. ASPINALL. Mr. Speaker, I am constrained to object to the request of the gentleman from Arkansas. I feel that this legislation is deserving of consideration at this time.

The SPEAKER. The gentleman from Colorado objects.

Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That section 401 (e) (2) of the act of June 23, 1938, as amended (49 U. S. C. 487 (e) (2); 52 Stat. 987), is amended by adding the following:

"(3) If any applicant who makes application for a certificate within 120 days after the enactment of this section shall show that, from the date of enactment of this section until the date of its application, it or its predecessor in interest, was an air carrier furnishing, within the continental limits of the United States, local or feeder service consisting of the carriage of persons, property and mail, under a temporary certificate of public convenience and necessity issued by the Civil Aeronautics Board, continuously operating as such (except as to interruptions of service over which the applicant or its predecessors in interest have no control) the Board, upon proof of such fact only, shall, unless the service rendered by such applicant for such period was inadequate and inefficient, issue a certificate or certificates of unlimited duration, authorizing such applicant to engage in air transportation between the terminal and intermediate points within the continental limits of the United States between which it, or its predecessor, so continously operated between the date of enactment of this section and the date of its application."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDMENT OF BANKRUPTCY ACT

The Clerk called the bill (H. R. 5796) to amend the Bankruptcy Act to make tax liens of States and their subdivisions valid against trustees in bankruptcy.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That clause (2) of subdivision c of section 67 of the Bankruptcy Act, as amended, is amended to read as follows: "(2) the provisions of subdivision b of this section to the contrary notwithstanding, statutory liens, other than liens for taxes, created or recognized by the laws of any State for debts owing to any person, including any State or any subdivision thereof, on personal property not accompanied by possession of, or by levy upon or by sequestra-

tion or distraint of, such property, shall not be valid against the trustee:".

SEC. 2. (a) The provisions of this amendatory act shall govern proceedings, so far as practicable and applicable, in cases pending when it takes effect; but proceedings in cases then pending to which the provisions of this amendatory act are not applicable shall be disposed of conformably to the provisions of clause (2) of subdivision c of section 67 of the Bankruptcy Act as it existed just prior to the effective date of this act.

(b) This amendatory act shall take effect and be in force on and after 3 months from the date of its approval.

With the following committee amendments:

Page 1, line 6, after "statutory", strike out "liens, other than liens for taxes," and insert "liens."

Page 1, line 8, after "debt", insert "(as distinguished from statutory liens for taxes)."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This completes the call of bills eligible for consideration on the Consent Calendar today.

PRODUCTION FOR THE ARMED FORCES

Mr. ARENDS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 9005) to continue the effectiveness of the act of July 17, 1953 (67 Stat. 177), with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 1, line 8, after "Congress", insert "or until July 1, 1955."

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Senate amendment was concurred in, and a motion to reconsider was laid on the table.

RETIRED MEMBERS OF THE UNIFORMED SERVICES

Mr. ARENDS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H. R. 9302) to permit retired members of the uniformed services to revoke elections made under the Uniformed Services Contingency Option Act of 1953 in certain cases where the elections were made because of mathematical errors or misinformation. I may say this was a unanimous report from our committee, and has been cleared on both sides of the aisle.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

Mr. GROSS. Reserving the right to object, will the gentleman explain very briefly what the bill is?

Mr. ARENDS. I will be very glad to explain this to the gentleman.

This is a unanimous report from our committee. The purpose of the proposed legislation as amended is to provide a 60-day period, after its enactment, in which retired members of the uniformed services who were on the retired list when the Uniformed Services Contingency Option Act of 1953 was enacted, may revoke elections made under that act. Under the proposed legislation, revocations would be limited to cases in which it can be shown to the satisfaction of the Secretary concerned that the election was based on misinformation or mathematical error on the part of the retired member in the computation of the cost of benefits he would receive when such misinformation or mathematical error has resulted in undue hardship. I may say that this will affect only 30 or 40 individuals.

Mr. GROSS. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That retired members of the uniformed services who have elected under section 3 (b) of the Uniformed Services Contingency Option Act of 1953 (Public Law 239, 83d Cong.) to receive a reduced amount of retired pay in order to provide an annuity under such public law may, within 60 days after the date of enactment of this act, revoke such elections. A retired member may not revoke an election under this act if any individual has died who would have been eligible to receive, upon the death of the member, an annuity payable under the election made by him, or if he cannot establish to the satisfaction of the Secretary concerned that he made such election because he was misinformed as to his rights under such public law or because he made a mathematical error in computing the benefits which he would derive under such public law. No retired member who revokes an election under this act shall be entitled to have refunded to him any amounts withheld from his retired pay under such public law prior to such revocation, and he shall not thereafter be permitted to be covered in any way by such public law.

SEC. 2. Terms used in this act shall have the meaning assigned to them by the Uniformed Services Contingency Option Act of 1953.

With the following committee amendment:

Page 1, strike out all after the enacting clause and insert in lieu thereof the following:

"That retired members of the uniformed services who have elected under section 3 (b) of the Uniformed Services Contingency Option Act of 1953 (Public Law 239, 83d Cong.) to receive a reduced amount of retired pay in order to provide an annuity under such public law may, within 60 days after the date of enactment of this act, revoke such elections. A retired member may revoke an election under this act only if he can establish to the satisfaction of the Secretary concerned that he made such election because he was misinformed as to his rights under the Uniformed Services Contingency Option Act of 1953 or because he made a substantial mathematical error in computing the cost of the benefits which he would derive under that act and that such information or error has resulted in undue hardship. The Secretary concerned may revoke an election made by him on behalf of a mentally incompetent member when it is established to his satisfaction that such election has resulted in undue hardship. A retired member whose election is revoked under this act shall have refunded to him a sum which represents the difference between the amount by which his retired pay has been reduced in accordance with his election and the cost of an amount of term insurance which is equal to the protection provided his dependents during the period his election was in effect. A retired member whose election is revoked under this act shall not thereafter be permitted to be covered in any way under the Uniformed Services Contingency Option Act of 1953.

"SEC. 2. Terms used in this act shall have the meaning assigned to them by the Uniformed Services Contingency Option Act of 1953.

"SEC. 3. Payments of the refunds authorized by this act may be made from appropriate current appropriations."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR THE CONVEYANCE OF CERTAIN LANDS TO THE CITY OF MUSKOGEE, OKLA.

Mr. EDMONDSON. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 8983) to provide for the conveyance of certain lands by the United States to the city of Muskogee, Okla., with an amendment of the Senate thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 2, line 18, strike out "bill" and insert "act."

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

The Senate amendment was concurred in, and a motion to reconsider was laid on the table.

AUTHORIZING CENTRAL BANK FOR COOPERATIVES TO ISSUE CONSOLIDATED DEBENTURES

Mr. HOPE. Mr. Speaker, I ask unanimous consent to return for immediate consideration to Consent Calendar No. 467, the bill (S. 3487) to authorize the Central Bank for Cooperatives and the regional banks for cooperatives to issue consolidated debentures, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. McCORMACK. Mr. Speaker, reserving the right to object, and I shall not object, the distinguished chairman of the House Committee on Agriculture conferred with me after I had asked that the bill be passed over without prejudice, and also the distinguished gentleman from Wisconsin [Mr. JOHNSON]. I am for the bill, but I felt, as I said in my colloquy earlier, that because of its importance it should be considered under the regular rules of the House and not by unanimous consent. But I realize we are getting to the close of the session, and if that happens, I realize there is a reasonable probability that it might get tied up in the last minute legislative rush, and not be passed.

Due to the persuasiveness of the distinguished chairman of the House Committee on Agriculture and the gentleman from Wisconsin [Mr. JOHNSON], and recognizing the practical situation myself as a result of my years of experience in this legislative body, I will be glad to see the House take such action on the bill that it will be passed today.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 37 of the Farm Credit Act of 1933, as amended (title 12, U. S. C. 1134m), is hereby amended by substituting the word "paragraph" for the word "section" in the next to the last sentence thereof and by adding thereto the following new paragraph:

"When the Central Bank for Cooperatives and the regional banks for cooperatives shall by resolutions consent thereto, consolidated debentures of the 13 banks for cooperatives may be issued in the manner and form and on terms and conditions approved by the Farm Credit Administration. There shall be a debenture committee comprised of the presidents of the 12 regional banks for cooperatives and the chief executive officer of the Central Bank for Cooperatives which shall exercise with respect to such consolidated debentures powers and functions equivalent to the powers and functions of the Bond Committee of the Federal Land Banks as authorized by the Federal Farm Loan Act, as amended, and shall operate in accordance with the provisions of law applicable to such Bond Committee (title 12, U. S. C., 883-886). Such debentures shall be made payable at any of the banks for cooperatives and may be made payable at any Federal Reserve bank or banks designated on the fact of the debentures. Such debentures shall be the joint and several obligations of the Central Bank for Cooperatives and of the regional banks for cooperatives, and each of such banks is hereby authorized and directed to take such action as is necessary to become obligated for such debentures. The debentures shall be secured by collateral which shall be at least equal in value to the amount of debentures outstanding and which shall consist of cash, direct obligations of the United States, or notes or other obligations discounted or purchased or representing loans made under sections 34 and 41, as amended (title 12, U. S. C., 1134j, 1134c). The Farm Credit Administration shall appoint a custodian or custodians of such collateral who shall have power subject to such rules and regulations as the administration may prescribe to approve and accept substitutions of collateral. The total amount of such consolidated debentures plus any outstanding individual debentures of the Central Bank which may be issued and outstanding at any time shall not exceed 8 times the capital and surplus of the central and regional banks for cooperatives. The provisions of law made applicable by the preceeding paragraph to the preparation and issue of debentures by the Central Bank for Cooperatives shall govern the preparation and issue of debentures under this paragraph and they shall be signed by the Governor of the Farm Credit Administration and attested by any deputy governor. Insofar as applicable, the provisions of the Federal Farm Loan Act, as amended, relative to the call for additional security and failure of any bank to pay its proportion of interest or principal shall apply to the consolidated debentures of the banks for cooperatives. Debentures issued under the provisions of this act by banks for cooperatives shall be a lawful investment for all fiduciary and trust funds, and may be accepted as security for all public deposits."

SEC. 2. The last sentence of paragraph 7 of section 5136 of the Revised Statutes, as amended (title 12, U. S. C., 24), is hereby amended by striking the words "Central Bank for Cooperatives" and inserting in lieu thereof the following: "thirteen banks for cooperatives organized under the Farm Credit Act of 1933, or any of them."

SEC. 3. Section 41 of the Farm Credit Act of 1933 (12 U. S. C. 1134c) is amended by adding at the end thereof the following: "Notwithstanding the foregoing or the provisions of section 34 or 38, no loan shall be made by any bank for cooperatives or by the Central Bank for Cooperatives for the purpose of financing the construction of broiler-growing facilities, the purchase of chicks, or the purchase of feed to be used primarily in the production of broilers. The said banks shall take reasonable precautions to avoid making loans which are likely to result in increased broiler production."

With the following committee amendments.

Page 3, line 9, change the word "central" to "Central."

Page 4, lines 5 to 15 inclusive, strike out all of section 3.

The committee amendments were agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING CONSTRUCTION OF NAVAL VESSELS

Mr. ARENDS submitted a conference report and statement on the bill (H. R. 8571) to authorize the construction of naval vessels, and for other purposes.

HOUR OF MEETING TOMORROW

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at 11 o'clock tomorrow morning.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

COMMITTEE ON THE JUDICIARY

Mr. REED of Illinois. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary may have until midnight tonight to file sundry reports.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

ALLOWING SUITS FOR RECOVERY OF TAXES IN DISTRICT COURTS

Mr. KEATING submitted a conference report and statement on the bill (S. 252) to permit all civil actions against the United States for recovery of taxes erroneously or illegally assessed or collected to be brought in the district courts with right of trial by jury.

OUR PRIMARY NATIONAL INTEREST IS LATIN AMERICA

Mr. SMITH of Wisconsin. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. SMITH of Wisconsin. Mr. Speaker, the revolution that broke out in Guatemala a few weeks ago served to move Latin America from the travel section to the front page of our newspapers. This conflict has long been brewing; it was not unexpected by those who have been following events south of the border. Even so, we were surprised to awake one June morning to discover that Guatemala, in our hemisphere and just a few hours flying time from the Panama Canal and the United States, had become a grave danger to the Nation's security against aggressive international communism.

Do the Communists really have a plan for war in the Americas? And if so, what are we doing to stop their attempt to disturb the peace and cooperation of this hemisphere?

There are some who argue that Latin America can never be a major danger to us. They reason that the area is too near to us and too remote from Communist power to be vulnerable to a Korean-type aggression. Yet Communist influences, while they may not burst upon us in open military conflict as in Korea, can seep in and be just as dangerous as outright military action.

One pattern of infiltration of this type can readily be traced in Guatemala. In 1944 the Guatemalan people revolted against a dictator. When it came time to organize a government of their own, however, the leaders of the revolt were divided by old rivalries and differences of approach to basic problems. None had ready a program of action. Into this situation came the Communists, highly organized and strictly disciplined. They arrived armed with a plan and a detailed procedure for carrying it out. The new president turned to them, for his other support was hopelessly divided. Before long, Communists held key posts in labor unions, the agrarian reform program, the government-controlled radio station and newspaper.

We all remember the flurry of editorial warnings resulting from the spotlight thrown on the Guatemalan situation at the Caracas Conference in March of this year. More recently there was a great commotion as a result of the armament shipment to Guatemala from Red Poland. Once again the headlines reverted to the small Central American republic as revolt flared up in the country.

This widespread publicity might lead some to believe that Guatemala is the only source of danger to the hemisphere. Certainly the situation in Guatemala was and perhaps still is a serious one. But Communist efforts to penetrate Latin America extend far beyond Guatemala and they go on day and night.

Throughout Latin America, Communist Party membership is estimated at around 200,000. It has been on the decline since 1947. Nevertheless, in the latest elections in Latin America, the Communist Parties polled about 1 million votes, indicating that many who do

not belong to the parties still support the Communists. This is an extraordinary figure when it is recalled that the highest vote ever polled by the Communist Party in the United States, in 1932, was only about 103,000.

We can ill afford to ignore the dangers of Communist infiltration in Latin America. The loss of this region or any part of it to freedom is unthinkable. We share with these republics to the south too many common ideals, needs, and interests. So many, in fact, that it is not an exaggeration to say that the Western Hemisphere has a common destiny.

As a former member of the Subcommittee on Latin America of the Foreign Affairs Committee of the House, I have traveled throughout Latin America and continue to maintain my interest in the area. I firmly believe that while we differ in language and customs, our ideals and aspirations are similar. The same belief in freedom and national independence that inspired Jefferson and Washington also motivated such great Latin American liberators at San Martin and Bolivar. Our political systems vary, but freedom is a goal which binds us all.

It was this goal which kept the nations of the hemisphere intact during World War II. How important the tie is to us was dramatized by the economic and strategic interdependence, that was evident during the conflict. At that time the Latin American nations filled unstintingly a desperate need in this country for raw materials needed for the war. And they joined with us in the military defense of the hemisphere. Some of their forces fought side by side with ours on battlefields across the seas. Bases in their countries proved to be vital jumping-off places and guard stations against enemy invasion.

Prior to the Guatemalan difficulties, it was easy to overlook the fact that this military interdependence continues in time of cold war as well as hot war. But now is a good time to remember that the Panama Canal, America's lifeline between the Atlantic and Pacific Oceans, lies in the midst of the 20 American Republics, and that more than one-half of our Latin American neighbors are geographically situated in the Caribbean or Gulf of Mexico area, a zone whose defense is indispensable to our security.

A situation such as existed in Guatemala presents a grave threat to the cooperation on this hemisphere. Fortunately that situation has improved. But it was a menace to the security and well-being of this Nation and the other Republics as well. What can we do to prevent a repetition or an extension of the Guatemalan situation? What can we do to bolster the common resistance of the Americas to the evil which is present? The events that have transpired in Guatemala emphasize the need to give constant attention to the relationships which we share with the republics to the south.

Some steps have already been taken. We have established a continuing mutual defense system with eight Latin American countries, and negotiations are going forward with others. Under this program, we furnish equipment to their armed forces and train military personnel in the methods of modern warfare. This program puts teeth into certain treaties which bind all the American republics to cooperate to end war in the hemisphere and to act jointly to stop aggression from entering it. These are encouraging evidences of the development of sound inter-American mechanisms for the defense of the hemisphere.

But military preparation alone will not halt the spread of communism. The fact is that communism feeds on certain conditions which exist in the Americas. And if we would eradicate communism, we must work together to eliminate those conditions. A look at the health and literacy statistics for Latin America is shocking. Life expectancy in that region averages less than 45 years. Whereas adult illiteracy in the United States is about 3 percent, we find such figures as 70 percent for Nicaragua, 44 percent for Colombia, 72 percent for Bolivia, and 45 percent for our nearest neighbor, Mexico.

The economic and social ills which rack many of our sister republics can no longer be ignored. The glowing promises presented by Communists could seem appealing and they are to those who are offered no alternative.

Let us, then, keep our military alliances in readiness. But at the same time, let us attack the problem at its roots.

Milton Eisenhower, on his return from Latin America, where he traveled as the President's personal representative, reported to the President:

> Economic improvement is the greatest single desire of the leaders and peoples of Latin America. And economic cooperation is without question the key to better relations between the United States and the nations to the south.

This opinion was substantiated at the Caracas Conference in March. At that meeting, the Latin Americans pointed out the immense obstacles in the way of their economic development. They wanted a hemispheric consideration of means for overcoming those obstacles.

I believe that there are ways in which we can be of help—not with new giveaways, not with irritating charity, but ways which will not only help the Latin Americans but ourselves as well. The day of the fantastic theory that friendship could be bought with handouts is over and not a moment too soon. We have come close to alienating the goodwill of the world by prolonging economic aid long beyond the time of its absolute necessity.

There are sound ways in which we can help Latin America and be helped in return. And these possibilities ought to be explored without delay.

The health of the economies of most Latin American countries is largely linked with the export of a single, or perhaps two, commodities. In Cuba it is sugar, in Bolivia tin, in Venezuela petroleum. Any sudden change in the world price of these commodities is in itself enough to cause a panic within the producing countries.

The Latin Americans are trying to get away from this single-commodity setup. But to do so, they must undertake broad programs of economic development. They need roads and railroads and improved water transportation to stretch to still untapped resources. They need powerplants as a base for industries so that they may diversify their production. These things take capital. Until now, capital accumulation has been dependent upon surpluses from the sale of their export commodities in the world markets as well as on loans from abroad, particularly from this country. Private investment of United States capital in our neighboring countries has been substantial. At the beginning of 1953, about $7 billion was invested in that region, more than in any other region of the world.

Only the most rabid nationalists and Communist - inspired Yankee haters would deny that these investments have greatly aided the development of the Latin American economies. Many fair-minded Latin American economists, however, point out that private capital from abroad has tended to gravitate to industries producing commodities readily salable abroad for dollars so that a return can be realized on the investment. Private foreign investment, in short, has gone heavily into raw-material production and mining development. These have been on the whole very beneficial investments and a continuation and expansion of them is highly necessary and desirable, both for ourselves and for the Latin Americans. But if such risk taking is to be stimulated to the advantage of both lender and borrower, it must be supplemented by other types of investment, particularly in roads, hydroelectric plants, port facilities, and similar undertakings. The problem is, From whence is capital to come for these investments since they are of a kind that are not generally financed by private capital?

Much of it, of course, will be provided by credit facilities in the Latin-American countries themselves. At the present rate of development, however, these countries are unable to satisfy the need for capital of this kind. One possible supplementary source—and one to which many Latin American leaders look—is the Export-Import Bank of the United States. Since 1934 the bank has authorized credits amounting to more than $2 billion to practically all of the southern Republics. These are not gifts. They are long-term loans, which are paid back with interest, and on which the default rate has been infinitesimal. They enable the receiving country to undertake major projects of development, the payment for which can be spread over a long period of time. The procedure involved is much like a private citizen's purchase of a house or an automobile.

In their desire to raise their standards of living, the Latin Americans are counting on our continuing and facilitating the flow of capital from this source. The value of these loans to them as well as to us goes without saying. They help to establish the basic facilities without which industry and trade cannot flourish. They serve to stimulate the flow of private foreign capital, thus encouraging

private enterprise, both in Latin America and the United States.

In this respect it is well to remember that we have a very flourishing trade with Latin America and that it is very much a two-way street. In 1953 they purchased more than 50 percent of imports from us and these purchases amounted to $6.4 billion. That is an enormous volume of sales and it means jobs and profit for thousands of Americans. I have examined what this trade means to my own State of Wisconsin, and found the facts very revealing.

Wisconsin, as the Members of the House know, has more dairy cattle than any other State, and leads the country in the production of dairy products. According to the Department of Agriculture, Latin America last year purchased more than 48 percent of the almost 6 million pounds of cheese the United States exported. Of the total United States export of milk products, like condensed and evaporated milk, Latin America took about one-third. Latin America also bought approximately two-thirds of all the butter sent abroad.

Latin America's purchasing power affects Wisconsin in still another way. My State manufactures many commodities which are used in the production of export goods: farm machinery, road machinery, automobiles and accessories, machine parts, bolts, rivets, batteries, electric motors. The list is too long to be itemized here. Each of these items that finds a customer in Latin America, increases the prosperity of the citizens of Wisconsin. In a similar manner, other States feel the benefits of their trade and the entire economy of the Nation is stimulated by this enormous annual sale of over $6 billion worth of products in Latin America. Furthermore, Latin America's rate of population growth, 2.5 percent annually, one of the largest in the world, promises to make that region an expanding market for consumer goods. The total population of Latin America is already greater than that of the United States.

In the fall, Latin American delegates are scheduled to meet with delegates from the United States to discuss our economic problems. I hope that we will recognize the need to stabilize our trade policies toward Latin America and to facilitate the granting of loans so vital to the development of our sister republics. The citizens south of our border are not content to live on 20 cents a day as they did in the past. In our own self-interest, both political and economic, as well as in the interest of the hemisphere, we must take cognizance of the real grievances of these people and cooperate with them through their governments in finding a solution to the problems which confront them. A poverty-stricken, illiterate populace is not a fertile basis on which democracy and private enterprise can flourish.

In this hemisphere, we still have a chance to demonstrate the power of free economies and free societies to serve the needs of their citizens far better than any other system. But we will be able to do so only if we work cooperatively, continuously and cordially with the other republics of the Americas.

In all of our relationships with our friends in Latin America it must be understood that the United States seeks no particular advantages, social or economic. We are sister republics on the same level, each a sovereign nation dedicated to the cause of human freedom in the Western Hemisphere and throughout the world.

On that basis we can all move forward together with the high expectation of better standards of living for all of our people and for continued hemispheric solidarity.

WEST VIRGINIA DISASTER

Mr. BAILEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. BAILEY. Mr. Speaker, I have asked for this time in order to tell my colleagues that the Office of the United States Army Engineers has notified me that the State of West Virginia has been visited by another disastrous flash flood. This morning at 6 o'clock the city of Ridgeway, a city with a population of approximately 6,000, was practically devastated. Fourteen bodies have been recovered and 20 people are still missing. A number of houses have been destroyed. The extent of loss of life and property cannot be determined at this time because all communications have been cut off. The city is without water. I am calling the attention of my colleagues of the House to the fact that the White House has been alerted and the Army engineers and the Red Cross are on the job. I remind my colleagues of the need for prosecuting the program started recently by the chairman of the Committee on Agriculture on upstream development. This is one of those cases which could have been prevented by the kind of work provided for in that program.

MEMORIAL TO THE LATE HONORABLE ROY O. WOODRUFF

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, on Sunday, June 27, 1954, in the First Presbyterian Church, Bay City, Mich., there was formally presented by Mrs. Roy O. Woodruff, a memorial to her husband, the late Congressman from the 10th Congressional District of Michigan. The ceremony, though brief, was beautiful. Mr. Woodruff and his wife were residents of Bay City, in the 10th Congressional District, throughout their married life, and for many years were faithful members of the church. Mr. Woodruff's congressional service, during the 34 years of his tenure, was of a most outstanding and distinguished character. He was also a veteran of the Spanish-American War.

The memorial has been placed in the chapel entrance of the church and is an artistically designed bulletin board, with bronze plaques, at top and bottom of the board, appropriately inscribed.

The top inscription—surmounted by the cross—reads as follows:

Let your light so shine before men that they may see your good works and give glory to your Father who is in heaven. (Matthew 5: 16.)

The bottom inscription reads thus:

Given in memory of Hon. Roy Orchard Woodruff, March 14, 1876–February 12, 1953, by his wife, Daisy Fish Woodruff.

The presentation of the memorial was made by Mr. Carl H. Smith, prominent attorney of Bay City, and lifelong friend of the late Congressman. His remarks were of an intimate and moving character.

The formal acceptance of the memorial was made by the Reverend Frederick A. Roblee, pastor of the church, and concluded by the following beautiful prayer delivered by him:

Almighty God, who dost enlighten the minds of Thy servants with the knowledge of Thy truth, strengthen now Thy church we pray Thee. May all who pass this place be inspired by the words of the Lord Jesus which are here inscribed, "Let your light so shine before men, that they may see your good works and give glory to your Father who is in heaven," and by the memory of this statesman who served his country so long and faithfully.

O Thou who art the Creater and lover of all men, by whom all souls do live: We bless and praise Thee for all that was pure and true, noble and strong, in the life commemorated this day; for the example of faith in God and in men which he has left; and for the assurance we have, through Christ, that he has entered into eternal glory.

Now unto Him that is able to do exceedingly abundantly above all that we ask or think, according to the power that worketh in us; unto Him be glory in the Church by Jesus Christ, throughout all ages, world without end. Amen.

Thereupon, Mrs. Woodruff, briefly but fervently, expressed the deepest appreciation, speaking as follows:

I am very much pleased with this lovely memorial for my husband.

I trust it will prove as useful and helpful to the church as Mr. Woodruff was to Bay City and the rest of the 10th district, which he represented in Congress so many years.

Thank you all for your kind cooperation, and especially Dr. Roblee, who was helpful in making my dream a reality in the selection of something that would be useful and appropriate for the church.

This memorial, artistically conceived and wrought, constitutes a distinctive adornment for the church, and a constant and fitting reminder of the eminent virtues of him in whose honor it stands.

I know that the Members of this body who served with Mr. Woodruff, and who are fully cognizant of his sterling worth and patriotic and highly useful public service—as well as the newer Members who have come to understand all this—will be very glad to learn of the memorial and the ceremonial attendant upon its presentation and acceptance.

NINETEEN HUNDRED AND FIFTY-FOUR NATIONAL AWARD TO LEE METCALF

Mr. JOHNSON of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. JOHNSON of Wisconsin. Mr. Speaker, as a conservationist, I am proud to call the attention of my colleagues to the honor just bestowed upon my colleague from the First District of Montana [Mr. METCALF]. As you know, five great national conservation organizations have cited Mr. METCALF for distinguished service to conservation.

Eighty conservation leaders applauded as Bernard DeVoto, Pulitzer prize-winning author, presented the bronze plaque on behalf of the Wildlife Management Institute, National Wildlife Federation, Izaak Walton League of America, National Parks Association, and the Wilderness Society.

Mr. METCALF was cited as a man whose alert and continuing work in the Nation's Capital has won him widespread respect and admiration. By virtue of his profound interest and comprehensive understanding of conservation and its objectives and problems, he has during his first term in office as a Member of the House of Representatives emerged as a defender of the principles of better management and wise use of natural resources for the benefit of all of the people.

The organizations also noted that Mr. METCALF was a foremost leader in what they termed "successful actions that turned aside attempts by those who chose to overlook the fundamental privileges of all Americans in the national forest lands in order to obtain special concessions for minority groups."

Although I have only been in Congress since January, I am proud to have been present and voted with him in this fight.

I append to my remarks the citation which accompanied the plaque awarded to our distinguished colleague:

NINETEEN HUNDRED AND FIFTY-FOUR NATIONAL AWARD TO LEE METCALF FOR DISTINGUISHED SERVICE TO CONSERVATION

LEE METCALF'S alert and continuing work in the Nation's Capital has won him widespread respect and admiration. By virtue of his profound interest and comprehensive understanding of conservation and its objectives and problems, the recipient has, during his first term of office as a Member of the House of Representatives of the United States, emerged as a defender of the principles of better management and wise use of natural resources for the benefit of all the people. Among his many achievements in attaining an enviable record in the 83d Congress, he was a foremost leader in successful actions that turned aside attempts by those who chose to overlook the fundamental privileges of all Americans in the national forest lands in order to obtain special concessions for minority groups; he sponsored legislation that would make possible improved management of public-domain lands; and he directed the attention of Congress to the diversion of duck stamp funds while appealing for adequate appropriations with which to fulfill the duties and responsibilities of the United States Fish and Wildlife Service. It is in gratitude for this outstanding public service and in appreciation of his accomplishments that this national award and bronze plaque is presented to Representative LEE METCALF, of Montana, by the undersigned national conservation organizations.

IZAAK WALTON LEAGUE OF AMERICA.
NATIONAL PARKS ASSOCIATION.
NATIONAL WILDLIFE FEDERATION.
WILDERNESS SOCIETY.
WILDLIFE MANAGEMENT INSTITUTE.

Mr. Speaker, I ask unanimous consent that the gentleman from Texas [Mr. BROOKS] may extend his remarks in the RECORD following my remarks.

The SPEAKER. Is there objection?

There was no objection.

Mr. BROOKS of Texas. Mr. Speaker, I too was very pleased to note that five national conservation organizations cited the gentleman from Montana [Mr. METCALF], for the distinguished service he has rendered in behalf of conservation during this 83d Congress.

Mr. METCALF has advocated a sound program of public-land management, a program of multiple use not only for this generation but for the future. He has maintained that full consideration should be given to all uses of public lands—including watershed conservation, timber production, mining, recreation, wildlife and grazing—instead of to just one or a few.

He feels, as I do, that only through maximum utilization of our great natural resources can we guarantee for future generations in this country the public benefits of bountiful natural resources.

To implement this program of full utilization of our natural resources, he has introduced H. R. 6081, amending the Taylor Grazing Act, and establishing multiple-use advisory boards on which each important use of public lands would be represented. Conservationists have hailed this bill as a step toward maximum use of our natural resources—a Federal policy since the days of Grover Cleveland and Theodore Roosevelt.

COLORADO RIVER UPPER BASIN PROJECTS

Mr. HOSMER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HOSMER. Mr. Speaker, a solid front of unanimous opposition to pending congressional bills, S. 1555, H. R. 236, and H. R. 4449, for the Colorado River Upper Basin projects is being registered by those affected.

An avalanche of resolutions from many county, city, and community administrative bodies have been received by our California congressional delegation.

The statewide opposition to the proposed billion dollar nonliquidation tax subsidy, threatening our rightful share of Colorado River water, has been supplemented by telegrams and letters from recognized agricultural, labor, financial, property and taxpayers organizations.

The list recorded to date includes:

City Councils of Anaheim, Beverly Hills, Burbank, Calexico, Calipatria, Chino, Compton, Fontana, Fullerton, Glendale, Hemet, Holtville, Long Beach, Los Angeles, Ontario, Pasadena, Perris, San Diego, San Jacinto, San Marino, Santa Ana, Santa Monica, Torrance, and Upland.

The Los Angeles and Orange County Board of Supervisors, and the County Supervisors Association of California Board of Directors; Southern California Council of the California State Chamber of Commerce, California State Grange, Los Angeles Central Labor Council, California Industrial Union Council, CIO, Coachella Valley Water District, Colorado River Board of California, Imperial Irrigation District, Brawley Chamber of Commerce, Los Angeles Department of Water and Power, Metropolitan Water District of Southern California, California Taxpayers Association, Property Owners Association of California, Railroad Brotherhoods' Joint Legislative Council of California, Rainbow Municipal Water District in San Diego County, and San Diego County Water Authority.

The action by the County Supervisors Association of California Board of Directors, with every county in the State officially represented by the board's action, presents a united defense against the proposed bills which threaten California's rightful share of Colorado River water.

California's agricultural, industrial, and population growth is rooted in water and we must protect its source to meet our present and future expansion and employment—

Said Roger Jessop, president of the association, after passage of the resolution.

The resolution was introduced by Supervisor Willard Smith, of Orange County, and seconded by Supervisor David W. Bird, of San Diego County. It reads as follows:

Whereas the County Supervisors Association of California has consistently opposed legislation injurious to the welfare of the citizens of this State and the Nation; and

Whereas the Colorado River upper basin billion-dollar tax-subsidy project bills (S. 1555, H. R. 236, and H. R. 4449), now pending before the Congress, would inflict on all American taxpayers an unjustifiable new burden; and

Whereas, for California as a whole, it would add $93,200,000 to the State's $25,443,600,000 share of the present $273 billion national debt; and

Whereas the economy of the Nation, the State of California, and every county therein would be seriously impaired by these costly and highly controversial proposals; and

Whereas this pending legislation calls for drastic changes in existing Federal water policy with the construction of an Echo Park Dam, which would flood a considerable portion of the Dinosaur National Monument in Utah; and

Whereas 80 years of a sound conservation policy would be broken and there would be created a dangerous precedent of like-invasion of all our great National and State parks; and

Whereas the County Supervisors Association of California is familiar with the organization, functions, activities, and program of the Colorado River Board of California

in its representation of California in connection with matters relating to the Colorado River system; and

Whereas the State of California has a vital interest in the waters of the Colorado River system and said Colorado River Board was authorized and created and provided for by the legislature of the State of California as an agency to protect the interests of the State of California in and to the waters of the Colorado River system: Now, therefore, be it

Resolved, That the board of directors of the County Supervisors Association of California do hereby express our confidence in the Colorado River Board of California and supports said board's expressed opposition to this proposed legislation and authorizes the secretary of this association to mail copies of this resolution to all California Members of Congress.

But the opposition to these bills is national as well as local. Nationally these bills are opposed by the Advisory Board on National Parks, Historic Sites, Buildings and Monuments, National Parks Association, Wilderness Society, Izaak Walton League of America, Sierra Club, National Wildlife Federation, National Parks Magazine, National Council of State Garden Clubs, and Wildlife Management Institute. Also the Engineers Joint Council representing among others the American Society of Civil Engineers, American Institute of Mining and Metallurgical Engineers, American Society of Mechanical Engineers, and the American Water Works Association.

These pump-priming measures would inflict on all American taxpayers an unjustifiable new burden, and for California as a whole it would add $93,200,000 to the State's $25,443,600,000 share of the present $273 billion national debt.

This legislation calls for drastic changes in the existing Federal water policy with the construction of an Echo Park Dam.

As a result 80 years of a sound conservation policy would be broken and there would be created a precedent of like invasion of all our great National and State parks.

TRIBUTE TO GEN. CARLOS P. ROMULO

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to include as a part of my remarks an editorial appearing recently in the New York Times.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, the events in southeast Asia are leading to a climax. Whatever arrangements may be made in Geneva they will only serve to help lead to that climax. It is of utmost importanct to us to see to it that we strengthen our friendship with the peoples of that region and convince them of our sincerity as their friends and allies.

That is what we are doing in the Philippines. This session of Congress has so far approved a number of measures designed to show the Filipino people that we are grateful to them for the loyalty that they showed democracy in the last war and for their determination to stand up and be counted whenever democracy is threatened as they did when they sent their troops to Korea. They have a new President, Ramon Magsaysay, whose record as a guerrilla leader during the last war has won our admiration. His 6-month administration as President has served to enhance our respect and regard for him.

That he should have had the wisdom to send to Washington as his special and personal envoy our former colleague, Gen. Carlos P. Romulo, to work for the measures that we have approved shows that President Magsaysay knows how to choose the man who can get things for the Philippines in the United States. We have an abiding affectionate regard for General Romulo in this country. We not only respect him, but have a real affection for him. His war record is a record of loyalty and courage. His work in the United Nations for democracy has stamped him as one of the world's leading statesmen. Whenever we see him on the floor of the House we see in him not only a former colleague but a true soldier of democracy who in war as well as in peace can be counted upon to uphold and defend the democratic ideals of freedom and human dignity.

With the unanimous consent of the House, I insert an editorial of the New York Times of July 16 entitled "Gains for the Philippines" and which pays a well-deserved tribute to General Romulo:

GAINS FOR THE PHILIPPINES

President Eisenhower has signed a proclamation making effective, as of July 4, an 18-month extension of our reciprocal free trade with the Philippines. Congress had authorized this step and a similar measure has been approved by the Philippine Legislature. The purpose of the extension is to provide a period in which further study can be made of Philippine-American trade relationships, looking to possible revision of the basic trade act. The American members of a panel to make this study have already been named and they are distinguished economists and technicians. It is now to be hoped that Manila can quickly name men of equal caliber and that the study can begin at an early date.

The free-trade extension is the final step in a series of legislative and administrative moves over the past 5 months that have been designed to strengthen Philippine economy and to cement Philippine-American bonds. These include the Philippine Traders Act, which is a matter of simple fair play for businessmen, the extension of the Rogers Act, which provides medical benefits for Filipino veterans of our joint military campaigns, the extension of the War Prisoners Claims Act, which will benefit some 70,000 Filipinos who were prisoners, and the vitally important implementation of the United States-Philippines Mutual Defense Pact.

These things have been done without fanfare and without any great controversy precisely because there is a mutality of interest between ourselves and the Filipinos and much good will on both sides. Part of this stems from the personality of Ambassador Romulo, who came to this country as the personal representative of President Magsaysay to work for the adoption of these measures. He is a good and hard-working representative of a good and hard-working President, and the combination has paid dividends that can accrue both to his country and to ours.

SPECIAL ORDER GRANTED

Mr. MEADER asked and was given permission to address the House for 10 minutes today, following the special orders heretofore entered.

BAD DROUGHT CONDITIONS IN SOUTHWEST

Mr. EDMONDSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. EDMONDSON. Mr. Speaker, although it has not received the publicity of last year's drought condition throughout the Nation, there are many indications that the drought situation in the Southwest is already worse in many areas than it was in 1953.

I have here a letter received this week from Cherokee County, Okla., in which the county agent reports the situation critical at present and he feels it will become progressively worse if drought continues.

I have a telegram just received this morning from Muskogee County stating:

Disastrous drought condition. Need immediate drought relief. Pastures and all feed dried up. Farmers selling foundation herds.

These conditions, I believe, are prevalent in many States of the Southwest.

Just Saturday the Senate passed the bill S. 3339, designed to provide immediate additional loan funds to meet this situation. Similar bills have already been introduced on the House side by the gentleman from New Mexico [Mr. DEMPSEY] and the gentleman from New Mexico [Mr. FERNANDEZ] and I am today introducing a similar bill. I hope the House will take action to meet this problem as quickly as possible.

SUPPLEMENTAL APPROPRIATION BILL, 1955

Mr. TABER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the immediate consideration of the bill (H. R. 9936) making supplemental appropriations for the fiscal year ending June 30, 1955, and for other purposes; and pending that motion I ask unanimous consent that general debate continue for 2 hours, to be equally divided between the gentleman from Missouri [Mr. CANNON] and myself.

Mr. CANNON. Mr. Speaker, reserving the right to object, will the gentleman modify his request to make it not to exceed 2 hours.

Mr. TABER. Yes, I will. Mr. Speaker, I so modify my request.

Mr. CANNON. In that event if debate is sooner concluded we can proceed to a reading of the bill.

Mr. TABER. Yes, but I wish to state at this time that we have been unable to obtain the rule that we must have today

for the consideration of certain items in the bill, and the Rules Committee does not meet this afternoon. Because of this we will not read too far in the bill today.

Mr. CANNON. But you will conclude general debate?

Mr. TABER. Yes.

Mr. CANNON. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. The gentleman from New York [Mr. TABER] asks unanimous consent that general debate continue not to exceed 2 hours, to be equally divided between himself and the gentleman from Missouri [Mr. CANNON].

Is there objection?

There was no objection.

The SPEAKER. The question is on the motion.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 9936, with Mr. ALLEN of Illinois in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the consent request just granted, the gentleman from New York [Mr. TABER] will be recognized for so much of 1 hour as he may use and the gentleman from Missouri [Mr. CANNON] for so much of 1 hour as he may use.

Mr. TABER. Mr. Chairman, I yield myself 8 minutes.

Mr. Chairman, this bill involves a total of recommendations from the budget of $1,959,000,000. The committee bill as reported calls for the appropriation of $1,194,188,079. There are some routine items for the legislative and the judiciary and there are a few items for State, Commerce, and Justice, and some for Treasury.

The Department of Labor, and Health, Education, and Welfare, has been provided with $95 million; Agriculture, $6½ million; Interior $17,496,000; independent offices $388,471,000; military construction, $571,600,000; and emergency program activities $69,295,000.

When the bill is read for amendment an opportunity will be afforded for discussion insofar as amendments that may be offered are concerned. The committee has worked very hard upon these items, and I believe it has done a good job. It is one of the most difficult things in the world to handle a supplemental bill in the last days of a session.

I hope when the reading of the bill for amendment has been concluded it will receive the approval of the Congress.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. TABER. I yield to the gentleman from West Virginia.

Mr. BAILEY. Are there any provisions made for supplemental money to implement a change in public laws having to do with impacted school districts by dropping the absorption provision?

Mr. TABER. There is nothing in here that relates to that particular item, if I remember the situation correctly. I would rather yield to the gentleman from Idaho [Mr. BUDGE] to answer that question.

Mr. BUDGE. May I ask what the question was?

Mr. TABER. The question is whether there are any provisions in the bill that would remove some restrictions upon impacted school districts. I understood there were no provisions relating to school districts in here. There was nothing submitted, if I remember correctly.

Mr. BUDGE. There was nothing to my knowledge. I know of nothing in the bill that relates to impacted school districts.

Mr. TABER. That would be legislation, in any event.

Mr. BUDGE. I would think so, but there was nothing considered in the committee, and we had no submission from the Department, to the best of my knowledge.

Mr. BAILEY. The question grew out of the activities of the Senate in proposing to change the public law dealing with construction, maintenance, and operation on account of restrictions in the present law requiring percentage construction requirements. I take it that that legislation has not cleared the Senate and no request was made for including it here.

Mr. TABER. There was a provision in the Departments of Health, Education, and Labor bill before the House earlier. There was a provision that the Senate inserted relating to the elimination of a requirement that there be a certain percentage of children involved as a result of an impacted area before the district would be entitled to receive any aid. But the conference report did not provide for that.

Mr. BAILEY. As the result of that, was there not an understanding that money would be made available in this supplemental appropriation bill for that purpose?

Mr. TABER. No.

Mr. BAILEY. There was no agreement of that kind?

Mr. TABER. No; no agreement.

Mr. BAILEY. I thank the gentleman from New York.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. TABER. I yield to the gentleman from Iowa.

Mr. GROSS. I notice an item of $500,000 for the building of an embassy in Pakistan, with the labor for the building of this structure to be donated. How much do these embassies cost, I would like to ask the gentleman?

Mr. TABER. Well, frankly, that Embassy, as I understand, is being built by what they call counterpart funds, and is being erected as an incident of good will to those people. So that it may be clear, as I understand, counterpart funds consist of moneys that have been received, or a percentage of the currency of the nations involved that has been received out of the sale of things that we have contributed to them in the days gone by. That is what I understand will be used for that purpose, so that the only thing that would come out of the Treasury would be the local currency that would be involved.

Mr. GROSS. I thought this bill provided for $500,000 in cash.

Mr. TABER. Well, the $500,000 in cash would be paid into the Treasury by the State Department for the purchase of that amount of counterpart foreign currency that was held by the Treasury. There is no other way that we could get anything out of them.

Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. GUBSER].

Mr. GUBSER. Mr. Chairman, I would like to take the time allotted me to express my regret that the committee has not seen fit to include the $8,430,000 rquested for the taking of a census of business, manufactures, and mineral industries. I prepared an amendment which, if introduced and adopted, would restore these funds, but I have elected to request the Senate to restore them instead of offering that amendment.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. GUBSER. I yield to the gentleman from New York.

Mr. ROONEY. I want to assure the gentleman that I, as well as a number of others on this side of the aisle, would be pleased to support the gentleman's proposed amendment. I have protested the denial of these necessary funds for the purpose of the legally required census of business, manufactures, and mineral industries. I know, and I say now, that this item is going to be restored to this bill in the Senate if it is not restored here in the House.

Mr. GUBSER. I thank the gentleman.

Mr. Chairman, I am particularly interested in this appropriation since I introduced the bill authorizing such census to be taken. The bill was approved by a subcommittee of the House Committee on Post Office and Civil Service of which I was chairman, and it was passed without objection or amendment by the Congress and was signed into law by the President. By authorizing the census, this Congress fulfilled the intent of the 80th Congress which passed legislation for a quinquennial census of manufactures, mineral industries, and business. It also followed the recommendations of the intensive review committee, appointed by the Secretary of Commerce.

But far above my interest in the appropriation which stems from my sponsorship of the authorization bill, is my concern for the taxpayer of this country. To refuse this money would be to throw away $1,590,000 of the taxpayers' money which is already invested in this census.

In deleting this appropriation from the bill, the House Committee on Appropriations held that there would be no loss of investment by the Federal Government if the special census were not conducted. The fact is that $200,000 was spent in fiscal 1952 and $1,390,000 in fiscal 1953 by the Bureau of the Census in preparation for the census that still has not been conducted. The appropriations subcommittee did not appropriate the needed funds for the census for fiscal 1954, giving the Census Bureau

$1,500,000 instead for the purpose of conducting spot checks. If the census is not made, $1,590,000 already invested would disappear down the drain.

The committee further contends that spot checks will be sufficient for the purposes of the business census. This is contrary to the informed opinion of the American Marketing Association, which states that periodic benchmarks are needed in a dynamic economy if we are to know what the actual facts of the economy are, and thereby correct errors that lie in sample studies. The testimony is overwhelming that sampling is worthless without the check points and benchmarks of an occasional complete census. The local map means nothing to the navigator except as it pertains to the entire globe. The charts of San Francisco Bay would be worthless to the pilot were it not for the larger chart which brought the vessel to the harbor entrance—such is the case with censuses.

The committee further contends that spot checks can be conducted from the normal operating funds of the Bureau of the Census. May I point out that the appropriation for fiscal 1954 was $6,870,000 for normal work, with $1,500,000 added for spot checks. The appropriation in this bill is $670,000 less than the normal operating budget of last year, with nothing appropriated for spot checks. Manifestly it is impossible to carry on even the spot-check program with this appropriation.

Mr. Chairman, there is no known opposition to this census outside the House Committee on Appropriations. A long list of witnesses testified before my subcommittee during hearings on the authorization bill, a list which, indeed, reads like a who's who in American business and industry. The National Cotton Council urges the census. So does the American Retail Federation, the National Association of Wholesalers, the United States Chamber of Commerce, the National Distribution Council, and the National Association of Manufacturers. Labor has given its approval, with both the American Federation of Labor and the CIO speaking for the census in recognition of the aid it gives the creation of employment. The National Bureau of Economic Research, the American Statistical Association, the American Marketing Association, and many other professional and educational groups also are for it.

Thus, we find that the legislative branch of the Government has authorized and directed that these censuses be taken, and that the executive branch, notably the Council of Economic Advisers, the Department of Agriculture, the Office of Defense Mobilization, the Board of Governors of the Federal Reserve System, and others, have gone on record in favor of it. We find a solid backing by business and industry, labor, and professional groups. In addition, the taking of these censuses has been given highest urgency by the Intensive Review Committee of the outside experts appointed by the Secretary of Commerce to reevaluate the entire Census Bureau program.

Censuses are traditional in the United States, having been taken at regular intervals since 1810. Similar censuses are taken in all other parts of the industrialized and civilized world.

I might also point out that the estimates for 1954 are below those of the past preceding censuses, and I wish to reiterate here that there is no known opposition to the taking of these censuses outside of the House Committee on Appropriations.

Mr. Chairman, I urge that the $8,430,000, requested by the Bureau of the Census and deleted by the House Committee on Appropriations, be reinserted so that this important work may be carried on during the current fiscal year for the benefit of the Nation as a whole. This is no partisan issue. Business and labor alike want these censuses taken. The 80th Congress, in its wisdom, decreed their taking every 5 years. Let us not now allow $1,590,000 already spent to go down the drain.

Mr. CANNON. Mr. Chairman, I yield 5 minutes to the gentleman from Georgia [Mr. PRESTON].

Mr. PRESTON. Mr. Chairman, it shall be my purpose either this afternoon or tomorrow, depending on the action the Committee takes on this bill as to whether we rise or remain in session, to offer an amendment to restore to this bill the budget request of $22 million for Federal aid to airports.

May I point out that in 1946 the Congress passed a bill authorizing $520 million to be spent on Federal aid to airports. From that time on until fiscal 1954 the Congress appropriated varying sums for this purpose. Last year under this new administration the Secretary of Commerce advised our committee that he wished to make a study of this program to determine whether it was really feasible, whether it was really working properly.

Mr. PATTEN. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] One hundred and twelve Members are present, a quorum.

The gentleman from Georgia will proceed.

Mr. PRESTON. Such a study was made by a commission appointed by the administration, and I may say a very careful study. That study has been further reviewed by the Department of Commerce. It was found unanimously that this program should be continued as it had in the past since 1946.

A budget request was accordingly sent over for this supplemental bill now before the Committee. Despite the urgings of the President, the Secretary of Commerce, the Civil Aeronautics Administrator, and the Deputy Under Secretary of Commerce for Transportation, the Committee on Appropriations has disallowed this request. So I shall offer the amendment. I am informed by the distinguished chairman of the Committee on Appropriations that the Committee will rise this afternoon rather early. I shall offer the amendment tomorrow. It will be the first amendment to be offered to the bill, so I want to caution those Members who are interested in restoring these funds that you should be on the floor tomorrow early, for this amendment will be one of the first items of business for consideration by the committee.

Mr. POLK. Mr. Chairman, will the gentleman yield?

Mr. PRESTON. I yield to the gentleman from Ohio.

Mr. POLK. I want to compliment and commend the gentleman from Georgia for his untiring efforts in endeavoring to secure funds for Federal aid to airports. I believe this is one of the most important problems we have in this country at this time.

In the district I have the honor to represent there is a proposed project. A situation exists where the people of Scioto County, Ohio, have $400,000 in the bank as the result of a sale of bonds for the purpose of building an airport in Scioto County, Ohio, near the great atomic energy plant. They have already purchased the land for this airport. Because of the change in policy during the past 2 years funds have not been available for them to proceed further. The gentleman's amendment will, if approved by the House, as I hope it will be, enable these people to go ahead and complete this project which is, as I said, partially complete. They had the land ready to proceed. All of the requirements have been met as far as the Civil Aeronautics Administration is concerned. All they need are the Federal funds to which they have always felt they were entitled. They have sold bonds with the understanding that the funds would be made available for that purpose. Therefore, I want to commend and compliment the gentleman and associate myself with him in his efforts in this regard.

Mr. PRESTON. I thank the gentleman.

Mr. EVINS. Mr. Chairman, will the gentleman yield?

Mr. PRESTON. I yield.

Mr. EVINS. I commend my distinguished colleague on the position that he has taken, and I certainly associate myself with him. I recall last year a similar fight was made on the need and the necessity for this fund. At that time it was stated that they were going to strike out the money this year, and then going to make a study of the need for it, and after the study, if we find it necessary next year, we will restore the money. So that study has been made and certainly there is a continuing and demonstrated need for this fund. I certainly hope the gentleman's amendment will be adopted, and that the necessary money will be restored.

Mr. PRESTON. I thank the gentleman.

Mr. SCOTT. Mr. Chairman, will the gentleman yield?

Mr. PRESTON. I yield.

Mr. SCOTT. I am glad the gentleman has made this statement at this time. I also want to associate myself with what he has said. The Federal Government makes continuous and important, and will in the future make, I would assume, even more important use

of these airports. Particularly referring to the international airport, it would seem to me that the restoration of this fund is desirable in the national interests.

Mr. PRESTON. I thank the gentleman.

Mr. BENDER. Mr. Chairman, will the gentleman yield?

Mr. PRESTON. I yield.

Mr. BENDER. I commend the gentleman for his statement. I, too, want to associate myself with my friend in this matter, and I can assure him that we will be here tomorrow to support his amendment.

Mr. PRESTON. I thank the gentleman.

Mr. NICHOLSON. Mr. Chairman, will the gentleman yield?

Mr. PRESTON. I yield.

Mr. NICHOLSON. I thank the distinguished gentleman from Georgia for bringing this matter to the forefront of our attention. I hope he will be successful in restoring some of the money needed for this purpose in this budget.

Mr. PRESTON. I thank the gentleman.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. PRESTON. I yield.

Mr. GREEN. I compliment the gentleman on his amendment. I want to state that I will support the amendment. All Members from the city of Philadelphia are very much interested in this matter.

Mr. PRESTON. I thank the gentleman.

Mr. Chairman, in conclusion I would like to emphasize one point. There is such a matter as good faith in our Government when we are dealing with the people. If we do not intend to keep the faith, we should repeal the law authorizing the fund. It is just that simple. It does not take much effort to repeal a law. If the overwhelming majority of this body is in favor of repealing that law, then we should repeal it and stop the impression from going out to the municipalities and airport authorities that Federal funds are going to be available. As we know, there are some $78 million worth of bonds which have been sold in this country in the belief that the funds would be made available to match the money that they have put up, and upon which interest is being paid to the bondholders.

Mr. DAVIS of Georgia. Mr. Chairman, will the gentleman yield?

Mr. PRESTON. I yield.

Mr. DAVIS of Georgia. I am very glad that the distinguished gentleman from Georgia is going to offer this amendment. I am wholeheartedly in favor of it, and will support it.

Mr. PRESTON. I thank the gentleman.

Mr. BYRNE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. PRESTON. I yield.

Mr. BYRNE of Pennsylvania. I wish to compliment the gentleman from Georgia on his amendment and associate myself with the gentleman's remarks. I know that all Members of the Philadelphia delegation are likewise very much in support of the gentleman's amendment.

Mr. PRESTON. I thank the gentleman.

Mr. Chairman, tomorrow we will discuss the matter further. I am sure there are others who are interested and I want to say before I take my seat that I claim no credit for having worked on this amendment. There are two Members of the House who have been more concerned, I think, than anyone else, namely, the gentleman from Ohio [Mr. POLK] and the gentleman from Ohio [Mr. JENKINS], because they have found themselves in a very embarrassing position at home where their community, having issued bonds as other communities have done, has been unable to use the funds because of the lapse of one fiscal year in providing the moneys under this program. They have worked untiringly and have plead with our committee to supply these funds. I was very much disappointed when their pleas went unheeded. I hope tomorrow the House of Representatives will keep faith with the people of America and provide the funds to continue this program which has been so unanimously endorsed by all segments of the aviation industry as well as by the present administration.

Mr. BARRETT. Mr. Chairman, will the gentleman yield?

Mr. PRESTON. I yield to the gentleman from Pennsylvania.

Mr. BARRETT. I want to associate myself with the gentleman's amendment and tell him that Philadelphia has been allotted $6,334,000. I am sure all the Philadelphia delegation will go along with the gentleman's amendment.

Mr. JENKINS. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. JENKINS. Mr. Chairman, I agree most heartily with the gentleman from Georgia [Mr. PRESTON]. I have prepared an amendment identical with the amendment that the gentleman will introduce.

The gentleman and I have for a long time worked together on this matter of getting a number of much-needed airports finished. I am particularly interested in the proposed airport at Portsmouth. This airport will be located within about 25 miles of where I was born and about 30 miles from where I live.

There are two things that recommend this airport most positively. The first reason is that the airport is needed—There is no airport within 100 miles of this proposed airport. There are about 750,000 people living within 60 miles of this airport. The second reason is that the people of Scioto County, in which this airport is to be located, were given to understand by the Government authorities that if the people of that county would furnish $400,000, which would be one-half of the expense of constructing the airport, that the Government authorities would match this amount.

The people of Scioto County voted for the issuance of this amount of bonds and the bonds were issued about 2 years ago. These bonds have been sold and are now drawing interest. If the Government fails to do its part, it will do these people a great disservice and will fail to keep its promise. The Government cannot break its promise any more than an individual can. I feel sure that when this House has given consideration to Mr. PRESTON's amendment and to my amendment the House will support these amendments. To fail to do so would be little short of dishonest conduct. I know the House will keep its promise.

Mr. BARRETT. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BARRETT. Mr. Chairman, the amendment being offered to include $22 million for the Federal-aid airport program amounts to a reinstatement of the program authorized by the Federal Airport Act of 1946. It is merely giving the Civil Aeronautics Administration the funds with which to carry out the intent and purpose of that act. This act authorized a Federal contribution of $1 billion for the airport program. However, to date the Congress has appropriated and contract authority has been given in a total amount of only $214,221,154.

Apparently in its haste to trim the budget, last year the administration more or less indiscriminately decided not to include in its budget a request for funds to aid the States in developing and improving their airports. At that time it was decided that an airport panel of the Transportation Council under the chairmanship of Jennings Randolph should investigate the need for any future participation by the Federal Government in such a program. After a thorough investigation and study of the airports throughout the country, the airport panel reported that it was most imperative to the needs of civil aviation and national defense for the Government to reinstate grants-in-aid to the States for airport development. The panel recommended reinstatement of this program. The administration is now in favor of it.

This money is not being requested for any special interests or particular areas of the United States. The recommendations of the Civil Aeronautics Administration includes apportionment to every State in the country, as well as the District of Columbia, Puerto Rico, Virgin Islands, and Territory of Hawaii. In the past, 1,181 airports have been developed under 2,476 projects authorized under the Airport Act of 1946.

The apportionment for the Commonwealth of Pennsylvania for fiscal year 1955 is listed by the Civil Aeronautics Administration as $634,043. The city of Philadelphia is one of the largest concentrations of industry, commerce, and international trade in the country. In the city of Philadelphia are located large plants of the Gulf and Atlantic Refining Companies, the Philadelphia Naval Base, Army Quartermaster Depot, Marine Corps Depot of Supplies, Frankford Arsenal, and Signal Corps. It is listed as

one of the most vulnerable cities in the country in the event of enemy attack. I am sure that any Member here today who has given the slightest thought to the significance of the airways to national defense will vote in favor of this amendment. Unfortunately, Philadelphia is in the critical surplus-labor market category and an airport-improvement program could do much to help stimulate trade for the area. It was difficult to understand the reason for discontinuing the grants-in-aid for airport projects for even 1 year. Now that the airport panel and Department of Commerce have recommended reinstating the project on the basis of a thorough study of the situation, it would be foolhardy not to accept this amendment to include the $22 million for implementing the Federal Airport Act of 1946. I believe the Members of the House are wholly justified in approving this amendment to reactivate the airport program, and I hope that there will be unanimous consent to Mr. PRESTON's amendment.

Mr. BENNETT of Florida. Mr. Chairman, I rise to support the proposed amendment of the gentleman from Georgia [Mr. PRESTON] to provide adequate, or at least minimum, funds for the program of Federal assistance to airports.

The Federal Airport Act, adopted in 1946, established the policy of this Government to encourage the development of a nationwide system of public airports adequate to the need of civil aeronautics. That act provided for grants to States and municipalities on a matching basis and imposed various obligations on the recipients of the grants in that it provided that airports receiving the grants should at all times be available for use by military and naval aircraft and that space was to be made available for Federal air-traffic-control activities and weather reporting at rental rates substantially lower than would be made to other users.

I believe that a study of the larger and more important airports throughout our country will reveal that a small investment of Federal funds has resulted in tremendous benefits to our country not only in the field of making possible a nationwide network of commercial air transportation facilities, but also in the field of strengthening our national defense by making available a substantial number of facilities adequate for material assistance in our national defense. I give my wholehearted support to the efforts to insert at least $22 million in this bill for this purpose, the amount which has been recommended by the Bureau of the Budget.

I sincerely hope that the amendment will pass.

Mr. WIGGLESWORTH. Mr. Chairman, I yield myself 3 minutes, and I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. WIGGLESWORTH. Mr. Chairman, I take this time merely to call attention to the fact that the funds requested by the President of the United States, through the Bureau of the Budget, for the purpose of new ship construction, have been completely eliminated from the bill by committee action; and to state that at the proper time I propose to offer an amendment reinstating these funds.

The request is one of several which the administration has made with a view to meeting deficiencies in our merchant marine, and to alleviating the desperate situation which today confronts our ship-construction industry.

The funds are important from the standpoint of modernizing our merchant marine. They are vital from the standpoint of the maintenance of an essential mobilization base for national defense.

About a year ago the Department of Defense went on record as to what it termed a deficiency in merchant-type vessels, a deficiency numbering 214 vessels, 43 of them large tankers, 6 of them large passenger-cargo ships, and 165 of them other ships.

The funds requested here would supply not 214 ships but 14 ships, including 10 new large tankers, and 4 new large passenger-cargo ships.

They will, of course, be built in American yards.

This House has recently recognized the acute situation by which we are confronted at this time by passing two pieces of authorizing legislation designed to help meet the situation.

This request may be said to be a companion request to those two pieces of legislation.

I trust, Mr. Chairman, that tomorrow the House will agree to accept the amendment I shall offer in order that funds requested by the President may be made available for ship construction which is so vital at this time.

Mr. ALLEN of California. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. I yield to my good friend from California, who always has the merchant marine close at heart.

Mr. ALLEN of California. With regard to one of the bills concerning the building of tankers, the bill has passed this House and the other body, and the conference has met and a conference report has been agreed to although not yet submitted.

Mr. WIGGLESWORTH. To deny the funds here in effect would be to reverse our action with respect to that bill, would it not?

Mr. ALLEN of California. That is quite correct.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. ROONEY. Mr. Chairman, I yield myself 8 minutes.

Mr. Chairman, I rise at this time principally to comment with regard to the devastating action of the majority of the subcommittee as well as the full committee in two instances in this bill. The first, the request in the amount of $8,430,000 for the Bureau of the Census, Department of Commerce, for a census of business, manufactures, and mineral industries.

I deplore the committee's action in entirely denying funds for such a census. Most of us must realize from the number of telegrams received from chambers of commerce all over the United States that this is a very important item and that some provision, even if not the full amount, should have been included in this bill in order to carry on such a vitally necessary census.

It was very appropriately pointed out a while ago by the gentleman from California [Mr. GUBSER] that the taxpayer has $1,590,000 already invested in this census, and that this money will be lost unless provision is made at this time to go forward with it.

I have always been one who has tried to realize the realities of life. Now, the same thing is going to happen here as happened with regard to the census of agriculture. In the early part of this year the President and his Bureau of the Budget and the Bureau of the Census requested $3,500,000 for a sample census of agriculture. It was denied wholly by this committee last February. The House concurred. I pointed out at the time on the floor of this House that it was senseless to deny funds for a census of agriculture as required by law, by a law enacted by this very House of Representatives and the other body and signed by the President. But you did not rectify the mistake at that time, and subsequently when the regular State, Justice, Commerce appropriation bill for 1955 fiscal year was considered by the other body there was inserted not $3,500,000 for a sample census of agriculture, but $16 million for a full census. The House conferees accepted it and the bill has already been signed by the President and is now law. I predict that the same thing will happen with regard to this request for a census of business, manufactures, and mineral industries. There will be one.

Mr. RABAUT. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield.

Mr. RABAUT. The gentleman is absolutely right. I had a telegram from the Detroit Board of Commerce asking me to see what could be done about this census of business, manufactures, and metals.

Mr. ROONEY. I likewise have had telegrams, I may say to my distinguished friend, the gentleman from Michigan, from chambers of commerce all over the United States, insisting that this is a very worthwhile census and vitally necessary to the Nation's business.

My second comment is with regard to the unusually drastic denial of funds for ship construction programs under maritime activities. The Department of Commerce, as you will learn from the committee report, requested $82,600,000 for this purpose. It was comprised, first, of $44,500,000 for construction-differential subsidy and national defense allowances on four passenger-cargo ships to be built by private operators as replacements for ships which have since become outmoded. This was entirely eliminated. Eleven million, one hundred thousand dollars of the eighty-two million, six hundred thousand dollars was allowed by the

committee for experimental modernization of four reserve fleet Liberty ships. But $26 million for a trade-in-and-build tanker program which would result in 10 new tankers and 20 trade-ins was wholly denied as well as $1 million requested for administrative expenses of the Maritime Administration.

I have prepared an amendment which would restore all of the funds for this vital program. I am reliably informed that this morning at the White House it was stated in unequivocal terms that this proposed majoriy action of the Committee on Appropriations would actually decimate the American merchant marine, and that this money should be restored to this bill.

I am going to be so bold and so reckless as to stand up here and support the President of the United States, President Eisenhower, in this matter, and I hope that there may be sufficient numbers of our friends on that side of the aisle who will be so bold and so reckless as to support the President and vote to prevent the decimation of the American merchant marine.

Mr. PELLY. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the gentleman from Washington.

Mr. PELLY. I want to assure the gentleman that I am going to support that amendment.

Mr. ROONEY. I would fully expect the support of the gentleman from Washington. I know of his professed interest in the American merchant marine. He and I have generally been in agreement with regard to the highly important matter of unemployment in our American shipyards as well as with regard to the carrying on of our merchant marine, and I commend the gentleman.

Mr. PELLY. I think I can assure the gentleman there are many more on this side of the aisle who will support the American merchant marine.

Mr. ROONEY. I hope the gentleman from Washington is correct in that regard when we get down to counting hands and heads. If we are unsuccessful in restoring these vitally needed funds to the bill I shall offer a motion to recommit, if I am recognized for that purpose, which would include the amendment which the gentleman from Massachusetts [Mr. WIGGLESWORTH] and I have prepared.

Mr. BENNETT of Florida. Mr. Chairman, I understand that the gentleman from Massachusetts [Mr. WIGGLESWORTH] will offer an amendment to restore to this bill the amount approved by the Bureau of the Budget for subsidization of new ship construction. It seems to me to be highly important that these funds be restored to this bill. It is my understanding that the money will be well spent when viewed from the aspect of national defense. It would also seem to be well spent from the standpoint of assisting our shipbuilding industry and keeping it in a going condition.

Our vital shipbuilding and ship repairing industry is faced with an emergency. Under Secretary of Commerce Robert B. Murray, Jr., has presented some telling figures concerning this emergency. He points out that World War II taught us that about 36,000 workers should be employed during peacetime in merchant ship construction, if we are to have an adequate base upon which to expand in wartime. How are we meeting the need for a 36,000-worker shipbuilding industry? Under Secretary Murray estimated that we had an average of 22,300 workers during 1952 and 23,000 during 1953. He estimates that the average employment will drop to approximately 10,800 workers this year and to about 1,200 workers in 1955 if nothing is done to halt the decline. He ascribes the precipitous drop in 1954 and 1955 to the completion of merchant ships now under contract. We here in Congress do not want to be responsible for there being a weak link in our chain of defense.

It seems clear to me that providing these funds would be of great assistance to the health of the shipbuilding industry at this time. This objective is in itself in the interest of national defense. Furthermore, the ships when constructed will be an asset in the national defense because they can be readily converted to military purposes. For these reasons, I sincerely hope that the House will approve this amendment.

Mr. TABER. Mr. Chairman, I yield 10 minutes to the gentleman from Wisconsin [Mr. DAVIS].

Mr. DAVIS of Wisconsin. Mr. Chairman, I shall confine my remarks to chapter 8 of the bill which is the largest single item in this supplemental appropriation. That is the annual appropriation for military construction.

If you will refer to page 30 of the committee report you will see that the amount of money requested for military construction in the fiscal year 1955 has been very substantially reduced; but that does not mean that the program itself has been reduced by anything approaching that amount. What it does mean is that the committee has made provision for a draining off or a using up of very substantial unobligated balances now in the hands of the armed services which are available for the military construction program. The amount which is being made available will permit the armed services to go forwarded in developing the physical facilities here and abroad that are necessary as the basis for operation of our Armed Forces. The individual detailed actions of our subcommittee are set forth quite clearly and quite fully in the report which is available to you.

I may mention, however, that with respect to overseas facilities—I think every Member will understand the necessity for handling it in that manner—we have sent a classified letter to the Secretary of Defense which explains the detailed actions that we have taken with respect to various facilities outside continental United States. So you will not find that detailed breakdown of information included in the report which is available to you. If there are questions which you have with respect to any of those installations overseas and you will ask some member of the subcommittee about them he will be happy to furnish you, as an individual, with that information.

The result of the subcommittee's work has been to attempt to continue the austerity program that has been initiated in the Armed Forces construction program. This group of items that you have before you does not represent austerity of facilities that are to be available to Armed Forces personnel. It does, however, attempt to continue the rule of austerity with respect to the type of construction; in other words, we want the men in the armed services to have all of the physical facilities they need, but we do not want them to have anything fancy or ornamental because those frills cost a great deal more money than is necessary in order to provide reasonable facilities.

In accordance with the stated policy of the President, this year's program includes a great many personnel and welfare items, which is something of a departure from the programs of past years when the emphasis has been placed on operational, rather than upon personnel, facilities. We have had some difficulty in attempting to hold the armed services to reasonable standards in a number of these personnel and welfare facilities. Perhaps it is because this modern program is rather new and fresh to them; they have not had the experience in construction in recent years that they have had with the operational facilities.

For example, I cite the gymnasium down at the Naval Academy at Annapolis. They requested one at a cost which was almost $30 a square foot, but out here at Georgetown University in the District of Columbia, there was recently completed a gymnasium at a cost of about $15 a square foot. So, we denied that particular item in an attempt to get them to come in with a more reasonable pattern of construction. The same with fire stations for the Navy and some of the other things that appeared to be out of line and out of keeping with the necessity for austerity.

The effect of the subcommittee's action is to require the Armed Forces to use about $665 million of previously appropriated but unobligated funds in furtherance of this year's program. That is divided about $192 million for the Army, $350 million for the Air Force, and about $122.5 million for the Navy.

Mr. JONES of Alabama. Mr. Chairman, will the gentleman yield?

Mr. DAVIS of Wisconsin. I yield to the gentleman from Alabama.

Mr. JONES of Alabama. Was it the intention of the committee to make appropriations for those items contained in the recent military construction authorization?

Mr. DAVIS of Wisconsin. We had those items before us, but the request before us was not confined only to those that were recently authorized. There were some older authorizations included in the program as well.

Mr. JONES of Alabama. So there is no intention on the part of the committee to say that appropriations will not be forthcoming for those that have been omitted from this list?

Mr. DAVIS of Wisconsin. It is possible, if they are authorized now, they may be submitted to our committee at a later date for funding; that is correct.

Mr. JONES of Alabama. So there is no intention on the part of the committee to hold in prejudice those authorized projects that were not included in this bill?

Mr. DAVIS of Wisconsin. Before I would answer that, I would have to know whether that particular project was submitted to our committee for consideration this year.

Mr. JONES of Alabama. I understand. But the indication of this report is that none of the other projects, or the ones omitted from this list, were held in prejudice by the committee.

Mr. DAVIS of Wisconsin. If the denial was with prejudice, you will find explanation for it set forth in detail in the report.

Mr. JONES of Alabama. I thank the gentleman.

Mr. DAVIS of Wisconsin. Since this is the last handiwork of our subcommittee that will be brought to the floor in the 83d Congress, I would not want this day to pass without expressing my very real appreciation to those members of the subcommittee who have served so conscientiously and so cooperatively during the two sessions of the 83d Congress. What I say applies to every one of them: to the gentleman from New Jersey, [Mr. HAND], to the gentleman from Michigan [Mr. CEDERBERG], to the gentleman from Michigan [Mr. RABAUT], and to the gentleman from South Carolina [Mr. RILEY], every one of whom has been most helpful, has contributed a great deal of time and work to the efforts of the subcommittee, and has made working with them not a chore but a real pleasure. Then, too, we have had the assistance and the advice of those two elder statesmen of the committee, the chairman of the full committee, the gentleman from New York [Mr. TABER], and the ranking minority member, the gentleman from Missouri [Mr. CANNON].

If there are further questions regarding this military construction program, I will be happy to attempt to answer them at this time.

Mr. BENNETT of Florida. Mr. Chairman, will the gentleman yield?

Mr. DAVIS of Wisconsin. I yield to the gentleman from Florida.

Mr. BENNETT of Florida. On page 35 of the report it says that—

> At naval air station, Civil Field, Fla., the parachute building and ordnance facilities have been denied.

My question is this: As I understand in the preceding part of that paragraph you are asking for a research and a review to be made to see whether those things are really needed or whether they may be dispensed with. So I desire to ask the gentleman this question. This is not a final determination that they are not needed but rather a determination that the gentleman and his committee wish to have a review before they are approved; is that correct?

Mr. DAVIS of Wisconsin. That is right. The estimates submitted before us appeared to be too high. We have asked them to review that matter and come in again.

Mr. BENNETT of Florida. I thank the gentleman.

Mr. JONES of Alabama. Mr. Chairman, will the gentleman yield for another question?

Mr. DAVIS of Wisconsin. I am happy to.

Mr. JONES of Alabama. I understand that there were several projects authorized in the last authorization act but that there have not been prepared budget estimates or recommendations that were submitted in time to be included in this bill; is that correct?

Mr. DAVIS of Wisconsin. I think it is correct that there were a number of items authorized in this Congress that were not submitted to our committee for funding at this time. We would have to assume that those projects are considered necessary or they would not have sought authorization and therefore I would think that they will come in perhaps in the next session with a request for funding at that time.

Mr. JONES of Alabama. I thank the gentleman.

Mr. CANNON. Mr. Chairman, I yield the gentleman from Florida [Mr. BENNETT] such time as he may require.

Mr. BENNETT of Florida. Mr. Chairman, I ask unanimous consent to revise and extend my remarks with regard to maritime matters following the remarks of the gentleman from New York [Mr. ROONEY]; and I make a similar request with regard to the subject of airport activities following the remarks of the gentleman from Georgia [Mr. PRESTON].

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. CANNON. Mr. Chairman, we have no further requests for time on this side.

Mr. TABER. Mr. Chairman, there have been many questions asked me, and there have been requests that that report be printed in the RECORD because it would answer many questions which would take considerable time to answer on the floor.

I therefore ask unanimous consent that the report of the committee, with the exception of the tables, be printed in the RECORD, notwithstanding the rule of the House requiring a special report and a special consent from the House with reference to the printing because of its extent.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

(The matter referred to follows:)

SUPPLEMENTAL APPROPRIATION BILL, 1955

Mr. TABER, from the Committee on Appropriations, submitted the following report to accompany H. R. 9936:

The Committee on Appropriations submits the following report in explanation of the accompanying bill making appropriations to supply certain regular and supplemental appropriations for the fiscal year ending June 30, 1955, and for other purposes.

The estimates upon which the bill is based are contained in House Documents Nos. 264, 361, 385, 408, 422, 428, 438, 439, 440, 441, 442, 443, 444, 454, 455, 456, 459, 460, 461, 467, 468, 469, and 471. The bill is divided into chapters corresponding to the subcommittees considering the estimates. The recommendations contained in the bill are as a result of deliberations of the several subcommittees as approved by the full committee.

SUMMARY OF BILL

Budget estimates considered by the committee total $1,959,958,267. Appropriations recommended total $1,194,188,079, a reduction of $765,770,188. These amounts are distributed by chapters of the bill as indicated in the following table (not printed).

CHAPTER I

Subcommittee: WALT HORAN, Washington, chairman; FRED E. BUSBEY, Illinois; FRANK T. BOW, Ohio; SAM COON, Oregon, temporarily assigned; MICHAEL J. KIRWAN, Ohio; GEORGE W. ANDREWS, Alabama; J. VAUGHN GARY, Virginia, temporarily assigned.

Legislative branch

This portion of the bill provides an additional $254,785 for fiscal year 1955 to strengthen the Capitol Police force as provided by legislation now before the House. An additional $175,000 is approved for the employment of 43 new men for the force, and an increase of $79,785 is allowed to purchase new uniforms, firearms, and miscellaneous equipment, together with 1 additional scout car.

The committee has also included two items of language under this heading of the bill. The first makes it possible for the Folger Shakespeare Library to obtain steam from the Capitol Power Plant on a reimbursable basis. The second authorizes the use of the unexpended balance of 1943 funds of the Government Printing Office to pay a claim certified by the General Accounting Office against the 1942 appropriation in which there is no balance available to meet the payment.

Judiciary branch

The committee has approved the full supplemental estimate of $222,000 carried in House Document No. 444 for fees of jurors and Commissioners for 1954. The large increase in the number of jury trials during the fiscal year, which are over 8 percent higher than the previous year, makes it necessary to provide additional funds to meet increased jury costs.

The balance of the items for the judiciary included in House Document No. 428 have not been allowed. It is believed that the penalty mail cost of $5,500 for 1954 can be absorbed within the amount now available for expenses of referees. Further, the committee feels that the supplemental requests to cover expected increases in salaries and expenses of referees in 1955 should not be allowed in advance of approval by the Judicial Conference.

CHAPTER II

Subcommittee: CLIFF CLEVENGER, Ohio, chairman; FREDERIC R. COUDERT, JR., New York; FRANK T. BOW, Ohio; SAM COON, Oregon; JOHN J. ROONEY, New York; PRINCE H. PRESTON, JR., Georgia; ROBERT L. F. SIKES, Florida.

Department of State

Acquisition of buildings abroad: The committee recommends $500,000 for this item, a reduction of $462,000 in the budget estimate. The $500,000 allowed is for materials and plans for the construction of an embassy office building in Karachi, Pakistan. The committee was advised that the Government of Pakistan has offered to supply, free of all cost to the United States in appreciation of our wheat loan, the labor costs involved in the construction of the building. The committee expects the Department to complete the building with the funds allowed.

The request for funds for the acquisition of permanent facilities for information centers in Germany is disallowed.

International Claims Commission: The bill includes the language requested to continue available during fiscal year 1955 the unobligated funds appropriated in the Supplemental Appropriation Act, 1954, for this Commission. The amount of the unobligated funds is estimated at $34,000. The commit-

tee has been assured that this work is to be completed without cost to the American taxpayer as requested by this committee.

Department of Justice

Legal Activities and General Administration

Salaries and expenses, general legal activities: The bill includes $275,000, a reduction of $75,000 in the budget estimate, for additional funds for the newly created Internal Security Division. It is expected that with the additional funds provided herein the necessary action on the part of this Division will be taken.

Salaries and expenses, United States attorneys and marshals: There is included in the bill $400,000 additional for United States attorneys and marshals to provide for additional staff to meet anticipated increase in workload in the 27 districts where new judgeships have been created and also to meet the unanticipated increases in internal security matters. The amount allowed is $125,000 below the budget estimates.

Fees and expenses of witnesses: The authority requested to transfer $135,000 from "Salaries and expenses, Antitrust Division," fiscal year 1954, to "Fees and expenses of witnesses" is included in the bill. The committee was advised that this additional amount would be required to pay the fees and expenses of witnesses.

Immigration and Naturalization Service

Salaries and expenses: The bill includes $3 million, the budget estimate, to permit the Immigration and Naturalization Service to enlarge its border patrol in order to apprehend illegal Mexican aliens and alien smugglers and to provide for their deportation to Mexico. The committee is recommending this increase with the understanding that the results obtained will determine the future action of the committee with regard to this item.

Federal Prison System

Salaries and expenses, Bureau of Prisons: The committee recommends an additional $750,000 for this item to take care of the increase in prison population beyond that anticipated at the time the budget was prepared and for the activation and operation of the Terminal Island facility.

Department of Commerce

Bureau of the Census

Censuses of business, manufactures, and mineral industries: The request for $8,430,000 to provide for the first year's cost of the censuses of business, manufactures, and mineral industries during fiscal year 1955 is not approved.

Civil Aeronautics Administration

Salaries and expenses: A request for $860,000 to provide for operation of aeronautical service by the Civil Aeronautics Administration at Cold Bay, Alaska, and Balboa, Panama Canal Zone, was submitted in House Document No. 454. The committee favors the operation of these services by the Civil Aeronautics Administration but recommends that the amount required for such operation be absorbed from the $97,650,000 appropriation they now have for salaries and expenses.

Establishment of air-navigation facilities: The committee recommends language which will permit the use of not to exceed $600,000 of funds previously appropriated for establishment of air-navigation facilities, for necessary construction and rehabilitation of facilities at Cold Bay, Alaska.

Federal aid airport program, Federal Airport Act: The request for $22 million contained in House Document No. 428 to provide funds for reinstitution of the Federal aid airport program is denied.

Claims, Federal Airport Act: The request for $69,449 for this item as contained in House Document No. 428 is denied.

Washington National Airport Corp.: Inasmuch as the legislation has not yet been enacted the committee has denied this request.

Land acquisition, additional Washington airport: The amount of the estimate, $16,297, is included in the bill to provide funds necessary for payment of the remaining claims.

Business and Defense Services Administration

Salaries and expenses: The supplemental request for $1 million to expand and augment the collection and analysis of information concerning construction activity is not allowed.

Maritime Activities

Ship construction: Of the $82,600,000 requested in House Document No. 428 for this item, the committee has allowed $11,100,000. The amount recommended by the committee is for the experimental modernization of four Reserve Fleet Liberty ships as a basis for developing plans to modernize the remaining ships in the reserve fleet in the event of emergency.

Ship mortgage-foreclosure of forfeiture contingencies: The bill includes $2,500,000 to enable the United States Government to protect its interest in forfeiture or mortgage-foreclosure cases. It is expected that maximum use will be made of non-Government funds before this appropriation is used.

Bureau of Public Roads

Inter-American Highway: The bill includes $4,750,000 for the improving and extending of the Inter-American Highway in three important Central American Republics—Nicaragua, Costa Rica, and Panama.

Weather Bureau

Salaries and expenses: A supplemental of $175,000 was requested in House Document No. 454 to provide for meteorological observations and services by the Weather Bureau at Cold Bay, Alaska. The committee approves the operation of this activity and suggests that the costs therefore be absorbed from the regular appropriation of $24,750,000.

CHAPTER III

Subcommittee: GORDON CANFIELD, New Jersey, chairman; EARL WILSON, Indiana; BENJAMIN F. JAMES, Pennsylvania; CHARLES W. VURSELL, Illinois; J. J. VAUGHAN GARY, Virginia; OTTO E. PASSMAN, Louisiana; ALFRED D. SIEMINSKI, New Jersey.

Treasury Department

Internal Revenue Service

Salaries and expenses: The supplemental request for $9,750,000 contemplates the employment of additional revenue producing employees including some 800 revenue agents, 455 special agents, and 675 supporting personnel.

The regular appropriation act for this Service contemplated a reduction in the overall number of positions but provided funds for an increase of approximately 1,500 revenue producing personnel. During the past several months through reorganization and new planning the number of personnel in certain categories has been greatly reduced while the number of revenue agents has been increased by more than 3,000. (See the table on p. 472 of the hearings.) Since each agent produces in revenue many times his cost to the Service this is an excellent showing. Long-range plans contemplate the addition of approximately 1,000 new agents per year for the next several years until the force reaches a level where most of the more productive erroneous returns can be audited. The committee is pleased with the progress that has been made and compliments the Commissioner and the administrative officials of the Service for the forward-looking planning.

The committee recommends for appropriation $8,750,000, which is a reduction of $1 million from the amount requested. In suggesting this reduction the committee feels that the additional revenue agents provided for in the regular bill, plus the number to be recruited with the funds herein recommended, will enable the Service to move forward as rapidly as it reasonably should in recruiting and training additional agents and will enable it to tie the present program into the contemplated future program of increasing the number of new agents by some 1,000 per year. The funds provided in the Appropriation Act for 1955 plus the funds herein recommended should permit the employment of approximately 1,400 new agents during fiscal year 1955.

United States Secret Service

Salaries and expenses: The purpose of the supplemental request for $229,000, to be derived by transfer, is to provide increased protection of the President, the Vice President, and their families, and to provide additional agents and clerks to process and keep more current the steadily increasing number of bond and forgery and other cases under the jurisdiction of the Secret Service.

Of the 39 agents proposed to be recruited if the requested authorization is granted 11 will be utilized to augment the White House detail of agents to strengthen the security of the President, the Vice President, and their families, and to provide additional personnel for the Protective Research Section. In order that the Protective Research Section may render a desirable and effective service its work with respect to threatening, abusive, obscene, and other categories of communications must be examined immediately upon receipt of the communications and properly evaluated and processed. Testimony before the committee indicates that with the available personnel a thorough and complete processing of these cases has not been possible. As of May 1, 1954, a backlog of 1,000 cases was on hand.

The remaining 28 of the 39 agents requested are to be used in the investigation of claims arising as the result of forgery and alteration of Government checks and bonds. Testimony indicates that the backlog of cases in almost every category is increasing monthly and that if the request for the 28 additional agents for this work is granted there will still remain at the close of fiscal year 1955 an average backlog of 78 cases for each agent, whereas it is the opinion of the Service that the average backlog per agent should not be more than 15 cases.

The supplemental contains a request also for funds for 12 clerk-stenographers to increase the operating efficiency of field offices, and also some $77,500 for necessary incidental expenses of additional personnel including $48,400 for travel, $1,350 for other contractual services, $3,750 for supplies and materials, $14,000 for equipment, and $10,000 for the purchase of information and to pay informants for services looking toward the apprehension of criminals.

The committee in its report on the annual "Treasury Department Appropriation Act, 1955," Public Law 374, 83d Congress, approved May 28, 1954, in recommending the amount requested in the budget commented upon conditions within the Service and suggested that consideration be given such matters as above referred to before presenting budget requests for fiscal year 1956. The present request is in response to that suggestion.

In recommending the amount herein requested, which is to be derived by transfer, the committee again reiterates its purpose of providing every security and protection for the President, the Vice President and their families, and wishes to encourage the Secret Service in the performance of its other very important functions.

Salaries and Expenses, White House Police

The supplemental request for $62,000 for this appropriation, to be derived by transfer, would permit the reestablishment of essential posts which were discontinued as

the result of reductions in appropriations for fiscal year 1954. The committee recommends that the request, which contains an amount sufficient to employ 18 class 3 police privates for 9 months plus holiday pay, and $1,800 for uniforms, be approved in order that every precaution can be taken for adequate protection of the White House.

United States Coast Guard

Acquisition, construction, and improvements: The supplemental request to the Coast Guard in the amount of $4 million contains two specific requests, as follows:

1. $3,750,000 for the construction of eight 95-foot boats to patrol the entrances at 3 ports; and

2. $250,000 for the replacement of a portion of the wharf at the Coast Guard base at Ketchikan, Alaska.

The item for $3,750,000 concerns the port security program which was initiated in October 1950, for the purpose of preventing the introduction into the country of persons or things inimical to the welfare of the United States and to protect vital port facilities.

Ten ports around the perimeter of the United States are now patrolled, and under an executive plan it is proposed to extend such patrol to 6 additional ports. Craft for patrol functions at 3 of the 6 ports are being provided by redeployment of boats presently being used in the port security program, leaving a requirement for the 8 boats herein requested for the remaining 3 ports. There are no funds presently available in Coast Guard appropriations for this construction. Therefore if the Executive plan is to be augmented the additional patrol boats are necessary.

Recent construction costs of 95-foot patrol boats indicate that the funds requested plus some materials left over from recent construction, and anticipated savings, will provide the eight patrol boats necessary to complete the program. The committee was impressed by testimony indicating a careful husbanding of resources and efforts to secure the patrol boats at the least possible outlay of funds.

The second item of the request in the amount of $250,000 to replace a section of the Coast Guard wharf at Ketchikan, Alaska, is in support of the only repair and supply facility of the Coast Guard District that covers Alaska. It is the only facility in the district with the capability for servicing all aids to navigation. The district supply depot, the Captain of the Port office, the electronic repair shop, and the maintenance and repair detachment are consolidated on this base for economy of operation. The section of the wharf that has so badly deteriorated was built in 1942 during wartime when creosoted pressure-treated timber was unavailable. This resulted in the use of salts treated and untreated timber and pilings which has permitted deterioration to a point that it is unsafe and prohibits the transfer of heavy equipment from ship to shore and seriously reduces the capacity of the base to service heavy buoys for the Alaskan area. Members of the committee who have visited the base concur in the report that the wharf was in bad condition as far back as 1950.

In view of the circumstances the committee recommends the appropriation of the $4 million requested for the purposes above discusseed.

Retired pay: The request for an additional amount of $80,000 (to be derived by transfer) for retired pay for Coast Guard warrant officers results from the enactment of Public Law 379, 83d Congress, approved May 29, 1954, which provides, in effect, that an increased number of warrant officers be placed on the retired list during fiscal year 1955. The language recommended permits absorption of the cost by transfer of the necessary amount from the appropriation to the Coast Guard for "Operating expenses, 1955."

CHAPTER IV

Subcommittee: FRED E. BUSBEY, Illinois, chairman; HAMER H. BUDGE, Idaho, acting chairman; BEN F. JENSEN, Iowa; ERRETT P. SCRIVNER, Kansas; temporarily assigned; JOHN E. FOGARTY, Rhode Island; ANTONIO M. FERNANDEZ, New Mexico.

Department of Labor

Bureau of Veterans' Reemployment Rights

Salaries and expenses: The committee denied the request for an additional $119,000. During the recent hearings on the regular budget request for this Bureau's funds for fiscal year 1955, the committee was told of the Bureau's gradually increasing backlog of work. In view of the facts presented at that time the committee and subsequently the Congress allowed the full amount of the budget request. Basically, the same justification was presented for the supplemental. The committee was not able to determine that any new factors have arisen that would indicate that the appropriation just made should be revised.

Bureau of Employment Security

Salaries and expenses: The committee denied the request for an additional $90,000. Most of the workloads upon which this request was based were foreseeable and considered at the time of action on the regular appropriation for 1955. The committee believes that any part not so considered can be absorbed within the appropriation of $4,705,000 already made.

Grants to States for unemployment compensation and employment service administration: The bill includes $4,600,000 of the $43 million requested and provides that this amount be available for workload increases and for increases in State salaries resulting from overall changes in State salary schedules. Payments for salary increases shall be limited to those increases which affect generally all employees of the State. This is in line with the recommendation of the Department. For the most part, the request was based on increased workload. The committee therefore sought a reconciliation of the workload and administrative costs for 1950, the postwar year of highest unemployment, with the workload and cost estimates for 1955. It was determined that the average actual insured unemployment during 1950 was 2,033,100 and the revised estimate for 1955 is for an average of 1,680,000. The appropriation for 1950 was $174 million and the request for 1955 totals $259,400,000, including the supplemental request for $43 million. Thus, with insured unemployment estimated to be 17 percent less, the request for administrative funds is 49 percent more. Considerable time was spent in attempting to determine why there should be this discrepancy. The witnesses steadfastly maintained that it was due to increased salary rates and increases in nonpersonnel costs such as rents. However, a more detailed breakdown, requested to be submitted for the record, revealed that the 1955 estimates would also provide for 3,400 more employees than were used for this work in 1950.

The action of the committee coupled with the appropriation already made for 1955 will provide a base appropriation of $200 million, which is the same as the amount expended during 1954, and a contingency fund of $21 million for workload increases in 1955 over those experienced in 1954. The committee is confident that the amount will be sufficient to adequately provide for any increases that can logically be anticipated in fiscal year 1955. In the unlikely event that the contingency fund is depleted before the end of the fiscal year the committee will expect to give favorable consideration to a supplemental request.

The language in this paragraph of the bill changes the restrictions on the use of the contingency fund, provided in the 1955 Department of Labor Appropriation Act, to allow the use of these funds for State salary increases resulting from changes in overall State compensation plans.

Unemployment compensation for veterans: The committee has allowed the full amount of $88,400,000 requested for this purpose. The expenditure of these funds is almost entirely beyond administrative control and the committee has, as it has in the past, accepted the estimates of those in the best position to estimate the extent of the need. The committee regrets that this is apparently the best alternative, for it has proven a very poor one. The request that was justified in March was for $55,600,000 for the full 1955 fiscal year. This amount was allowed in full. In July the estimate was revised to a total of $144 million. It is obvious that the original submission was grossly in error.

Salaries and expenses, Mexican farm-labor program: The committee denied the request for an additional $350,000 to recruit additional Mexican farm laborers estimated to be required because of intensified activities of the Immigration and Naturalization Service to deport Mexicans illegally in the United States. The committee was somewhat surprised to find that the major portion of the request was not for recruiting but for other activities such as compliance work, and that the request included funds to increase the Washington staff by 25 percent. The Congress was rather generous in allowing $60,000 more than the original 1955 budget request, for nonreimbursable activities. Any increase in workload that may occur can be provided for by adjustments within the $1,581,000 already appropriated.

Bureau of Labor Statistics

Salaries and expenses: The committee denied the request for $110,000 for increased emphasis on building statistics. No factors were presented to indicate any greater need for increasing this activity that did not exist at the time the original 1955 budget was considered. That budget contained $301,881 for this activity, which is the same amount that is available under the 1955 appropriation already made to the Bureau.

Department of Health, Education, and Welfare

Office of Education

Three separate items falling in the field of research into the problems of education were submitted. The largest was $1,750,000 for a White House Conference on Education, another (which technically would come under the Secretary's office) was $175,000 for the establishment of a National Advisory Committee on Education, and the third was $100,000 for cooperative research in education. No funds are included in the bill for any of these. The Office of Education has, for many years, been justifying the requests for appropriations to cover its own salaries and expenses on the basis that it does essentially the same research and fact-and-opinion gathering in the education field that is envisioned by the three activities for which $2,025,000 additional was requested. The fact that the committee recommends some $3 million per year to be appropriated to the Office of Education is evidence that it believes that a reasonable amount of such activity is needed.

It is worthy of note that 75 percent of the supplemental funds requested were for grants to States to enable them "* * * to hold conferences of educators and lay citizens to discuss educational problems and make recommendations for appropriate action to be taken at local, State, and Federal levels." This method of financing activities purely within State boundaries appears questionable, to say the least.

Public Health Service

Grants for hospital construction, and surveys, and planning for hospital construction: The committee has not allowed the $35 million requested for construction under the new provisions of this program which have been provided by legislation enacted only a few days ago. The hearings revealed that plans for the expenditure of these funds, the ability or willingness of the States to approve projects on the basis of the tentative program presented to the committee, and the availability of sponsors for the program presented, were all very vague. The importance of a survey and preparation of a plan for each State was emphasized in the testimony. The committee agrees completely that this is very important to the successful carrying out of a program involving the expenditure of over $100 million of the Federal funds and has approved in full the request for $2 million for grants to States for this work.

The committee's action does not indicate lack of sympathy with the new program but rather a belief that it might easily be done more harm than good by proceeding before any but the most sketchy plans are available.

Salaries and expenses, hospital construction service: None of the requested increase of $400,000 has been allowed. The committee believes that the $850,000 appropriated in the 1955 appropriation act provides sufficient funds to enable this division to administer the established program and prepare for the new features that were recently added by the amendments to the Hospital Survey and Construction Act.

Social Security Administration

Salaries and expenses, Bureau of Old-Age and Survivors Insurance: The committee expressly denies the requested authority to use funds from the OASI Trust Fund to pay per diem to the 450 employees proposed to be moved to Washington from Baltimore and seriously questions the advisability of such a move.

Construction, Bureau of Old-Age and Survivors Insurance: The Bureau requested $24,890,000 for the construction of a building to house its activities now located in several different buildings in Baltimore and Pennsylvania. The committee has not provided funds since it was testified that final plans and specifications will not be completed until June 1955 and the bids will not likely be opened until August 1, 1955. More than ample funds have already been provided to do all necessary work up to the point of awarding the construction contract. The committee recognizes the need for this building and will expect the 1956 budget to include provision for an authorization to cover the costs of construction. The committee approves of plans for the conventional, fireproof facility described during the hearings and estimated to cost not to exceed $25,370,000 in total. The committee specifically disapproves of the additional special design and construction features aimed at providing bomb protection, estimated to cost $2,600,000; and directs that the plans not provide the same.

Salaries and expenses, Children's Bureau: The committe has not allowed the request for $165,000 for additional activities in the field of juvenile delinquency. The Children's Bureau has for many years had ample authority to proceed in this field, and the committee notes that of the 1954 appropriation to the Bureau of $1,525,000, providing for 214 man-years of employment, the Bureau saw fit to utilize only 5½ man-years in the field of juvenile delinquency. The personnel now utilized in this activity could be quadrupled within the appropriation already made and still require only about 10 percent of the total Bureau funds. It is apparent from budget submissions that the executive branch has not decided whether increased activity in this field should be assigned to this Bureau or to other bureaus in other offices of the same Department.

Office of the Secretary

Salaries and expenses, Office of the Secretary: Since there were no new factors introduced in support of this request that were not known at the time the regular 1955 budget was presented to the committee, the request for $124,500 is denied. The committee believes that there may be certain functions not now carried on in the Secretary's Office which should be carried on at the departmental level and requests that this be given careful study for possible inclusion in the 1956 budget.

CHAPTER V

Subcommittee: H. CARL ANDERSEN, Minnesota, chairman; WALT HORAN, Washington; OAKLEY HUNTER, California; MELVIN R. LAIRD, Wisconsin; JAMIE L. WHITTEN, Mississippi; CLARENCE CANNON, Missouri; FRED MARSHALL, Minnesota.

Department of Agriculture

Forest Service

Forest roads and trails: The bill includes $6,500,000 for "Forest Roads and Trails" which, together with the amount carried in the regular bill, will provide the full authorization of $22½ million for this purpose for 1955. The committee is approving the full 1955 authorization with the understanding that all unused prior year authorizations will be considered canceled.

The additional funds are recommended to meet (1) the urgent need for access roads in southern Idaho, where epidemic insect infestations make necessary an immediate salvage program, and (2) the need for additional roads in California and other areas where overmature timber needs harvesting as soon as possible to protect its commercial value.

CHAPTER VI

Subcommittee: BEN F. JENSEN, Iowa, chairman; IVOR D. FENTON, Pennsylvania; HAMER H. BUDGE, Idaho; MICHAEL KIRWAN, Ohio; W. F. NORRELL, Arkansas.

Department of the Interior

Bureau of Indian Affairs

Health, education, and welfare services: The budget estimate of $1,180,000 has been allowed to provide 400 additional hospital beds in Washington State sanatoriums for Alaskan native tuberculosis patients. None of the funds allowed in this appropriation are to be used for hospitalization in Alaska.

Resources management: An appropriation of $100,000 is recommended for expediting probate work on Indian estates. While this is a reduction of $50,000 in the estimate of $150,000, it should permit a considerable reduction in the present backlog of probate cases.

Construction: The budget estimate of $6,900,000 has been reduced to $3,900,000 which is allowed for construction, repair, and maintenance of roads in Indian reservations. This amount together with the funds in the regular appropriation bill for 1955 will provide a total of $6,797,000 to meet contract earnings and other expenses on the approved program totaling $7,730,000. The amount appropriated herein and the amount appropriated in the regular bill are both applicable to the total authorization in the Federal-Aid Highway Act of 1954 under the provisions of section 6 of that act.

The $3 million which has been disallowed was for grants to public-school districts for the construction and equipping of public school facilities for Navaho Indian children from reservation areas not included in such districts. While the committee is most anxious to support all efforts to put as many Indian children into school as possible, it is of the opinion that there is no law under which such a program as that proposed can be undertaken.

Bureau of Reclamation

Construction and rehabilitation: The committee recommends an appropriation of $1,707,000, a reduction of $118,000 in the budget estimate of $1,825,000. The funds provided are for four small irrigation projects as follows:

Hanover-Bluff unit, Wyoming	$157,000
Heart Butte unit, North Dakota	300,000
Helena Valley unit, Montana	250,000
Sargent unit, Nebraska	1,000,000
Total	1,707,000

Rehabilitation work on the Humbolt project in Nevada, estimated at $118,000, was provided for in the regular bill for 1955.

The funds provided for the Hanover-Bluff unit were proposed in the estimate for use only on the Bluff portion of the unit. Both portions of the unit are to be served by a common diversion canal and if they are undertaken simultaneously economic feasibility is improved. Therefore, the funds provided are to be used for plans and construction of the complete unit.

The committee approves an expenditure of not to exceed $15,000 of available funds to complete investigations on the N-Bar-N development as a separate unit of the Missouri River Basin project in view of the fact that an irrigation district has been formed by the water users.

Bureau of Mines

Construction: The recommended appropriation of $5 million represents a reduction of $1 million in the budget estimate. These funds are to be used for the construction of helium production facilities at either Excell, Tex., or in the Keyes gas field of Cimarron County, Okla., depending upon which location provides greatest benefits to the Government. The committee fails to see the need for the large number of additional employees proposed in connection with this construction which is to be contracted.

The prices charged for helium sold by the Federal Government are calculated to recover capital charges, including interest.

Language has been included in the bill to rescind $19,000 of unobligated funds appropriated in previous years for the Leadville Tunnel drainage project in Colorado.

National Park Service

Construction: An appropriation of $5,562,101 is recommended. Of this amount $500,000 is for acquiring privately owned lands within the boundaries of areas administered by the Park Service, and $5,602,101 is for construction of parkways, roads, and trails. This later amount together with funds allowed in the regular bill for 1955 for the same purposes will provide a total of $9,500,000, the full amount of cash requested to meet 1955 contract earnings and other expenses on the authorized and approved program of $20 million. The amount appropriated herein and the amount appropriated in the regular bill are both applicable to the total authorization in the Federal-Aid Highway Act of 1954 under the provisions of section 6 of that act.

With this appropriation, there will be a considerable increase in the general level of the Park Service construction program. The committee expects the Department to take this into account in preparation of the 1956 budget. It is the committee's desire also that the need for reconstruction of the south approach road, Route 9, into Yellowstone Park, be given careful consideration in connection with the 1956 construction program.

In connection with both appropriated and donated funds available for acquisition of lands within the boundaries of areas administered by the Park Service, no land is to be taken through the condemnation procedure

when the use of such procedure is objected to by the owner.

Office of Territories

Administration of Territories: The estimate of $47,000 is recommended. These funds are required for the payment of a 25 percent cost of living allowance to classified employees in the Virgin Islands in accordance with regulations established by the Civil Service Commission on April 3, 1954.

CHAPTER VII

Subcommittee: JOHN PHILLIPS, California, chairman; NORRIS COTTON, New Hampshire; CHARLES R. JONAS, North Carolina; OTTO KRUEGER, North Dakota; ALBERT THOMAS, Texas; GEORGE W. ANDREWS, Alabama; SIDNEY R. YATES, Illinois.

Independent Offices

Commission on Intergovernmental Relations

The bill includes $414,000 for salaries and expenses of this Commission, which is $46,000 below the estimate, and together with the unobligated balance of $96,250 will provide a total of $510,250 during the remaining 8 months the Commission will be in existence.

The Commission was established by Public Law 109, approved July 10, 1953, and the original date for making its final report was March 1, 1954. When it became evident that it would not be possible to complete the studies in this broad field on schedule the date for filing the final report and liquidating the Commission was extended to March 1, 1955, in Public Law 302, approved March 1, 1954.

Because of the extension of time for making its report, the original appropriation of $500,000 will not be sufficient and the committee therefore recommends a supplemental appropriation of $414,000. The coordination of effort already contemplated between this agency and other commissions and congressional committees should make it possible to save the amount indicated.

Commission on Organization of the Executive Branch of the Government

The bill contains an additional $497,835 to complete the activities of the Commission, which is a reduction of $55,315 in the estimate. There has been appropriated previously $1,931,909, making the total for the present Commission $2,429,744. The first Hoover Commission was able to complete its work with a total appropriation of $1,938,600, and the committee is of the opinion maximum results can be obtained by this Commission within the amount provided. The committee is aware of the popularity of this program and is in complete accord with its purposes, but believes that economies can be accomplished and efforts made to coordinate the studies of this Commission and other agencies and committees to the extent of the reduction indicated.

General Services Administration

Additional court facilities: The committee considered a budget estimate of $4,800,000 for additional court facilities for the new judges recently authorized by law to be appointed to the Federal bench, and has approved $3 million for such purposes, or a reduction of $1,800,000 in the estimate.

The committee has the utmost regard for the needs of the other separate and equal branch of the Government, but it cannot approve the present estimates of cost which are clearly high and has reduced the total to what it considers is actually needed. The committee believes that justice will be dispensed in this Nation as well from a chair costing the Government $100 as from one costing $174, and as well from behind a $200 desk as one for $341. A wastepaper basket at a lesser cost than $15 will serve just as well.

It is suggested that prior to starting this program for additional court facilities an effort be made to determine the actual desires of the judges and make the costs more reasonable than those just considered.

Operating expenses, Federal Supply Service: The committee has allowed the budget estimate of $60,000 to enable the General Services Administration to establish interagency motor pools at 5 locations during the fiscal year 1955 if legislation contained in H. R. 8753 or S. 3155 authorizing such pools is enacted into law. It was testified that if such pools are created approximately 20 percent of the present number of vehicles will no longer be required and the savings resulting from reductions in maintenance, administration and other costs are expected to be $1,500,000 per year after the first 3 years of operation.

Expenses, general supply fund: The bill contains language authorizing the General Services Administration to lease warehouse space temporarily in excess of operating requirements to commercial organizations, and that proceeds from such rentals shall be covered into the Treasury as miscellaneous receipts.

Strategic and critical materials: The bill contains the budget estimate of $380 million for this item and the same limitation as contained in the regular bill that no part of the amount shall be used for construction of warehouse or tank storage facilities. Approximately $292 million of the supplemental request is, in effect, a bookkeeping transaction to purchase inventory from the Defense Production Act borrowing authority program which was started in 1950, and such transfers have no effect on net expenditures of the Government. The value of the stockpile on hand or on order on June 30, 1954, is estimated at $5,452.3 million, under the revised estimates the Government will add materials valued at $579.2 million this fiscal year, and a balance of $1,313.6 million will remain to be financed after 1955.

National Science Foundation

International Geophysical Year: The bill contains $1,500,000 to assist in financing the United States program for the International Geophysical Year, which is a reduction of $1 million below the amount contained in the supplemental estimate. The committee is of the opinion the amount recommended is adequate, but in the event the National Science Foundation considers this program of such importance that it may desire to provide an additional grant of not to exceed $1 million from its regular funds, the committee is of the opinion the Foundation has sufficient funds to do so and that the language of its basic act is of sufficient scope as to permit such a grant.

The International Geophysical Year is a worldwide scientific undertaking involving concurrent research in geophysics by some 30 nations, beginning in 1957. It involves studies of the entire earth including the arctic regions, the oceans and the upper atmosphere. The appropriation at this time will enable orders to be placed for specialized equipment, and an additional sum will be needed for the fiscal year 1956 to cover the remaining costs of the program.

St. Lawrence Seaway Development Corporation

The bill contains language authorizing the Corporation to initiate operations under the provisions of Public Law 358, approved May 13, 1954. The Corporation has authority to issue not to exceed $10,500,000 worth of revenue bonds to the Secretary of the Treasury during its first year, and thereafter up to a total of $105 million. In view of the fact that the Budget language contained no limitation on the amount of money that could be spent for administrative expenses of the Corporation, the Committee has limited the amount that can be spent for this purpose to $250,000. It has been proposed that authority be included for the employment of a total of four persons in grades GS–16 to 18 to enable employment of the best qualified personnel in key positions of the Corporation, and such language has been included.

Veterans' Administration

Inpatient care: The committee has included in the bill the Budget estimate of $3 million for this item which is in addition to $598,127,000 included in the regular bill. Congress relies on the agency to indicate the number of beds that can be staffed and operated and has always provided the full amount required.

Recently it has developed that the Veterans' Administration has staffed hospitals in 1954 over the level authorized by the appropriations and it would be necessary to make some reductions in such personnel and delay staffing of neuropsychiatric beds in 1955 which are badly needed unless the additional $3 million is made available. This information was not given to the committee during the regular hearings and to do everything within its power to correct the situation the committee has included the entire amount of the supplemental estimate.

It is disturbing to note that there are neuropsychiatric hospitals where according to testimony the cost is running in the neighborhood of $34 per patient day, which no private hospital administrator would tolerate. A neuropsychiatric hospital usually operates 25 percent cheaper than a general medical and surgical hospital and it is recommended that a thorough investigation be made by the Veterans' Administration to correct such conditions and to bring about more efficient operations.

No part of the present estimate is needed to provide care for any service-connected disability, but is exclusively for non-service-connected treatment.

War Claims Commission

In order to complete adjudication of all war claims on schedule an additional $400,000 is requested for administrative expenses, and the bill includes the full amount. The Commission has remaining a backlog of the most difficult claims, and at least an additional 47,000 claims are expected to be filed under authority of Public Law 359, approved May 13, 1954, which extended the date for filing claims to August 1, 1954.

Under the provisions of Reorganization Plan No. 1 of 1954 functions and funds available or to be made available to the War Claims Commission were transferred to a new agency on July 1, the Foreign Claims Settlement Commission of the United States. Since the committee is allowing the full budget estimate for this item, and regardless of the transfer of activities to the new agency, the committee is expecting all work on war claims to be completed on schedule on March 31, 1955, and no further request for funds should be made.

CHAPTER VIII

Subcommittee: GLENN R. DAVIS, chairman; T. MILLET HAND, New Jersey; ELFORD A. CEDERBERG, Michigan; JOHN TABER, New York; CLARENCE CANNON, Missouri; LOUIS C. RABAUT, Michigan; JOHN J. RILEY, South Carolina.

Military construction

The Department of Defense requested approval of a military public works program of $1,427,622,000 for fiscal year 1955 and new appropriations of $1,100 million. The committee recommends a program of $1,235,958,000, a reduction of $191,664,000. New appropriations of $571,600,000 are recommended, a reduction of $528,400,000. These funds when coupled with existing unobligated balances from prior years public works programs, which the committee has made available, will be sufficient to meet the needs of the military construction program for the current fiscal year. The action of

the committee on the specific requests will be found in subsequent paragraphs and in the table at the end of this chapter.

Military Public Works Program

The committee was gratified to note the progress made in the proper utilization of advance planning funds, particularly in the Department of the Air Force, which resulted in the estimates submitted for the 1955 program being firmer than any received in prior years. There are, however, several deficiencies existing in this field which warrant the immediate attention of the Department of Defense and the Assistant Secretary of Defense for Properties and Installations. There has always been a need for review of the cost and scope of those facilities which have functions common to more than one service. That this review has not been properly carried out in the past is obvious when one seeks to explain why a fire station should cost approximately $12 per square foot for the Air Force and be budgeted for an amount in excess of $18 per square foot by the Navy. The committee is also at a loss to understand why parachute shops can be constructed for approximately $16 per square foot by the Air Force while the Navy requests in excess of $21 per square foot for these shops. Similar cost differentials appear to exist in the construction of certain fuel storage facilities and ammunition and ordnance magazines. The attention of the Department is called to the situation existing with reference to the construction of barracks at Ladd Air Force Base in Alaska. The Department of the Air Force has under contract at the present time barracks with mess facilities at these locations at costs varying between $2,876 per man to $3,016 per man. The Department of the Army submitted budget requests for barracks for this installation at a cost of $3,900 per man. The committee desires that the Department of Defense thoroughly study this problem of common type facilities and file a report thereon with the committee not later than January 3, 1955.

There is also a need for a continuing review by the Department of Defense and the three services as to the design of repetitive type structures. A recent experience of the Department of the Navy in this respect points out the need for such a constant review. The so-called Miramar hangar was adopted by the Navy as the standard type of overhaul hangar for naval air stations. Continuing reviews of the design and construction of this hangar have resulted in modifications which have reduced the unit cost in excess of $4 per square foot. The committee will expect the services to maintain a continuing inspection of the design of their facilities so that maximum utilization is made of funds appropriated for military construction.

The estimates for fiscal year 1955 represent the initiation of two features of the military construction program which have not been present to any extent in recent years. The first of these has to do with the construction of welfare and recreational facilities. The committee was not satisfied that the estimates presented to it in support of these requests were based on adequate advance planning. On the contrary, it appeared that in most instances the facilities were too costly for the proposed utilization of the structures. The unit costs of gymnasiums contained in the program were particularly high. Past experiences in both Government and private construction lead the committee to believe that permanent gymnasiums can be constructed for approximately $16 per square foot, while semipermanent gynasiums can be properly built for $14 per square foot. In allocating funds for gym facilities at the various installations the committee has used these cost factors and expects that the Department of Defense will have these limitations in mind in designing standard gymnasiums. It will be expected that the Departments will adhere to the same austere standards of construction on welfare and recreational facilities which have been typical of the construction program in the past. In this respect, the committee points out to the Department of Defense the desirability of standard facilities of this type for the three services.

The 1955 program also contains the initiation of a program for providing vehicle parking areas at many of the large installations. Generally the committee has approved these requests. It desires, however, that the departments carefully monitor this feature of the construction program, and it will be expected that requests for parking areas, for other than military vehicles, will be held to the minimum.

The necessary expansion of industrial and aviation facilities of the Department of Defense is creating a problem which requires immediate and continuing attention. Necessary expansion of most of the other installations can be made only at great expense, in many instances necessitated by the purchase of valuable commercial and residential land from private interests. The only alternatives to these expansions are the construction of similar facilities elsewhere or a reduction of the functions of the particular installations. While these alternatives appear to be costly and undesirable they must be considered in connection with any future plans for our military forces.

The conversion of the Air Force to the use of jet-type planes has created another problem, especially as to the use of municipal airports in close proximity to populated areas. At present the use of such fields is vital to the proper air defense of the Nation. If their use is to jeopardize either Air Force personnel or the surrounding communities or is to prohibit the expansion of commercial flying activities, consideration should be given to the establishment of new facilities in the same general area. The need for a review of the continued utilization of such fields is most apparent when one realizes the projected increase of flying activities in the future. It is desired that the Department of Defense, together with the three services, thoroughly study these problems, filing the results of such a study with the proper committees of Congress early in the next Congress and prior to the consideration of the military construction program for fiscal year 1956.

The action of the committee is generally predicated on several criteria: First, maximum use should be made of existing unobligated and unexpended balances prior to the appropriation of additional funds; second, construction on defense installations should continue to be on austerity standards; third, the limitations on the construction of barracks, bachelor officer quarters, warehousing facilities, and cold-storage plants should be continued at the same unit cost as have been used in the past.

Department of the Navy

The budget estimates received by the committee requested approval of a Navy public-works program in the amount of $221,470,000 and appropriations of $140 million. The committee recommends a program of $196,013,000, a reduction of $25,457,000. Appropriations of $73,517,000 are recommended, a reduction of $66,483,000. The unobligated balance of funds previously appropriated for public works, Navy, was estimated to be $300 million of June 30, 1954. These funds, when coupled with the appropriations contained in this bill, will be sufficient to meet the needs of the construction program of the Navy in fiscal year 1955 and will provide a satisfactory carryover of funds into the following fiscal year.

Committee Recommendations

The funds approved for the Department of the Navy have been allocated in the following manner:

CONTINENTAL

Shipyard facilities:	
Naval Shipyard, Boston, Mass.	$3,400,000
Naval Shipyard, Charleston, S. C.	555,000
Minecraft Station, Panama City, Fla.	1,254,000
Naval Shipyard, San Francisco, Calif.	1,091,000
Fleet facilities:	
Morehead City, N. C.	710,000
Submarine Base, New London, Conn.	476,000
Minecraft Base, Charleston, S. C.	158,000
Aviation facilities:	
Naval Air Station, Alameda, Calif.	4,463,000
Naval Auxiliary Landing Field, Alice, Tex.	151,000
Naval Air Station, Atlantic City, N. J.	779,000
Marine Corps Auxiliary Air Station, Beaufort, S. C.	10,776,000
Naval Air Station, Brunswick, Maine	527,000
Naval Air Station, Cecil Field, Fla.	863,000
Naval Auxiliary Air Station, Chase Field, Tex.	241,000
Marine Corps Air Station, Cherry Point, N. C.	1,609,000
Naval Air Station, Corpus Christi, Tex.	342,000
Naval Auxiliary Air Station, Corry Field, Fla.	2,153,000
Marine Corps Air Station, El Toro, Calif.	1,675,000
Naval Auxiliary Air Station, Fallon, Nev.	468,000
Naval Air Station, Glenview, Ill.	70,000
Naval Auxiliary Air Station, Glynco, Ga.	6,185,000
Naval Auxiliary Air Station, Kingsville, Tex.	601,000
Naval Air Facility, Litchfield, Park, Ariz.	1,654,000
Naval Air Landing Field, Mayport, Fla.	75,000
Naval Air Station, Miramar, Calif.	3,331,000
Naval Air Station, Moffett Field, Calif.	1,336,000
Marine Corps Auxiliary Air Station, Mojave, Calif.	160,000
Marine Corps Air Facility, New River, N. C.	972,000
Naval Air Station, Norfolk, Va.	628,000
Naval Air Station, Oceana, Va.	4,106,000
Naval Air Station, Pensacola, Fla.	1,533,000
Naval Air Missile Test Center, Point Mugu, Calif.	1,030,000
Naval Air Station, Quonset Point, R. I.	579,000
Naval Air Station, San Diego, Calif.	1,157,000
Padre Island, Tex.	80,000
Naval Air Turbine Test Station, Trenton, N. J.	5,209,000
Naval Air Station, Whidbey Island, Wash.	4,197,000
Classified locations	2,666,000
Supply facilities:	
Naval Supply Center, Norfolk, Va.	653,000
Naval Supply Center, Oakland, Calif.	3,051,000
Marine Corps facilities:	
Depot of Supplies, Albany, Ga.	452,000
Camp Lejeune, N. C.	749,000
Recruit Depot, Parris Island, S. C.	737,000

CONTINENTAL—continued

Marine Corps facilities—Con.	
Marine Corps School, Quantico, Va	$585,000
Recruit Depot, San Diego, Calif	82,000
Ordnance facilities:

Classified locations	8,452,000
Ordnance facilities: Classified location	400,000
Communications facilities: Naval Communication Facility, Philippine Islands	6,520,000
Yards and docks facilities:	
Correction of deficiencies, overseas	750,000

OVERSEAS—continued

Yards and docks facilities—Con.	
Replacement of temporary housing	$4,000,000
Total, overseas	90,724,000
Total, Navy	196,013,000

Generally these allocations are based upon application of previously mentioned criteria to the budget requests. The committee desires, however, to point out the necessity for reductions at several of the installations.

The committee has denied the request of $225,000 for the acquisition of the San Francisco and Napa Valley Railroad serving the Naval Shipyard, Mare Island, Calif. It would appear from the testimony that the Navy desires the requested funds to increase their bargaining position with reference to the rail transportation problem at this installation rather than for the immediate acquisition of the railroad. The committee disapproves the use of funds for this purpose.

The request for a pipefitter shop at the Naval Shipyard, San Francisco, Calif., has been denied. The shop contemplated by the estimates is considerably in excess of any similar facilities which have existed or are now in use at this base. It is desired that the Navy restudy the need for this shop, both as to size and unit cost.

The allocation of $452,000 at the Marine Corps Depot of Supplies, Albany, Ga., is sufficient to provide the requested second increment of the maintenance shops at this installation and the necessary security facilities.

The Department of the Navy requested $288,000 for the construction of temporary classroom buildings at the Marine Corps Recruit Depot, Parris Island, S. C. The committee questions the economy of constructing temporary classrooms at this permanent installation, and desires that the Department restudy this item with a view toward providing permanent classrooms if they are needed to carry on the mission of this depot.

The need for additional physical training facilities at the Naval Academy, Annapolis, Md., is recognized by the committee. The additional gymnasium facility requested in the amount of $5,680,000, however, appears to be excessive in both scope and cost. It is desired that the Department more thoroughly examine the needs of the Academy in this respect and present the results thereof to the committee for its consideration in the next Congress.

The committee has denied the request for funds for certain housing and subsistence facilities at the Naval Training Center, Great Lakes, Ill. In this connection it is noted that the Senate denied the request for authorization of $3,900,000 for barracks and subsistence buildings. All pending requests for construction at Great Lakes are based on the centralization of certain training facilities at that location. It would appear that the Senate questions the desirability of this program, therefore, this committee has deleted all related facilities. It is apparent that the Navy has not adequately justified its plan for consolidation of presently existing facilities at Great Lakes.

The allocations for advance planning and correction of deficiencies, both in the continental United States and overseas, when coupled with unobligated balances remaining in these funds will provide for the continuation of orderly programs similar to those carried on in past years.

The committee has previously stated its desire for a review of facilities which are common both to the Department of the Navy and the other services. This is particularly true with reference to aviation facilities. The cost estimates presented to the committee by the Department on these type facilities were in any instances considerably higher than similar costs in the Air Force. With this restudy in mind the committee has deleted requests for certain common type facilities. At Naval Air Station, Cecil Field, Fla., the parachute building and ordnance facilities have been denied. Fuel storage facilities at the Naval Auxiliary Air Station, Glynco, Ga., at the Naval Auxiliary Air Station, Kingsville, Tex., and the Marine Corps Auxiliary Air Station, Beaufort, S. C., have also been deleted. Fire and crash stations at the Naval Air Station, Brunswick, Maine, Naval Auxiliary Landing Field, Crows Landing, Calif., the Naval Auxiliary Air Station, Fallon, Nev., Naval Air Facility, Cubi Point, Philippine Islands, and the Naval Air Missile Test Center, Point Mugu, Calif., have been denied. The ammunition storage facilities at the Naval Air Facility, Cubi Point, Philippine Islands, and the Naval Auxiliary Air Station, El Centro., Calif., have been denied for the same reason.

Department of the Air Force

The committee recommends a program of $834,080,000 for the Department of the Air Force, a reduction of $111,917,000, and new appropriations $484,080,000, a reduction of $461,917,000 in the request for new funds. In addition, the committee recommends the application of unobligated balances from prior years of $350 million to the construction program set forth in this report. On June 30, 1954, the unobligated balance of construction funds previously appropriated to the Air Force was approximately $1.2 billion. These balances together with the new appropriation will be sufficient to meet the needs of the military construction program in fiscal year 1955 and will provide a satisfactory carryover of funds into the next fiscal year.

Committee Recommendations

Listed below is a table showing the amounts allocated to the installations in the continental United States and the various overseas commands.

CONTINENTAL

Air Defense Command:	
Atlantic City, N. J	$72,000

Total, overseas	164,107,000
Total, Air Force	834,080,000

These allocations are generally based upon application of previously mentioned criteria to the budget estimates. The committee desires, however, to comment on reductions at several of the installations.

The committee is not convinced of the need for a gymnasium at Ent Air Force Base, Colorado Springs, Colo. It would appear that sufficient recreational facilities are presently available in the area to meet the needs of the base personnel.

At Kinross Air Force Base, Mich., it would seem to be proper to provide a multipurpose recreational building, with theater facilities, rather than the large expensive theater contemplated in the budget estimates.

Recent experiences have demonstrated that the costs of storage igloos at Truax/Madison Field, Wis., can be reduced below those presented to the committee.

The Air Force requested $1,495,000 for the relocation of certain buildings at Kelly Field, Tex. As a result of a survey requested by the committee it now appears that the necessary relocations can be accomplished for approximately $975,000. The committee is quite desirous that the Air Force carefully screen the buildings to be relocated at this base both as to their present condition and the actual need for them in the accomplishment of the permanent mission of this installation.

The request of $132,000 for railroad trackage at Topeka Air Force Depot, Kans., has been denied. Estimated savings resulting from this item are not sufficient to warrant its construction at the present time.

It is desired that the Air Force restudy the plans for housing and messing facilities at Gila Bend Auxiliary Field, Ariz., with a view toward providing only for the needs of the personnel stationed at the base. Sufficient funds have been included in the allocation to provide for such reduced facilities. The committee calls to the attention of the Air Force the desirability of providing both housing and messing facilities in one building at small installations of this type.

The committee has reduced the request for personnel facilities at Wichita Air Force Base, Kans., in the belief that a restudy of the present estimates for these structures, both as to size and cost, should result in considerable savings.

Funds were requested for construction of a joint Air Force-Navy Reserve facility in the vicinity of Cleveland, Ohio. Experience has shown that it is folly to appropriate large sums for construction until the site of the installation has been firmly established and proper advance planning accomplished on the individual line items. Since this has not been accomplished at this base, the $4 million allocated by the committee will be sufficient to provide for the necessary land acquisitions as well as to allow the award of contracts for portions of the airfield pavement requirements.

The committee fails to see the need for the replacement of dormitory and messing facilities at Kirtland Air Force Base, N. Mex., the hospital addition at Sedalia Air Force Base, Mo., or the gymnasium at Stead Air Force Base, Nev.

The funds requested for Auxiliary Field 11 of Patrick Air Force Base, Fla. have been denied. The committee will entertain requests for this installation when the site has been firmly established and the need more clearly demonstrated.

The personnel facilities requested at Pope Air Force Base, N. C. have been deleted. It is the committee's opinion that facilities of this type exist, either at this installation or at adjacent Fort Bragg, to meet the needs of the personnel.

The committee desires that the Air Force review the warehouse requested for the Mount Washington climatic project, New Hampshire. The need for the structure and the unit cost of $30 per square foot are both questionable.

At Plattsburg Air Force Base, N. Y., the committee has denied funds for a post exchange sales store and a hospital. Sufficient facilities exist to meet the needs of the base for a sales store. The hospital should be reviewed as to design, size, and cost with a

view toward providing the most economical structure cognizant with the needs of the installation.

The amount of $15,338,000 is made available for the initiation of construction of the Air Force Academy and for construction of the interim Academy at Lowry Air Force Base, Colo., with the specific limitation that the funds made available to the Air Force by the State of Colorado are to be used only for the purchase of land. The committee has reduced the request for land-acquisition funds by the $1 million presently contemplated to be received from the State for this purpose. Under no circumstances is the Department of the Air Force to acquire more than the presently contemplated 15,000 acres for this installation without prior clearance by this committee.

At Hickam Air Force Base, T. H., it appears that the cost of the contemplated restoration of certain barracks space is excessive and should be more thoroughly studied prior to the appropriation of funds.

The committee has denied requests in their entirety for bases on which construction has not been initiated or has been seriously retarded due to the inability of the Air Force to fulfill necessary land requirements. These bases are Portland International Airport, Oreg., Dover Air Force Base, Del., Dow Air Force Base, Maine, and Lawson Air Force Base, Ga.

Reductions have been made in the land acquisition costs at certain bases due to the donation of lands by local interests. These bases are North Dakota, Glasgow Air Force Base, Mont.; Traverse City Air Force Base, Mich.; and Myrtle Beach Municipal Airport, S. C. Additional reductions have been made in the costs at Glasgow due to the overpricing of the land in the estimates submitted to the committee.

Application of the present cost limitation on warehousing and cold-storage facilities has resulted in reductions in the funds requested for these facilities at Minot Air Force Base; Glasgow Air Force Base; Grand Forks Air Force Base; K. I. Sawyer Municipal Airport, Mich.; Klamath Falls Municipal Airport, Oreg; Traverse City Air Force Base, Mich.; Great Falls Air Force Base, Mont.; and Altus Air Force Base, Okla.

The committee has reduced the cost of gymnasiums requested for bases at Grandview, Mo.; Amarillo Air Force Base, Tex.; Laughlin Air Force Base, Tex.; Wichita Air Force Base, Kans.; Kirtland Air Force Base, N. Mex.; Hanscom Air Force Base, Mass.; Hunter Air Force Base, Ga.; Lake Charles Air Force Base, La.; Lincoln Air Force Base, Nebr.; Portsmouth Air Force Base, N. H.; Ardmore Air Force Base, Okla.; Blytheville Air Force Base, Ark.; Foster Air Force Base, Tex.; and George Air Force Base, Calif.

Department of the Army

The budget estimates received by the committee for the Department of the Army contemplated a funding program from available unobligated balances in the amount of $245,611,000. The committee recommends a program of $191,321,000, a reduction of $54,290,000 in the budget request.

Committee Recommendations

The funds approved by the committee for the Department of the Army are allocated in the following manner:

Department of the Army	
Ordnance:	
Aberdeen Proving Ground, Md	$1,579,000
Atchison Storage Facility, Kans	1,155,000
Benicia Arsenal, Calif	352,000
Frankford Arsenal, Pa	1,626,000
Jet Propulsion Laboratory, Calif	247,000
Letterkenny Ordnance Depot, Pa	$2,190,000
Lima Ordnance Depot, Ohio	33,000
Navaho Ordnance Depot, Ariz	85,000
Redstone Arsenal, Ala	580,000
Savanna Ordnance Depot, Ill	360,000
Quartermaster:	
Atlanta General Depot, Ga	100,000
Fort Lee, Va	983,000
New Cumberland General Depot (including United States Disciplinary Barracks), Pa	492,000
Richmond Quartermaster Depot, Va	97,000
Chemical:	
Army Chemical Center, Md	673,000
Deseret Chemical Depot, Utah	181,000
Dugway Proving Ground, Utah	78,000
Signal:	
Transmitting Station, Va	2,360,000
Fort Huachuca, Ariz	77,000
Lexington Signal Depot, Ky	492,000
Fort Monmouth, N. J	330,000
Sacramento Signal Depot, Calif	492,000
Corps of Engineers: Fort Belvoir, Va	3,050,000
Transportation:	
Brooklyn Army Base, N. Y	1,264,000
Charleston Transportation Depot, S. C	370,000
Fort Eustis, Va	3,463,000
Oakland Army Base, Calif	785,000
Point Aux Pins Ammunition Terminal, Ala	6,152,000
Army Security Agency: Vint Hill Farms Station, Va	98,000
Army Medical Service:	
Wm. Beaumont Army Hospital, Tex	391,000
Brooke Army Medical Center, Tex	1,129,000
First Army:	
Boston Army Base, Mass	9,900,000
Fort Devens, Mass	1,314,000
Fort Dix, N. J	330,000
Fort Hamilton, N. Y	450,000
Second Army:	
Fort Knox, Ky	1,285,000
Fort George G. Meade, Md	303,000
Third Army:	
Fort Benning, Ga	4,264,000
Fort Bragg, N. C	3,470,000
Fort Campbell, Ky	3,623,000
Fourth Army:	
Fort Bliss, Tex	11,178,000
Fort Hood, Tex	9,904,000
Fort Sill, Okla	1,314,000
Fifth Army:	
Camp Carson, Colo	3,582,000
Fort Riley, Kans	3,871,000
Sixth Army:	
Fort Lewis, Wash	6,268,000
Presidio of Monterey, Calif	330,000
Fort Ord, Calif	774,000
U. S. Disciplinary Barracks, Calif	923,000
Yuma Test Station, Ariz	75,000
Armed Forces special weapons projects	2,080,000
General, continental United States:	
Tactical facilities	65,000,000
Classified project	2,700,000
Overseas areas:	
Alaska:	
Eielson Air Force Base (Army)	533,000
Kenai	1,954,000
Ladd Air Force Base (Army)	839,000
Fort Richardson	992,000
Whittier	541,000
Okinawa	11,049,000
Pacific: Waiawa Radio Transmitting Station, T. H	$221,000
Iceland	5,490,000
Tactical facilities, overseas	500,000
General, continental United States and overseas: Advance design	5,000,000
Total, Army	191,321,000

Generally, the reductions recommended by the committee are based on previously mentioned criteria. The committee desires, however, to comment on reductions at several specific installations.

Adequate swimming facilities exist at Aberdeen Proving Ground, Md., therefore, the committee has denied the request for an additional swimming pool at this installation.

The committee believes that the gymnasium at White Sands Proving Ground, N. Mex., is excessive to the needs of this installation and desires that the Army restudy the need for a facility of the size contemplated at this station.

The request for an addition to the officers' open mess at Fort Belvoir, Va., has been denied, as have funds requested for the post exchange at Walter Reed Medical Center, D. C.; the bowling alleys and officers club at Fort Bragg, N. C.; and the fieldhouse and post exchange at Fort Dix, N. J., in the belief that adequate facilities exist on these installations to meet the needs of the personnel stationed there.

The committee fails to see the need for a post exchange sales store at the Sacramento Signal Depot, Calif.

Funds were requested in the amount of $8,450,000 for conversion of the riding hall at the United States Military Academy, N. Y., to classroom spaces. While the committee recognizes the possible need for additional classroom spaces at the Academy, it desires that the Department restudy this proposal with consideration being given both to the erection of a less costly structure and to the amount of classroom space actually needed in view of present and anticipated future enrollments at the Academy.

Funds requested for post exchanges at Fort Campbell, Ky., and Camp Carson, Colo., have been denied. The requested facilities appear to be excessive in scope to the needs of these installations, particularly with reference to the inclusion of cafeteria facilities.

The request for barracks at Ladd Air Force Base, Alaska, has been denied by the committee. As is stated elsewhere in their report, a careful study should be made of the costs of these barracks in view of the actual construction experiences of the Air Force at this same installation.

The funds allocated for advance design when coupled with unobligated balances remaining in this item will provide for the continuation of an orderly advance planning program.

The committee has allocated funds for construction of the Point Aux Pins Ammunition Terminal, Alabama, in the amount requested by the Department of the Army. These funds are to be used only for land acquisition and for dredging of a channel leading directly to the sea in the manner presented to the committee in the recent hearings in support of this project.

Funds in the amount of $9,900,000 for the Boston Army Base, Mass., were requested by the Department of the Army. This project is authorized in H. R. 9242 and has been concurred in by both the House of Representatives and the Senate. It also involves the utilization of approximately $1,100,000 from the Commonwealth of Massachusetts and authorizes the Secretary of the Army to lease such portions of the Boston Army Base as

he may deem advisable to the Commonwealth of Massachusetts with the retention of recapture rights in any national emergency upon a determination by the Secretary of the Army that the property is needed for military purposes. The committee insists that such a lease contain terms that in the event of reentry into these facilities by the United States the return given to the Commonwealth of Massachusetts as a result of such action shall only be the proper proration of the capitalization of the $1,100,000 contributed by the Commonwealth and shall not include any expenses of protection, repair, and maintenance of the leased premises which the Commonwealth would assume under the terms of H. R. 9242.

CHAPTER IX

Subcommittee: JOHN TABER, New York, chairman; RICHARD B. WIGGLESWORTH, Massachusetts; H. CARL ANDERSEN, Minnesota; IVOR D. FENTON, Pennsylvania; NORRIS COTTON, New Hampshire; GLENN R. DAVIS, Wisconsin; GERALD R. FORD, Jr., Michigan; J. VAUGHAN GARY, Virginia; JOHN J. ROONEY, New York; OTTO E. PASSMAN, Louisiana; CLARENCE CANNON, Missouri.

Emergency programs and activities

Department of State

Government in occupied areas: The bill includes $14 million for carrying out the United States occupation, contractual, diplomatic, and educational exchange functions in Germany and Austria. This amount is $1,500,000 below the amount of the budget estimate and is $5,836,101 below the comparable appropriation for fiscal year 1954.

In addition, the $1 million requested in House Document Numbered 428 to provide for the construction of staff housing in Austria is approved. This amount is to be used exclusively for purchase of foreign credits owed to or owned by the United States.

Funds Appropriated to the President

Refugee relief: There is included in the bill $7 million to carry out the provisions of the Refugee Relief Act of 1953, in which six of the major departments of Government are involved. The amount allowed is $2,025,000 below the budget estimate and $3,750,000 above the appropriation for fiscal year 1954. The request as contained in House Document Numbered 422 for language permitting the apportionment of the entire amount in the first 9 months of the fiscal year, if found necessary by the Bureau of the Budget, is not approved.

Department of the Army, Civil Functions

Government and relief in occupied areas: The committee recommends $3,100,000 for expenses necessary to meet the responsibilities and obligations of the United States in connection with the government or occupation of the Ryukyu Islands, the most important of which is Okinawa. The amount provided is the same as appropriated for fiscal year 1954 and is $950,000 below the budget estimate. It should be noted that $600,000 of the 1954 fiscal year's appropriation was withheld by administrative action and was recently released for procurement of supplies, the economic effect of which will be realized in the present fiscal year. The Department therefore volunteered a reduction of $600,000 in their request for the 1955 fiscal year.

Federal Civil Defense Administration

The bill includes a total of $44,025,000 in new appropriations plus the sum of $1,300,000 of previously appropriated funds which is continued available. The amount allowed provides appproximately the same amount as was obligated during fiscal year 1954. The action with respect to each item is set forth below.

Operations: The committee recommends $8,525,000 for this item which provides for civil defense planning, education services, operations control services, technical advisory services, field representation, executive direction, and general administration. The amount allowed is the same as was appropriated for fiscal year 1954.

Federal contributions: There is included in the bill $10,500,000 for financial contributions to the States, pursuant to subsection (1) of section 201 of the Federal Civil Defense Act of 1950, as amended to be equally matched with State funds. The amount allowed is $4,250,000 below the budget estimate, but is the same as the sum appropriated for fiscal year 1954. In addition, language as requested in House Document No. 385, continuing available $1,300,000 of the unobligated balance for fiscal year 1954, is included in the bill.

Emergency supplies and equipment: The bill includes $25 million for procurement of reserve stocks of emergency civil-defense materials as authorized by subsection (h) of section 201 of the Federal Civil Defense Act of 1950, as amended. The amount allowed is $2,500,000 below the amount appropriated for the current fiscal year and is $35 million below the budget estimate. The entire amount allowed is to be used for medical supplies and equipment.

Jamestown-Williamsburg-Yorktown Celebration Commission

The sum of $170,000, the budget estimate, is included in the bill for the operation of this Commission which was established pursuant to Public Law 263, approved August 13, 1953.

General Services Administration

Administrative expenses, Abaca fiber program: Language as requested in House Document No. 456 is included in the bill. The administrative expense limitation has been reduced from $148,000 to $135,000.

Treasury Department

Federal Facilities Corporation: Language as requested in House Document No. 456 with the administrative expense limitation of $1,954,000 is included in the bill.

CHAPTER X

Claims, audited claims, and judgments

The committee recommends the full amount of $9,296,561 contained in House Document No. 461 to cover claims for damages, audited claims, and judgments rendered against the United States. Of this amount, $8,031,303 represents judgments of the Court of Claims and the United States districts courts. The amount provided for claims is $1,265,258.

CHAPTER XI

General provisions

Subcommittee: JOHN TABER, New York, chairman; RICHARD B. WIGGLESWORTH, Massachusetts; H. CARL ANDERSEN, Minnesota; IVOR D. FENTON, Pennsylvania; NORRIS COTTON, New Hampshire; GLENN R. DAVIS, Wisconsin; GERALD R. FORD, Jr., Michigan; J. VAUGHAN GARY, Virginia; JOHN J. ROONEY, New York; OTTO E. PASSMAN, Louisiana; CLARENCE CANNON, Missouri.

The general provision included in the accompanying bill are applicable to all departments, agencies, and corporations of the Federal Government.

Section 1101 continues, at $1,400 each, the amount that may be spent for purchase of passenger motor vehicles, and adds a new limitation of $3,000 on any one passenger vehicle irrespective of any limitation carried in the 1955 appropriations acts.

Section 1102 continues language which has been carried for some years concerning the employment of aliens.

Section 1103 continues language previously carried relating to living quarters allowances.

Section 1104 continues language previously carried prohibiting the filling of positions by anyone whose nomination has been disapproved by the Senate.

Section 1105 continues language previously carried limiting the amount that may be paid for copies of the United States Code Annotated and the Lifetime Federal Digest.

Section 1106 continues language previously carried relating to the use of funds by Government corporations.

Section 1107 contains language similar to that previously carried prohibiting the use of funds of corporations for purchase or construction of office buildings.

Section 1108 continues language previously carried to authorize the transfer of personnel and appropriations to defense activities of various departments and agencies of the Government in pursuance to law.

Section 1109 continues language concerning rental of Government-owned living quarters.

Section 1110 contains language similar to that carried previously authorizing the use of appropriated funds to purchase foreign credits owed to or owned by the United States, as required by section 1415 of Public Law 547, 82d Congress.

Section 1111, definition of obligations: Over a period of years numerous loose practices in handling appropriated funds have grown up in various agencies of the Government. The most difficult problem in this area arises from the recording of various types of transactions as obligations of the Government when, in fact, no real obligation exists. This situation has become so acute as to make it next to impossible for the Committee on Appropriations to determine with any degree of accuracy the amount which has been obligated against outstanding appropriations as a basis for determining future requirements. It has become necessary to set forth definitely in the law the types of transactions which will be recognized as true obligations and secure accurate reporting thereon in order that it may be possible for the Committee on Appropriations to have a sound basis for its operations. Section 1111 therefore has been included in the bill to accomplish this purpose. A clean-cut definition of the obligations will also greatly simplify the work of the General Accounting Office in auditing and settling the accounts of the various agencies. The Acting Comptroller General was consulted and has concurred in the proposal as a necessary step to clear up the existing chaotic situation. The proposal has also been discussed with the Director of the Bureau of the Budget and he agrees that legislation of this type is needed.

Section 1112 continues language previously carried commonly known as the antistrike provision.

Limitations and legislative provisions

The following limitations and legislative provisions not heretofore carried in connection with any appropriation bill are recommended:

On page 2, line 20, in connection with the appropriation for the Architect of the Capitol:

"The Architect of the Capitol, under the direction of the House Office Building Commission, is authorized hereafter to furnish steam from the Capitol Power Plant to the Folger Shakespeare Library: *Provided*, That the person or persons authorized to make contracts with respect to such building to which such steam is to be furnished agrees (a) to pay for such steam at rates not less than cost, determined by the Architect of the Capitol with the approval of the House Office Building Commission, and (b) to connect such building with the Capitol Power Plant steam lines without expense to the United States and in a manner satisfactory to the Architect of the Capitol and the House Office Building Commission: *Provided further*, That amounts received in payment for steam

so furnished shall be covered into the Treasury of the United States as miscellaneous receipts."

On page 10, line 19, in connection with "Construction and rehabilitation, Bureau of Reclamation": *"Provided,* That no part of this appropriation shall be used to initiate construction of the Helena Valley unit, Montana, until a repayment contract has been executed."

On page 13, line 7, in connection with "Expenses, General Supply Fund":

"Leased warehouse space temporarily in excess of operating requirements may be subleased to commercial organizations and the proceeds shall be covered into the Treasury as miscellaneous receipts."

On page 37, line 22, "General Provisions":

"SEC. 1111. (a) After the date of enactment hereof no amount shall be recorded as an obligation of the Government of the United States unless it is supported by documentary evidence of—

"(1) a binding agreement in writing between the parties thereto, in a manner and form and for a purpose authorized by law, executed before the expiration of the period of availability for obligation of the appropriation or fund concerned for specific goods to be delivered, real property to be purchased or leased, or work or services to be performed; or

"(2) a valid loan agreement, showing the amount of the loan to be made and the terms of repayment thereof; or

"(3) an order required by law to be placed with a Government agency; or

"(4) an order issued pursuant to a law authorizing purchases without advertising when necessitated by public exigency or for perishable subsistence supplies or within specific monetary limitations; or

"(5) a grant or subsidy payable (i) from appropriations made for payment of or contributions toward, sums required to be paid in specific amounts fixed by law or in accord with formulae prescribed in law, or (ii) pursuant to agreement authorized by, or plans approved in accord with and authorized by, law; or

"(6) a liability which may result from pending litigation brought under authority of law; or

"(7) employment or services of persons or expenses of travel in accord with law, and services performed by public utilities; or

"(8) any other legal liability of the United States against an appropriation or fund legally available therefor.

"(b) Not later than September 30 of each year, the head of each Federal agency shall certify, as to each appropriation or fund under the control of such agency, the amount thereof remaining obligated but unexpended and the amount thereof remaining unobligated on June 30 of such year and copies of such certification shall be forwarded by him to the chairmen of the Committees on Appropriations of the Senate and the House of Representatives, to the Comptroller General of the United States, and to the Director of the Bureau of the Budget. Notwithstanding any other provision of law, the duty of making certifications as required by this subsection shall not be delegated: *Provided,* That such certification for the fiscal year ending June 30, 1954, shall be made not later than October 31, 1954, and shall include only such obligations as could have been recorded under the provisions of subsection (a) hereof.

"(c) Each certification made pursuant to subsection (b) shall be supported by records evidencing the amounts which are certified therein as having been obligated and such records shall be retained in the agency in such form as to facilitate audit and reconciliation for such period as may be necessary for such purposes.

"(d) No appropriation or fund which is limited for obligation purposes to a definite period of time shall be available for expenditure after the expiration of such period except for liquidation of amounts obligated in accord with subsection (a) hereof; but no such appropriation or fund shall remain available for expenditure for any period beyond that otherwise authorized by law."

Mr. TABER. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read the bill down to and including line 16, page 5.

Mr. TABER. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. ALLEN of Illinois, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 9936) making supplemental appropriations for the fiscal year ending June 30, 1955, and for other purposes, had come to no resolution thereon.

CHARTER OF TANKERS BY THE SECRETARY OF THE NAVY

Mr. ARENDS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (S. 3458) to authorize the long-term time charter of tankers by the Secretary of the Navy, and for other purposes, with a House amendment thereto, insist on the House amendment, and agree to the conference requested by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Illinois? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. ARENDS, COLE of New York, SHAFER, CUNNINGHAM, VINSON, KILDAY, and RIVERS.

SPECIAL ORDERS GRANTED

Mr. HOLIFIELD asked and was given permission to address the House for 1 hour today and 1 hour on Wednesday next, following the legislative program and any special orders heretofore entered.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 6788) entitled "An act to authorize the Secretary of Agriculture to cooperate with States and local agencies in the planning and carrying out of works of improvement for soil conservation, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2759) entitled "An act to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes."

PROVIDING MULTIPLE MINERAL DEVELOPMENT OF PUBLIC LANDS

Mr. ALLEN of Illinois. Mr. Speaker, I call up the resolution (H. Res. 639) providing for the consideration of H. R. 8896, a bill to amend the mineral-leasing laws to provide for multiple mineral development of the same tracts of the public lands, and for other purposes, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 8896) to amend the mineral-leasing laws to provide for multiple mineral development of the same tracts of the public lands, and for other purposes, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the bill shall be read for amendment under the 5-minute rule. It shall be in order to consider without the intervention of any point of order the substitute amendment recommended by the Committee on Interior and Insular Affairs now in the bill, and such substitute for the purpose of amendment shall be considered under the 5-minute rule as an original bill. At the conclusion of such consideration the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any member may demand a separate vote in the House on any of the amendments adopted in the Committee of the Whole to the bill or committee substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

Mr. ALLEN of Illinois. Mr. Speaker, I yield such time as he may require to the gentleman from Montana [Mr. D'EWART].

Mr. D'EWART. Mr. Speaker, this bill has to do with the mineral leasing and mining laws. These laws provide only for the exclusive development of minerals, under the mining laws and the exclusive search and development of oil and certain other minerals under the leasing laws. This bill is necessary because of the discovery of fissionable materials on these claims and leases thereby making multiple use necessary. This bill proposes to permit multiple use of those areas. The committee held extended hearings on the matter. We went into it a year ago. The Congress passed a law permitting development for 1 year on existing uranium claims. However, that bill was only for 1 year and this new bill provides for future development of fissionable materials. The bill is necessary if we are to have this multiple use of these oil lease lands and mining lands. Therefore, I hope the rule is adopted.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 30 minutes to the gentleman from Virginia [Mr. SMITH].

Mr. SMITH of Virginia. Mr. Speaker, I yield 5 minutes to the gentleman from Colorado [Mr. ASPINALL] to explain this bill. I think it would be well for the House to know something about the bill, and the gentleman from Colorado is very well informed on it.

Mr. ASPINALL. Mr. Speaker, while it is unfortunate, it sometimes appears that if we wish to achieve some simple end by legislation, we must use language so complicated that the simple purpose is obscured. This is particularly true if the situation which is to be handled has developed over a long term of years.

The consideration of H. R. 8896, which has for its purpose the multiple use of our mineral resources present in our public lands, falls into this category. Yet, I believe that a careful explanation will show the close relationship between the simple end to be achieved and the method of achievement.

The basic problem is that we have two general statutory procedures and two general systems for the development and production of the mineral resources of this Nation. The first of these grew out of the necessities of the early mining operations of the West and centered around the rights to follow the initial discovery of a valuable mineral or metal. The locator was given exclusive possession to otherwise unclaimed public land upon which he had discovered a lode or vein or placer deposit. It follows that certain specifications and procedures must be followed and adhered to but the important point is that the locator is entitled to prosecute his claim to full title by patent to a limited area of ground directly related to his discovery. This system received statutory approval by the passage of the mining law of 1872.

A second type of development came into play in 1920 with the passage of the Mineral Leasing Act which reserved to the Government such minerals as coal, phosphate, oil shale, gas and oil, sodium and later sulfur. Under the provisions of this act, development was on a limited basis by permit or lease with title to the land and also to the mineral involved, until it was actually in the physical possession of the lessee or permittee, remaining in the Government. The developer was thus a permittee or lessee and not a fee owner as in the case of a general mining operator.

Beyond this, these two mining acts provide for systems which are mutually exclusive. Public land withdrawn or valuable or potentially valuable for Leasing Act minerals, or land actually covered by a permit or lease for one of these listed minerals is closed to location and development under the mining laws. Likewise, public land under location for mining claims makes impossible development of leasing mineral potentials unless carried on by the locator himself.

For a long period of time—in fact from 1920 until the late 1940's—this mutually exclusive pattern, while undesirable, did not cause any major hardship or controversy. Then came the demand for uranium in this country and a special and dramatic emphasis was placed upon this general subject. This came about because it was found that the major area where most of the early uranium deposits were located and opened was largely blanketed by prior oil and gas leases or on lands likely to be valuable for oil and gas.

Mr DURHAM. Mr. Speaker, will the gentleman yield?

Mr. ASPINALL. I yield.

Mr. DURHAM. I think legislation probably should have been adopted earlier in the development of these uranium mines in the western part of the United States, but since this does put them under the mining law, it would also give each individual, it does not make any difference how small he is, if he is just a one-shovel prospector, it will put him in the same position as the man with any other amount of money?

Mr. ASPINALL. That has been the history of the mining law development in this country.

Mr. DURHAM. What effect will this have on the sale of securities since under the mining and leasing law they will be able to sell stock; is that correct?

Mr. ASPINALL. That is right.

Mr. DURHAM. Will these leases and the regulations governing the sale of securities be under the State law or under the general Federal law?

Mr. ASPINALL. They will be under both; they will be under Federal law with reference to the sale of securities, and also they will certainly come under the various State laws.

Mr. DURHAM. Since there is a great deal of confusion at the present time as to this whole field of operation, does the gentleman feel that this bill will protect the Federal Government in respect to the sale of securities?

Mr. ASPINALL. I feel that it will protect the Federal Government and the people working with the Federal Government and the State commissions; and the Atomic Energy Commission, as the gentleman from North Carolina knows, has been asked for its approval of this proposed legislation.

Mr. DURHAM. And does the gentleman feel that the individual investor will be fully protected? I mean by that, he will know whether or not his stock is worth anything, or whether it is the kind of stock that is given away with each $5 purchase of groceries. The gentleman knows what I mean.

Mr. ASPINALL. I know exactly; and I feel that the protection afforded will be as great as it is possible to give. In my opinion, it will be just as substantial as any protection in such procedures, or for that matter, when any securities are legally issued and offered for sale. The gentleman asks if it will be possible to sell stock. As long as we have people who want to buy such stocks—and we always have them—I suppose they will be able to buy them, I do not see any difficulty because of this bill.

Mr. DURHAM. The stocks are usually regulated by State agencies.

Mr. ASPINALL. And this stock will be regulated as well.

Mr. SHEPPARD. Mr. Speaker, will the gentleman yield?

Mr. ASPINALL. I yield.

Mr. SHEPPARD. I would like to ask this question out of precaution and more or less as a matter of formula: Does this have anything to do with water rights?

Mr. ASPINALL. It has nothing whatsoever to do with water rights. It deals simply with multiple rights to the use of minerals in our public lands.

Mr. SHEPPARD. I thank the gentleman.

Mr. ASPINALL. Mr. Speaker, when this conflict became known, some solution was made mandatory and there began a great effort on the part of the affected parties, mining interests, leasing interests, the Atomic Energy Commission, and the Department of Interior to find some means to sustain the worthy principles of both the mining and the leasing laws and still provide for the rapid development of vitally needed uranium. This is not to indicate that uranium is the only value involved for there are other mineral values which can be more readily developed if some multiple-use legislation can be passed. Uranium just dramatized this need.

This need for solution and the effort given to it resulted in measures to meet the most pressing immediate needs and also to demonstrate the process by which a permanent solution could be had. First, something had to be done about the mining claims filed in unknowing trespass on oil and gas lands during the period between August 1, 1939 and December 31, 1952, the date when the technical trespass was recognized as a known factor. These claims, filed in good faith, were in production but the cloud on the location or right forced the Atomic Energy Commission to withhold certain payments to the producers. This uncertainty with regard to going mines put a damper on any new operations and many feared that they would lose what investment they had put into their claim or mine.

This pressing need was met by special legislation in August of 1953. Public Law 250, passed during the first session of the 83d Congress, validated the claims filed in unknowing trespass between August 1, 1939, and the end of December 1952, most of which were located on the Colorado Plateau. Beyond that, this temporary legislation laid the foundation upon which a permanent solution could be built.

The cutoff date of December 31, 1952, still left a great many claims and a great many potential claims in doubt as to validity. The Atomic Energy Commission, in order to sustain the impetus of uranium development while some solution was being worked out, finally came out with certain lease procedures under its Circular No. 7, which it issued late in January of 1954. This again was only a stopgap proposition. Something permanent was required because of confusion stemming from the reservation to the Government and its agent, the Atomic Energy Commission, of all fissionable source materials as specified in the Atomic Energy Act of 1946.

We have now come to the time when permanence must be given to past procedures and where some lasting procedures can be established to carry through the years.

It became apparent during the involved discussions on this general subject that the reservation to the Government of all fissionable source materials has, in effect, put their development under procedures similar to those provided in the Mineral Leasing Act rather than the general mining laws, while it had been understood from official releases that prospecting and developing procedures under the general mining law would be respected. The general mining law did not apply for even though a discovery was made by a mining locator, he could not acquire title or right to a material reserved to the Government and his location could be as easily filed upon by another. If this had been seriously pursued, the confusion would have passed all bounds.

Any claim located under the mining laws and filed prior to an oil and gas lease or permit or an application for such and/or prior to the Atomic Energy Act is quite valid, only no one was filing any claims for uranium any earlier for there was no market. However, on that same Colorado plateau where the oil and gas lease overlap was so important, there were many old claims containing uranium which had been initially located for either radium or vanadium. There was no way the Government could abrogate these old valid claims, yet no apparent way by which new ones could be located.

The actual demonstrated results of the operation of the program under the mining system, before it developed that it might be clouded by the Mineral Leasing Act, made it clear beyond doubt that the wisest and most efficient method of finding and developing uranium deposits was under the mining laws. This allowed, and indeed inspired, a vast number of individuals to go out into the hills and run down workable deposits of uranium. The only apparent alternative would have been a lease system under which the small operator is at a material disadvantage, and under which the possibility of monopoly is much greater. Under the prospecting system the individual enterpriser can do, and in fact always has done, about as well as anyone else. The enterprise system has been proved a wise system many times in the prospecting and developing of mineral resources throughout the history of our Nation.

So it was then that the interested parties came to a preliminary agreement in 1953 which resulted in the passage of Public Law 250. This act validated the claims made which would have been abrogated under the Mineral Leasing Act if any suit had been pursued. In the full realization that the effort for a permanent solution was going forward, the method of operation was not materially altered. That is to say that enterprising people still went out into the hills with their jeep—and that little machine has displaced the burro in this field—and found and staked out claims for uranium even though many of them were on lands where the Leasing Act prohibition still might cut them off. In that this effort was allowed by mutual, if unwritten, agreement, we should not now abrogate the well-established pattern for it is based upon our traditional method of locating new ore bodies. It has been partially validated by the limited effect of Public Law 250 and the operations under the regulations of the Atomic Energy Commission—Circular No. 7—and by the general assumption that the interested groups would come to some common agreement on a permanent solution.

This desirable end has been achieved and has been reduced to legal language. The bill containing this language has been unanimously approved by the Senate and is now before the House for final consideration.

It is not my purpose to go into a section-by-section analysis of this bill at this time while considering the resolution for a rule. However, I do wish to point up the fact that the bill to be considered has four distinct purposes, all of which are closely connected. The first of these is to validate claims made in good faith under the mining laws on lands where they would otherwise be blocked by the leasing law. This requires certain stipulations on priority of past claims which, even though presently without validity, do represent at least a prior equitable right.

The second purpose is to make possible the development of other than the leasable minerals—coal, phosphate, oil and gas, oil shale, sodium, and sulfur—on public lands covered by mineral leases or permits or applications for such leases or permits. And, at the same time providing that from the effective date of said act that claims filed and patents issued hereafter shall in most cases carry a reservation to the Federal Government of the leasable minerals present in lands described in such claims or patents. This part of the legislation makes possible the multiple-mineral use of the public lands. The third purpose of the bill is to provide a procedure whereby an applicant for or holder of a permit or lease under the Mineral Leasing Act may request the Department of the Interior to publish a notice requiring any claimant under an unpatented mining claim to come forward and make his claim known where the claim extends to Leasing Act minerals. This part of the bill is largely for the protection of the dormant claim owner and at the same time provides for the multiple-mineral use of such lands. This has been the most difficult part of the legislation. The members of the committee considering the bill feel that the best possible protection for all concerned has been provided. Time alone will tell just how well we have done. The fourth objective in H. R. 8896 is the amending of the Atomic Energy Act in accordance with the expressed approval of the Commission itself and providing for the deletion from said act of the reservation of all fissionable-source materials. This provision does not disturb the exclusive right of the Government to the purchase and control of the use of all fissionable-material ore. On the other hand, it does clarify the statutory procedure by which the prospecting for and the taking from the earth of such ore shall be accomplished.

The legislation has been considered most extensively by the Committee on Interior and Insular Affairs. The bill was reported to the House with but minor objection. Since the committee action an amendment has been agreed upon by its sponsors and our colleague, Congressman ENGLE, of California, which agreement has removed his objection. This amendment will be offered under the 5-minute rule.

The legislation is badly needed and I sincerely hope that the rule and the bill will each have the support of the Members.

I should like to close with a commendation of those interested individuals and groups who have worked so diligently for a solution acceptable to all. I can recall no other time when I have seen such determination to work in harmony to find an agreement on the principles without weakening compromises. We have had here, in my opinion, a demonstration of the best process of democracy—the working together of freemen to find a common solution to an existing problem. Lastly, may I say that if this bill becomes law, it will be another effective link in our ecomonic system which has been so well built on private initiative and free enterprise.

Mr. ALLEN of Illinois. Mr. Speaker, I rise to urge the adoption of House Resolution 639 which will make in order the consideration of the bill (H. R. 8896) to amend the mineral leasing laws to provide for multiple mineral development of the same tracts of the public lands, and for other purposes.

House Resolution 639 provides for an open rule, waiving points of order with 1 hour of general debate on the bill. The rule would also allow for the consideration of the committee substitute amendment as an original bill for the purposes of amendment.

H. R. 8896 proposes to solve the difficult problem arising out of the conflict and coexistence of two distinct systems under which a person may acquire rights to develop and exploit the mineral resources of the Federal domain.

The first method by which these rights may be acquired dates back to 1872 when it was decided that the person who located and patented a mining claim received full title to this location.

In 1920, however, the leasing system was inaugurated under the Mining Leasing Act, which provided for the licensing or leasing system of lands on which oil and gas, oil shale, coal, phosphate, sodium and potash have been discovered.

The conflict arises from the fact that under the laws of the United States, lands on which mineral locations have been made under the mining laws have not been open to leasing under the Mineral Leasing Act. On the other hand, lands which have been leased or licensed to individuals under an oil or gas lease provided for in the Mineral Leasing Act, or if they are known to be valuable for leasing act minerals, have not been open to mineral entry under the mining laws.

The report on this bill brought out the fact that the need for the discovery and exploitation of uranium in the United States has brought this situation to a head. The uranium deposits thus far have been discovered in the area around the Colorado Plateau. However, this particular section has a great many oil

and gas filings on it, and consequently precludes to a large extent the possibilities of development for uranium and other hard minerals.

It works the other way too, Mr. Speaker, for in sections where oil and gas applications have not yet been made, and where there are mining locations and claims, the oil and gas prospectors are reluctant to lease and drill in view of the already existing mining claims.

It is obvious that a way has to be found to permit both interests to work in harmony together for the better development of all our resources.

H. R. 8896 would provide for legal compatibility for the coexistence of a mining claim and of a permit or lease under the Leasing Act on the same land. The bill also seeks to resolve the uncertainty which now exists because of the scope of the Atomic Energy Act, as to the validity of any mining claim located after August 1, 1946, the date of enactment of the Atomic Energy Commission Act, for fissionable source materials. This bill would eliminate that uncertainty.

The final change which this bill seeks to make would be to provide a procedure under which claimants of unpatented mining claims, which may conflict with Leasing Act filings, may be required to make known and establish the basis of their assertions if these assertions extend to Leasing Act minerals.

H. R. 8896 would also clarify the legal situation caused by the limited scope of Public Law 250 and complications introduced by the Atomic Energy Commission's domestic uranium program circular 7 which had been issued by the Atomic Energy Commission to permit development of fissionable source material on lands closed to mining location because of Mineral Leasing Act filings.

Mr. Speaker, I think that we will all agree that it is very important to our national security that the mineral and mining laws be so drawn as to provide for the maximum harmonious development of these important national assets. It seems to me that this bill is comprehensive enough to protect the rights of both groups involved and still allows for the full development of our resources. I hope that the rule will be adopted and that the House will pass the bill.

Mr. SMITH of Virginia. Mr. Speaker, I have no further requests for time.

Mr. ALLEN of Illinois. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

Mr. D'EWART. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 8896) to amend the mineral-leasing laws to provide for multiple-mineral development of the same tracts of the public lands, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 8896, with Mr. KEATING in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule the gentleman from Montana [Mr. D'EWART] will be recognized for 30 minutes, and the gentleman from California [Mr. ENGLE] for 30 minutes.

The gentleman from Montana is recognized.

Mr. D'EWART. Mr. Chairman, I yield 10 minutes to the gentleman from Utah [Mr. DAWSON], author of the pending bill.

Mr. DAWSON of Utah. Mr. Chairman, this is a rather complicated measure but I trust that in a few words I may be able to give you a better picture of what we are attempting to achieve. This measure applies principally to the Colorado plateau area, which is now producing the bulk of the uranium in this country.

Under existing laws we have a conflict between what is known as the general mining law, which was adopted back in 1872, and the Mineral Leasing Act, which was adopted in 1920.

Under the mining law a prospector can go on the public domain and search for hard minerals and if he makes a discovery he can perfect his claim and eventually pursue that to patent and acquire patent to a small tract on which the minerals are located. Under the General Leasing Act, which was passed in 1920, the Government leases to operators who are prospecting for what is known as leasable minerals, such as oil, gas, and potassium, et cetera, acreage for the purpose of removing these minerals under lease, but they can never acquire title.

The difficulty we have had is that if an oil and gas lease operator wants to go ahead and explore for oil and gas, and there is a mining claim located on this land, he is subject to the mining claim. We find thousands of old dormant mining claims located on these oil and gas lease lands and in the event that the oil operator locates oil or gas on his lease, then these old mining claimants might come forward and in effect blackmail him for a certain payment to buy him out in order to acquire the right to the area that he covers. That has been blocking the oil and gas lease operators.

On the other hand, if there is an oil and gas lease existing on the public domain, a mining claimant could not go on and explore for the so-called hard minerals, which has meant that today in the State of Utah where 72 percent of the land is now owned by the Federal Government a big portion of these lands are now under oil and gas leases which means that these people who want to go out and explore for uranium have in effect been thwarted by the fact that these leases are outstanding.

The purpose of this measure is to make these two mineral laws compatible so as to permit the oil and gas lease operator to go on and search for oil and gas without interfering with the mining claimant, and, by the same token, the mining claimant can go on and search for uranium without interfering with the oil and gas claimant, which results in the so-called multiple use and help everyone concerned.

The Nation as a whole is vitally concerned with this measure because under conditions as they now exist we have this conflict. Those who are searching for uranium are finding they do not have a valid claim when they go on oil and gas leased lands. As a result, the Atomic Energy Commission has urgently requested that this legislation be passed to assist them to bring forth these fissionable materials.

There are a great many features to the bill that are rather technical in nature, but the committee has spent a considerable length of time hearing testimony on the bill. The oil and gas people and the mining people have worked for months on it and have come up in pretty much of a general agreement on these proposals. We feel that for the good of the Nation and also for the good of those who are out there seeking to remove these fissionable materials this bill should be passed.

Mr. D'EWART. Mr. Chairman, will the gentleman yield?

Mr. DAWSON of Utah. I yield to the gentleman from Montana.

Mr. D'EWART. As a matter of fact, this legislation is the result of years of work on the part of representatives of the mining industry, the representatives of the oil and gas industry and the Atomic Energy Commission in trying to resolve differences so that the development of these fissionable materials may be speeded up.

Mr. DAWSON of Utah. That is perfectly true. Furthermore, you must understand that under existing law the Atomic Energy Commission is required to go out and give leases on these acreages for the reason that under the Atomic Energy Commission Act all of the uranium must be sold to the Government and it is all under their jurisdiction. So, they are vitally concerned with this measure.

Mr. SAYLOR. Mr. Chairman, will the gentleman yield?

Mr. DAWSON of Utah. I yield to the gentleman from Pennsylvania.

Mr. SAYLOR. I would like to congratulate the author of this bill for taking some steps which I think have been long needed in correcting many of the evils which have existed in the mining industry. I think the aims which he has directed in a portion of this bill to allow multiple use of public lands is highly commendable and highly desirable. The only question I would like to ask him is in regard to the first section of the bill which attempts to validate leases or claims which have already been made. Would the gentleman explain those provisions? That is the only part of the bill which I have any objection to, and I would like the record to show why the gentleman proposes to validate leases made subsequent to July 31, 1939, and prior to February 10, 1954.

Mr. DAWSON of Utah. I will be happy to explain. As the gentleman from Colorado told us a few moments ago, we passed a bill last year known as Public Law 250, which validated these uranium claims from 1939 up until January 1,

1953, based upon the very same reasons that I have presented to you here today.

Now, the first section of the bill to which the gentleman refers would also validate claims from January 1, 1953, up until the effective date of this act. The reason for that is this: The Atomic Energy Commission has, by reason of Circular 7, granted leases on much of this land and the people have gone on there in good faith and located claims. The first section of the bill attempts to set up a series of priorities for claimants, and the reason for giving priority to those claims which were filed subsequent to January 1, 1953, and the date this act becomes effective would be to give those claimants who went in there in good faith the results of their endeavors. Now, of course, there have been other claimants who have come in and filed on top of these claims, and there has been some dispute out there where the priority shall lie. But the industry, the mining people, and the oil and gas people have pretty well agreed on the system of priorities set up in this measure. Of course, there is something to what the gentleman says, that it does attempt to legalize so-called technical trespassers. We admit that these people are in technical trespass because of this overlapping of interest, but the purpose of the bill is to try to iron out these differences, and until these differences are ironed out, we are going to have some serious trouble out there. Out in our State we had a shooting take place; a man was shot because of so-called claim jumping, and if something is not done to straighten out these claims, we will have a lot more of it.

Mr. SAYLOR. I have opposed up until this time this provision, but if the gentleman will offer an amendment which will make the effective date for these leases not February 10, 1954, the date when Circular 7 was first published, but the effective date of this act, so that next year we will not be faced with coming back here and asking to validate claims between February 10, 1954, and the effective date of the act, I think the bill will accomplish a much broader purpose.

Mr. DAWSON of Utah. I wish I could offer such an amendment as the gentleman proposes, and I think you are probably right that it is the effective date of Circular 7 we were referring to rather than the effective date of the act. But in my opinion, that would be a mistake, because we would simply be stirring up a lot more controversy out there than exists at the present time, and as far as I know, there have been very few who would proposed to change the date as the gentleman suggests. We have to draw the line somewhere, and the people who have been spending so much time trying to work out these differences have agreed on these times. Inasmuch as it does involve such technical phases of the mining law I think it would be a mistake for us to attempt to change it at this date.

Mr. ENGLE. Mr. Chairman, I have no requests for time on this side.

Mr. D'EWART. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will now read the substitute committee amendment printed in the bill as an original bill for the purpose of amendment.

The Clerk read as follows:

Be it enacted, etc., That, (a) subject to the conditions and provisions of this act and to any valid intervening rights acquired under the laws of the United States, any mining claim located under the mining laws of the United States subsequent to July 31, 1939, and prior to February 10, 1954, on lands of the United States, which at the time of location were—

(1) included in a permit or lease issued under the mineral leasing laws; or

(2) covered by an application or offer for a permit or lease which had been filed under the mineral leasing laws; or

(3) known to be valuable for minerals subject to disposition under the mineral leasing laws;

shall be effective to the same extent in all respects as if such lands at the time of location, and at all times thereafter, had not been so included or covered or known: *Provided, however*, That, in order to be entitled to the benefits of this act, the owner of any such mining claim located prior to January 1, 1953, must have posted and filed for record, within the time allowed by the provisions of the act of August 12, 1953 (67 Stat. 539), an amended notice of location as to such mining claim, stating that such notice was filed pursuant to the provisions of said act of August 12, 1953, and for the purpose of obtaining the benefits thereof: *And provided further*, That in order to obtain the benefits of this act, the owner of any such mining claim located subsequent to December 31, 1952, and prior to February 10, 1954, not later than 120 days after the enactment of this act, must post on such claim in the manner required for posting notice of location of mining claims and file for record in the office where the notice or certificate of location of such claim is of record an amended notice of location for such claim, stating that such notice is filed pursuant to the provisions of this act and for the purpose of obtaining the benefits thereof and, within said 120 days period, if such owner shall have filed a uranium lease application as to the tract covered by such mining claim, must file with the Atomic Energy Commission a withdrawal of such uranium lease application or, if a uranium lease shall have issued pursuant thereto, a release of such lease, and must record a notice of the filing of such withdrawal or release in the county office wherein such notice or certificate of location shall have been filed for record.

(b) Labor performed or improvements made after the original location of and upon or for the benefit of any mining claim which shall be entitled to the benefits of this act under the provisions of subsection (a) of this section 1, shall be recognized as applicable to such mining claim for all purposes to the same extent as if the validity of such mining claim were in no respect dependent upon the provisions of this act.

(c) As to any land covered by any mining claim which is entitled to the benefits of this act under the provisions of subsection (a) of this section 1, any withdrawal or reservation of lands made after the original location of such mining claim is hereby modified and amended so that the effect thereof upon such mining claim shall be the same as if such mining claim had been located upon lands of the United States which, subsequent to July 31, 1939, and prior to the date of such withdrawal or reservation, were subject to location under the mining laws of the United States.

SEC. 2. (a) If any mining claim which shall have been located subsequent to December 31, 1952, and prior to December 11, 1953, and which shall be entitled to the benefits of this act, shall cover any lands embraced within any mining claim which shall have been located prior to January 1, 1953, and which shall be entitled to the benefits of this act, then as to such area of conflict said mining claim so located subsequent to December 31, 1952, shall be deemed to have been located December 11, 1953.

(b) If any mining claim hereafter located shall cover any lands embraced within any mining claim which shall have been located prior to February 10, 1954, and which shall be entitled to the benefits of this act, then as to such area of conflict said mining claim hereafter located shall be deemed to have been located 121 days after the date of the enactment of this act.

SEC. 3. (a) Subject to the conditions and provisions of this act and to any valid prior rights acquired under the laws of the United States, the owner of any pending uranium lease application or of any uranium lease shall have, for a period of 120 days after the date of enactment of this act, as limited in subsection (b) of this section 3, the right to locate mining claims upon the lands covered by said application or lease.

(b) Any rights under any such mining claim so hereafter located pursuant to the provisions of subsection (a) of this section 3 shall be subject to any rights of the owner of any mining claim which was located prior to February 10, 1954, and which was valid at the date of the enactment of this act or which may acquire validity under the provisions of this act. As to any lands covered by a uranium lease and also by a pending uranium lease application, the right of mining location under this section 3, as between the owner of said lease and the owner of said application, shall be deemed as to such conflict area to be vested in the owner of said lease. As to any lands embraced in more than one such pending uranium lease application, such right of mining location, as between the owners of such conflicting applications, shall be deemed to be vested in the owner of the prior application. Priority of such an application shall be determined by the time of posting on a tract then available for such leasing of a notice of lease application in accordance with paragraph (c) of the Atomic Energy Commission's Domestic Uranium Program Circular 7 (10 C. F. R. 60.7 (c)), provided there shall have been timely compliance with the other provisions of said paragraph (c), or, if there shall not have been such timely compliance, then by the time of the filing of the uranium lease application with the Atomic Energy Commission. Any rights under any mining claim located under the provisions of this section 3 shall terminate at the expiration of 30 days after the filing for record of the notice or certificate of location of such mining claim unless, within said 30-day period, the owner of the uranium lease application or uranium lease upon which the location of such mining claim was predicated shall have filed with the Atomic Energy Commission a withdrawal of said application or a release of said lease and shall have recorded a notice of the filing of such withdrawal or release in the county office wherein such notice or certificate of location shall be of record.

(c) Except as otherwise provided in subsections (a) and (b) of this section 3, no mining claim hereafter located shall be valid as to any lands which at the time of such location were covered by a uranium lease application or a uranium lease. Any tract upon which a notice of lease application has been posted in accordance with said paragraph (c) of said Circular 7 shall be deemed to have been included in a uranium lease application from and after the time of the posting of such notice of lease application: *Provided*, That there shall have been timely compliance with the other provisions of said paragraph (c) or, if there shall not have

been such timely compliance, then from and after the time of the filing of a uranium lease application with the Atomic Energy Commission.

SEC. 4. Every mining claim or millsite hereafter located under the mining laws of the United States and every mining claim or millsite heretofore so located which shall be entitled to benefits under the first three sections of this act shall be subject to a reservation to the United States of all Leasing Act minerals and of the right (as limited in section 6 hereof) of the United States, its lessees, permittees, and licensees to enter upon the land covered by such mining claim or millsite and to prospect for, drill for, mine, treat, store, transport, and remove Leasing Act minerals and to use so much of the surface and subsurface of such mining claim or millsite as may be necessary for such purposes, and whenever reasonably necessary, for the purpose of prospecting for, drilling for, mining, treating, storing, transporting, and removing Leasing Act minerals on and from other lands; and any patent issued for any such mining claim or millsite and contain such reservation.

SEC. 5. Subject to the conditions and provisions of this act, mining claims and millsites may hereafter be located under the mining laws of the United States on lands of the United States which at the time of location are—

(a) included in a permit or lease issued under the mineral leasing laws; or

(b) covered by an application or offer for a permit or lease filed under the mineral leasing laws; or

(c) known to be valuable for minerals subject to disposition under the mineral leasing laws;

to the same extent in all respects as if such lands were not so included or covered or known.

SEC. 6. (a) Where the same lands are being utilized for mining operations and Leasing Act operations, each of such operations shall be conducted, so far as reasonably practicable, in a manner compatible with such multiple use.

(b) Any mining operations pursuant to rights under any unpatented or patented mining claim or millsite which shall be subject to a reservation to the United States of Leasing Act minerals as provided in this act shall be conducted, so far as reasonably practicable, in a manner which will avoid damage to any known deposit of any Leasing Act mineral. Subject to the provisions of subsection (d) of this section 6, mining operations shall be so conducted as not to endanger or materially interfere with any existing surface or underground improvements, workings, or facilities which may have been made for the purpose of Leasing Act operations, or with the utilization of such improvements, workings, or facilities.

(c) Any Leasing Act operations on lands covered by an unpatented or patented mining claim or millsite which shall be subject to a reservation to the United States of Leasing Act minerals as provided in this act shall be conducted, so far as reasonably practicable, in a manner which will avoid damage to any known deposit of any mineral not so reserved from such mining claim or millsite. Subject to the provisions of subsection (d) of this section 6, Leasing Act operations shall be so conducted as not to endanger or materially interfere with any existing surface or underground improvements, workings, or facilities which may have been made for the purpose of mining operations, or with the utilization of such improvements, workings, or facilities.

(d) If, upon petition of either the mining operator or the Leasing Act operator, any court of competent jurisdiction shall find that a particular use in connection with one of such operations cannot be reasonably and properly conducted without endangering or materially interfering with the then existing improvements, workings, or facilities of the other of such operations or with the utilization thereof, and shall find that under the conditions and circumstances, as they then appear, the injury or damage which would result from denial of such particular use would outweigh the injury or damage which would result to such then existing improvements, workings, or facilities or from interference with the utilization thereof if that particular use were allowed, then in such event such court may permit such use upon payment (or upon furnishing of security determined by the court to be adequate to secure payment) to the party or parties who would be thus injured or damaged, of an amount to be fixed by the court as constituting fair compensation for the then reasonably contemplated injury or damage which would result to such then existing improvements, workings, or facilities or from interference with the utilization thereof by reason of the allowance of such particular use.

(e) Where the same lands are being utilized for mining operations and Leasing Act operations, then upon request of the party conducting either of said operations, the party conducting the other of said operations shall furnish to and at the expense of such requesting party copies of any information which said other party may have, as to the situs of any improvements, workings, or facilities theretofore made upon such lands, and upon like request, shall permit such requesting party, at the risk of such requesting party, to have access at reasonable times to any such improvements, workings, or facilities for the purpose of surveying and checking or determining the situs thereof. If damage to or material interference with a party's improvements, workings, facilities, or with the utilization thereof shall result from such party's failure, after request, to so furnish to the requesting party such information or from denial of such access, such failure or denial shall relieve the requesting party of any liability for the damage or interference resulting by reason of such failure or denial. Failure of a party to furnish requested information or access shall not impose upon such party any liability to the requesting party other than for such costs of court and attorney's fees as may be allowed to the requesting party in enforcing by court action the obligations of this section as to the furnishing of information and access. The obligation hereunder of any party to furnish requested information shall be limited to map and survey information then available to such party with respect to the situs of improvements, workings, and facilities and the furnishing thereof shall not be deemed to constitute any representation as to the accuracy of such information.

SEC. 7. (a) Any applicant, offeror, permittee, or lessee under the mineral-leasing laws may file in the office of the Secretary of the Interior, or in such office as the Secretary may designate, a request for publication of notice of such application, offer, permit, or lease, provided, expressly, that not less than 90 days prior to the filing of such request for publication there shall have been filed for record in the county office of record for the county in which the lands covered thereby are situate a notice of the filing of such application or offer or of the issuance of such permit or lease which notice shall set forth the date of such filing or issuance, the name and address of the applicant, offeror, permittee or lessee and the description of the lands covered by such application, offer, permit or lease, showing section or sections of land surveyed, or, if such lands are unsurveyed, the section or sections of land which would probably be involved when the public lands surveyed are extended to such lands, or a tie by courses and distances to an approved United States Mineral Monument. The filing of such request for publication shall be accompanied by a certified copy of such recorded notice and an affidavit or affidavits of a person or persons over 21 years of age setting forth that the affiant or affiants have examined the lands involved in a reasonable effort to ascertain whether any person or persons were in possession of or engaged in the working of such lands or any part thereof, and, if no person or persons were found to be in possession of or engaged in the working of said lands or any part thereof on the date of such examination, setting forth such fact, or, if any person or persons were so found to be in possession or engaged in such working on the date of such examination, setting forth the name and address of each such person, unless affiant shall have been unable through reasonable inquiry to obtain information as to the name and address of any such person, in which event the affidavit shall set forth fully the nature and results of such inquiry.

Thereupon the Secretary of the Interior, or his designated representative, at the expense of the requesting person (who, prior to the commencement of publication, must furnish the agreement of the publisher to hold such requesting person alone responsible for charges of publication), shall cause notice of such application, offer, permit, or lease to be published in a newspaper having general circulation in the county in which the lands involved are situate.

Such notice shall describe the lands covered by such application, offer, permit, or lease, as provided heretofore in the notice to be filed in the office of record of the county in which the lands covered are situate, and shall notify whomever it may concern that if any person claiming or asserting under, or by virtue of, any unpatented mining claim, any right or interest in Leasing Act minerals as to such lands or any part thereof, shall fail to file in the office where such request for publication was filed (which office shall be specified in such notice) and within 150 days from the date of the first publication of such notice (which date shall be specified in such notice), a verified statement which shall set forth, as to such unpatented mining claim:

(1) The date of location;

(2) The book and page of recordation of the notice or certificate of location;

(3) The section or sections of the public land surveys which embrace such mining claim; or if such lands are unsurveyed, either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument;

(4) Whether such claimant is a locator or purchaser under such location; and

(5) The name and address of such claimant and names and addresses so far as known to the claimant of any other person or persons claiming any interest or interests in or under such unpatented mining claim;

such failure shall be conclusively deemed (i) to constitute a waiver and relinquishment by such mining claimant of any and all right, title, and interest under such mining claim as to, but only as to, Leasing Act minerals, and (ii) to constitute a consent by such mining claimant that such mining claim and any patent issued therefor, shall be subject to the reservation specified in section 4 of this act, and (iii) to preclude thereafter any assertion by such mining claimant of any right or title to or interest in any Leasing Act mineral by reason of such mining claim.

If such notice is published in a daily paper, it shall be published in the Wednesday issue for 9 consecutive weeks, or, if in a weekly paper, in 9 consecutive issues, or,

if in a semiweekly or triweekly paper, in the issue of the same day of each week for 9 consecutive weeks.

Within 15 days after the date of first publication of such notice, the person requesting such publication (1) shall cause a copy of such notice to be personally delivered to or to be sent by registered mail addressed to each person in possession or engaged in the working of the land whose name and address is shown by an affidavit filed as aforesaid, and to each person who may have filed, as to any lands described in said notice, a request for notices, as provided in subsection (d) of this section 7, and (2) shall file in the office where said request for publication was filed an affidavit showing that copies have been so delivered or mailed.

(b) If any claimant under any unpatented mining claim which embraces any of the lands described in any notice published in accordance with the provisions of subsection (a) of this section 7 shall fail to file a verified statement, as above provided, within 150 days from the date of the first publication of such notice, such failure shall be conclusively deemed, except as otherwise provided in subsection (e) of this section 7, (i) to constitute a waiver and relinquishment by such mining claimant of any and all right, title, and interest under such mining claim as to, but only as to, Leasing Act minerals, and (ii) to constitute a consent by such mining claimant that such mining claim and any patent issued therefor, shall be subject to the reservation specified in section 4 of this act, and (iii) to preclude thereafter any assertion by such mining claimant of any right or title to or interest in any Leasing Act mineral by reason of such mining claim.

(c) If any verified statement shall be filed by a mining claimant as provided in subsection (a) of this section 7, then the Secretary of the Interior or his designated representative shall fix a time and place for a hearing to determine the validity and effectiveness of the mining claimant's asserted right or interest in Leasing Act minerals, which place of hearing shall be in the county where said interest or part of it is located, unless the mining claimant agrees otherwise. The procedures with respect to notice of such a hearing and the conduct thereof, and in respect to appeals shall follow the then established general procedures and rules of practice of the Department of the Interior in respect to contests or protests affecting public lands of the United States. If, pursuant to such a hearing the final decision rendered shall affirm the validity and effectiveness of any mining claim as to Leasing Act minerals then no subsequent proceeding under section 7 of this act shall have any force or effect upon any rights or interests under the said so affirmed mining claim. If at any time prior to a hearing the person requesting publication of notice and any person filing a verified statement pursuant to such notice shall so stipulate, then to the extent so stipulated, but only to such extent, no hearing shall be held with respect to rights asserted under that verified statement, and to the extent defined by the stipulation the rights asserted under that verified statement shall be deemed to be unaffected by that particular published notice.

(d) Any person claiming any right in Leasing Act minerals under or by virtue of any unpatented mining claim and desiring to receive a copy of any notice of any application, offer, permit, or lease which may be published as above provided in subsection (a) of this section 7 and which may affect lands embraced in such mining claim, may cause to be filed for record in the county office of record where the notice or certificate of location of such mining claim shall have been recorded, a duly acknowledged request for a copy of any such notice. Such request for copies shall set forth the name and address of the person requesting copies and shall also set forth, as to each mining claim under which such person asserts rights in Leasing Act minerals:

(1) the date of location;

(2) the book and page of the recordation of the notice or certificate of location; and

(3) the section or sections of the public land surveys which embrace such mining claim; or if such lands are unsurveyed, either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument.

Other than in respect to the requirements of subsection (a) of this section 7 as to personal delivery or mailing of copies of notices and in respect to the provisions of subsection (e) of this section 7, no such request for copies of published notices and no statement or allegation in such request and no recordation thereof shall affect title to any mining claim or to any land, or be deemed to constitute constructive notice to any person, that the person requesting copies has, or claims, any right, title, or interest in or under any mining claim referred to in such request.

(e) If any applicant, offeror, permittee, or lessee shall fail to comply with the requirements of subsection (a) of this section 7 as to the personal delivery or mailing of a copy of notice to any person, the publication of such notice shall be deemed wholly ineffectual as to that person or as to the rights asserted by that person and the failure of that person to file a verified statement, as provided in such notice, shall in no manner affect, diminish, prejudice or bar any rights of that person.

SEC. 8. The owner or owners of any mining claim heretofore located may, at any time prior to issuance of patent therefor, waive and relinquish all rights thereunder to Leasing Act minerals. The execution and acknowledgment of such a waiver and relinquishment by such owner or owners and the recordation thereof in the office where the notice or certificate of location of such mining claim is of record shall render such mining claim thereafter subject to the reservation referred to in section 4 of this act and any patent issued therefor shall contain such a reservation, but no such waiver or relinquishment shall be deemed in any manner to constitute any concession as to the date of priority of rights under said mining claim or as to the validity thereof.

SEC. 9. The Atomic Energy Act is hereby amended as follows:

(a) Section 5 (b) (5) is revised to read:

(5) Acquisition.—The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this act, to purchase, take, requisition, condemn, or otherwise acquire—

(A) supplies of source materials or any interest in real property containing deposits of source materials, and

(B) rights to enter upon any real property deemed by it to have possibilities of containing deposits of source materials and to conduct prospecting and exploratory operations for such deposits.

Any purchase made under this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5) upon certification by the Commission that such action is necessary in the interest of the common defense and security, or upon a showing that advertising is not reasonably practicable, and partial and advance payments may be made thereunder. The Commission may establish guaranteed prices for all source materials delivered to it within a specified time. Just compensation shall be made for any property or interest in property purchased, taken, requisitioned, condemned, or otherwise acquired under this paragraph.

(b) Section 5 (b) (6) is revised to read:

(6) Operations on lands belonging to the United States: The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this act, to issue leases or permits for prospecting for, exploration for, mining, or removal of deposits of source materials (or for any or all of these purposes) in lands belonging to the United States.

(c) Section 5 (b) (7) is revised to read:

"(7) Public lands: No individual, corporation, partnership, or association, which had any part, directly or indirectly, in the development of the atomic bomb project, may benefit by any location, entry, or settlement upon the public domain made after such individual corporation, partnership, or association took part in such project, if such individual, corporation, partnership, or association, by reason of having had such part in the development of the atomic bomb project, acquired confidential official information as to the existence of deposits of such uranium, thorium, or other materials in the specific lands upon which such location, entry, or settlement is made, and subsequent to the date of the enactment of this act made such location, entry, or settlement or caused the same to be made for his, or its, or their benefit. In cases where any patent, conveyance, lease, permit, or other authorization has been issued, which reserved to the United States source materials and the right to enter upon the land and prospect for, mine, and remove the same, the head of the department or agency which issued the patent, conveyance, lease, permit, or other authorization shall, on application of the holder thereof, issue a new or supplemental patent, conveyance, lease, permit, or other authorization without such reservation."

(d) Notwithstanding the provisions of the Atomic Energy Act, and particularly section 5 (b) 7 thereof, prior to its amendment hereby, or the provisions of the act of August 12, 1953 (67 Stat. 539), and particularly section 3 thereof, any mining claim, heretofore located under the mining laws of the United States, for, or based upon a discovery of a mineral deposit which is a fissionable source material and which, except for the possible contrary construction of said Atomic Energy Act, would have been locatable under such mining laws, shall, insofar as adversely affected by such possible contrary construction, be valid and effective, in all respects to the same extent as if said mineral deposit were a locatable mineral deposit other than a fissionable source material.

SEC. 10. As used in this act "mineral leasing laws" shall mean the act of October 20, 1914 (38 Stat. 741); the act of February 25, 1920 (41 Stat. 437); the act of April 17, 1926 (44 Stat. 301); the act of February 7, 1927 (44 Stat. 1057); and all acts heretofore or hereafter enacted which are amendatory of or supplementary to any of the foregoing acts; "Leasing Act minerals" shall mean all minerals which, upon the effective date of this act, are provided in the mineral leasing laws to be disposed of thereunder; "Leasing Act operations" shall mean operations conducted under a lease, permit, or license issued under the mineral leasing laws in or incidental to prospecting for, drilling for, mining, treating, storing, transporting, or removing Leasing Act minerals; "mining operations" shall mean operations under any unpatented or patented mining claim or millsite in or incidental to prospecting for, mining, treating, storing, transporting, or removing minerals other than Leasing Act minerals and any other use under any claim of right or title based upon such mining claim or millsite; "Leasing Act operator" shall mean any party who shall conduct Leasing Act operations; "mining operator" shall mean any party who shall conduct mining operations; "Atomic Energy Act" shall mean the act of August 1, 1946 (60 Stat. 755), as amended; "Atomic Energy Commission" shall mean the United States Atomic Energy Commission established under the Atomic Energy Act or any amendments thereof; "fissionable source material" shall mean uranium, thorium, and all other materials referred to in

section 5 (b) (1) of the Atomic Energy Act as reserved or to be reserved to the United States; "uranium lease application" shall mean an application for a uranium lease filed with said Commission with respect to lands which would be open for entry under the mining laws except for their being lands embraced within an offer, application, permit, or lease under the mineral leasing laws or lands known to be valuable for minerals leasable under those laws; "uranium lease" shall mean a uranium mining lease issued by said Commission with respect to any such lands; and "person" shall mean any individual, corporation, partnership, or other legal entity.

SEC. 11. If any provision of this act, or the application of such provision to any person or circumstances, is held unconstitutional, invalid, or unenforcible, the remainder of this act or the application of such provision to persons or circumstances other than those as to which it is held unconstitutional, invalid, or unenforcible, shall not be affected thereby.

Mr. D'EWART (interrupting the reading of the bill). Mr. Chairman, I ask unanimous consent that the bill be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Montana?

There was no objection.

Mr. ASPINALL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ASPINALL: Page 28, line 4, strike period and insert comma in lieu thereof and add the following: "provided, however, that such reservation contained in the patent shall apply only to the lands included in said mining claim which, at the time of the issuance of such patent are—

"(a) included in a permit or lease under the mineral leasing laws; or

"(b) covered by an application or offer for a permit or lease filed under the mineral leasing laws; or

"(c) known to be valuable for minerals subject to disposition under the mineral leasing laws."

Mr. ASPINALL. Mr. Chairman, when the bill was considered in committee there was some objection to the possibility that owners of present mining claims which had not ripened into patents might be denied the right to a fee-simple title without a reservation in the patent expressly reserving the leasable minerals to the Government; also that mining claims located hereafter which would not likely have any leasable mineral development might also be denied the right to have a fee-simple title without an expressed reservation in the patent reserving the leasable minerals to the Federal Government. So it was concluded in a conference between the sponsor of this bill and the gentleman from California [Mr. ENGLE], and myself who sponsors a similar bill that an amendment taking care of that situation might very well be in order.

The amendment which is proposed provides that a patent issued hereafter on lands covered by a mining claim shall not carry the reservation if at the time of the issuance of said patent, there is no mineral leasing lease or permit or an application or offer for a lease or permit covering the lands to be described in the patent. Also, that unless the area is a known area to be valuable for minerals subject to disposition under the mineral leasing laws. Keep in mind that this act provides that the same individual may be both a lessee of the Government, and a claimant under the mining laws of the Government if he so desires; and this simply provides that the claimant receiving a patent shall under certain circumstances proceed as he has heretofore in the past and receive a fee-simple title without any reservation of the leasable minerals. My point is that this will have very little effective use because it will not be needed, but if it is needed in any particular instance, in my opinion it does not harm the legislation at all. I therefore ask your support.

Mr. ENGLE. Mr. Chairman, will the gentleman yield?

Mr. ASPINALL. I yield to the gentleman from California.

Mr. ENGLE. It is true, is it not, that in the absence of this amendment section 4 would provide a hidden reservation, so to speak, in all mineral claims and in all patents coming from mineral claims.

Mr. ASPINALL. It might be so interpreted.

Mr. ENGLE. May I say to the gentleman that I concur in his amendment; in fact, I helped work it out. I have no objection to reservations of minerals when they are known to exist, but it would be patently unfair, in my opinion, to have mining claims go to patent and then 20 years later the Government exercise a hidden reservation in regard to something that was wholly unknown at the time the claim was filed and the patent was matured.

Mr. D'EWART. Mr. Chairman, will the gentleman yield?

Mr. ASPINALL. I yield to the gentleman from Montana.

Mr. D'EWART. The members of the committee on this side have discussed the amendment and are agreeable to it and think it will improve the bill. We hope it will be adopted.

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

Mr. SAYLOR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

On page 22, line 4, after the words "prior to", strike out "February 10, 1954," and insert "the effective date of this act."

Mr. SAYLOR. Mr. Chairman, as was explained by the gentleman from Utah [Mr. DAWSON], the author of this bill, at the last session of Congress a similar situation arose and Congress validated those claims made by discoverers of uranium up until the 1st day of January 1951. This bill would extend the period for validation of claims until the 10th day of February 1954. From the 10th day of February 1954, the date when the Atomic Energy Commission issued Circular Number 7, down until the effective date of this act there will be a hiatus; there will be a question as to whether or not any claims filed in that period of time are valid. All this amendment does is to say that the provisions of this bill shall extend not just from 1939 down until the 10th day of February 1954, but down until the effective date of the act. I believe this is an improvement to the bill and will prevent anyone's having to come back next year and correct any claims filed between the 10th of February 1954 and the effective date of the act.

Mr. DAWSON of Utah. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, as I stated before, the people concerned with these matters, the industry, the oil and gas people, the mining people, have spent a considerable length of time trying to work out a period of time when they feel this would be most equitable to those who have located their claims.

Far be it from me to attempt to go back and try to iron out those differences. There are some conflicts. However, as I stated before, I feel that this change should be opposed because the big majority of the people out there who have gone out in good faith and located their claims have received the protection they are entitled to under the present wording of the bill. Therefore, I hope the Committee will oppose this amendment and vote it down.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. SAYLOR].

The question was taken; and the Chair being in doubt, the Committee divided, and there were—ayes 6, noes 16.

So the amendment was rejected.

The CHAIRMAN. The question is on the committee amendment, as amended.

The amendment was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. KEATING, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 8896) to amend the mineral leasing laws to provide for multiple mineral development of the same tracts of the public lands, and for other purposes, pursuant to House Resolution 639, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed, and a motion to reconsider was laid on the table.

Mr. D'EWART. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3344) to amend the mineral leasing laws and the mining laws to provide for multiple mineral development of the same tracts of the public lands, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Montana?

There was no objection.

The Clerk read the Senate bill, as follows:

Be it enacted, etc., That, (a) subject to the conditions and provisions of this act and to any valid intervening rights acquired under the laws of the United States, any mining claim located under the mining laws of the United States subsequent to July 31, 1939, and prior to February 10, 1954, on lands of the United States, which at the time of location were—

(1) included in a permit or lease issued under the mineral leasing laws; or

(2) covered by an application or offer for a permit or lease which had been filed under the mineral leasing laws; or

(3) known to be valuable for minerals subject to disposition under the mineral leasing laws;

shall be effective to the same extent in all respects as if such lands at the time of location, and at all times thereafter, had not been so included or covered or known: *Provided, however*, That, in order to be entitled to the benefits of this act, the owner of any such mining claim located prior to January 1, 1953, must have posted and filed for record, within the time allowed by the provisions of the act of August 12, 1953 (67 Stat. 539), an amended notice of location as to such mining claim, stating that such notice was filed pursuant to the provisions of said act of August 12, 1953, and for the purpose of obtaining the benefits thereof: *And provided further*, That, in order to obtain the benefits of this act, the owner of any such mining claim located subsequent to December 31, 1952, and prior to February 10, 1954, not later than 120 days after the date of enactment of this act, must post on such claim in the manner required for posting notice of location of mining claims and file for record in the office where the notice or certificate of location of such claim is of record an amended notice of location for such claim, stating that such notice is filed pursuant to the provisions of this act and for the purpose of obtaining the benefits thereof and, within said 120-day period, if such owner shall have filed a uranium lease application as to the tract covered by such mining claim, must file with the Atomic Energy Commission a withdrawal of such uranium lease application or, if a uranium lease shall have issued pursuant thereto, a release of such lease, and must record a notice of the filing of such withdrawal or release in the county office wherein such notice or certificate of location shall have been filed for record.

(b) Labor performed or improvements made after the original location of and upon or for the benefit of any mining claim which shall be entitled to the benefits of this act under the provisions of subsection (a) of this section 1, shall be recognized as applicable to such mining claim for all purposes to the same extent as if the validity of such mining claim were in no respect dependent upon the provisions of this act.

(c) As to any land covered by any mining claim which is entitled to the benefits of this act under the provisions of subsection (a) of this section 1, any withdrawal or reservation of lands made after the original location of such mining claim is hereby modified and amended so that the effect thereof upon such mining claim shall be the same as if such mining claim had been located upon lands of the United States which, subsequent to July 31, 1939, and prior to the date of such withdrawal or reservation, were subject to location under the mining laws of the United States.

SEC. 2. (a) If any mining claim which shall have been located subsequent to December 31, 1952, and prior to December 11, 1953, and which shall be entitled to the benefits of this act, shall cover any lands embraced within any mining claim which shall have been located prior to January 1, 1953, and which shall be entitled to the benefits of this act, then as to such area of conflict said mining claim so located subsequent to December 31, 1952, shall be deemed to have been located December 11, 1953.

(b) If any mining claim hereafter located shall cover any lands embraced within any mining claim which shall have been located prior to February 10, 1954, and which shall be entitled to the benefits of this act, then as to such area of conflict said mining claim hereafter located shall be deemed to have been located 121 days after the date of the enactment of this act.

SEC. 3. (a) Subject to the conditions and provisions of this act and to any valid prior rights acquired under the laws of the United States, the owner of any pending uranium lease application or of any uranium lease shall have, for a period of 120 days after the date of enactment of this act, as limited in subsection (b) of this section 3, the right to locate mining claims upon the lands covered by said application or lease.

(b) Any rights under any such mining claim so hereafter located pursuant to the provisions of subsection (a) of this section 3 shall be subject to any rights of the owner of any mining claim which was located prior to February 10, 1954, and which was valid at the date of the enactment of this act or which may acquire validity under the provisions of this act. As to any lands covered by a uranium lease and also by a pending uranium lease application, the right of mining location under this section 3 as between the owner of said lease and the owner of said application, shall be deemed as to such conflict area to be vested in the owner of said lease. As to any lands embraced in more than one such pending uranium lease application, such right of mining location, as between the owners of such conflicting applications, shall be deemed to be vested in the owner of the prior application. Priority of such an application shall be determined by the time of posting on a tract then available for such leasing of a notice of lease application in accordance with paragraph (c) of the Atomic Energy Commission's Domestic Program Circular 7 (10 C. F. R. 60.7 (c)) provided there shall have been timely compliance with the other provisions of said paragraph (c) or, if there shall not have been such timely compliance, then by the time of the filing of the uranium lease application with the Atomic Energy Commission. Any rights under any mining claim located under the provisions of this section 3 shall terminate at the expiration of 30 days after the filing for record of the notice or certificate of location of such mining claim unless, within said 30-day period, the owner of the uranium lease application or uranium lease upon which the location of such mining claim was predicated shall have filed with the Atomic Energy Commission a withdrawal of said application or a release of said lease and shall have recorded a notice of the filing of such withdrawal or release in the county office wherein such notice or certificate of location shall be of record.

(c) Except as otherwise provided in subsections (a) and (b) of this section 3, no mining claim hereafter located shall be valid as to any lands which at the time of such location were covered by a uranium lease application or a uranium lease. Any tract upon which a notice of lease application has been posted in accordance with said paragraph (c) of said Circular 7 shall be deemed to have been included in a uranium lease application from and after the time of the posting of such notice of lease application: *Provided*, That there shall have been timely compliance with the other provisions of said paragraph (c) or, if there shall not have been such timely compliance, then from and after the time of the filing of a uranium lease application with the Atomic Energy Commission.

SEC. 4. Every mining claim or millsite hereafter located under the mining laws of the United States and every mining claim or millsite heretofore so located which shall be entitled to benefits under the first three sections of this act shall be subject to a reservation to the United States of all Leasing Act minerals and of the right (as limited in sec. 6 hereof) of the United States, its lessees, permittees, and licensees to enter upon the land covered by such mining claim or millsite and to prospect for, drill for, mine, treat, store, transport, and remove Leasing Act minerals and to use so much of the surface and subsurface of such mining claim or millsite as may be necessary for such purposes, and whenever reasonably necessary, for the purpose of prospecting for, drilling for, mining, treating, storing, transporting, and removing Leasing Act minerals on and from other lands; and any patent issued for any such mining claim or millsite shall contain such reservation.

SEC. 5. Subject to the conditions and provisions of this act, mining claims and millsites may hereafter be located under the mining laws of the United States on lands of the United States which at the time of location are—

(a) included in a permit or lease issued under the mineral leasing laws; or

(b) covered by an application or offer for a permit or lease filed under the mineral leasing laws; or

(c) known to be valuable for minerals subject to disposition under the mineral leasing laws;

to the same extent in all respects as if such lands were not so included or covered or known.

SEC. 6. (a) Where the same lands are being utilized for mining operations and Leasing Act operations, each of such operations shall be conducted, so far as reasonably practicable, in a manner compatible with such multiple use.

(b) Any mining operations pursuant to rights under any unpatented or patented mining claim or millsite which shall be subject to a reservation to the United States of Leasing Act minerals as provided in this act, shall be conducted, so far as reasonably practicable, in a manner which will avoid damage to any known deposit of any Leasing Act mineral. Subject to the provisions of subsection (d) of this section 6, mining operations shall be so conducted as not to endanger or materially interfere with any existing surface or underground improvements, workings, or facilities which may have been made for the purpose of Leasing Act operations, or with the utilization of such improvements, workings, or facilities.

(c) Any Leasing Act operations on lands covered by an unpatented or patented mining claim or millsite which shall be subject to a reservation to the United States of Leasing Act minerals as provided in this act, shall be conducted, so far as reasonably practicable, in a manner which will avoid damage to any known deposit of any mineral not so reserved from such mining claim or millsite. Subject to the provisions of subsection (d) of this section 6, Leasing Act operations shall be so conducted as not to endanger or materially interfere with any existing surface or underground improvements, workings, or facilities which may have been made for the purpose of mining operations, or with the utilization of such improvements, workings, or facilities.

(d) If, upon petition of either the mining operator or the Leasing Act operator, any court of competent jurisdiction shall find that a particular use in connection with one of such operations cannot be reasonably and properly conducted without endangering or materially interfering with the then existing improvements, workings, or facilities of the other of such operations or with the

utilization thereof, and shall find that under the conditions and circumstances, as they then appear, the injury or damage which would result from denial of such particular use would outweigh the injury or damage which would result to such then existing improvements, workings, or facilities or from interference with the utilization thereof if that particular use were allowed, then and in such event such court may permit such use upon payment (or upon furnishing of security determined by the court to be adequate to secure payment) to the party or parties who would be thus injured or damaged, of an amount to be fixed by the court as constituting fair compensation for the then reasonably contemplated injury or damage which would result to such then existing improvements, workings, or facilities or from interference with the utilization thereof by reason of the allowance of such particular use.

(e) Where the same lands are being utilized for mining operations and Leasing Act operations, then upon request of the party conducting either of said operations, the party conducting the other of said operations shall furnish to and at the expense of such requesting party copies of any information which said other party may have, as to the situs of any improvements, workings, or facilities theretofore made upon such lands, and upon like request, shall permit such requesting party, at the risk of such requesting party, to have access at reasonable times to any such improvemetns, workings, or facilities for the purpose of surveying and checking or determining the situs thereof. If damage to or material interference with a party's improvements, workings, facilities, or with the utilization thereof shall result from such party's failure, after request, to so furnish to the requesting party such information or from denial of such access, such failure or denial shall relieve the requesting party of any liability for the damage or interference resulting by reason of such failure or denial. Failure of a party to furnish requested information or access shall not impose upon such party any liability to the requesting party other than for such costs of court and attorney's fees as may be allowed to the requesting party in enforcing by court action the obligations of this section as to the furnishing of information and access. The obligation hereunder of any party to furnish requested information shall be limited to map and survey information then available to such party with respect to the situs of improvements, workings, and facilities and the furnishing thereof shall not be deemed to constitute any representation as to the accuracy of such information.

SEC. 7. (a) Any applicant, offeror, permittee, or lessee under the mineral leasing laws may file in the office of the Secretary of the Interior, or in such office as the Secretary may designate, a request for publication of notice of such application, offer, permit, or lease, provided expressly, that not less than 90 days prior to the filing of such request for publication there shall have been filed for record in the county office of record for the county in which the lands covered thereby are situate a notice of the filing of such application or offer or of the issuance of such permit or lease which notice shall set forth the date of such filing or issuance, the name and address of the applicant, offeror, permittee or lessee and the description of the lands covered by such application, offer, permit or lease. The filing of such request for publication shall be accompanied by a certified copy of such recorded notice and an affidavit or affidavits of a person or persons over 21 years of age setting forth that the affiant or affiants have examined the lands involved in a reasonable effort to ascertain whether any person or persons were in actual possession of or engaged in the working of such lands or any part thereof, and, if no person or persons were found to be in actual possession of or engaged in the working of said lands or any part thereof on the date of such examination, setting forth such fact, or, if any person or persons were so found to be in actual possession or engaged in such working on the date of such examination, setting forth the name and address of each such person, unless affiant shall have been unable through reasonable inquiry to obtain information as to the name and address of any such person, in which event the affidavit shall set forth fully the nature and results of such inquiry.

The filing of such request for publication shall also be accompanied by the certificate of a title or abstract company, or of a title abstractor, or of an attorney, based upon such company's, abstractor's, or attorney's examination of the instruments affecting the lands involved, of record in the public records of the county in which said lands are situate as shown by the indices of the public records in the county office of record for said county, setting forth the name of any person disclosed by said instruments to have an interest in said lands under any unpatented mining claim heretofore located, together with the address of such person if disclosed by such instruments of record.

Thereupon the Secretary of the Interior, or his designated representative, at the expense of the requesting person (who, prior to the commencement of publication, must furnish the agreement of the publisher to hold such requesting person alone responsible for charges of publication), shall cause notice of such application, offer permit, or lease to be published in a newspaper having general circulation in the county in which the lands involved are situate.

Such notice shall describe the lands covered by such application, offer, permit, or lease and shall notify whomever it may concern that if any person claiming or asserting under, or by virtue of, any unpatented mining claim heretofore located, any right or interest in Leasing Act minerals as to such lands or any part thereof, shall fail to file in the office where such request for publication was filed (which office shall be specified in such notice) and within 150 days from the date of the first publication of such notice, a verified statement which shall set forth, as to such unpatented mining claim:

(1) The date of location;

(2) The book and page of recordation of the notice or certificate of location;

(3) The section or sections of the public land surveys which embrace such mining claim; or if such lands are unsurveyed, either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument;

(4) Whether such claimant is a locator or purchaser under such location; and

(5) The name and address of such claimant and names and addresses so far as known to the claimant of any other person or persons claiming any interest or interests in or under such unpatened mining claim;

such failure shall be conclusively deemed (i) to constitute a waiver and relinquishment by such mining claimant of any and all right, title, and interest under such mining claim as to, but only as to, Leasing Act minerals, and (ii) to constitute a consent by such mining claimant that such mining claim and any patent issued therefor, shall be subject to the reservation specified in section 4 of this act, and (iii) to preclude thereafter any assertion by such mining claimant of any right or title to or interest in any Leasing Act mineral by reason of such mining claim.

If such notice is published in a daily paper, it shall be published in the Wednesday issue for 9 consecutive weeks, or, if in a weekly paper in 9 consecutive issues, or, if in a semiweekly or triweekly paper, in the issue of the same day of each week for 9 consecutive weeks.

Within 15 days after the date of first publication of such notice the person requesting such publication (1) shall cause a copy of such notice to be personally delivered to or to be mailed by registered mail addressed to each person in possession or engaged in the working of the land whose name and address is shown by an affidavit filed as aforesaid, and to each person who may have filed, to any lands described in said notice, a request for notices, as provided in subsection (d) of this section 7, and shall cause a copy of such notice to be mailed by registered mail to each person whose name and address is set forth in the title or abstract company's or title abstrator's or attorney's certificate filed as aforesaid, as having an interest in the lands described in said notice under any unpatented mining claim heretofore located, such notice to be directed to such person's address as set forth in such certificate; and (2) shall file in the office where said request for publication was filed an affidavit showing that copies have been so delivered or mailed.

(b) If any claimant under any unpatented mining claim heretofore located which embraces any of the lands described in any notice published in accordance with the provisions of subsection (a) of this section 7 shall fail to file a verified statement, as above provided, within 150 days from the date of the first publication of such notice, such failure shall be conclusively deemed, except as otherwise provided in subsection (e) of this section 7, (i) to constitute a waiver and relinquishment of such mining claimant of any and all right, title, and interest under such mining claim as to, but only as to, Leasing Act minerals, and (ii) to constitute a consent by such mining claimant that such mining claim and any patent issued therefor, shall be subject to the reservation specified in section 4 of this act, and (iii) to preclude thereafter any assertion by such mining claimant of any right or title to or title to or interest in any Leasing Act mineral by reason of such mining claim.

(c) If any verified statement shall be filed by a mining claimant as provided in subsection (a) of this section 7, then the Secretary of the Interior or his designated representative shall fix a time and place for a hearing to determine the validity and effectiveness of the mining claimant's asserted right or interest in Leasing Act minerals. The procedures with respect to notice of such a hearing and the conduct thereof, and in respect to appeals shall follow the then established general procedures and rules of practice of the Department of the Interior in respect to contests or protests affecting public lands of the United States. If at any time prior to a hearing the person requesting publication of notice and any person filing a verified statement pursuant to such notice shall so stipulate, then to the extent so stipulated, but only to such extent, no hearing shall be held with respect to rights asserted under that verified statement, and to the extent defined by the stipulation the rights asserted under that verified statement shall be deemed unaffected by that particular published notice.

(d) Any person claiming any right in Leasing Act minerals under or by virtue of any unpatented mining claim heretofore located and desiring to receive a copy of any notice of any application, offer, permit, or lease which may be published as above provided in subsection (a) of this section 7, and which may affect lands embraced in such mining claim, may cause to be filed for record in the court office of record where the notice or certificate of location of such mining claim shall have been recorded, a duly acknowledged request for a copy of any such notice. Such request for copies shall set forth the name and address of the person requesting copies and shall also set forth, as to each

mining claim under which such person asserts rights in Leasing Act minerals:

(1) the date of location;

(2) the book and page of the recordation of the notice or certificate of location; and

(3) the section or sections of the public land surveys which embrace such mining claim; or if such lands are unsurveyed, either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument.

Other than in respect to the requirements of subsection (a) of this section 7 as to personal delivery or mailing of copies of notices and in respect to the provisions of subsection (e) of this section 7, no such request for copies of published notices and no statement or allegation in such request and no recordation thereof shall affect title to any mining claim or to any land, or be deemed to constitute constructive notice to any person that the person requesting copies has, or claims, any right, title, or interest in or under any mining claim referred to in such request.

(e) If any applicant, offeror, permittee, or lessee shall fail to comply with the requirements of subsection (a) of this section 7 as to the personal delivery or mailing of a copy of notice to any person, the publication of such notice shall be deemed wholly ineffectual as to that person or as to the rights asserted by that person and the failure of that person to file a verified statement, as provided in such notice, shall in no manner affect, diminish, prejudice or bar any rights of that person.

SEC. 8. The owner or owners of any mining claim heretofore located may, at any time prior to issuance of patent therefor, waive and relinquish all rights thereunder to Leasing Act minerals. The execution and acknowledgment of such a waiver and relinquishment by such owner or owners and the recordation thereof in the office where the notice or certificate of location of such mining claim is of record shall render such mining claim thereafter subject to the reservation referred to in section 4 of this act and any patent issued therefor shall contain such a reservation, but no such waiver or relinquishment shall be deemed in any manner to constitute any concession as to the date of priority of rights under said mining claim or as to the validity thereof.

SEC. 9. Notwithstanding any previous act, regulation, or decision, the reservation of minerals in lands withdrawn from the public domain for mineral purposes by Executive order, proclamation, or other administrative procedure shall be applicable only to those minerals and for the purposes expressed in said Executive order, proclamation, or other administrative procedure. The Secretary of the Interior shall retain the power and authority to dispose of other leasable minerals in said lands by leasing procedures applicable to the public domain. This section shall become effective April 1, 1955.

SEC. 10. The Atomic Energy Act is hereby amended as follows:

(a) Section 5 (b) (5) is revised to read:

"(5) Acquisition: The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this Act, to purchase, take, requisition, condemn, or otherwise acquire—

"(A) supplies of source materials or any interest in real property containing deposits of source materials; and

"(B) rights to enter upon any real property deemed by it to have possibilities of containing deposits of source materials and to conduct prospecting and exploratory operations for such deposits.

Any purchase made under this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5) upon certification by the Commission that such action is necessary in the interest of the common defense and security, or upon a showing that advertising is not reasonably practicable, and partial and advance payments may be made thereunder. The Commission may establish guaranteed prices for all source materials delivered to it within a specified time. Just compensation shall be made for any property or interest in property taken, requisitioned, or condemned under this paragraph."

(b) Section 5 (b) (6) is revised to read:

"(6) Operations on lands belonging to the United States: The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this act, to issue leases or permits for prospecting for, exploration for, mining, or removal of deposits of source materials (or for any or all of these purposes) in lands belonging to the United States."

(c) Section 5 (b) (7) is revised to read:

"(7) Public lands: No individual, corporation, partnership, or association, which had any part, directly or indirectly, in the development of the atomic bomb project, may benefit by any location, entry, or settlement upon the public domain made after such individual, corporation, partnership, or association took part in such project, if such individual, corporation, partnership, or association, by reason of having had such part in the development of the atomic bomb project, acquired confidential official information as to the existence of deposits of such uranium, thorium, or other materials, in the specific lands upon which such location, entry, or settlement is made, and subsequent to the date of the enactment of this act made such location, entry, or settlement or cause the same to be made for his, or its, or their benefit. In cases where any patent, conveyance, lease, permit, or other authorization has been issued, which reserved to the United States source materials and the right to enter upon the land and prospect for, mine, and remove the same, the head of the department or agency which issued the patent, conveyance, lease, permit, or other authorization shall, on application of the holder thereof, issue a new or supplemental patent, conveyance, lease, permit, or other authorization without such reservation."

(d) Notwithstanding the provisions of the Atomic Energy Act, and particularly section 5 (b) (7) thereof, prior to its amendment hereby, or the provisions of the act of August 12, 1953 (67 Stat. 539), and particularly section 3 thereof, any mining claim, heretofore located under the mining laws of the United States, for, or based upon a discovery of a mineral deposit which is a fissionable source material and which, except for the possible contrary construction of said Atomic Energy Act, would have been locatable under such mining laws, shall, insofar as adversely affected by such possible contrary construction, be valid and effective, in all respects to the same extent as if said mineral deposit were a locatable mineral deposit other than a fissionable source material.

SEC. 11. As used in this act "mineral leasing laws" shall mean the act of October 20, 1914 (38 Stat. 741); the act of February 25, 1920 (41 Stat. 437); the act of April 17, 1926 (44 Stat. 301); the act of February 7, 1927 (44 Stat. 1057); and all acts heretofore or hereafter enacted which are amendatory of or supplementary to any of the foregoing acts; "Leasing Act minerals" shall mean all minerals which, upon the effective date of this act, are provided in the mineral leasing laws to be disposed of thereunder, "Leasing Act operations" shall mean operations conducted under a lease, permit, or license issued under the mineral leasing laws in or incidental to prospecting for, drilling for, mining, treating, storing, transporting, or removing Leasing Act minerals; "mining operations" shall mean operations under any unpatented or patented mining claim or millsite in or incidental to prospecting for, mining, treating, storing, transporting, or removing minerals other than Leasing Act minerals and any other use under any claim of right or title based upon such mining claim or millsite; "Leasing Act operator" shall mean any party who shall conduct Leasing Act operations; "mining operator" shall mean any party who shall conduct mining operations; "Atomic Energy Act" shall mean the act of August 1, 1946 (60 Stat. 755), as amended; "Atomic Energy Commission" shall mean the United States Atomic Energy Commission established under the Atomic Energy Act or any amendments thereof; "fissionable source material" shall mean uranium, thorium, and all other materials referred to in section 5 (b) (1) of the Atomic Energy Act as reserved or to be reserved to the United States; "uranium lease application" shall mean an application for a uranium lease filed with said Commission with respect to lands which would be open for entry under the mining laws except for their being lands embraced within an offer, application, permit, or lease under the mineral leasing laws or lands known to be valuable for minerals leasable under those laws; "uranium lease" shall mean a uranium mining lease issued by said Commission with respect to any such lands; and "person" shall mean any individual, corporation, partnership, or other legal entity.

SEC. 12. If any provision of this act, or the application of such provision to any person or circumstances, is held unconstitutional, invalid, or unenforcible, the remainder of this act or the application of such provision to persons or circumstances other than those as to which it is held unconstitutional, invalid, or unenforcible, shall not be affected thereby.

Mr. D'EWART. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by D'EWART: Strike out all after the enacting clause and insert the langauge of H. R. 8896 as passed:

"That, (a) subject to the conditions and provisions of this act and to any valid intervening rights acquired under the laws of the United States, any mining claim located under the mining laws of the United States subsequent to July 31, 1939, and prior to February 10, 1954, on lands of the United States, which at the time of location were—

"(1) included in a permit or lease issued under the mineral leasing laws; or

"(2) covered by an application or offer for a permit or lease which had been filed under the mineral leasing laws; or

"(3) known to be valuable for minerals subject to disposition under the mineral leasing laws.

shall be effective to the same extent in all respects as if such lands at the time of location, and at all times thereafter, had not been so included or covered or known: *Provided, however,* That, in order to be entitled to the benefits of this act, the owner of any such mining claim located prior to January 1, 1953, must have posted and filed for record, within the time allowed by the provisions of the act of August 12, 1953 (67 Stat. 539), an amended notice of location as to such mining claim, stating that such notice was filed pursuant to the provisions of said act of August 12, 1953, and for the purpose of obtaining the benefits thereof: *And provided further,* That in order to obtain the benefits of this act, the owner of any such mining claim located subsequent to December 31, 1952, and prior to February 10, 1954, not later than 120 days after the date of enactment of this act, must post on such claim in the manner required for posting notice of location of mining claims and file for record in the office where the notice or certificate of location of such claim is of record

an amended notice of location for such claim, stating that such notice is filed pursuant to the provisions of this act and for the purpose of obtaining the benefits thereof and, within said 120-day period, if such owner shall have filed a uranium-lease application as to the tract covered by such mining claim, must file with the Atomic Energy Commission a withdrawal of such uranium-lease application or, if a uranium lease shall have issued pursuant thereto, a release of such lease, and must record a notice of the filing of such withdrawal or release in the county office wherein such notice or certificate of location shall have been filed for record.

"(b) Labor performed or improvements made after the original location of and upon or for the benefit of any mining claim which shall be entitled to the benefits of this act under the provisions of subsection (a) of this section 1, shall be recognized as applicable to such mining claim for all purposes to the same extent as if the validity of such mining claim were in no respect dependent upon the provisions of this act.

"(c) As to any land covered by any mining claim which is entitled to the benefits of this act under the provisions of subsection (a) of this section 1, any withdrawal or reservation of lands made after the original location of such mining claim is hereby modified and amended so that the effect thereof upon such mining claim shall be the same as if such mining claim had been located upon lands of the United States which, subsequent to July 31, 1939, and prior to the date of such withdrawal or reservation, were subject to location under the mining laws of the United States.

"SEC. 2. (a) If any mining claim which shall have been located subsequent to December 31, 1952, and prior to December 11, 1953, and which shall be entitled to the benefits of this act, shall cover any lands embraced within any mining claim which shall have been located prior to January 1, 1953, and which shall be entitled to the benefits of this act, then as to such area of conflict said mining claim so located subsequent to December 31, 1952, shall be deemed to have been located December 11, 1953.

"(b) If any mining claim hereafter located shall cover any lands embraced within any mining claim which shall have been located prior to February 10, 1954, and which shall be entitled to the benefits of this act, then as to such area of conflict said mining claim hereafter located shall be deemed to have been located 121 days after the date of the enactment of this act.

"SEC. 3. (a) Subject to the conditions and provisions of this act and to any valid prior rights acquired under the laws of the United States, the owner of any pending uranium lease application or of any uranium lease shall have, for a period of 120 days after the date of enactment of this act, as limited in subsection (b) of this section 3, the right to locate mining claims upon the lands covered by said application or lease.

"(b) Any rights under any such mining claim so hereafter located pursuant to the provisions of subsection (a) of this section 3 shall be subject to any rights of the owner of any mining claim which was located prior to February 10, 1954, and which was valid at the date of the enactment of this act or which may acquire validity under the provisions of this act. As to any lands covered by a uranium lease and also by a pending uranium lease application, the right of mining location under this section 3, as between the owner of said lease and the owner of said application, shall be deemed as to such conflict area to be vested in the owner of said lease. As to any lands embraced in more than one such pending uranium lease application, such right of mining location, as between the owners of such conflicting applications, shall be deemed to be vested in the owner of the prior application. Priority of such an application shall be determined by the time of posting on a tract then available for such leasing of a notice of lease application in accordance with paragraph (c) of the Atomic Energy Commission's Domestic Uranium Program Circular 7 (10 C. F. R. 60.7 (c)) provided there shall have been timely compliance with the other provisions of said paragraph (c) or, if there shall not have been such timely compliance, then by the time of the filing of the uranium lease application with the Atomic Energy Commission. Any rights under any mining claim located under the provisions of this section 3 shall terminate at the expiration of 30 days after filing for record of the notice or certificate of location of such mining claim unless, within said 30-day period, the owner of the uranium lease application or uranium lease upon which the location of such mining claim was predicated shall have filed with the Atomic Energy Commission a withdrawal of said application or a release of said lease and shall have recorded a notice of the filing of such withdrawal or release in the county office wherein such notice or certificate of location shall be of record.

"(c) Except as otherwise provided in subsections (a) and (b) of this section 3, no mining claim hereafter located shall be valid as to any lands which at the time of such location were covered by a uranium lease application or a uranium lease. Any tract upon which a notice of lease application has been posted in accordance with said paragraph (c) of said Circular 7 shall be deemed to have been included in a uranium lease application from and after the time of the posting of such notice of lease application: *Provided*, That there shall have been timely compliance with the other provisions of said paragraph (c) or, if there shall not have been such timely compliance, then from and after the time of the filing of a uranium lease application with the Atomic Energy Commission.

"SEC. 4. Every mining claim or millsite hereafter located under the mining laws of the United States and every mining claim or millsite heretofore so located which shall be entitled to benefits under the first three sections of this act shall be subject to a reservation to the United States of all Leasing Act minerals and of the right (as limited in sec. 6 hereof) of the United States, its lessees, permittees, and licensees to enter upon the land covered by such mining claim or millsite and to prospect for, drill for, mine, treat, store, transport, and remove Leasing Act minerals and to use so much of the surface and subsurface of such mining claim or millsite as may be necessary for such purposes, and whenever reasonably necessary, for the purpose of prospecting for, drilling for, mining, treating, storing, transporting, and removing Leasing Act minerals on and from other lands; and any patent issued for any such mining claim or millsite and contain such reservation: *Provided, however*, That such reservation contained in the patent shall apply only to the lands included in said mining claim which, at the time of the issuance of such patent are—

"(a) included in a permit or lease under the mineral leasing laws; or

"(b) covered by an application or offer for a permit or lease filed under the mineral leasing laws; or

"(c) known to be valuable for minerals subject to disposition under the mineral leasing laws.

"SEC. 5. Subject to the conditions and provisions of this act, mining claims and millsites may hereafter be located under the mining laws of the United States on lands of the United States which at the time of location are—

"(a) included in a permit or lease issued under the mineral leasing laws; or

"(b) covered by an application or offer for a permit or lease filed under the mineral leasing laws; or

"(c) known to be valuable for minerals subject to disposition under the mineral leasing laws;

to the same extent in all respects as if such lands were not so included or covered or known.

"SEC. 6. (a) Where the same lands are being utilized for mining operations and Leasing Act operations, each of such operations shall be conducted, so far as reasonably practicable, in a manner compatible with such multiple use.

"(b) Any mining operations pursuant to rights under any unpatented or patented mining claim or millsite which shall be subject to a reservation to the United States of Leasing Act minerals as provided in this act, shall be conducted, so far as reasonably practicable, in a manner which will avoid damage to any known deposit of any Leasing Act mineral. Subject to the provisions of subsection (d) of this section 6, mining operations shall be so conducted as not to endanger or materially interfere with any existing surface or underground improvements, workings, or facilities which may have been made for the purpose of Leasing Act operations, or with the utilization of such improvements, workings, or facilities.

"(c) Any Leasing Act operations on lands covered by an unpatented or patented mining claim or millsite which shall be subject to a reservation to the United States of Leasing Act minerals as provided in this act, shall be conducted, so far as reasonably practicable, in a manner which will avoid damage to any known deposit of any mineral not so reserved from such mining claim or millsite. Subject to the provisions of subsection (d) of this section 6, Leasing Act operations shall be so conducted as not to endanger or materially interfere with any existing surface or underground improvements, workings, or facilities which may have been made for the purpose of mining operations, or with the utilization of such improvements, workings, or facilities.

"(d) If, upon petition of either the mining operator or the Leasing Act operator, any court of competent jurisdiction shall find that a particular use in connection with one of such operations cannot be reasonably and properly conducted without endangering or materially interfering with the then existing improvements, workings, or facilities of the other of such operations or with the utilization thereof, and shall find that under the conditions and circumstances, as they then appear, the injury or damage which would result from denial of such particular use would outweigh the injury or damage which would result to such then existing improvements, workings, or facilities or from interference with the utilization thereof if that particular use were allowed, then in such event such court may permit such use upon payment (or upon furnishing of security determined by the court to be adequate to secure payment) to the party or parties who would be thus injured or damaged, of an amount to be fixed by the court as constituting fair compensation for the then reasonably contemplated injury or damage which would result to such then existing improvements, workings, or facilities or from interference with the utilization thereof by reason of the allowance of such particular use.

"(e) Where the same lands are being utilized for mining operations and Leasing Act operations, then upon request of the party conducting either of said operations, the party conducting the other of said operations shall furnish to and at the expense of such requesting party copies of any information which said other party may have, as to the situs of any improvements, workings, or facilities theretofore made upon such lands,

and upon like request, shall permit such requesting party, at the risk of such requesting party, to have access at reasonable times to any such improvements, workings, or facilities for the purpose of surveying and checking or determining the situs thereof. If damage to or material interference with a party's improvements, workings, facilities, or with the utilization thereof shall result from such party's failure, after request, to so furnish to the requesting party such information or from denial of such access, such failure or denial shall relieve the requesting party of any liability for the damage or interference resulting by reason of such failure or denial. Failure of a party to furnish requested information or access shall not impose upon such party any liability to the requesting party other than for such costs of court and attorney's fees as may be allowed to the requesting party in enforcing by court action the obligations of this section as to the furnishing of information and access. The obligation hereunder of any party to furnish requested information shall be limited to map and survey information then available to such party with respect to the situs of improvements, workings, and facilities and the furnishing thereof shall not be deemed to constitute any representation as to the accuracy of such information.

"SEC. 7. (a) Any applicant, offeror, permittee, or lessee under the mineral leasing laws may file in the office of the Secretary of the Interior, or in such office as the Secretary may designate, a request for publication of notice of such application, offer, permit, or lease, provided, expressly, that not less than 90 days prior to the filing of such request for publication there shall have been filed for record in the county Office of Record for the county in which the lands covered thereby are situate a notice of the filing of such application or offer or of the issuance of such permit or lease which notice shall set forth the date of such filing or issuance, the name and address of the applicant, offeror, permittee, or lessee and the description of the lands covered by such application, offer, permit or lease, showing section or sections of land surveyed, or, if such lands are unsurveyed, the section or sections of land which would probably be involved when the public lands surveyed are extended to such lands, or a tie by courses and distances to an approved United States Mineral Monument. The filing of such request for publication shall be accompanied by a certified copy of such recorded notice and an affidavit or affidavits of a person or persons over 21 years of age setting forth that the affiant or affiants have examined the lands involved in a reasonable effort to ascertain whether any person or persons were in possession of or engaged in the working of such lands or any part thereof, and, if no person or persons were found to be in possession of or engaged in the working of said lands or any part thereof on the date of such examination, setting forth such fact, or, if any person or persons were so found to be in possession or engaged in such working on the date of such examination, setting forth the name and address of each such person, unless affiant shall have been unable through reasonable inquiry to obtain information as to the name and address of any such person, in which event the affidavit shall set forth fully the nature and results of such inquiry.

"Thereupon the Secretary of the Interior, or his designated representative, at the expense of the requesting person (who, prior to the commencement of publication, must furnish the agreement of the publisher to hold such requesting person alone responsible for charges of publication), shall cause notice of such application, offer, permit, or lease to be published in a newspaper having general circulation in the county in which the lands involved are situate.

"Such notice shall describe the lands covered by such application, offer, permit, or lease, as provided heretofore in the notice to be filed in the office of record of the county in which the lands covered are situate, and shall notify whomever it may concern that if any person claiming or asserting under, or by virtue of, any unpatented mining claim, any right or interest in Leasing Act minerals as to such lands or any part thereof, shall fail to file in the office where such request for publication was filed (which office shall be specified in such notice) and within 150 days from the date of the first publication of such notice (which date shall be specified in such notice), a verified statement which shall set forth, as to such unpatented mining claim:

"(1) The date of location;

"(2) The book and page of recordation of the notice or certificate of location;

"(3) The section or sections of the public land surveys which embrace such mining claim; or if such lands are unsurveyed, either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument;

"(4) Whether such claimant is a locator or purchaser under such location; and

"(5) The name and address of such claimant and names and addresses so far as known to the claimant of any other person or persons claiming any interest or interests in or under such unpatented mining claim;

such failure shall be conclusively deemed (i) to constitute a waiver and relinquishment by such mining claimant of any and all right, title, and interest under such mining claim as to, but only as to, Leasing Act minerals, and (ii) to constitute a consent by such mining claimant that such mining claim and any patent issued therefor, shall be subject to the reservation specified in section 4 of this act, and (iii) to preclude thereafter any assertion by such mining claimant of any right or title to or interest in any Leasing Act mineral by reason of such mining claim.

"If such notice is published in a daily paper, it shall be published in the Wednesday issue for 9 consecutive weeks, or, if in a weekly paper, in 9 consecutive issues, or, if in a semiweekly or triweekly paper, in the issue of the same day of each week for 9 consecutive weeks.

"Within 15 days after the date of first publication of such notice, the person requesting such publication (1) shall cause a copy of such notice to be personally delivered to or to be sent by registered mail addressed to each person in possession or engaged in the working of the land whose name and address is shown by an affidavit file as aforesaid, and to each person who may have filed, as to any lands described in said notice, a request for notices, as provided in subsection (d) of this section 7, and (2) shall file in the office where said request for publication was filed an affidavit showing that copies have been so delivered or mailed.

"(b) If any claimant under any unpatented mining claim which embraces any of the lands described in any notice published in accordance with the provisions of subsection (a) of this section 7 shall fail to file a verified statement, as above provided, within 150 days from the date of the first publication of such notice, such failure shall be conclusively deemed, except as otherwise provided in subsection (e) of this section 7, (i) to constitute a waiver and relinquishment by such mining claimant of any and all right, title, and interest under such mining claim as to, but only as to, Leasing Act minerals, and (ii) to constitute a consent by such mining claimant that such mining claim and any patent issued therefore, shall be subject to the reservation specified in section 4 of this act, and (iii) to preclude thereafter any assertion by such mining claimant of any right or title to or interest in any Leasing Act mineral by reason of such mining claim.

"(c) If any verified statement shall be filed by a mining claimant as provided in subsection (a) of this section 7, then the Secretary of the Interior or his designated representative shall fix a time and place for a hearing to determine the validity and effectiveness of the mining claimant's asserted right or interest in Leasing Act minerals, which place of hearing shall be in the county where said interest or part of it is located, unless the mining claimant agrees otherwise. The procedures with respect to notice of such a hearing and the conduct thereof, and in respect to appeals shall follow the then established general procedures and rules of practice of the Department of the Interior in respect to contests or protests affecting public lands of the United States. If, pursuant to such a hearing the final decision rendered shall affirm the validity and effectiveness of any mining claim as to Leasing Act minerals then no subsequent proceeding under section 7 of this act shall have any force or effect upon any rights or interests under the said so affirmed mining claim. If at any time prior to a hearing the person requesting publication of notice and any person filing a verified statement pursuant to such notice shall so stipulate, then to the extent so stipulated, but only to such extent, no hearing shall be held with respect to rights asserted under that verified statement, and to the extent defined by the stipulation the rights asserted under that verified statement shall be deemed to be unaffected by that particular published notice.

"(d) Any person claiming any right in Leasing Act minerals under or by virtue of any unpatented mining claim and desiring to receive a copy of any notice of any application, offer, permit, or lease which may be published as above provided in subsection (a) of this section 7 and which may affect lands embraced in such mining claim, may cause to be filed for record in the county office of record where the notice or certificate of location of such mining claim shall have been recorded, a duly acknowledged request for a copy of any such notice. Such request for copies shall set forth the name and address of the person requesting copies and shall also set forth, as to each mining claim under which such person asserts rights in Leasing Act minerals:

"(1) the date of location;

"(2) the book and page of the recordation of the notice or certificate of location; and

"(3) the section or sections of the public land surveys which embrace such mining claim; or if such lands are unsurveyed, either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument.

Other than in respect to the requirements of subsection (a) of this section 7 as to personal delivery or mailing of copies of notices and in respect to the provisions of subsection (e) of this section 7, no such request for copies of published notices and no statement or allegation in such request and no recordation thereof shall affect title to any mining claim or to any land, or be deemed to constitute constructive notice to any person that the person requesting copies has, or claims, any right, title, or interest in or under any mining claim referred to in such request.

"(e) If any applicant, offeror, permittee, or lessee shall fail to comply with the requirements of subsection (a) of this section 7 as to the personal delivery or mailing of a copy of notice to any person, the

publication of such notice shall be deemed wholly ineffectual as to that person or as to the rights asserted by that person and the failure of that person to file a verified statement, as provided in such notice, shall in no manner affect, diminish, prejudice or bar any rights of that person.

"SEC. 8. The owner or owners of any mining claim heretofore located may, at any time prior to issuance of patent therefor, waive and relinquish all rights thereunder to Leasing Act minerals. The execution and acknowledgment of such a waiver and relinquishment by such owner or owners and the recordation thereof in the office where the notice or certificate of location of such mining claim is of record shall render such mining claim thereafter subject to the reservation referred to in section 4 of this act and any patent issued therefor shall contain such a reservation, but no such waiver or relinquishment shall be deemed in any manner to constitute any concession as to the date of priority of rights under said mining claim or as to the validity thereof.

"SEC. 9. The Atomic Energy Act is hereby amended as follows:

"(a) Section 5 (b) (5) is revised to read:

"(5) Acquisition: The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this act, to purchase, take, requisition, condemn, or otherwise acquire—

"(A) supplies of source materials or any interest in real property containing deposits of source materials, and

"(B) rights to enter upon any real property deemed by it to have possibilities of containing deposits of source materials and to conduct prospecting and exploratory operations for such deposits.

Any purchase made under this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5) upon certification by the Commission that such action is necessary in the interest of the common defense and security, or upon a showing that advertising is not reasonably practicable, and partial and advance payments may be made thereunder. The Commission may establish guaranteed prices for all source materials delivered to it within a specified time. Just compensation shall be made for any property or interest in property purchased, taken, requisitioned, condemned, or otherwise acquired under this paragraph.

"(b) Section 5 (b) (6) is revised to read:

"(6) Operations on lands belonging to the United States: The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this act, to issue leases or permits for prospecting for, exploration for, mining, or removal of deposits of source materials (or for any or all of these purposes) in lands belonging to the United States.

"(c) Section 5 (b) (7) is revised to read:

"'(7) Public lands: No individual, corporation, partnership, or association, which had any part, directly or indirectly, in the development of the atomic bomb project, may benefit by any location, entry, or settlement upon the public domain made after such individual, corporation, partnership, or association took part in such project, if such individual, coropration, partnership, or association, by reason of having had such part in the development of the atomic bomb project, acquired confidential official information as to the existence of deposits of such uranium, thorium, or other materials in the specific lands upon which such location, entry, or settlement is made, and subsequent to the date of the enactment of this act made such location, entry, or settlement or caused the same to be made for his, or its, or their benefit. In cases where any patent, conveyance, lease, permit, or other authorization has been issued, which reserved to the United States source materials and the right to enter upon the land and prospect for, mine, and remove the same, the head of the department or agency which issued the patent, conveyance, lease, permit, or other authorization shall, on application of the holder thereof, issue a new or supplemental patent, conveyance, lease, permit, or other authorization without such reservation.'

"(d) Notwithstanding the provisions of the Atomic Energy Act, and particularly section 5 (b) 7 thereof, prior to its amendment hereby, or the provisions of the act of August 12, 1953 (67 Stat. 539), and particularly section 3 thereof, any mining claim, heretofore located under the mining laws of the United States, for, or based upon a discovery of a mineral deposit which is a fissionable source material and which, except for the possible contrary construction of said Atomic Energy Act, would have been locatable under such mining laws, shall, insofar as adversely affected by such possible contrary construction, be valid and effective, in all respects to the same extent as if said mineral deposit were a locatable mineral deposit other than a fissionable source material.

"SEC. 10. As used in this act 'mineral leasing laws' shall mean the act of October 20, 1914 (38 Stat. 741); the act of February 25, 1920 (41 Stat. 437); the act of April 17, 1926 (44 Stat. 301); the act of February 7, 1927 (44 Stat. 1057); and all acts heretofore or hereafter enacted which are amendatory of or supplementary to any of the foregoing acts; 'Leasing Act minerals' shall mean all minerals which, upon the effective date of this act, are provided in the mineral leasing laws to be disposed of thereunder, 'Leasing Act operations' shall mean operations conducted under a lease, permit, or license issued under the mineral leasing laws in or incidental to prospecting for, drilling for, mining, treating, storing, transporting, or removing Leasing Act minerals; 'mining operations' shall mean operations under any unpatented or patented mining claim or millsite in or incidental to prospecting for, mining, treating, storing, transporting, or removing minerals other than Leasing Act minerals and any other use under any claim of right or title based upon such mining claim or millsite; 'Leasing Act operator' shall mean any party who shall conduct Leasing Act operations; 'mining operator' shall mean any party who shall conduct mining operations; 'Atomic Energy Act' shall mean the Act of August 1, 1946 (60 Stat. 755), as amended; 'Atomic Energy Commission' shall mean the United States Atomic Energy Commission established under the Atomic Energy Act or any amendments thereof; 'fissionable source material' shall mean uranium, thorium, and all other materials referred to in section 5 (b) (1) of the Atomic Energy Act as reserved or to be reserved to the United States; 'uranium lease application' shall mean an application for a uranium lease filed with said Commission with respect to lands which would be open for entry under the mining laws except for their being lands embraced within an offer, application, permit, or lease under the mineral leasing laws or lands known to be valuable for minerals leasable under those laws; 'uranium lease' shall mean a uranium mining lease issued by said Commission with respect to any such lands; and 'person' shall mean any individual, corporation, partnership, or other legal entity.

"SEC. 11. If any provision of this act, or the application of such provision to any person or circumstances, is held unconstitutional, invalid, or unenforcible, the remainder of this act or the application of such provision to persons or circumstances other than those as to which it is held unconstitutional, invalid, or unenforcible, shall not be affected thereby."

The SPEAKER. The question is on the amendment offered by the gentleman from Montana [Mr. D'EWART].

The amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The proceedings whereby the bill H. R. 8896, was passed were vacated, and that bill was laid on the table.

HOUSING ACT OF 1954

Mr. WOLCOTT submitted a conference report and statement on the bill (H. R. 7839) to aid in the provision and improvement of housing, the elimination and prevention of slums, and the conservation and development of urban communities.

SPECIAL ORDER GRANTED

Mr. HAND asked and was given permission to address the House on Thursday and Friday of this week for 30 minutes each, following the legislative business of the day and any special orders heretofore entered.

SPECIAL ORDER VACATED

The SPEAKER. Under previous order of the House the gentleman from California [Mr. PHILLIPS] is recognized for 45 minutes.

Mr. PHILLIPS. Mr. Speaker, I ask unanimous consent that the special order allotted to me be vacated.

The SPEAKER. Is there objection?

There was no objection.

A DISCUSSION OF THE CONCEPT OF EQUAL PAY FOR EQUAL WORK

The SPEAKER. Under previous order of the House, the gentlewoman from Ohio [Mrs. FRANCES P. BOLTON] is recognized for 20 minutes.

Mrs. FRANCES P. BOLTON. Mr. Speaker, on January 14 of this year I introduced H. R. 7172 after considerable research and contact with people of many groups which have expressed interest in the principle of equal pay for equal work. Included in these groups were leaders of American labor, business, finance, education, and women's affairs.

It has seemed wise not to press the matter until I have more significant information. So today I want to discuss the general concept of equal pay for equal work. To do so, let me set forth briefly the provisions of my bill the overall purpose of which was to prohibit discrimination on account of sex in the payment of wages by employers. Briefly, this bill—

First. Directs the Secretary of Labor to set up standards to determine which jobs involve work of comparable character or skills.

Second. Permits an employee to sue for wages he was deprived of because his employer violated the act.

Third. Permits the Secretary of Labor to bring court action if the employee prefers that method.

The administration, the Labor Department, and the Women's Bureau pledged strong support of the bill. So did many other important groups in labor and industry, in women's organizations and education.

Many organizations have expressed their support of the principle of equal pay: the Amalgamated Clothing Workers of America, the American Association of University Women, General Federation of Women's Clubs, National Council of Catholic Women, National Council of Jewish Women, National Council of Negro Women, the National Education Association, National Federation of Business and Professional Women's Clubs, National League of Women Voters, National Women's Trade Union League, National Association of Women Lawyers, Young Women's Christian Association, United Church Women.

The Chamber of Commerce of the United States, in a policy declaration, stated it believed in the equal-pay principle but did not believe in Federal legislation.

The National Association of Manufacturers says:

> The principle of equal pay for equal work performance within the wage structure of a local business establishment is sound and should be observed. Rates of pay should be based on the nature and requirements of each job, irrespective of age, sex, or other personal factors of the worker.

Among individual industrialists who have recently been queried on the matter of equal pay for equal work, there appear to be divergent opinions regarding the validity of the proposed legislation. Most industrialists believe in the principle but look with a certain amount of foreboding on national legislation. They prefer an evolutionary program of education rather than legislation. They are concerned about inspectors, penalties, difficulties of enforcement. However, I recognize that many people in this country, including Members of this Congress, leaders in industrial management, leaders in labor organizations, educators, women's organizations are not fully aware of the advantages and difficulties in the passage and enforcement of such a bill. I think it is important to bring all arguments, pro and con, before you so that you may have all the facts as to the benefits which this bill will bring to all the people.

I think it is wise to take a new look at the woman worker who is so important in our economy.

The typical woman at work today is in her late thirties, and she is married. She works because she and her family need the money she earns. Her job is probably a clerical or factory job, full-time. She may work less than a full year in any one place.

Her income runs between $1,500 and $2,000. This amount combined with her husband's salary gives the family an income of less than $5,000. The Women's Bureau of the Department of Labor figures—1952—show almost 19 million women holding jobs—one-third of this Nation's labor force.

These figures do more than suggest that this woman deserves our attention as "United States citizen, first-class."

It is true also that women generally own two-thirds of all privately owned war bonds, either alone or as co-owner; they hold 40 percent of the titles of 30 million homes in this country; they pay 40 percent of all property taxes; 80 percent of all inheritance taxes. They spend 80 percent of the national income.

Women made up 52 percent of the voters in the 1952 election. There are some 2 million more women than men today in our country. With the necessary withdrawal of men for the Armed Services, these figures may continue to increase. This will mean an even greater necessity for women to earn a decent wage. Should national emergencies arise, her services may again be desperately needed by industry.

The present spiritual and economic climate makes this a peculiarly propitious time for consideration of the whole question of equal pay.

Many experts believe that such a bill will stimulate our economy by increasing consumer purchasing power. If we have learned anything from the disturbed business cycles of the past two or three decades, it is that a high living standard and prosperous business conditions cannot exist if the worker cannot buy the products of his or her labor. Yet, if large numbers of women can be hired at less than the prevailing rates for men, their competition is likely to result either in the displacement of the men or in men's acceptance of lower rates. The eventual result is reduced purchasing power and lower standards of living for all workers.

The payment of lower rates to women for work comparable with men's has adverse effect on the best use of workers. By creating so-called men's jobs and women's jobs, it cuts down free choice of work opportunities for all. Men will not take women's jobs because of their lower rates of pay, and men resent the hiring of women for men's jobs for fear that the rates will be cut if women are brought in. This creates what might be called a frozen labor market, and industry itself suffers because of it.

It is to industry's advantage that workers be able to move freely, as the situation demands, from one job to another, but the artificial barrier set up by unequal wage rates prevents industry from employing workers on the most efficient basis. The widespread establishment of a rate for the job, irrespective of sex, would make a genuine contribution toward creating labor mobility and increased industrial efficiency.

I recognize, of course, that there are many different opinions on the question. Before any bill is passed, these viewpoints have to be adjusted and reconciled. There are the points of view of industrial management, of organized labor, of women's organizations, of educators, of the women who work.

I hope that the discussions which may arise from presentation of available facts will give the American people as a whole an opportunity to express their wishes.

DEFINITION

The increasing number of women in industry has made the question of equal pay for comparable work of growing importance. In two world wars the Federal Government supported the principle of equal pay for women. Various States adopted such legislation.

Equal pay for comparable work by definition is the application of a rate or rate range for the job without regard to the sex of the worker. There are sound methods of job evaluation by which it is possible to weigh the duties, responsibilities, and working conditions and fix the rate of pay for each job. Job evaluation has almost eliminated the difficulty of setting up criteria.

HISTORICAL BACKGROUND

Demands for Government action for equal pay arose as early as 1868, when the National Labor Union Convention passed a resolution urging Federal and State Governments "to pass laws securing equal salaries for equal work to all women employed under the various departments of Government."

The Classification Act of 1923 established for Federal workers the rate for the job, irrespective of sex. Just last week the House Committee on Post Office and Civil Service approved an amendment to the new Federal pay bill—H. R. 8093—permitting appeal to the Civil Service Commission where persons are passed over on job eligibility lists because of their sex. For many years, women's organizations, labor unions, and many others both inside and outside the Government have urged that the Federal Government should enact an equal-pay law.

Many unions, however, have long pressed for equal-pay provisions in their contracts and in legislation.

It is difficult to obtain information as to the extent of wage discrimination against women throughout the United States. Many instances of unequal pay in individual plants or establishments have come to my attention. The dual wage structure in contracts is one method by which employers and unions avoid paying women the man's rate for the job.

In some arbitration awards interpreting union contracts the arbitrator has held that although women perform the same work as men and receive a lower pay rate, they are not entitled to the same pay since the differential has been in existence for a number of years and the union has implicitly condoned it, making no protestation.

A number of States have passed legislation of one sort or another, but State action cannot of itself reach the national goal. It might be interesting to take up at this point just what the States have done. This recapitulation may serve as background for recommendations looking to Federal legislation.

Achievement by women in the First World War resulted in the passage of equal-pay laws in two States, Montana and Michigan.

Wartime developments and the War Labor Board action have helped collective-bargaining agreements and have helped the establishment of job evaluation systems under which pay differentials based on sex have been abolished.

The demand for legislative action during the Second World War resulted in the passage by a number of States of equal-pay laws. In one decade 12 States passed equal-pay laws.

Today, in addition to Michigan and Montana, there are equal pay laws in Illinois, Washington, New York, Massa-

chusetts, Rhode Island, Pennsylvania, New Hampshire, California, Connecticut, Maine, New Jersey, and the Territory of Alaska.

However, among these 14 equal-pay laws, very few are free of loopholes. In Illinois, the Department of Labor has no responsibility to enforce the law. In Illinois and Michigan, the law covers only workers in manufacturing industries. In California, Illinois, Maine, Pennsylvania, and Rhode Island, wage discrimination is permitted if sanctioned by a collective-bargaining agreement. In California, Illinois, Maine, Pennsylvania, and Rhode Island, laws enumerate many factors upon which wage differentials can be based. In New York and Washington, wage differentials are permitted if based on "factors other than sex." The New Jersey law permits "a reasonable factor or factors other than sex" on which to base wage differentials. Such terminology has, in many cases, been used to evade the intent of the laws. In many States the labor commissioner does not have the power to take wage assignments and sue in behalf of the employee. In most States inadequate appropriations make administration of the equal pay laws difficult. No State's laws attempt to eliminate inequalities between rates paid for so-called men's and women's jobs.

Some States require equal pay for teachers and for State employees. Sixteen States and the District of Columbia have equal pay laws for teachers. About one-half the States have civil-service systems in which equal pay for men and women is generally required in all branches of the State government.

However, experience has shown that the limited orbit of State laws cannot cure an evil which is nationwide in its extent. Today, practically all American business and industry touches on interstate commerce. Very few businesses or industries operate on a strictly intrastate basis. For this reason, broad, uniform, countrywide Federal legislation would seem to be needed. Such Federal legislation could: First, eliminate many labor disputes caused by discriminatory wage practices; second, lessen unfair competition among employers; third, raise living standards of all workers and their dependents; fourth, contribute to maximum labor force efficiency and flexibility; fifth, increase the prestige of the United States among the nations of the world; and, above all else, sixth, grant justice to women workers.

Let me touch briefly on each of these points:

LABOR DISPUTES CAUSED BY DISCRIMINATION

Unrest, and even strikes, result from employers' resistance to granting equal pay. Walter P. Reuther testified at a congressional hearing that the fight for equalization of women's rates had prolonged strikes in some plants of General Motors. Joseph A. Beirne, president, Communications Workers of America, has testified that the question of equal pay was always one of the stumbling blocks in contract negotiations.

UNFAIR COMPETITION

The Senate report on the Women's Equal Pay Act of 1950 points out that employers in the States with equal-pay laws are now at a competitive disadvantage in interstate transactions. Furthermore, it states that Federal legislation would benefit employers now voluntarily applying the equal-pay principle by eliminating unfair competition from those areas paying lower wages to women.

LIVING STANDARDS

Labor unions have presented many examples of how unequal pay for women results in lower wages for men and in lower living standards for many American families. Says Mr. T. R. Owens, of the United Rubber Workers, CIO:

> Wherever there are two sets of rates in a plant, there is a continual attempt to bring all rates down to the lower level. Thus industries with a labor force having large proportions of women have lower wage rates than industries employing chiefly men. This is true, for instance, of the cotton textile industry, where the majority of workers are women.

Wage differentials occur in industries where studies have been made, for instance, in the meat-cutting industry.

In 1953, women's hourly rate was 5 cents less than men's. Before collective bargaining, it was as much as 10½ cents an hour less. This is true of other industries, as shown by studies made by the Labor Department.

It is important, for instance, to remedy such a situation as occurred in an arbitration award in Pittsburgh. In absence of a contract clause requiring equal pay for equal work, it was ruled that an employer need not pay female employees the high rate paid male employees for the same work.

A number of important problems still remain in regard to equal pay and collective bargaining. Unequal pay is still the rule where no strong union or no union exists. Unequal pay practices are justified by various devices. For instance, names of the same job vary; first, when performed by men; second, when performed by women. Or a man's job is changed slightly or renamed for performance by a woman, at a lower rate of pay. A number of such devices are used to get around the problem.

Regrettably, we have no comprehensive plant-by-plant job-by-job wage data of the extent to which equal pay for comparable work for women and men is practiced in the United States. Weekly earnings of production workers in certain manufacturing industries in several States are striking examples of the lower level of women's earnings.

The United Automobile Workers, CIO, gives an example of how unequal pay for women can force men to accept lower wage rates. In the Delco-Remy plant in Anderson, Ind., a 16-cent differential existed between male and female rates for the same or comparable work. After V-J Day, management hired more women, while at the same time refusing to hire males, a large percentage of whom were veterans. When management refused to eliminate the differential, the union accepted a compromise. Women were placed on the day shift and new male employees were put on the afternoon shift where the rates were higher.

In other countries the matter has had attention of the government. The British Government announced that it would start applying, in all departments, the principle of equal pay for women. By March 1955, the old practice of paying women less than men for the same work would have been completely eliminated. This should affect all British industry.

On August 15, 1945, Pope Pius XII told the Congress of the Italian Catholic Women Workers, "the Church has always held that women should receive the same pay as men for equal work and output."

JUSTICE TO WOMEN WORKERS

Statistics show that American women work in order to support or help support themselves and their families.

In 1950, the median income of husband-wife families in which the wife was working was $4,003. According to the Bureau of Labor Statistics, a minimum family budget for a city worker's family of four was $3,727 in October 1950. In many families, the wife's entire earnings are essential if the family is to maintain any kind of a standard of living. As Miss Elizabeth Christman pointed out when she represented the National Women's Trade Union League at congressional hearings, a loaf of bread has the same price no matter who purchases it.

It is interesting that both the political parties have had equal pay planks in their platforms.

Republican:

> We favor legislation assuring equal pay for equal work regardless of sex.

Democratic:

> We believe in equal pay for equal work regardless of sex, and we urge legislation to make that principle effective.

So far they have but gathered dust.

CONCLUSIONS

Economic, social, moral, and political reasons all seem to point to the need for adequate equal pay legislation.

The problem we face as a free Nation dedicated to justice and opportunity for the individual spreads itself out before us as the exigencies of living continue to force women into the labor market. What is the way to meet it? A century has passed since women first were openly accepted as part of the labor force. Now women actually form a third of that force. What is the best way to bring about the result? How can we best insure her receiving the same pay as a man whose work is the same as her own?

It seems to me that is a question with which this Congress must deal in the very near future.

The bill I introduced in the 83d Congress dies at the adjournment hour. While I do not feel that the failure of this attempt was caused by any apparent flaws in H. R. 7172, neither does this preclude the possibility that I may take a different approach at a future session of Congress. What should be in the bill which the 84th Congress considers?

I shall greatly appreciate your thoughtful consideration of the whole matter and shall hope you will let me have your thoughts and your suggestions as a guide for possible future legislation.

WHAT THE 83D CONGRESS HAS DONE FOR SEATTLE

The SPEAKER pro tempore (Mr. CANFIELD). Under the previous order of the House, the gentleman from Washington [Mr. PELLY] is recognized for 15 minutes.

Mr. PELLY. Mr. Speaker, as the House of Representatives concludes the regular order of another day's business, I rise to speak in a rather personal way. This session of the 83d Congress will soon adjourn, and from now on our sessions may be longer and our patience shorter. So, while the Members are still in a friendly and receptive mood, I want to take advantage of the situation.

My one purpose in addressing the House today is to discharge the deep sense of obligation I feel to the Members of this body for the unfailing courtesy, help, and cooperation given me since the 83d Congress convened in January 1953.

When I have called on you, Mr. Speaker, or upon the individual Members of this House, for information or sympathetic consideration of a problem, you have invariably earned my gratitude, and the results have been of real importance to the people of Seattle and Kitsap County. We of the First Congressional District owe a great debt to those in the legislative and executive branches of the Government.

Mr. ARENDS. Mr. Speaker, will the gentleman yield?

Mr. PELLY. I yield.

Mr. ARENDS. I would like to say to the gentleman from Washington that in like manner we would express ourselves on this side of the aisle by saying that we have enjoyed not only the fellowship but the complete cooperation of the gentleman from Washington [Mr. PELLY], in the legislative programs that we have had up since he has been a so-called new Member. He has been tireless in his efforts and worked continuously for the best interests of the people of his district. It is Members like the gentleman from Washington [Mr. PELLY], who have made possible this fine constructive program we are trying to put through in this Congress.

Mr. PELLY. I thank the gentleman.

Mr. Speaker, let me cite a few examples:

(a) After a quarter of a century of waiting, the Public Works Committee finally recommended authorization of the Ballard breakwater and small-boat basin in Shilshole Bay outside the Government locks.

(b) After years of waiting, Seattle is getting a new terminal post office.

(c) Enough modernization and conversion work has been allocated to the Puget Sound Naval Shipyard in Bremerton to keep the yard in its present position as the top public shipyard in the Nation from the standpoint of workload. I might say that this is as it should be, because the performance of the Puget Sound yard has been outstanding with regard to economy of operation, meeting time schedules, and quality of workmanship. This fine record fully justified the Navy's decision to give the yard the first $40 million modernization of a *Midway* class carrier.

(d) Utilization of the merchant-marine reserve fleet at Olympia for storage of surplus wheat.

(e) A congressional fact-finding hearing on the transportation problems which have plagued the Seattle waterfront for so long. It is perhaps significant that there has been no major waterfront shutdown since those hearings; untold benefit to the city has followed.

(f) Favorable consideration of several pieces of legislation, including two resolutions authorizing free import of goods for the third and fourth international trade fairs in Seattle, and a bill which will save the shipping industry thousands of operation dollars annually by allowing quarantine inspections during overtime hours.

(g) The transfer of several MSTS vessels to Seattle from San Francisco as their home port, with a resulting boost for Seattle's most important interest, the maritime industry.

(h) Reconsideration at my request of a holdover Defense Department procurement policy, which means that $100 million formerly designated for expenditure each year in foreign shipyards now goes to domestic shipyards.

(i) Successful conclusion of a temporary agreement, through the intercession of the State Department with the Government of Canada, to allow flooding across the Canadian boundary on the Skagit River. This will allow Seattle City Light to meet its power demands without difficulty for at least another year.

For these actions and many, many more my constituents deeply appreciate the assistance of this Congress and this administration. On their behalf and for myself I extend to this body my sincere gratitude.

Mr. Speaker, since early 1953 we of this House of Representatives have considered and debated, pro and con, many issues important to the American people. A good part of President Eisenhower's recommended program has passed the House. By and large, it has been a series of measures designed to be liberal in relation to the needs of the people, but conservative in the spending of their money. All partisanship aside, it is a good program, and if the President is given congressional support during the 84th Congress, the Eisenhower era will go down as one of the great periods in the history of the Republic.

It has been a great satisfaction to have had a part in liberalizing the social-security system.

It has been even more gratifying to be able to give the hard-pressed wage earners and taxpayers of the Nation tax reductions approximating $7 billion.

The achievements of the 83d Congress in the elimination of waste, duplication, and unnecessary expenditures, in doing away with wage and price controls, and in holding the line against the inflation that was destroying our buying power, have all made me proud to be a Member of the legislative branch of the Government. But what has given me the most satisfaction is that I have been part of an administration that terminated the bloodshed and killing of American boys in Korea.

Right now, fortunately, my district is in good sound economic condition, even considering that the war boom is over. The transition has been far easier than one might have expected.

Since I have represented the First Congressional District of the State of Washington many problems have come to me. Some of these have been successfully concluded, some are now in the process of solution and, of course, there were many which had no solution.

Mr. Speaker, during the two sessions of the 83d Congress I have worked on over 100 matters of major importance to my district. Week by week and day by day they have claimed my attention. Many of these projects, some of them already mentioned, appear to be successfully accomplished. Others, such as keeping passenger ships running to Alaska, obtaining cargoes for American merchant ships—of vital importance to the port of Seattle—and keeping the shipbuilding industry alive, are continuing problems which obviously cannot be solved at any one time by any single action.

Finally, Mr. Speaker, I want to say this. I feel that the 83d Congress has accomplished a great deal. Personally, after reviewing the legislation we have passed, I have a sense of real satisfaction. Couple this with the record of the administration in such important respects as the great progress in achieving racial equality, in removing poor security risks from sensitive Government positions, in the elimination of waste of taxpayers' money and increasing the efficiency of Government, gives me a sense of pride and of having kept faith with preelection promises.

I will go back to my district with a feeling of achievement. Meanwhile, again, I thank all Members of the House for their cooperation and the great privilege of association with such a fine group of legislators.

VOCATIONAL REHABILITATION ACT

Mr. McCONNELL submitted a conference report and statement on the bill (S. 2759) to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes.

COOPERATIVE RESEARCH IN EDUCATION

Mr. McCONNELL submitted a conference report and statement on the bill (H. R. 9040) to authorize cooperative research in education.

WHITE HOUSE CONFERENCE ON EDUCATION

Mr. McCONNELL submitted a conference report and statement on the bill (H. R. 7601) to provide for a White House conference on education.

NATIONAL ADVISORY COMMITTEE ON EDUCATION

Mr. McCONNELL submitted a conference report and statement on the bill (H. R. 7434) to establish a National Advisory Committee on Education.

TELECASTING AND BROADCASTING OF CONGRESSIONAL HEARINGS

The SPEAKER pro tempore (Mr. CANFIELD). Under the previous order of the House, the gentleman from Michigan [Mr. MEADER] is recognized for 10 minutes.

Mr. MEADER. Mr. Speaker, I desire to call the attention of the House to the very controversial question of whether or not committee hearings should be broadcast and telecast.

Members will recall that in the last Congress the present Speaker of the House [Mr. MARTIN] propounded a parliamentary inquiry and the former Speaker of the House [Mr. RAYBURN] ruled that, in his opinion, committees did not have the power to authorize the broadcasting or telecasting of their proceedings.

My understanding of that statement by former Speaker RAYBURN was that it was not a precedent binding upon the House but merely the expression of an opinion in response to a parliamentary inquiry.

I also understand that the present Speaker of the House has indicated informally that, were the question presented to him for ruling, his ruling would be that the committees in their own discretion could decide what media of communication could be permitted to report the public proceedings of committees.

Mr. Speaker, in the 82d Congress I introduced a resolution to amend the rules of the House to make it clear that committees had the discretion to decide what media of communication could report their hearings.

The Committee on Government Operations, of which I am a member, has taken action in this connection. It adopted a rule which, in my judgment, was unwise. On February 4 of this year on motion of the gentleman from California [Mr. CONDON], the Government Operations Committee adopted a rule, or an amendment to an existing rule, rule 13 (a) and (b). The effect of the amendment is to prohibit regular or special subcommittees from telecasting or broadcasting their hearings except by unanimous consent. With respect to the full committee the rule provides that there must be an affirmative vote of a constitutional majority, in other words, more than one-half of the authorized membership of the committee, before the full committee proceedings could be broadcast or telecast. I voted against that amendment. My colleague, the gentleman from Michigan [Mr. HOFFMAN], chairman of the Committee on Government Operations, and I, were the only members of the committee to vote against the adoption of that rule.

The committee is now reconsidering that action. A special subcommittee was appointed under the chairmanship of the gentleman from New York [Mr. RIEHLMAN] to consider the matter of telecasting and broadcasting our committee proceedings. The gentleman from New York [Mr. RIEHLMAN] asked me if I cared to make any comments on revision of this rule with respect to telecasting. I did so. I addressed a letter to him under date of July 16 setting forth my comments on the proposed reconsideration of telecasting committee hearings. Briefly, Mr. Speaker, I said that I believe telecasting and broadcasting should be permitted within the sound discretion of the committee upon the same type of vote by which the committee takes all action, namely, the vote of a majority of those present and voting, a quorum being present.

Mr. Speaker, to require unanimous consent on a matter such as broadcasting and telecasting, in my judgment, goes too far in the direction of minority rule. I am impressed by the passage in the introduction of the Rules of the House by our parliamentarian, Mr. Deschler, to the effect that the rules of the House are very finely adjusted and so developed that a majority can work its will at all times, even in the face of the most vigorous opposition of a minority.

As I view it, last February the majority of the Government Operations Committee abdicated its power to take action not just to the minority but to one single member. Regardless of the desires of the rest of the membership, one member can block the telecasting of subcommittee hearings.

I think persons who regard those new devices for transmission of news as something to be feared are perhaps a little bit behind the times. I think those new mediums of bringing the Government closer to the people are in the public interest. Eventually I believe the public will insist upon using this instrument for knowing about the public business. Therefore, it is my hope that when the Government Operations Committee considers this problem—and I understand they will do so day after tomorrow—they will unhesitatingly repeal the rule ill advisedly adopted last February.

Mr. Speaker, at this point I ask unanimous consent to incorporate in my remarks a letter I wrote to the gentleman from New York [Mr. RIEHLMAN], on July 16, setting forth my views on this subject.

The SPEAKER pro tempore (Mr. CANFIELD). Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. MEADER. The letter is as follows:

JULY 16, 1954.

Hon. R. WALTER RIEHLMAN,
Chairman, Subcommittee on Military Operations, Government Operations Committee, House of Representatives, Washington, D. C.

DEAR WALTER: You have invited my comment on modification of Rule 13 (a) and (b) of the Rules of the Committee on Government Operations adopted February 4, 1954.

You may recall I opposed the adoption of this rule. I believe it should be repealed.

Rule 13 reads as follows:

"Hearings—the taking of testimony—are to be conducted in an orderly, dignified manner, the committee keeping in mind the power of the Congress, the authority of the committee, the attainment of the objective sought and the rights and privileges of the witness.

"Rule 13 (a): • • • None of the hearings of the regular subcommittees, or any of the special subcommittees which may be appointed, shall be telecast or broadcast, whether directly or through such devices as wire recordings, wire tapes, motion pictures, or other mechanical means, unless approved by unanimous consent of the member of such regular subcommittee or of any special subcommittees. Such consent shall be expressed by ballot and the vote on such ballot shall not be released to the public unless the vote is unanimous: *Provided*, That if any member of any regular subcommittee, or any special subcommittee shall be ill or otherwise unavailable for such vote on such ballot, his consent shall not be necessary, if at least a quorum of such regular subcommittee or special subcommittee unanimously approves such telecast or broadcast.

"Rule 13 (b): • • • None of the hearings of the full committee shall be telecast or broadcast by any of the means set forth in rule 13 (a) unless approved by ballot, by a majority of the members of the full committee (not merely a majority of the members present and voting)."

In effect, those rules prohibit telecasting or broadcasting of subcommittee hearings except by unanimous consent evidenced by secret ballot, and of hearings of the full committee except by approval by ballot of a majority of the membership of the full committee (a "constitutional majority").

I oppose that rule on both procedural and substantive grounds.

The general rule in the House of Representatives, and its committees, is that valid decisions are made by vote of a simple majority, that is the majority of those present and voting, a quorum being present (rule XV, 4). The rules of the House are expressly made the rules of its standing committees (rule XI, 25 (a)).

A simple majority can take action on all legislative and procedural questions except those regarded for special reasons as being of exceptional gravity or lasting consequence.

A simple majority vote can declare war, levy taxes, appropriate public funds, raise the limitation on the public debt, impose criminal penalties and decide on all kinds of matters of far-reaching national policy.

Examples of questions requiring more than a simple majority vote are amendments to the Constitution, overriding a veto, expulsion of a Member, rejecting a presidential reorganization plan and conviction on impeachment.

No question, procedural or legislative, is regarded as sufficiently important to require a unanimous vote.

A committee may not adopt rules inconsistent with the rules of the House. It is my opinion that rule 13 (a) and (b) is therefore wholly void as an attempted exercise of the rule-making power by a committee which it does not possess. When an attempt is made to enforce rule 13 (a) and (b) I believe a point of order against it would be well taken.

Whether valid or void as a matter of legality, rule 13 (a) and (b) is unwise and unsound. In effect, it deprives the majority of the right to run a committee. Not only does it place control in a minority, but in the hands of any one member of a subcommittee who, by a single objection, can prevent the broadcasting and telecasting of committee hearings regardless of the wishes of all the other members. This is essentially unparliamentary as the comment of the House Parliamentarian, Lewis Deschler, indicates in this very well expressed passage from the introduction to the Rules of the House:

"From the beginning of the First Congress the House has formulated rules for its

procedure. Some of them have since gone out of existence. More of them have been amplified and broadened to meet the exigencies that have arisen from time to time. Today they are perhaps the most finely adjusted, scientifically balanced, and highly technical rules of any parliamentary body in the world. Under them a majority may work its will at all times in the face of the most determined and vigorous opposition of a minority."

As I appraise the importance of telecasting and broadcasting committee hearings it does not justify requiring action to be taken by a degree of voting more difficult to obtain than that by which all other action of a committee is taken. Certainly the decision on what media of communication shall be permitted to report committee proceedings is simply one of the housekeeping matters which ought to be in the discretion of the majority at all times. It, in my judgment, cannot rise to the dignity and importance of recommending favorable action on bills or resolutions or the filing of committee reports with the House, all of which action is taken by simple majority vote.

Leaving the procedural question, I am unable to agree with the philosophy of rule 13 (a) and (b) on the merits. Public hearings of committees are a legitimate matter of public interest. Any means of communicating the work of a public agency such as a congressional committee to the people of the United States, subject to the control of the committee in its sound discretion, should be effectively utilized to the end that there may be an informed electorate. I have difficulty in distinguishing between agencies or channels of communication where they bear upon reporting of public activities on any basis of principle. The official record of the committee, the transcript of testimony, and the accounts of news reporters, columnists, or commentators are essentially the same, as I view it, as the actual verbatim tape recording, live or transcribed newsreel cameras, and live or transcribed telecasting. If there is a distinction between those media of communication, it would appear that there was less opportunity for distortion, slanting, or editing in the telecasting and broadcasting of proceedings than in other media of reporting committee proceedings which, of necessity, must be hearsay in their character.

Those who would stop or attempt to stop this new and powerful method of bringing Government closer to the people, I predict, will be unsuccessful in the long run. Telecasting and broadcasting are here to stay, and the public will eventually insist upon these new channels for observing the conduct of the public business. I for one have no fear of the public scrutiny of public proceedings. If an individual citizen has the right to be present and observe the proceedings of a committee in person, I see no reason why he should not have the privilege of using the instrumentality of television or of radio broadcasting to observe the conduct of the Nation's business.

I can foresee that it may be necessary in the future to prevent editing and slanting or exploitation of public proceedings for commercial purposes, but in my judgment these possible abuses cannot be anticipated completely in advance and detailed, rigid rules adopted in a vacuum. These matters should be left within the sound discretion of the committee to be acted upon when the issue arises.

In conclusion, I might say that I do not share the apparent distrust of the sound judgment of my colleagues which the adoption of these rules implies. I am not oblivious to weaknesses in human character and freely recognize that there have been abuses in the past and that there will be abuses in the future, but, by and large, my experience in the House of Representatives has led me to respect my colleagues and to regard them as mature, sober citizens who can be trusted to exercise good judgment at least as frequently as persons in any other walk of life.

The work of the Congress is important. The complicated problems we face today can best be handled through the committee system where a smaller group of men can give detailed study to a subject. Committees are the point of contact between the elected legislator, the administrative official, and the private citizen. It is the forum where views, opinions, arguments, and facts are expressed and considered. The factfinding process and the interchange of views are necessary as a basis for sound legislation. If thorough consideration is to be given to public problems within the limited time a committee can devote to it, there must be flexibility and freedom in the committee to manage its business. Rigid, straight-jacketing rules which obstruct and delay the committee's work are therefore not in the public interest.

Sincerely,

GEORGE MEADER,
Member of Congress.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. MEADER. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. Is it not true, speaking generally, that heretofore the public has been dependent for its information as to the business transacted by congressional committees upon what the reporters and, perhaps, editorial writers and radio commentators and columnists have had to say and write and that the people generally did not hear and see the actual proceedings?

Mr. MEADER. The gentleman is correct, and being an excellent trial lawyer in his home State of Michigan, I know that he is fully aware of the reliability of primary evidence as compared with hearsay evidence, and I think he has very well pointed out that news reports and comments by radio commentators are hearsay; they are secondhand and never can be quite as good as the original article.

Mr. HOFFMAN of Michigan. And the accuracy of what the people get depends, perhaps, in the first instance, upon what the reporter hears and understands as to what the witness said. Then again, following that, upon the degree of accuracy with which the reporter transmits his views to maybe the city editor or whoever it is in the newspaper office who writes it. Then you have the rewrite man, while if you had radio and telecast, the people themselves hear and they see what happens and they are able to judge for themselves as to the intent to be conveyed by the witnesses.

Mr. MEADER. I think the gentleman is absolutely correct. I would like to ask the gentleman if he does not agree with me that since a member of the public, any citizen, has the right to be present in person at a public hearing of a committee, he should also have the right to be there, not in person, but through the instrument of telecasting and radio broadcasting devices.

Mr. HOFFMAN of Michigan. Yes, I agree with the gentleman in that, and I think that while television may in the beginning have had an attraction for some of us to get in front of the camera and put on a show, most of us have discovered that if you are a ham, television will expose you just as quickly as it will promote your good qualities, if you have any, so that in the end what people get through the radio, through the broadcast, and through the telecast, is an accurate picture of just exactly what is going on.

PENDING ATOMIC ENERGY LEGISLATION

The SPEAKER pro tempore (Mr. CANFIELD). Under previous order of the House, the gentleman from California [Mr. HOLIFIELD] is recognized for 60 minutes.

Mr. HOLIFIELD. Mr. Speaker, the majority leadership has indicated that the atomic energy bill, H. R. 9757, may be brought up this week. This bill, consisting of 104 pages, and almost as many sections, is an exceedingly complicated piece of legislation. It deals with matters of the utmost importance to America's future. As the Members may be aware from the debate going on in the other body with regard to the companion bill, S. 3690, many serious questions have been raised about the inadequacies of the bill and its failure to protect the public interest at crucial points.

I am greatly concerned, myself, at the numerous shortcomings in H. R. 9757. Later in these remarks I shall set forth the views that the gentleman from Illinois [Mr. PRICE] and I, as members of the Joint Committee on Atomic Energy, share with regard to what we believe are errors of omission and commission in the atomic energy bill.

Various Members have signified to me their desire to introduce amendments to particular provisions of H. R. 9757. For the convenience of these and other Members who may wish to prepare themselves for the debate on the atomic energy legislation I have assembled 33 relatively brief amendments.

The amendments are numbered consecutively as they would appear in successive sections or pages of the bill, H. R. 9757. However, they are grouped for convenience in discussion. I ask unanimous consent to have them printed at this point in connection with these remarks.

The SPEAKER pro tempore. Without objection, it is so ordered.

(The matter referred to follows:)

Amendment No. 1: On page 3, at the bottom, add the following new subsection:

"i. In achieving the maximum contribution of atomic energy to the general welfare it is essential that the United States, through its own agencies and through other agencies, public and private, undertake a comprehensive program for the production and distribution of electrical power utilizing atomic energy."

Amendment No. 2: On page 4, after line 20, add the following new subsection e and renumber sections e and f as f and g, respectively.

"e. A program for Government and non-Government production and distribution of electrical power utilizing atomic energy so directed as to achieve the maximum public benefits of atomic energy development and make the maximum contribution to the national welfare."

Amendment No. 3: On page 10, line 24, after the word "actions", place a comma and insert the following: "equal access to all

information pertaining to atomic energy matters, whether originating within the Commission or elsewhere in the Government."

Amendment No. 4: On page 11, strike the sentence beginning on line 1, and insert in lieu thereof the following sentence: "The Chairman (or acting Chairman in the absence of the Chairman) shall discharge such of the executive and administrative functions of the Commission as may be delegated by the Commission and as are not in conflict with functions delegated by the Commission to the General Manager or other officers pursuant to section 161o."

Amendment No. 5: On page 13, line 3, after the word "of", insert the following: "Civilian Power Application, a Division of."

Amendment No. 6: On page 15, beginning at line 4, add the following new section, and renumber sections 27 and 28 as sections 29 and 30, respectively (this assumes that the amendment adding an Electric Power Liaison Committee will be sec. 28):

"SEC. 27. Labor-Management Advisory Committee: There shall be a Labor-Management Advisory Committee to advise the Commission on all matters relating to labor-management relations in atomic energy plants and facilities owned or licensed by the Commission, including measures to promote collective bargaining and alleviate industrial strife, health, and safety standards and workmen's compensation provisions and other terms and conditions to be observed by contractors or licensees of the Commission, the application of Federal statutes governing employment and labor standards, personnel security procedures, and the effects of atomic energy enterprises on established industries and occupations. The Committee shall be composed of 9 members who shall be appointed by the President, 4 each representing labor and management and a Chairman representing the public. Each member shall hold office for a term of 6 years, except that (a) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed, shall be appointed for the remainder of such term; and (b) the terms of office of the labor and management representatives first taking office after the effective date of this act, shall expire, as designated by the President at the time of appointment, 1 each at the end of 2 years, 2 each at the end of 4 years, and 1 each at the end of 6 years. The Committee shall meet at least 4 times in every calendar year. The members of the Committee shall receive a per diem compensation for each day spent in the work of the Committee and all members shall receive the necessary traveling or other expenses while engaged in the work of the Committee."

Amendment No. 7: On page 15, beginning line 4, add the following new section 28, and renumber present sections 27 and 28 as 29 and 30, respectively (this numbering assumes a new sec. 27 will be added, establishing a Labor-Management Advisory Committee):

"SEC. 28. Electric Power Liaison Committee: There is hereby established an Electric Power Liaison Committee consisting of—

"a. A Chairman, who shall be the head thereof and who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall receive compensation at the rate prescribed for the Chairman of the Military Liaison Committee; and

"b. A representative of the Federal Power Commission, the Securities and Exchange Commission, the Rural Electrification Administration, the Tennessee Valley Authority, the Bureau of Reclamation, the Bonneville Power Administration, the Southwest Power Administration, the Southeast Power Administration, the Corps of Engineers, and such other Government agencies as the President may from time to time determine. The Chairman of the Committee may designate one of the members of the Committee as Acting Chairman to act during his absence. The Commission shall advise and consult with other Government agencies, through the Committee, on all atomic energy matters which relate to electric power applications of atomic energy, including the development, manufacture, and use of atomic reactors for power purposes, the allocation of special nuclear material for such purposes, the technical, economic, and accounting relationships between production of special nuclear material and atomic energy for electric power and for atomic weapons, appropriate policies to govern the production and distribution of electric power from atomic energy in order that the benefits of such power shall be widely distributed and maximum revenues shall be returned to the Federal treasury, and the integration of atomic power policies and administration with other power activities of the Federal Government; and shall keep other Government agencies, through the Committee, fully and currently informed of all such matters before the Commission. Other Government agencies, through the Committee, shall have the authority to make written recommendations to the Commission from time to time on matters relating to civilian applications of atomic energy as they deem appropriate."

Amendment No. 8: On page 19, line 14, after the word "authorized", insert the following: "and directed."

Amendment No. 9: On page 23, in line 8, after the word "publicly", place a comma and insert the word "cooperatively."

Amendment No. 10: On page 23, strike the sentence beginning in line 9 and insert in lieu thereof the following new sentence: "The Commission shall at all times, in disposing of such energy, give preference and priority to public bodies and cooperatives."

Amendment No. 11: On page 23, after line 12, add the following new section:

"SEC. 45. Electric power production: a. The Commission is empowered to produce or provide for the production of electric power and other useful forms of energy derived from nuclear fission in its own facilities or in the facilities of other Federal agencies. In the case of energy other than electric power produced by the Commission, such energy may be used by the Commission, or transferred to other Government agencies, or sold to other users at reasonable and nondiscriminatory prices. Electric power not used in the Commission's own operations shall be delivered to the Secretary of the Interior, who shall transmit and dispose of such power in accord with the provisions of section 5 of the Flood Control Act of 1944 (58 Stat. 890).

"b. The Commission may undertake any or all of the functions provided in subsection 45a, through other Federal agencies authorized by law to engage in the production, marketing, or distribution of electric energy for use by the public, and such agencies are hereby empowered to undertake the design, construction, and operation of nuclear power facilities and the disposition of electric energy produced in such facilities when funds therefor have been appropriated by Congress. Nothing in this act shall preclude any Federal agency now or hereafter authorized by law to engage in the production, marketing, or distribution of electric energy from obtaining a license under section 103 of this act for the construction and operation of facilities for the production and utilization of special nuclear material or atomic energy for the primary purpose of producing electric energy for disposition for ultimate public consumption."

Amendment No. 12: On page 42, beginning line 16, strike section 102 and insert in lieu thereof the following:

SEC. 102. Finding of practical value: Whenever in its opinion any industrial, commercial, or other nonmilitary use of special nuclear material or atomic energy has been sufficiently developed to be of practical value, the Commission shall prepare a report to the President stating all the facts with respect to such use, the Commission's estimate of the social, political, economic, and international effects of such use, and the Commission's recommendations for necessary or desirable supplemental legislation. The President shall then transmit this report to the Congress together with his recommendations. No license for any utilization or production facility shall be issued by the Commission pursuant to section 103 until after (1) the Commission has made a finding in writing that the facility is of a type sufficiently developed to be of practical value for industrial or commercial purposes; (2) a report of the finding has been filed with the Congress; and (3) a period of 90 days in which the Congress was in session has elapsed after the report has been so filed. In computing such period of 90 days, there shall be excluded the days on which either House is not in session because of an adjournment of more than 3 days."

Amendment No. 13: On page 42, in line 23, after the word "Commission", insert the following: "and report to the Congress."

Amendment No. 14: On page 43, in line 16, after the semicolon, insert the following new item (3) and renumber the present (3) as (4): "(3) who agree, if the license is for facilities for the utilization of special nuclear material for the generation of electric energy for sale, to claim no value for such facilities for ratemaking purposes in excess of the net investment in such facilities as defined in the Federal Power Act."

Amendment No. 15: On page 44, in line 3, change the period to a colon and add the following proviso: *"Provided, however,* That upon not less than 2 years' notice in writing from the Commission the United States shall have the right upon and after the expiration of any license to take over and thereafter to maintain and operate any facility or facilities for the utilization of special nuclear material for the generation of electric energy on payment of the net investment of the licensee in such facilities, with severance damages, if any, in general accordance with the terms of section 14 of the Federal Power Act: *And provided further,* That, if the United States does not exercise its right to take over the facility or facilities on the expiration of any license, States, municipalities, and cooperatives shall have a prior right of acquisition on the same terms in connection with the issuance of a new license for such facility or facilities."

Amendment No. 16: On page 47, beginning in line 21, after the letter "b", insert the following new sentence: "Where activities under any license might serve to maintain or to foster the growth of monopoly, restraint of trade, unlawful competition, or other trade position inimical to the entry of new, freely competitive enterprises in the field, the Commission is authorized and directed to refuse to issue such license or to establish such conditions to prevent these results as the Commission, in consultation with the Attorney General, may determine."

Amendment No. 17: On page 52, in line 12, strike the word "approved" and insert in lieu thereof the following: "submitted to the President."

Amendment No. 18: On page 52, in line 22, after the word "purpose" and before the semicolon insert the following: "except where the President determines that such uses will bring reciprocal benefits and be otherwise advantageous to the United States."

Amendment No. 19: On page 53, in line 16, before the period, insert the following: "after which period of time the agreement shall take effect."

Amendment No. 20: On page 53, beginning at line 17, strike the wording of section 124 and insert the following in lieu thereof:

SEC. 124. International atomic pool: The President is authorized to enter into an international arrangement with any nation

or number of nations or with an organization representing any or all of such nations providing for international cooperation in the nonmilitary applications of atomic energy. The President is further authorized to request the cooperation of or the use of the services and facilities of the United Nations, its organs, its specialized agencies, or other international organizations in carrying out the purposes of this section. Any agreements made by the United States under the authority of this section with other governments and with international organizations shall be registered with the Secretariat of the United Nations in accordance with the provisions of article 102 of the United Nations Charter. In the event further legislation is necessary to implement an international arrangement authorized by this section, the President shall transmit recommendations therefor to the Congress."

Amendment No. 21: On page 58, in line 18, after the word "That", insert the following: "unless the President determines that the common defense and security will be endangered thereby."

Amendment No. 22: On page 61, in line 21, after the word "the", insert the following: "production or."

Amendment No. 23: On page 62, in line 3, after the word "the", insert the following: "production or."

Amendment No. 24: On page 63, after line 4, add the following new subsection:

"e. No patent hereafter granted shall confer any rights with respect to any invention or discovery to the extent that such invention or discovery is used in the conduct of research or development activities in the fields specified in section 31. Any rights conferred by any patent heretofore granted for any invention or discovery are hereby revoked to the extent that such invention or discovery is so used, and just compensation shall be made therefor."

Amendment No. 25: On page 63, beginning line 6, strike the wording of section 152 and insert in lieu thereof the following new language:

"SEC. 152. Nonmilitary utilization:

"a. It shall be the duty of the Commission to declare any patent to be affected with the public interest if: (1) the invention or discovery covered by the patent utilizes or is essential in the utilization of special nuclear material or atomic energy; and (2) the licensing of such invention or discovery under this section will effectuate the policies and purposes of this act.

"b. Whenever any patent has been declared affected with the public interest, pursuant to subsection 152a—

"(1) the Commission is hereby licensed to use the invention or discovery covered by such patent in performing any of its powers under this act; and

"(2) any person to whom a license has been issued under sections 53, 62, 63, 81, 103, or 104, or to whom a permit or lease has been issued under section 67, or who is engaged in activities otherwise authorized by this act, is hereby licensed to use the invention or discovery covered by such patent to the extent such invention or discovery is used by him in carrying on the activities authorized by his license, permit, lease or otherwise.

"c. In the event the Commission fails to declare any patent to be affected with the public interest or finds any patent not to be so affected, under subsection 152a, any person conducting activities authorized under this act may at any time make application to the Commission for a patent license for the use of an invention or discovery useful in the production or utilization of special nuclear material or atomic energy covered by a patent. Each such application shall set forth the nature and purpose of the use which the applicant intends to make of the patent license, the steps taken by the applicant to obtain a patent license from the owner of the patent, and a statement of the effects, as estimated by the applicant, on the authorized activities which will result from failure to obtain such patent license and which will result from the granting of such patent license.

"d. Whenever any person has made an application to the Commission for a patent license pursuant to subsection 152c—

"(1) the Commission, within 30 days after the filing of such application, shall make available to the owner of the patent all of the information contained in such application, and shall notify the owner of the patent of the time and place at which a hearing will be held by the Commission;

"(2) the Commission shall hold a hearing within 60 days after the filing of such application at a time and place designated by the Commission; and

"(3) in the event an applicant applies for two or more patent licenses, the Commission may, in its discretion, order the consolidation of such applications, and if the patents are owned by more than one owner, such owners may be made parties to one hearing.

"e. If, after any hearing conducted pursuant to subsection 152d, the Commission finds that—

"(1) the invention or discovery is to be used in the conduct of activities authorized under this act;

"(2) the licensing of such invention or discovery is of primary importance to the conduct of the activities of the applicant; and

"(3) such applicant cannot otherwise obtain a patent license from the owner of the patent on terms which the Commission deems to be reasonable for the intended use of the patent to be made by such applicant, the Commission shall license the applicant to use the invention or discovery covered by the patent for the purposes stated in such application.

"f. The Commission shall not grant any patent license pursuant to subsection 152e for any other purpose than that stated in the application. Nor shall the Commission grant any patent license to any other applicant for a patent license on the same patent without an application being made by such applicant pursuant to subsection 152c, and without separate notification and hearing as provided in subsection 152d, and without a separate finding as provided in subsection 152e.

"g. The owner of the patent affected by a declaration or a finding made by the Commission pursuant to subsection 152b or 152e shall be entitled to a reasonable royalty fee from the licensee for any use of an invention or discovery licensed by this section. Such royalty fee may be agreed upon by such owner and the patent licensee, or in the absence of such agreement shall be determined for each patent license by the Commission pursuant to subsection 156c.

"h. The provisions of this section shall apply to any patent the application for which shall have been filed before September 1, 1964."

Amendment No. 26: On page 68, in lines 12, 13, and 14, strike the word "Advisory."

Amendment No. 27 (in the event the amendment establishing a Labor-Management Advisory Committee is accepted, conforming language should be written to give the members thereof the same privileges as other advisory committees in sec. 163.): On page 79, in line 10, after the words "section 26", place a comma and add the following: "the members of the Labor-Management Advisory Committee established pursuant to section 27."

Amendment No. 28: On page 80, in line 9, add the following new sentence: "Nothing in this section shall be deemed to authorize the Commission to contract for electric utility services which are not delivered by the contractor directly to the installations named herein."

Amendment No. 29: On page 86, in line 18, after the comma insert the following: "to municipalities, public bodies, and cooperatives within transmission distance authorized to engage in the distribution of electric energy to the public."

Amendment No. 30: On page 86, in line 21, add the following new sentences: "In case of protests or conflicting applications or requests for the establishment of special conditions in prospective licenses, the Commission shall, prior to issuance of any license, hold public hearings on such application or applications in general accordance with the procedures established in connection with consideration of applications for licenses under the Federal Power Act and interested parties shall have the same rights of intervention in such proceedings, application for rehearing, and appeal from decisions of the Commission as are provided in that act and in the Administrative Procedure Act. In any proceeding before it the Commission, in accordance with such rules and regulations as it may prescribe, may admit as a party any interested State, State commission, municipality, public or cooperative electric system, or any competitor of a party to such proceeding, or any other person whose participation may be in the public interest."

Amendment No. 31: On page 87, in line 3, add the following new sentence: "Where conflicting applications include those submitted by public or cooperative bodies, such applications shall receive preferred consideration over any submitted by privately owned utility systems."

Amendment No. 32: On page 87, following line 20, add the following new subsection e:

"e. Every licensee under this act, holding a license from the Commission for a utilization or production facility for the generation of commercial power under section 103, shall be subject to the regulatory provisions of the Federal Power Act applicable to licensees under that act as established by sections 301, 302, 304, and 306 thereof and to such other provisions of the Federal Power Act as provide for the enforcement of the regulatory authority of the Federal Power Commission with respect to licensees for development of waterpower."

Amendment No. 33: On page 89, in line 9, change the period to a comma and add the following: "and no construction permit shall be issued by the Commission until after the completion of the procedures established by section 182 for the consideration of applications for licenses under this act."

Mr. HOLIFIELD. Mr. Speaker, the following are my comments on the amendments:

POWER AMENDMENTS

One group of amendments deals with the production of electrical power from atomic energy. These I refer to as the power amendments. They comprise amendments numbered 1, 2, 5, 7, 9, 10, 11, 14, 15, 29, 30, 31, 32, and 33. A brief description of each of the power amendments follows:

Amendment No. 1 adds to the congressional findings in section 2 of the bill the finding that a comprehensive program for the production and distribution of electrical power utilizing atomic energy is essential in achieving the maximum contribution of atomic energy to the general welfare. The finding states that such a program should be carried out by Federal agencies and by other agencies, public and private. There should be no

objection whatever to a congressional finding of this nature. After all, the key to the peacetime benefits of atomic energy is electrical power. If those benefits are to be realized, as this bill intends, then the Congress should be willing to so state at the outset.

Amendment No. 2 is in line with amendment No. 1 and clarifies the purpose of the bill that a program of Government and non-Government production and distribution of electrical power utilizing atomic energy should be undertaken and so directed as to achieve the maximum public benefits of atomic energy development and make the maximum contribution to the national welfare.

Amendment No. 5 provides an organizational base for the atomic power program by providing for a Division of Civilian Power Application in section 25. That section already provides for a Division of Military Application. Since this bill is intended to emphasize the peacetime development of atomic energy certainly civilian applications should have equal recognition in the organizational setup of the Atomic Energy Commission with military applications.

Amendment No. 7 follows through on amendment No. 5 and provides for an Electric-Power Liaison Committee commensurate with the Military Liaison Committee now provided in section 27. The effort here again is to put the civilian peacetime benefits of atomic-energy development on a par with the military aspects. The Electric-Power Liaison Committee would bring in other agencies of the Federal Government concerned with electric-power activities and would serve to keep these agencies and the Atomic Energy Commission in step on the atomic phases of national power politics.

Amendments Nos. 9 and 10 provide that preference and priority shall be given to public bodies and cooperatives in the disposal of byproduct electrical energy produced by the Atomic Energy Commission in connection with the production of special nuclear—fissionable—material in facilities owned by the United States. These amendments bring the Federal marketing of electrical energy from atomic sources in line with the Federal marketing of energy produced at water-power sites. They eliminate the provision in section 44 that the price shall be subject to appropriate regulatory agencies, for no appropriate State or Federal agency has regulatory jurisdiction over the price at which the United States sells the energy it produces.

Amendment No. 11 adds a new section 45 to the bill empowering the Atomic Energy Commission in its own facilities or through the facilities of other Government agencies to engage in the production of electrical power and other useful forms of energy derived from nuclear fission. This amendment makes it clear that the Federal Government as well as other agencies, public and private, can produce and distribute atomic power. In this way a yardstick will be provided to measure the reasonableness of atomic power prices charged by privately owned utilities in the application of this great new source of energy.

Amendment No. 14 provides that licenses of the Atomic Energy Commission producing commercial electrical power from nuclear material must agree as a condition of receiving their licenses that the net investment in atomic facilities, is the limit of the value they can claim for rate-making purposes. This amendment applies the standards in the Federal Power Act to atomic facilities for the production of electrical power.

Amendment No. 15 provides that upon 2 years' notice the United States will have the right to take over, maintain, and operate any atomic power facility for which the license has expired, upon payment of the net investment of the licensee plus severance damages, if any. If the Government does not exercise such right, States, municipalities, and cooperatives will have a prior right of acquisition on the same terms in connection with the issuance of a new license. These provisions are similar to those in the Federal Power Act relating to the licensing of waterpower sites.

Amendment No. 29 provides that before issuing licenses for the operation of atomic-power facilities, the Atomic Energy Commission must give notice in writing to municipalities, public bodies and cooperatives within transmission distance of the proposed power activity. By receiving adequate notices, such public agencies will be enabled to make an appearance before the Commission or present pertinent information affecting the application for a license.

Amendment No. 30 follows through on amendment No. 29 and provides that the Atomic Energy Commission shall hold public hearings in case of protests or conflicting applications or requests for special conditions in prospective licenses. Interested parties are to have the same rights of intervention, application for rehearing and appeal from Commission decisions as are provided in the Federal Power Act and the Administrative Procedure Act. State, municipal, and other public agencies, cooperatives, competitors of the applicant, and so forth, are to be admitted as interested parties at such proceedings.

Amendment No. 31 provides that in case of conflicting license applications for atomic-power facilities, public bodies and cooperatives shall receive preferred consideration over privately owned utilities. This amendment follows the policy laid down in the Federal Power Act for license applications for waterpower sites.

Amendment No. 32 provides generally that licensees of the Atomic Energy Commission engaged in producing atomic power shall be subject to the regulatory provisions of the Federal Power Act applicable to licensees under the act.

Amendment No. 33 follows through on amendments Nos. 29, 30, and 31 and makes the procedures of section 182 applicable to construction permits as well as licenses. Since a permit to construct an atomic-power facility would in all likelihood be followed by a license, it is important that the same procedural safeguards in the case of licenses be applied to construction permits.

DIXON-YATES AMENDMENT

Amendment No. 28 deals with a collateral but important issue in the power field. It is concerned not with atomic-power production as such but with the authority of the Atomic Energy Commission to make long-term contracts for conventional utility services. This amendment adds a sentence to section 164 of the bill affirming the intent of Congress that AEC can make long-term utility contracts for servicing its own installations but not in the capacity of power broker for other agencies or outside parties.

AMENDMENTS ON COMMISSIONERS' STATUS

Amendment No. 3 makes it clear that each member of the Atomic Energy Commission has equal access to all information pertaining to atomic energy matters, whether originating inside or outside the Commission. This amendment is necessary because the AEC Chairman has kept important information on atomic energy matters to himself, claiming a special status as adviser to the President on atomic energy affairs.

Amendment No. 4 eliminates the ambiguous designation of the Chairman as "official spokesman" of the Atomic Energy Commission and makes it clear that any authority he exercises in an executive capacity is by delegation from the Commission as a whole. Without this amendment, the executive and administrative responsibilities of the Chairman and the General Manager would be conflicting or would overlap.

LABOR-MANAGEMENT ADVISORY COMMITTEE AMENDMENTS

Amendment No. 6 sets up a Labor-Management Advisory Committee in the Atomic Energy Commission. In view of the difficult labor-management relations in the atomic energy field, with its tight security requirements and the many new problems of health, safety, and other applications of labor standards that would arise, a Labor-Management Advisory Committee can perform many useful functions in helping to make orderly adjustments as private enterprise comes into the field.

Amendment No. 27 is related to amendment No. 6 and provides that the proposed new Labor-Management Advisory Committee shall have the same status under the law as the General Advisory Committee and other advisory committees.

COMMISSION RESEARCH AMENDMENT

Amendment No. 8 directs the AEC to carry on research and development activities in the atomic field. In section 32 of the bill, the Commission is only authorized to carry on such activities. The amendment makes it clear that the Congress does not want the AEC to slacken its momentum in atomic research.

AMENDMENTS FOR REPORT TO CONGRESS

Amendment No. 12 reinstates the requirement in the present atomic energy law that the Atomic Energy Commission shall make a comprehensive report to

Congress on the social, political, economic, and international effects of atomic energy whenever it finds that development in the civilian field has reached the stage of "practical value." The AEC to date has evaded making such a report which the Congress should have before enacting further legislation in this important field. The amendment also requires that proposed licenses shall be submitted to the Congress for a 90-day period before being issued by the Commission.

Amendment No. 13 is a minor language change to conform to amendment No. 12.

MONOPOLY PREVENTION AMENDMENT

Amendment No. 16 reinstates in section 145b the requirement in the present atomic energy law that the Atomic Energy Commission shall have an affirmative responsibility to prevent monopoly or restraint of trade in the exercise of its licensing function. The pending bill relieves the Commission of this responsibility and "passes the buck" to the Department of Justice or Federal Trade Commission. Many agencies of Government have affirmative responsibilities to prevent monopoly or encourage free competitive business, and the amendment is in line with established practices.

PATENT AMENDMENTS

Amendments Nos. 22 through 26 deal with the patent sections of the bill.

Amendment No. 22 reinstates in section 151 a requirement in the present atomic energy law that inventions used solely in the "production" of special nuclear material or atomic energy are outside the patent area. The purpose of this amendment is to prevent patent bottlenecks on basic production processes for atomic weapons. The pending bill limits the patent ban to "utilization" of inventions in atomic weapons.

Amendment No. 23 is conforming language with amendment No. 22 and provides that no patent rights shall be conferred for inventions to the extent used in production of special nuclear material or atomic energy in atomic weapons.

Amendment No. 24 reinstates a provision in the present atomic energy law that no patent rights will be granted for any invention to the extent used in the conduct of atomic research and development activities. This amendment is necessary to insure that research will not be hampered by patent restrictions.

Amendment No. 25 simplifies the procedure for declaring patents "affected with a public interest" so that the Atomic Energy Commission and other authorized users can have access to the patented inventions. The amendment also simplifies the procedures whereby authorized persons may have access to important patents even though not formally declared "affected with a public interest." Both procedures are provided in the pending bill but are so cumbersome and restrictive that access to important patents will be extremely limited unless the amendment is adopted. The period of accessibility to patents is extended by the amendment from 5 years to 10 years, because the next 10 years are the crucial period in the advancement of atomic technology, and during that period new firms will be able to enter the field if patent monopolies do not stand in their way.

Amendment No. 26 eliminates the word "Advisory" from the Patent Compensation Advisory Board in section 156a, to make it clear that the Board can be delegated authority to make final decisions in patent compensation, awards, and royalties in the event the Atomic Energy Commission finds this work too time-consuming to the detriment of major duties.

AMENDMENTS ON INTERNATIONAL ACTIVITIES

Amendments Nos. 17 through 21 deal with the international aspects of atomic energy.

Amendment No. 17 requires that proposed agreements for cooperation with other nations in authorized atomic energy activities "be submitted" to the President by the Atomic Energy Commission or the Department of Defense. In section 123 of the pending bill, those agencies have to "approve" agreements, thereby ostensibly having authority to override a decision of the President in the international field.

Amendment No. 18 provides that the proposed limitation on other nations using our material for atomic weapons, or research and development on atomic weapons, can we waived by the President when he determines the United States will get reciprocal benefits. In this way, we can gain the benefits of atomic discoveries in other nations such as Great Britain.

Amendment No. 19 clarifies the time when a proposed agreement for cooperation can take effect. Since the proposal must be submitted to the joint committee for a 30-day period, the amendment allows the President to make adjustments in proposed agreements to meet congressional objections before the end of the 30-day period, at which time, according to the amendment, the agreement comes into effect.

Amendment No. 20 rewrites section 124 providing for an international atomic pool. The President's authority to make international arrangements for an international pool for nonmilitary applications of atomic energy should not be hampered by the limiting provisions of section 123. The Congress has a sufficient check in this field because concurrence of both Houses of Congress is required for an international arrangement, as defined in section 11k of the bill. The amendment also authorizes the President to call upon the United Nations and its specialized agencies in working out an atomic pool arrangement.

Amendment No. 21 provides that the restrictions on communicating atomic weapons information can be lifted by the President if he determines that otherwise the defense and security of the United States will be endangered. The purpose of this amendment is to allow for those contingencies when it may be to the best interests of our own defense and security to let our allies have certain information relating to atomic weapons.

Because the time to be allotted for debate on the atomic energy bill is so relatively brief, I believe the members will be greatly aided in their study of the legislation by the following analysis in which Congressman PRICE concurs with me.

INTRODUCTION

Mr. Speaker, the atomic energy bill is one of the most important bills before the Congress. It proposes to chart the future course of peacetime atomic energy development. So deep and far-reaching is its potential impact on the American economy and upon our position in world affairs that we consider it necessary to set forth our own views and reservations concerning the bill.

As members of the Joint Committee on Atomic Energy we have endeavored always to act in a spirit of nonpartisanship. The duties and responsibilities committed to the jurisdiction of our committee are too directly concerned with the Nation's security and welfare to allow the play of partisan politics. In the same objective way we have tried to approach this legislation.

During the course of the committee hearings and conferences, we have presented what we believe were constructive proposals for improving the bill. Some were accepted in whole or in part and others rejected. Among the committee members there were, and presumably still are, many differences of opinion and interpretation regarding particular provisions of the bill. We respect those differences, and although we were willing to have the bill reported out for floor debate, the public importance of this measure compels us to recount here what some of us consider still its major defects.

The discussion proceeds under the following headings: First, "The Legislative Setting"; second, "Questionable Form and Timing"; third, "Evasion of 7–B Report"; fourth, "Placing AEC Chairman on Pedestal"; fifth, "Withholding Information From Commissioners"; sixth, "Overriding the Commission's Will"; seventh, "Limiting AEC Power Production"; eighth, "Inadequate Power Licensing Provisions"; ninth, "Need for Division of Civilian Power Application"; tenth, " 'Passing the Buck' on Monopoly Prevention"; eleventh, "Limiting Access to Patents"; twelfth, "Built-In Subsidy Feature"; thirteenth, "Omission of Labor-Management Provision"; fourteenth, "Complicating International Arrangements"; and fifteenth, "Increasing Military Posture."

1. THE LEGISLATIVE SETTING

The atomic energy program of the United States is governed by the Atomic Energy Act of 1946, known as the McMahon Act. The basic legislation, enacted in 1946, has been amended from time to time in certain respects, but the original pattern of Government control has not been substantially altered.

The monumental contributions of the atomic energy program under the McMahon Act to the common defense and security and to the protection of the free world need not be recited here. They testify to the basic worth of the legislation and to the wisdom of those who conceived it. President Eisenhower affirmed this testimony when he said in a special message to the Congress on February 17, 1954 that "the act in the main is still adequate to the Nation's needs."

The question that now confronts the Congress is what changes are necessary and desirable in the McMahon Act. Unquestionably, some changes are in order. The swift pace of atomic technology, the development of new atomic weapons, the ending of the American monopoly in atomic bombs, all provide—as the President observed in his message—a new setting for the legislative problem.

The broad objectives to be sought by new legislation are not in dispute. Changing requirements of mutual defense demand a freer exchange of atomic information with our allies. Beyond atomic armament for mutual defense, there is the mutual benefit of working together with friendly countries to develop the peacetime uses of atomic energy. At home as well as abroad, this great source of energy holds forth the exciting promise of industrial progress and higher standards of living.

Whether the bill now before us would enhance the achievement of these objectives is an exceedingly complex question. The answers, we believe, are both "Yes" and "No." The negative side weighs so heavily that we cannot support the bill without further amendment.

2. QUESTIONABLE FORM AND TIMING

The method of presentation and the timing of the proposed legislation, in our opinion, are most unfortunate. It represents a complete rewriting of the McMahon Act, carrying over some provisions of the existing law intact, modifying others and adding entirely new sections. Thus the Congress is confronted, in the closing days of this session, with a single-package bill comprehending a bewildering array of technical matters. Some are timely; others could well be postponed. The form and wording of the bill, with its many new definitions, cross-referenced and inter-related sections, make it virtually impossible for the Congress to select the more urgent matters for action at this time. It is an "all or none" proposition.

Before this bill was drafted, we took the position, and I stated publicly, that the Congress should put first things first and enact those amendments which might be necessary to implement the President's proposal, made before the United Nations General Assembly, for an atomic pool of resources to encourage peacetime development of atomic energy among nations and to prepare the way for international accord on atomic armaments. We see no compelling reason why the legislative requirements to facilitate an exchange of atomic information with friendly nations, whether for purposes of mutual defense or peacetime endeavor, have to be coupled with the granting of private ownership and patent rights in atomic energy to domestic corporations. Defense of the free nations and world peace demand more urgent attention than the desire of a few industrial and utility companies to own and operate atomic reactors.

Furthermore, international obligations and domestic aims in atomic-energy development may conflict if simultaneously pursued now. We advert to this matter below.

When President Eisenhower submitted his special message of February 17 on atomic energy, he asked the Congress to approve a number of amendments to the Atomic Energy Act. His recommendations did not contemplate a complete rewriting of the McMahon Act. Accompanying his message were drafts of two separate bills, prepared by the Atomic Energy Commission, proposing to amend the McMahon Act in order to, first, widen cooperation with our allies in certain atomic-energy matters and improve procedures for the control and dissemination of atomic-energy information; and second, encourage broader industrial participation in the development of peacetime uses of atomic energy here at home.

The President's two-package presentation, whether we agree with his particular recommendations or not, at least would have afforded the Congress an opportunity to act on atomic-energy matters of more immediate concern without having to consider, as it does now, the whole range of controversial matters embodied in H. R. 9757. Joint committee members have every right to prepare their own legislation, and indeed are to be commended for their initiative. However the sponsors of the pending bill would have been well advised to take a two-package approach and act first upon the President's suggestions relating to cooperation with our allies, rather than ask the Congress to swallow the whole mass of complicated legislation in one gulp.

Defense and peace requirements in atomic energy which involve our allies should have been first on the agenda. Then the Congress could have taken a long, hard look at the pending proposals to confer private ownership and patent rights in the atomic field.

3. EVASION OF 7–B REPORT

The framers of the McMahon Act, preoccupied as they were with the awesome implications of the atomic bomb, nevertheless registered their desire "to promote the use of atomic energy in all possible fields for peacetime purposes"—79th Congress, 2d session, Senate Report No. 1211, page 20. In anticipation of such peacetime uses, they decided that the Congress should have the benefit of a comprehensive report from the Atomic Energy Commission whenever atomic energy developments appeared to be of "practical value." Section 7 (b) of the McMahon Act reads in part as follows:

> Report to Congress: Whenever in its opinion any industrial, commercial, or other nonmilitary use of fissionable material or atomic energy has been sufficiently developed to be of practical value, the Commission shall prepare a report to the President stating all the facts with respect to such use, the Commission's estimate of the social, political, economic, and international effects of such use and the Commission's recommendations for necessary or desirable supplemental legislation. The President shall then transmit this report to the Congress together with his recommendations.

The Atomic Energy Commission has never seen fit to prepare and present the report required by section 7 (b) of the McMahon Act. One year ago the Commission submitted to the joint committee informally a draft of legislation intended to promote wider industrial participation in the atomic energy program, asserting at the same time that atomic energy developments had not reached the stage of "practical value" and that therefore a report under section 7 (b) would be premature.

The President's message of February 17, transmitting new drafts of legislation from the Commission, states hopefully that peacetime use of atomic energy "can soon become a reality" but makes no mention whatever of a 7 (b) report. A joint committee request in writing to the Commission dated July 31, 1953, for the required report, elicited a promise to file an interim report before 1954. The final gesture as a substitute for actual compliance was an extended speculative essay on the prospects for future industrial development of atomic energy which comprised the major portion of the testimony presented by AEC Chairman Lewis Strauss in his appearance before the joint committee during the June 1954 hearings.

If a 7 (b) report is premature, as the Commission held last year and still appears to hold by its failure to produce the report, then legislation such as the pending bill, which would lay down a blueprint for industrial activities in the atomic energy field, also is premature. If, on the other hand, the stage of "practical value" is at hand, the Atomic Energy Commission has evaded the clear intent of Congress set forth in section 7 (b) of the McMahon Act.

The sponsors of H. R. 9757 propose to escape from this dilemma by the simple expedient of eliminating the requirement for a 7 (b) report to Congress. The Congress now is asked to legislate for the peacetime uses of atomic energy without the benefit of the careful and comprehensive report from the Commission contemplated by the framers of the McMahon Act. We do not agree with the contention in the majority report—page 19—that the Commission's general obligation to keep the committee informed, and the proposed new obligation of the committee to investigate the development of the atomic energy industry during the first 60 days of each session of Congress, justify discontinuance of the requirement for the report.

This omission is not a mere matter of form or one to be taken lightly. The "social, economic, political, and international effects" of using this new source of energy are certain to be profound and wideranging, even if we discount the more exaggerated and optimistic claims. Surely the Congress is entitled, before legislating, to have the expert analysis and advice of the independent Commission it created to administer the atomic energy program.

The sponsors of H. R. 9757 have retained a watered-down version of the 7 (b) report in connection with licensing activities, minus the essential feature of presentation to the Congress. In section 102 of the pending bill, the Atomic Energy Commission would have to make a finding in writing as to the practical value of "any type of utilization or production facility" before issuing a license in a given case. This is a modification

of the McMahon Act provision which tied the 7 (b) report to a specific requirement that before any license could be issued by the Commission for the manufacture, production, export, or use of atomic energy equipment or devices, a report had to be filed with the Congress concerning the activity sought to be licensed, which report was to lie before the Congress for 90 days before issuance of the license. The framers of the McMahon Act evidently regarded industrial licensing in this field so important as to justify a congressional review of specific licensing actions.

4. PLACING AEC CHAIRMAN ON PEDESTAL

In considering legislation which proposes a complete overhaul of the McMahon Act, our joint committee might well have undertaken a systematic review of all phases of the Atomic Energy Commission's organization and management. This it did not do. The committee's interest in the management of the atomic energy program was directed mainly to a proposal to make the chairman of the Commission its principal officer. Seemingly innocuous and trivial at first, this proposal has opened up issues of such gravity and importance that it merits extended discussion.

Why the sponsors of the pending bill desired to elevate by statutory prescription the Chairman of the Atomic Energy Commission, it is difficult to say. Under the McMahon Act, basic authority to administer the atomic-energy program was vested in a five-man Commission responsible for important policy decisions. The act also provided for a General Manager to whom the Commission could delegate executive and administrative functions. The General Manager is the Commission's director of operations, responsible for day-to-day administration.

This organizational arrangement, which brings to bear the collective judgment of the 5-man Commission on crucial matters in the atomic-energy program, while centering in 1 officer the responsibility for directing its far-flung operational activities, appears to be well-conceived and conducive to good administration. Three of the five Commissioners testified as to its efficacy. The General Manager gave a clear and explicit statement of his duties and relationship to the Commission. No important evidence had ever been brought before the joint committee to indicate that the organizational arrangement was unsatisfactory and should be altered by law.

Nevertheless, Chairman Strauss appeared before the joint committee to ask for additional authority in the Chairman's office. He disavowed any responsibility for originating the principal-officer proposal, suggesting that the Chairman's role should be defined more precisely than by the simple designation "principal officer." Mr. Strauss rested his argument on the recommendations of the first Hoover Commission that the chairmen of certain regulatory commissions be made responsible for carrying on the executive and administrative tasks of these commissions.

Since Mr. Strauss relied so heavily on the Hoover Commission report, it is well to emphasize that the Atomic Energy Commission—hardly more than a year old when the Hoover Commission started to work—specifically was excluded from the Hoover Commission studies on independent regulatory commissions.

The Task Force Report on Regulatory Commissions, Appendix N, upon which the Hoover Commission based its report, states at page 3:

> Although the Atomic Energy Commission has certain regulatory powers and is an independent commission, it has been excluded partly because so large a part of its work is operational, and partly because so many of its problems appear to be unique.

Again the task-force report states at page 29:

> To avoid misunderstanding, we emphasize that our examination has been limited to the regulatory commissions; we have not made any study of primarily operating commissions such as the Atomic Energy Commission and the Tennessee Valley Authority, both of which combine a governing board with an executive official to manage the operations of the agency. Consequently we do not intend to imply any judgment on such an organization for these purposes.

The statements we have quoted make it clear and certain that the first Hoover Commission's recommendations concerning regulatory commissions in general were not intended to apply to the Atomic Energy Commission in particular. Mr. Hoover has expressed his personal opinion in a telegram to Chairman COLE that the general recommendations are applicable to the Atomic Energy Commission, but there is no warrant for that opinion in the reports of the Hoover Commission. Whether the decision of that group not to study the organization of the Atomic Energy Commission was based on security reasons, as Mr. Hoover asserts, or on the unique and largely operational character of the agency, as the task force reported, the fact remains that the Atomic Energy Commission was not studied.

In an effort to bring the Atomic Energy Commission within the organization pattern which the Hoover Commission recommended for regulatory commissions generally, Mr. Strauss maintained in his testimony that the relationship of Chairman and General Manager in the Atomic Energy Commission is analogous to that of Chairman and executive officer in the recommended organization of regulatory commissions. This analogy is inaccurate and misleading.

The Hoover Commission Task Force regarded the executive officer as the designee of the chairman, working under the chairman's active direction, speaking in his name, reporting to him exclusively, taking from him the burden of routine administrative detail but keeping away from policy matters which are the business of the Commission itself—see Task Force Report on Regulatory Commissions, Appendix N, pages 47–48. In other words, the executive officer is the Chairman's helper in discharging day-to-day administrative duties which the task force proposed to be vested in the Chairman of the regulatory commission.

Under the law governing the Atomic Energy Commission, the General Manager enjoys a much more important position than that of Chairman's helper. He receives a salary of $20,000 per annum, equal to that of the Chairman and exceeding by $2,000 that of each other Commissioner. He performs executive or administrative duties delegated by the whole Commission, whereas the executive officer, in Mr. Strauss' analogy, would be merely carrying out such duties vested in the Chairman.

The anomalous situation that would be created by increasing the Chairman's statutory authority is highlighted by Mr. Hoover's suggestion that the phrase principal officer be clarified by substituting administrative and executive authority. Precisely this authority now is vested by law in the General Manager by delegation from the Commission as a whole.

Commissioner Smyth, in his testimony before the joint committee, pointed out cogently that to give the Chairman greater administrative authority implied that he should assume the functions of the General Manager who has been responsible, since the establishment of the Commission, for day-to-day administration of the Commission's business and staff.

> If the Chairman were to become the senior administrative officer of the Commission, with the General Manager as his deputy—
>
> Commissioner Smyth observed—
>
> the essential purpose of our commission form of organization would be defeated.

It was his judgment that in such a case "the other Commissioners would be left uninformed and essentially without function"—hearings, part II, page 785.

To accept Mr. Strauss' analogy for the Atomic Energy Commission could only mean that 1 of 2 alternative developments would ensue: Either the General Manager would be reduced in status and authority to a mere executive assistant of the Chairman, or else a straight line of authority or chain of command would be created, running from the Chairman as principal officer to the General Manager in his present position as directing officers of operations, with the four other Commissioners being shunted aside. Under any such arrangement, to use the expression of Commissioner Zuckert, "you would have a Chairman and four junior-grade Commissioners. The Commission would be maintained in form, but there would be a one-man administration in substance.

Although Mr. Strauss said he retained a preference for the commission form of organization in the atomic-energy field, his conviction was a halfhearted one; a substantial portion of his testimony on this matter was given over to the argument that "you can't operate a large business by committee." In this approach he had the backing of one Commissioner, Joseph Campbell, the newest appointee. Mr. Campbell, it appeared, was not quite sure what his duties were as AEC Commissioner or whether a commission even was necessary; he was "not sold" on the commission form of organization and wanted a "more coherent chain of command." Adding up the testimony of Messrs. Strauss and Campbell leaves the net impression that

they have little use for the commission form of organization, but that they are not quite ready to say so.

A year ago, when President Eisenhower designated Mr. Strauss to be Chairman of the Atomic Energy Commission, the New York Times in an editorial warmly applauded the choice and made this observation about the agency Mr. Strauss was to head:

> The Atomic Energy Commission is probably the most important technical body in the world today. It commands intellectual, financial, and industrial resources of unprecedented magnitude. Its power is immense; its decisions have an influence which is far-reaching. For those reasons, it has responsibilities that far transcend those of other Government agencies, except those that are concerned with national defense and with foreign affairs.

That editorial statement is enough to suggest why the Congress placed the management and direction of the atomic energy program in a five-man commission. The undertaking is vast, the responsibilities great, and there is still much pioneering work to do, as Commissioners Smyth and Zuckert emphasized before the joint committee. A commission, the latter said, would make surer progress in charting the tasks ahead "than a line organization of the kind that builds bridges, fights wars, or sells tooth paste."

Similarly, the joint committee reported after its extended investigation of the atomic energy program in 1949:

> The framers of the McMahon Act deliberately established a five-man directorate, rather than a single administrator, to control our atomic enterprise for the very purpose of assuring that diverse viewpoints would be brought to bear upon issues so far-reaching as those here involved (81st Cong. 1st sess., S. Rept. No. 1169, p. 81).

Therefore we are deeply disturbed at the indications that the Atomic Energy Commission is disintegrating as a commission under the chairmanship of Mr. Strauss. Three of five Commissioners, Mr. Smyth, an eminent scientist; Mr. Murray, an experienced businessman; and Mr. Zuckert, an able public administrator, registered their concern with the joint committee over the increasing centralization of authority in the Chairman. They urged the Congress to resist this tendency, and expressed the fear that the designation of the Chairman as "principal officer" would only accelerate it. We agree with them, and we will not support any statutory provision which reinforces the dominance of the Chairman to the detriment of the Commission as a whole.

The committee decided to strike "principal officer" from section 21 of the bill, and the phrase does not appear in the final version, H. R. 9757. The committee also wrote language into that section specifying that each commissioner "shall have equal authority and responsibility." However the Chairman's position was singled out by the following language:

> The Chairman (or the Acting Chairman in the absence of the Chairman) shall be the official spokesman of the Commission in its relations with the Congress, Government agencies, persons or the public, and, on behalf of the Commission, shall see to the faithful execution of the policies and decisions of the Commission, and shall report thereon to the Commission from time to time or as the Commission may direct.

This particular phraseology apparently represents an attempt to write into law part of an informal description of the Chairman's role which Commissioner Smyth presented to the committee. So far as we know, this is the first time a Federal statute proposes to give the chairman of a commission formal status as "official spokesman." Whatever the legal effect of this phrase, we believe it would be a mistake to pin down by law the chairman's accepted position as chief spokesman of the agency.

Designating the Chairman as "official spokesman" and obliging him "to see to the faithful execution of the policies and decisions of the Commission," are either redundant or a roundabout way of granting him the additional authority he seeks. If redundant, as Commissioner Smyth pointed out in connection with the "principal officer" proposal, the wording had best be eliminated. It does not appear in the McMahon Act and its inclusion now would be construed as meaningful since the Congress cannot be assumed to legislate for idle or trivial reasons. If the language is not redundant, this is a grant of new authority which, uncertain though its dimensions, conflicts with the "equal authority and responsibility" of the other Commissioners and overlaps or replaces the authority and responsibility of the General Manager.

5. WITHHOLDING INFORMATION FROM COMMISSIONERS

It was generally acknowledged in the testimony of the other Commissioners that Mr. Strauss is a strong and vigorous chairman, and this, in itself, is a matter for commendation and not criticism. But Mr. Strauss emerges in a dual role; he is not only Chairman of the Atomic Energy Commission, but also special adviser on atomic-energy affairs to the President. He admits he "wears two hats," as they say in Washington. By putting on the hat of special adviser, he can plead the confidence of the Chief Executive and keep his fellow Commissioners in the dark about atomic affairs of the greatest significance.

Three of the five Commissioners, with a combined record of nearly 12 years of service on the Commission, have testified in substance before the joint committee that the present Chairman has not taken them fully into his confidence; that they were not informed about certain important actions affecting the atomic energy field; that their access to the President has been virtually cut off; and that there is an increasing tendency to one-man rule in the Commission.

These Commissioners first read in the newspapers the President's speech before the United Nations General Assembly, calling for an international atomic pool of resources to promote peaceful development of atomic energy. Commissioner Smyth, the only scientist on the Commission and senior in length of service, was not even consulted when the Chairman called for an international conference of scientists. A press conference announcement by the President to the effect that atomic weapons have reached optimum size, came as a surprise to the other Commissioners. Since Mr. Strauss became Chairman, none of the others, with the exception of Mr. Campbell, has had an opportunity to visit the White House or to discuss atomic matters with the President.

There was a noticeable and understandable reluctance among these three Commissioners to place on the public record instances of disaffection and discord in the Commission. And there are those who argue that the Chairman was fully within his rights in withholding information from his fellow Commissioners because of his separate and privileged status as special adviser to the President on atomic-energy matters. Nevertheless, there is enough in the testimony, taken together with evidence from other sources, to warrant the conclusion that the Atomic Energy Commission has fallen to a low point in harmony and effectiveness.

In trying to treat generously of the strong-man propensities in their Chairman, several Commissioners pointed out that atomic energy is becoming a subject of increasing interest to military men, diplomats, and industrialists; that the difficulties and disturbances in the Atomic Energy Commission reflect the changing role of the agency in relation to other agencies of Government and the public; and that in keeping with these changes, the Chairman necessarily is called upon to take an active part in affairs not directly related to the internal business of the Commission.

There is an important element of truth in these assertions. But the larger truth is that the Congress intended the Atomic Energy Commission to administer the atomic-energy program. There is every reason to suppose that a commission, well organized, with a normal amount of self-discipline and good sense in each commissioner, with a chairman possessed of tact and understanding and a degree of administrative ability, can keep the President fully informed and well advised on all atomic-energy matters without distorting the Commission pattern of organization.

It goes without saying that the President can select whomever he pleases to advise him on atomic energy. It does not go, in our judgment, that the President and the Chairman of the Commission can utilize the device of special adviser to thwart the objectives of the Atomic Energy Act and disrupt the performance of the Commission by putting a blank wall between the Chairman and the other Commissioners.

One of the Commissioners took pains to prepare and submit to Chairman Strauss a detailed memorandum on the latter's dual status as Chairman and special adviser, in an effort to determine where the Commission stood. Mr. Strauss himself acknowledged that a psychological conflict had been created by his two-hat role. He offered to lay aside the hat of special adviser if the other Commissioners so desired. The suggestion ought to be accepted. Maintenance of the integrity of the Commission, of full and equal access by the

Commissioners to the information necessary to the proper performance of their duties, will contribute more lasting benefit to the Nation than setting the Chairman on a pedestal closer to the President's ear.

In this context, we are constrained to note that the committee majority, though willing to acknowledge in the bill the equal authority and responsibility of the five Commissioners, were unwilling to write in a guaranty that these Commissioners would have full and equal access to atomic information. The committee report states, page 10:

> The right of the members to have access to all information within the Commisssion flows from this responsibility and authority.

Undoubtedly this is the case, but explicit statutory affirmation is in order, considering the committee majority's insistence on writing new language with regard to the Chairman's position.

Whether the committee report is intended to mean that atomic information outside the Commission does not come within the purview of the Commissioner's authority and responsibility is uncertain. In any event, we consider the omission of the information guaranty in the bill a sad commentary on the extent to which distrust and suspicion condition the affairs of government.

Our committee chairman has stated publicly his view that a majority of the Commission at some future time might want to vote to withhold from 1 or 2 Commissioners information on a particular subject. With great affection and respect for our committee chairman, we must say that this suggestion astounds us. It throws doubt upon the ability of a President of the United States to select Commissioners deserving of trust and respect. It throws doubt on the competence of our investigative agencies in checking the background of such appointees; and it throws doubt on the judgment and wisdom of the Senate in confirming them.

When and where do doubt and suspicion come to rest if they are carried into the highest levels of government? They will eat like a cancer at the vital organs of free government in a democracy.

6. OVERRIDING THE COMMISSION'S WILL

The independence and integrity of the Atomic Energy Commission as a commission are seriously threatened not only from within, by the position of dominance assumed by the Chairman, but from without by overriding orders of the President.

The Nation is treated with the unpleasant spectacle of the Commisssion being ordered, against its better judgment, to enter into a 25-year contract with a private utility syndicate. This contract is not for the purpose of providing utility services to the atomic-energy program. It has all the earmarks of a smart play, figured out in the White House and the Budget Bureau, to have the Atomic Energy Commission run interference for the private utilities in their contest with the Tennessee Valley Authority.

The committee's immediate interest in this activity stems from the fact that the contract is being negotiated under color of the authority granted in section 12 (d) of the McMahon Act, as amended, which section is carried over intact as section 164 of H. R. 9757.

When the Atomic Energy Commission sought and received this authority from the Congress to make long-term contracts, and to pay cancellation charges to the utility groups involved in the event the contracts were terminated, the authority was specifically limited to utility services for the Oak Ridge, Paducah, and Portsmouth installations of the Commission. As the former General Manager, Marion W. Boyer, testified in answer to a question from me at the time the authorizing legislation was being considered by the committee:

> In other words, it is limited to the power requirements for those three installations. It is not a wide-open authority.

Although many Members of Congress had misgivings about this particular grant of authority, which really served no other purpose than the convenience of the private utilities in financing construction of their new plants, the Members understandably were unwilling to overturn arrangements already made for supplying electricity to the atomic-energy projects. The proposed new contract, however, has nothing to do with the power needs of the atomic-energy program. In the words of Commissioners Smyth and Zuckert:

> The present proposal would create a situation whereby the AEC would be contracting for power not 1 kilowatt of which would be used in connection with the Commission production activities (hearings, pt. II, p. 958).

The scheme is for the Commission to maintain its present firm contract for TVA power to run the Paducah plant while contracting for some 600,000 kilowatts of additional power to be delivered by the private-utility group to the TVA for service in the Memphis area, several hundred miles away from any atomic-energy installation. In other words, the AEC would become a power broker, purchasing power it does not need for an area far removed from its activities. The TVA would be forced into buying the power from the private group through AEC instead of building its own plant to serve the Memphis area.

Over the life of the contract, the taxpayers would foot a bill of at least $90 million over and above the cost of power that TVA could produce itself. The $90 million figure is the AEC's own estimate; the TVA estimate is that this new proposal would result in $140 million added cost to the taxpayers.

The members of the Commission and their General Manager struck us as rather shamefaced about the whole business when they came before the committee. They said in effect: "This proposal did not originate with us. We don't like it but higher authority has decreed it, and we will be good soldiers and carry out orders."

The General Manager testified that the proposal "originated in the Bureau of the Budget as an administrative policy." He cited instructions received from the Bureau of the Budget to proceed with negotiations looking toward a definitive contract, despite his advice to the Bureau "that the Commission did not agree on the wisdom of AEC entering into this type of contract"—hearings, part II pages 946 and following.

Chairman Strauss and Commissioner Campbell were the only Commission members who did not object; in fact, Mr. Strauss had been apprised of the Bureau's intentions at least a month before the matter was brought up at a Commission meeting. The meeting in question was held January 19, 1954, 2 days before the budget message of the President was presented to the Congress, stating that "arrangements are being made to reduce, by the fall of 1957, existing commitments of the Tennessee Valley Authority to the Atomic Energy Commission by 500,000 to 600,000 kilowatts." The arrangements involving discussions with the interested utility group, had been going on at least since early December of 1953, and when finally revealed, did not propose to reduce existing TVA commitments to AEC but to compel the TVA purchase of new and additional power from private sources.

Commissioners Smyth and Zuckert, in a joint letter to the Director of the Bureau of the Budget, undertook to express their personal views that the proposed action was awkward and unbusinesslike and involves the AEC in a matter remote from its responsibilities. Commissioner Murray took substantially the same position in testimony before the committee. It is noteworthy that Mr. Murray, as the Commissioner responsible for initiating the first long-term contract between the Commission and a private utility group, frankly acknowledged the unsatisfactory performance of that group in comparison with the TVA, and strongly objected to the proposed new contract—hearings, part II, page 1001.

A great deal more is involved here than a simple controversy between private and public power. Is the Atomic Energy Commission, created by the Congress as an independent agency of Government to administer the vast atomic energy program, which now represents a public investment of $12 billion, to lay aside its collective judgment in deference—nay, subservience—to unrelated budgetary and power policies of the current administration?

Who, one may well ask, is in charge of the Atomic Energy Commission? Are there not five Commissioners duly appointed and confirmed under the law, sworn to administer it faithfully, and answerable to the Congress as well as the President for their performance? Or does higher authority take over whenever the Budget Bureau or the White House has a pet scheme to promote?

As Members of Congress and of this committee, we are interested in the efficient performance of Government agencies. We have supported constructive proposals to improve the organization and management of the executive branch. Certainly the President as the Chief Executive and the appointed heads of the departments and agencies should have the requisite authority to organize their administrative units in a manner conducive to efficient execution of the laws passed by the Congress.

But there is a line to be drawn between Presidential direction of the executive branch for good administration and Presidential usurpation of the authority of independent commissions. The members of the Atomic Energy Commission do not serve at the pleasure of the President. They are appointed by him, of course, but the Senate confirms the appointments, and the period of tenure is fixed by law. The President can remove a Commissioner only for "inefficiency, neglect of duty, or malfeasance in office."

The administration of the atomic energy program is vested by law in the Commission, not in the President. True enough, the President is charged with certain responsibilities of the highest importance, such as directing the Commission to deliver atomic weapons to the Armed Forces for such use as he deems necessary in the national defense; and the President is given extraordinary authority to exempt the Commission from Federal statutes relating to contracts when he determines such action necessary to the common defense and security. But the President is not authorized to substitute his judgment for that of the Commission members in matters committed to their administration, and certainly he is not authorized to direct the Commission to engage in matters foreign to their duties.

For the benefit of the members of the Atomic Energy Commission we say this: The Commission will forfeit the respect of the public and insult the dignity of its high office if it allows itself to become a puppet agency for the execution of purposes alien to the Atomic Energy Act.

Our own committee, too, has a responsibility in connection with this matter. It is proposed to reenact authority which, in our view, provides no legal justification whatever for the contract under negotiation. None of the three installations named in section 164 of the bill is involved in the proposed new electrical power arrangements, and only by the most violent stretching of an incidental phrase can the general counsel for the Atomic Energy Commission wrap the cloak of legality around this action.

This latest move of the AEC at the behest of the Budget Bureau illustrates the danger of legislating quickly without laying down adequate standards. As the Federal Power Commission observed in connection with section 164:

> Here again the grant of power is without any definition of governing standards, any policy guide, or any limitation of any kind. Apparently this may ratify or authorize ratification of existing contracts. The Federal Power Commission has not indicated any position as to the terms of the contracts heretofore entered into. (Hearings, pt. II, p. 1133.)

We should take the opportunity now to make clear the intent of Congress in originally enacting this section if the plain wording and legislative history of the amendment leave any doubt on that score. We regret that the committee majority has voted down clarifying language and has refused to adopt a motion disapproving the transaction in question. Our responsibility and obligation in this regard are all the greater, since we are asking the Congress to add prerogatives in this bill to the Committee's already important jurisdiction and status.

7. LIMITING AEC POWER PRODUCTION

A remarkable series of incongruities show up with regard to the power position of the Atomic Energy Commission.

The determination to cast the Commission in the role of "power broker" under the proposed new contract would commit that agency to continuing responsibilities for a 25-year period in a field which is external to the Commission's own concerns and power needs.

This contractual arrangement would bring the AEC into the conventional power business as an additional Government agency and tie it to TVA's future power activities despite the professed intention of that agency and the present administration to limit the role of Government in business.

The AEC already has entered into two long-term contracts, and is about to become involved in a third, for the supply of electrical energy from conventional private sources for the next quarter century, even while freely predicting that electrical energy from atomic sources will be available in the next decade.

Most incongruous of all, the AEC wants to stay out of the atomic-power business, a field in which it might be expected to have a legitimate and continuing function.

The Atomic Energy Commission is the largest single consumer of electricity in the world. When presently authorized facilities are completed, the Commission will be utilizing capacity on the order of 5 million kilowatts, exceeding the combined capacity of the New England States. Its consumption of electrical energy in the near future may reach 8 or 10 percent of the Nation's total.

In view of its enormous power needs, which will come to represent an outlay of $150 million to $200 million a year, one would expect the AEC to show initiative and enterprise in adapting its own facilities to supply a substantial portion of these needs rather than to waste the heat energy created by nuclear fission. The framers of the McMahon Act contemplated use of atomic power by AEC as well as the transfer or sale of such power to others when they provided in section 7 (d) of the act:

> Byproduct power: If energy which may be utilized is produced in the production of fissionable material, such energy may be used by the Commission, transferred to other Government agencies, or sold to public or private utilities under contracts providing for reasonable resale prices.

Back in 1946, when this section was written, the atomic-energy program was centered primarily upon the development and production of atomic weapons. Atomic power was still a remote possibility and the section pertaining to its production was embryonic. Now that we stand on the threshold of the atomic-power era and consider legislation designed to usher it in, singular, indeed, is the fact that the new legislation does not enlarge upon the embryo, so far as AEC production of atomic power is concerned.

Section 7 (d) of the McMahon Act is now section 44 of H. R. 9757, dignified only by having a whole section number to itself, and containing a few minor word changes, but still an incidental item tucked away in a corner of the bill instead of becoming a full-fledged set of provisions to launch a positive program of Federal development in the atomic-power field. If anything, the language in the new bill is more restrictive than in the existing act.

The Federal Power Commission, in an extended analysis of the proposed atomic energy legislation, criticizes, among other things, the paucity of legislative standards with respect to section 44. It points out that the sale of byproduct power is not a new problem and calls attention to the series of acts in which the Congress has provided detailed and explicit standards governing the disposition of electric power from projects involving the development of irrigation, water conservation, flood control, and navigation improvement projects. The Federal Power Commission then remarks:

> Corresponding enunciation of policy in the sale of byproduct power from Government atomic energy installations may present some new or different problems, but the precedents cited are sufficient to suggest that the Congress has been jealous to enunciate the policy to be effectuated by the agency marketing the power and has not been willing to leave the responsibility for policy to the agency. (Hearings, pt. II, p. 1132.)

One of the long-established Federal policies to which the Federal Power Commission adverted is the according of preference to municipal, cooperative, or other public bodies in the sale of federally generated power. Section 44, covering the marketing by the Atomic Energy Commission of surplus energy from its own nuclear operations, contains no such preference. This is in conflict with the policy established by every law governing the marketing of federally generated power within the last 50 years. The section should be amended to accord with established Federal power policy.

The Atomic Energy Commission, whether for lack of a positive congressional mandate or because of preoccupation with atomic weapons, has never been a power-minded agency. It has steadily backed away from any concept of Government responsibility for the production of atomic power. It regards the atomic power authorization in section 7 (d) of the McMahon Act as incidental and unlikely to be productive of any important achievements. Chairman Strauss describes the AEC's planned power reactor program for the next few years as a minimum program by choice. The future power role conceived for this agency by the present administration is a narrow and declining one. President Eisenhower said in his message to the Congress on February 17, 1954:

> The creation of opportunities for broadened industrial participation may permit the Government to reduce its own reactor research and development after private industrial activity is well established. For the

present, in addition to contributing toward the advancement of power-reactor technology, the Government will continue to speed progress in the related technology of military propulsion reactors.

A draft of proposed legislation accompanying the President's message contains this language:

> Nothing in this act shall be construed to authorize the Commission to engage in the sale or distribution of electrical energy for commercial use except such energy as may be produced by the Commission incident to the operation or research and development facilities or facilities for the production of fissionable material.

That proposed restriction was incorporated in an earlier version of H. R. 9757, but the sponsors were persuaded finally to strike it out. The majority report on the bill, however, construes the restriction to be still applicable to section 44. It states in this regard—page 15:

> This section will permit the Commission to dispose of that utilizable energy it produces in the course of its own operations, but does not permit the Commission to enter into the power producing business without further congressional authorization to construct or operate such commercial facilities.

We fail to see why the Commission should be enjoined from producing atomic power for commercial use when it would be given broad authority to license others for such production. If the Nation is to realize the maximum power benefits from its investment in this new resource, a positive program of atomic power production by the Federal Government is essential. The history of electrical power development in this country affords ample evidence that a reasonable balance between public and private power serves as the most important check on monopoly control in the vital field of energy resources. The very magnitude of economically feasible nuclear powerplants persuades us to believe that the balance will be thrown heavily in favor of private monopoly unless provision is made for Federal development of atomic power, particularly where supply is desired by public or cooperative systems.

The committee members are convinced, for security and perhaps other reasons, and have affirmed in the pending bill, that the special material which produces nuclear energy should remain the property of the United States. Another finding in section 2 of the bill is that "In permitting the property of the United States to be used by others, such use must be regulated in the national interest." It is judicially established beyond question in our constitutional system that what the United States owns and permits others to use, it may use itself and dispose in any manner the Congress sees fit, including the transformation of owned resources into electrical energy and the transmission of such energy to market. Private companies engaged in similar and competing enterprises have no vested right to be free from Federal Government competition—*Ashwander v. Tennessee Valley Authority* (297 U. S. 288); *Tennessee Power Co. v. Tennessee Valley Authority* (306 U. S. 118).

8. INADEQUATE POWER-LICENSING PROVISIONS

H. R. 9757 not only fails to mark out a clear and constructive program for Federal production of atomic power; it is altogether deficient in the matter of safeguards to protect the public interest in the licensing of non-Federal agencies to produce and sell atomic power.

As noted above, the nuclear-energy resource itself will remain the property of the Federal Government. Thus, in terms of the public interest, the use of nuclear energy and the use of the energy in the falling water of streams should be subject to the same safeguards established by law.

These safeguards involve far more than the bare assurance that the electricity generated from the resource shall be subject to the ordinary processes of utility regulation. They are based on the principles that a public resource must be conserved and developed for the best possible use, that it must be always kept open for public use if the people so decide, and that whatever States may do or fail to do about it, the use must always be directed at providing electricity at the lowest possible rates through preventing private capitalization of the value inherent in the right to use a public resource.

The very fact that there are still six States which have set up no State agency to regulate the rates charged by privately owned electric utilities reveals the extraordinary importance of these public resource safeguards, and the necessity for their incorporation in any legislation designed to facilitate the use of atomic energy as a source of commercial power. These safeguards for the right of the people to get the full value out of their resources, without any toll being taken above what is necessary to assure the funds required for development, have already been formulated in detail by Congress in the Federal Power Act which prescribes how hydroelectric resources may be used. They include:

First. Safeguard for the prior right of Federal development of the resource in any specific case where this will best serve the public interest.

Second. Safeguard for the prior right of public bodies and cooperatives, as against a private applicant for a license for any specific development of the resource.

Third. Safeguards for the right to public hearing in connection with any application, with specific provision for admission of interested States, State commissions, municipalities, representatives of interested consumers or competitors as parties.

Fourth. Safeguards for the right of Federal or other public recapture of any development by a private licensee at the end of the license period on payment of no more than the licensee's net investment in the project.

Fifth. Safeguards for reasonable rates to consumers by provision requiring licensees as a condition of any license to agree to Federal regulation where States have provided no regulation of electric rates, with further provision that in any rate proceeding the licensee can claim no more than net investment in the development for rate base purposes.

Sixth. Safeguards for the preferred position of public and cooperative electric systems to obtain power supply from Federal development of the resource.

The bill, as reported, is wholly lacking in such safeguards. It would enable the Atomic Energy Commission to turn this greatest energy resource over to private power monopoly under licenses unconditioned except for the requirements of national security and public health and safety. Aside from section 271, providing that nothing in this act shall affect the authority or regulations of Federal, State, and local regulatory agencies, it is barren of any recognition of the public interest in securing electric energy from this new resource at the lowest possible rates. Experience has shown clearly that such regulatory authority is entirely inadequate to protect the public interest in electric power developed from public resources, unless supplemented by specific standards governing licenses and the availability of public or cooperative competition in the distribution of electric energy.

The bill includes no provision to encourage public or cooperative distribution of nuclear power. Furthermore, it includes no provisions assuring that privately owned electric utilities producing nuclear electric energy under license from the Commission shall sell the power at the lowest possible rates consonant with sound business practices.

The following comments on specific licensing features of the bill indicate what we consider essential requirements for protection of the public interest in the use of this new public resource for the generation of commercial electric power.

Section 103 (b), establishing the minimum qualifications for applicants for commercial licenses to construct, own, and operate facilities for the utilization and production of special nuclear material or atomic energy, contains no provisions requiring agreement by the applicant, where the end result is generation of electric energy for sale, to claim no more than net investment in such facilities for rate-making purposes. Such a limitation is placed upon all licensees for use of the people's waterpower resources under the Federal Power Act. This section of the bill should be amended to bring it in line with established Federal power policy.

Section 103 (c), providing for a limitation on the term of commercial licenses issued by the Commission for the ownership and operation of facilities for the utilization and production of special nuclear material or atomic energy, contains no provision for the right of the United States, after reasonable notice, to take over, maintain, and operate such facilities at the end of the license period on payment to the licensee of its net investment, plus severance damages, if any. All private hydroelectric power developments, licensed under the Federal Power Act, are subject to such a provision. This section should be amended to bring it in line with established Federal power policy.

Section 182 (b), providing for due notice to the public before the issuance of any license for utilization or production facilities which generate commercial power is lacking as to both breadth of notice required and provision of specific procedures in connection with license applications to assure full protection of the rights of interested parties. It also lacks specific recognition of those interests whose rights may be affected by Commission action or whose participation may be in the public interest.

To cure these deficiencies, where generation of nuclear-electric power is the primary purpose involved, we believe the section should be amended to provide that notice of applications shall also be sent to municipalities, and to public and cooperative electric systems within transmission distance; that, in case of protests, conflicting applications, or proposals for special conditions, interested parties shall be accorded opportunity for intervention, hearing, petition for rehearing, and appeal, in general accord with the procedures now prevailing under Federal power legislation; and that the Commission may admit as parties interested States, State commissions, municipalities, public and cooperative electric systems, or representatives of interested consumers or security holders, or any competitor of a party to such proceedings, or any other person whose participation may be in the public interest.

Section 182 (c), providing for preferred consideration to applications for facilities which will be located in high-cost power areas in the United States, lacks a similar provision which has been the policy of the Government since the Federal Power Act became law in 1920, according preferred consideration to public bodies where their applications conflict with those of privately owned systems. We believe this lack should be overcome to bring the section into line with established Federal power policy.

Section 183, providing specific terms which must be included in licenses for the ownership and operation of facilities for the utilization or production of special nuclear material or atomic energy, is completely lacking in provision for Federal accounting control of licensees where such licenses are not also engaged in the transmission of electricity or sale of electricity in interstate commerce for resale. Such accounting control should be vested in the Federal Power Commission which is responsible for such regulation over licensees for hydroelectric power developments, and is provided for, with enforcement authority, in sections 301, 302, 304, and 306 of the Federal Power Act. We believe that the bill should be amended to make these sections applicable to licensees for atomic power development.

Section 185, providing for the issuance of construction permits to applicants whose applications are otherwise satisfactory to the Commission, should be specifically subject to the same procedural safeguards, assuring interested parties full opportunity for notice, hearing, and appeal before issuance, as are provided in connection with the issuance of licenses under section 182. We believe that the section should be amended to make the same procedure specified in section 182 mandatory before construction permits are issued.

The parallels between electrical energy from nuclear and hydropower sources were called to the attention of the committee in earlier hearings during the summer of 1953 by a member of the Federal Power Commission and again during the present hearings by Chairman Kuykendall of the Federal Power Commission, who supplied a detailed analysis of pending atomic energy legislation. This material will be found in part II of the committee's recent hearings at pages 1124 through 1133.

In view of the Federal proprietary interest and congressional authority in the field of atomic energy, the Federal Power Commission observes:

> It becomes pertinent to test any legislative proposals with respect to non-Federal development of atomic energy to see whether the public interest in atomic energy is protected and benefited as adequately as the Congress of an earlier generation sought to do for the Nation's interest in waterpower (p. 1128).

The Federal Power Commission observes further that:

> * * * The grant of the (license) privilege should depend not solely on the negative consideration that national defense will not be harmed, but on the affirmative ground of benefit to the public interest in electric power and other products of the operation of nuclear reactors as well (ibid.).

Unfortunately, the present bill, reflects nothing of this advice from the Nation's outstanding independent power agency, but relies mainly on negative considerations in licensing. The analysis of the Federal Power Commission is sufficient to indicate that the bill is still complete, so far as it comes within the scope of power policy.

9. NEED FOR A DIVISION OF CIVILIAN POWER APPLICATION

Our concern goes not alone to the omission of public interest safeguards in power licensing. If the use of nuclear energy as a source of commercial electric power is to be accorded the consideration which its importance warrants, this should be reflected in the statutory organization of the Commission. It cannot be left wholly to the discretion of the Commission which may be at any given time, and is now, weighted in favor of playing down the Government responsibilities in this field.

Specifically, we believe there should be a statutory Division of Civilian Power Application, counterbalancing the statutory Division of Military Application, with positive responsibility for the commercial development of nuclear electric power by Federal or non-Federal public and private agencies.

There should also be an Electric Power Liaison Committee, corresponding with the Military Liaison Committee, with provision for full cooperation between the Atomic Energy Commission and those Federal agencies responsibile for carrying out other phases of Federal power policy. This would provide a basis, now lacking in the bill, for Federal construction and operation of nuclear powerplants where required in connection with Federal regional programs.

The Electric Power Liaison Committee might well be composed of one representative each of the Federal Power Commission, the Securities and Exchange Commission, the Rural Electrification Administration, the Tennessee Valley Authority, The Bureau of Reclamation, the Bonneville Power Administration, the Southwest Power Administration, the Southeast Power Administration, and the Corps of Engineers, with an independent chairman appointed by the President, by and with the consent of the Senate, serving at the pleasure of the President.

This committee would advise with the Atomic Energy Commission in connection with all activities directed at the development of power from nuclear energy with a view to assuring its maximum contribution to the general welfare. Such advice would include assistance in the formulation of standards as specific problems arise. But dependence on ad hoc decisions alone for the determination of standards affecting the economics of atomic power development and use would be unsatisfactory in the extreme. It is for this reason that we favor amendments which would authorize and direct the Division of Civilian Power Application and the Federal Power Commission, in their respective spheres, to apply substantially the same public interest safeguards in connection with the licensing of atomic powerplants as are applied in licensing hydroelectric developments under the Federal Power Act.

The Nation's interest in ample supplies of low-cost electric power to meet the requirements of an expanding economy is great. It reaches into every farm home and commercial or industrial establishment. It makes the difference between vigorous and retarded regional development. It is a vital factor in the economical operation of farms. It contributes to continually rising living standards. All this has been emphasized in many official reports, including that of the President's Materials Policy Commission, which made an exhaustive analysis of the future requirements of our civilization.

The quality of the legislation which opens the atomic-energy resource to development as a part of the country's total energy economy will have a profound effect on the attainment of these goals. We are convinced that enactment of the present bill without mature consideration of the changes which we propose would be a disservice to the people of the United States. No delay required to perfect the bill to meet the requirements of the general welfare could result in a minute fraction of the losses that would inevitably follow an ill-considered transfer of atomic-power development to private monopoly.

10. PASSING THE BUCK ON MONOPOLY PREVENTION

The fact that electrical utilities are more or less natural monopolies in the areas they serve makes it unlikely that

the antitrust provisions in section 105 of the bill will have any important bearing on the licensing of utilities for atomic power production and distribution. Indeed that section empowers the Atomic Energy Commission, with the approval of the Attorney General, to exempt such classes or types of licenses as it may determine would not significantly affect the licensee's activities under the antitrust laws.

With regard to the provisions of section 105 generally, we believe it is a mistake to relieve the Commission of the affirmative responsibility contained in the McMahon Act, and deleted in this bill, to exercise its licensing authority in a manner to prevent the growth of monopoly or restraint of trade. Section 7 (c) of the McMahon Act reads in part:

> Where activities under any license might serve to maintain or to foster the growth of monopoly, restraint of trade, unlawful competition, or other trade position inimical to the entry of new, freely competitive enterprises in the field, the Commission is authorized and directed to refuse to issue such license or to establish such conditions to prevent these results as the Commission, in consultation with the Attorney General, may determine. The Commission shall report promptly to the Attorney General any information it may have with respect to any utilization of fissionable material or atomic energy which appears to have these results.

Section 105a of H. R. 9757 would permit the Commission to suspend or revoke a license only after a court of competent jurisdiction has found a licensee to be guilty of violating the antitrust laws. It seems to us that here the Commission locks the barn after the horse is stolen. In a new, developing field of industrial endeavor, resort to the cumbersome and protracted procedures, sometimes extending over many years, which eventuate in final adjudication of antitrust violations, can have little effect in assuring the maintenance of free competitive enterprise.

Section 105c of the bill does add a procedure whereby some preventive action can be taken against monopoly or restraint of trade. It is left to the Attorney General or the Federal Trade Commission to determine whether "the proposed license would tend to create or maintain a situation inconsistent with the antitrust laws." In the event of such a determination, the applicant is permitted to file a petition with the Federal Trade Commission for a hearing, and if the Commission finds adversely, the applicant would have recourse to the courts.

We are uncertain as to the legal effect of a court finding which would put an applicant in a position "inconsistent with the antitrust laws" without necessarily being guilty of violating the antitrust laws. In any event, we see little validity in the arguments which led the sponsors of the bill to relieve the Atomic Energy Commission of the affirmative responsibility cited above.

A review of Federal statutes demonstrates rather convincingly that many departments and agencies of the Federal Government are charged by law with such positive responsibility and authority to prevent or discourage monopoly or other restraints of trade, or to actively promote competition and participation by small business, in various fields of endeavor. It is specious reasoning, in our opinion, to say that the Atomic Energy Commission, as the agency charged with the administration of the atomic energy program, should pass wholly on to others the responsibility for taking steps to insure equality of opportunity by all businesses, large and small, to participate in that program and to share the privileges and benefits arising from it.

11. LIMITING ACCESS TO PATENTS

Intimately tied up with the crucial issues of monopoly or competition in the atomic-energy field is the extent to which private patents are authorized and others have access to the patented inventions or discoveries.

The patent question is one of the most controversial in the atomic-energy field. It arose in the very beginning, when the drafters of the McMahon Act decided to make an outright ban on patents for inventions or discoveries which concerned the production of fissionable material or the utilization of such material in atomic weapons. In the nonmilitary field patents could be granted, but were subject to a public-interest declaration under stated conditions, in which case the Atomic Energy Commission and its licensees automatically were entitled to their use, with reasonable compensation to the owner. This constituted a form of compulsory patent licensing.

Since the licensing provisions of the McMahon Act were never utilized, and the Commission acquired practically all of its patents through arrangements with its contractors, who were operating with public funds, the public-interest provision remained a dead letter. It is this feature which H. R. 9757 adopts with modifications, broadening the permissible area of private patenting and authorizing others to have access to the patented inventions or discoveries under certain conditions.

An earlier version of the pending bill proposed to remove the ban on patents in the production of special—fissionable—material, whether for industrial or weapons uses, leaving only the patent ban on utilization of special material in an atomic weapon. The provision for public-interest declarations also was eliminated, in effect opening up the whole nonmilitary atomic-energy field—and part of the military—for private patenting without any obligation to license others in the use of the patented inventions or discoveries.

We commend the committee majority for withdrawing those earlier provisions and for recognizing in the report—page 9—that the dangers of restrictive patent practices are present because few firms may be involved in the atomic-energy program for the immediate future. The fact that a few large industrial corporations, as contractors to the Atomic Energy Commission, have acquired an overwhelming head start on would-be competitors by virtue of technical know-how acquired on the inside is enough to warrant the utmost care on the part of the Congress in legislating patent privileges.

The committee has reverted substantially to the position taken by President Eisenhower when he said in his message of February 17, 1954, to Congress:

> Until industrial participation in the utilization of atomic energy acquires a broader base, considerations of fairness require some mechanism to assure that the limited number of companies, which as Government contractors now have access to the program, cannot build a patent monopoly which would exclude others desiring to enter the field. I hope that participation in the development of atomic power will have broadened sufficiently in the next 5 years to remove the need for such provisions.

While we believe that the President's proposal for compulsory patent licensing is necessary until such time as interested industrial concerns are on a more equal footing in their acquisition of skills and experience in atomic technology, we believe both the President and the sponsors of this bill are unduly optimistic in the hope that a period of 5 years will suffice to reach that stage. It will take at least 5 years to construct a sufficient number of reactors for making comparative evaluations of performance, and it will take at least 5 years more to accumulate the economic and engineering data for these evaluations.

The Congress would be better advised, as an able patent attorney and former deputy general counsel of the Atomic Energy Commission testified before the committee, to strike the September 1, 1959, termination date and leave open the time for legislative removal of compulsory licensing. The Congress could then enact the necessary legislation at such time as a broadened industrial base for atomic energy became evident. At the very minimum the period of compulsory patent licensing should extend for 10 years.

The question next arises whether the language of the bill is designed to make effective the compulsory licensing of patents or whether it is designed to make this process difficult and unusual. Although it is not easy to judge the effect of the prolix and unduly cumbersome provisions in this regard, we are inclined to the conclusion that the compulsory licensing provision is an extremely limited guaranty of accessibility to patented inventions.

Perhaps the simplest way to establish compulsory licensing would have been to carry over the provision in section 11 (c) (2) of the McMahon Act which provides that whenever any patent is declared by the Atomic Energy Commission to be affected with the public interest, not only is the Commission automatically licensed to use the invention or discovery covered by the patent—a provision retained in the present bill—but any person licensed by the Commission automatically is licensed to use the invention or discovery covered by the patent.

Under section 152 of the pending bill, whenever a patent has been declared affected with the public interest, the Commission automatically is licensed to use the invention or discovery covered by such patent, but another person desiring to use the patented invention

or discovery must apply to the Commission for a patent license, which shall be granted to the extent that the Commission finds that the invention or discovery is of primary importance to the conduct of an activity by such person authorized under the act.

In other words, the initiative and the burden of proof now would lie with the applicant who must demonstrate to the satisfaction of the Commission that the use of the invention or discovery is of primary importance to his business. The limiting aspect of this requirement was brought to the attention of the committee in earlier hearings by Caspar Ooms, a patent attorney, formerly United States Patent Commisioner and chairman of the AEC Patent Compensation Board. Mr. Ooms, who suggested patent revisions in the McMahon Act very similar to those now embodied in H. R. 9757, testified before the committee last July; pages 458–459, that by eliminating the automatic licensing feature of the McMahon Act even though a patent is declared affected with a public interest:

> Each applicant for a license must demonstrate separately that the license is necessary to effectuate the policies and purposes of the act. This restriction is maintained to make the invocation of this licensing power an exception and an infrequently used device. It is intended to guard against the fear that the inventor who is willing to devote his resources to making developments in this field would be compelled to share his contributions with his competitors and to insure that he will be required to give licenses only in the extreme and infrequent situation where that is necessary to accomplish the designs of this legislation.

Before a patent reaches the stage of being declared affected with the public interest, several other conditions are interposed by H. R. 9757. In the first place the patent owner is entitled to a hearing before such declaration. Presumably he could present arguments why the patent should be withheld from the public interest sphere, and if overruled, could appeal to the courts under the Administrative Procedure Act, as provided in section 181. Court action, conceivably, could consume a goodly portion of the 5-year period in which the compulsory licensing requirement obtains.

Secondly, declaring a patent "to be affected with the public interest" would be optional or discretionary with the Atomic Energy Commission, whereas under the McMahon Act the declaration is mandatory provided two conditions are met. The pertinent provision of the McMahon Act follows:

> (1) It shall be the duty of the Commission to declare any patent to be affected with the public interest if (A) the invention or discovery covered by the patent utilizes or is essential in the utilization of fissionable material or atomic energy; and (B) the licensing of such invention or discovery under this subsection is necessary to effectuate the policies and purposes of this act.

In contrast, section 152a of the pending bill provides:

> The Commission may, after giving the patent owner an opportunity for a hearing, declare any patent to be affected with the public interest if: (1) the invention or discovery covered by the patent is of primary importance in the production or utilization of special nuclear material or atomic energy; and (2) the licensing of such invention or discovery under this section is of primary importance to effectuate the policies and purposes of this act.

It will be noted that under the present bill the concept of "primary importance" applies to two conditions, whereas in the McMahon Act the mere fact of utilizing fissionable material or atomic energy satisfies one of the conditions. Under the present bill, conceivably, the Atomic Energy Commission could decide that an invention or discovery is of primary importance in the atomic-energy field but is not of primary importance to effectuate the purposes of the act. "Primary importance" is a strong phrase, and its strength is doubled in section 152a of the bill. We can conceive that many inventions or discoveries would not meet the double-strength criterion and yet be important.

Furthermore, it must be borne in mind that what may be of primary importance to the small business may not be of primary importance to the Atomic Energy Commission or to the atomic-energy field generally.

If the "public interest" feature of the patent survives the objection of the owner and the hearing procedure, and meets the double test of primary importance under section 152a, then a person may apply for a license under 152b, which requires still a third test of primary importance.

In the event the Commission fails to make a "public interest" declaration, prospective or actual licensees or persons otherwise authorized may apply to the Commission under section 152c for a patent license for the use of a patented invention or discovery. The Commission then undertakes to hold a hearing within 60 days—section 152d—and must issue the license—section 152e—if it finds that the invention or discovery meets three tests of "primary importance" and an additional condition.

The application that can survive this procedure will be an impressive one indeed. The patent attorneys may derive more satisfaction from section 152 than the would-be user of the invention.

In issuing a patent license under section 152e, the "primary importance" of which is triple-tested, still the Commission itself would not be automatically licensed to use the invention or discovery. We believe the same privilege of automatic licensing for Commission use should apply here as in the case of "public interest" patents under section 152b.

In the event the Commission turns down a patent license application for failing to meet the three primary importance criteria under sections 152a and 152b, it is unlikely that a license application for the same invention or discovery under section 152c would ever come within reach of meeting the three primary importance criteria of section 152e. The unlikelihood is the more apparent in case two or more applicants desire the use of the same patented invention, for the Commission would then be faced with the dubious proposition under section 152e (3) that the use by each is "of primary importance to the furtherance of policies and purposes of this act."

In connection with research, we note a serious omission in the patent sections of H. R. 9757. The provision contained in section 11 (b) of the McMahon Act and carried over to an earlier version of the pending bill, which prohibited any patent rights with respect to any invention or discovery to the extent used in research and development activities in the atomic-energy program, has been deleted.

Failure to enact this provision undoubtedly would be a deterrent to research. It would appear that those desiring to utilize patented inventions or discoveries in research would have to go through the cumbersome procedures of applying for a patent license under section 152 c, d, e, f, and g. The elimination of this patent ban in research, for reasons which are not clear to us, is contrary to the recommendations of the Atomic Energy Commission. We believe the provisions should be reinstated.

Other questionable features in the patent sections we note as follows:

While patents are banned in the case of inventions or discoveries useful solely in the utilization of special nuclear material or atomic energy in an atomic weapon, they are not banned in the production of such material. Since special nuclear material can be utilized both for weapons and nonweapons, apparently a producer of such material could get a patent on basic production processes whether the material is used for weapons or not. We do not believe that the area of patentability should extend to inventions or discoveries that affect the weapons field.

Although drastic penalties are provided for violations of certain provisions in the bill, no penalty is provided for failing to report inventions or discoveries under section 151c, which could involve matters of strategic significance to the atomic-energy program.

The Patent Compensation Advisory Board, created under section 156a, being advisory only, apparently could not be delegated authority to make final decisions, as under the McMahon Act, in the event the Commission found itself bogged down with matters of compensation, awards, and royalties to the detriment of major responsibilities.

12. BUILT-IN SUBSIDY FEATURE

Section 2h of the bill makes this finding:

> It is essential to the common defense and security of the United States that title to all special nuclear material be in the United States while such special nuclear material is within the United States.

Accepting as fundamental to the legislation this finding, which is implemented in section 52 and other sections of the bill, nevertheless we wish to point out some of its implications for the development of atomic-energy enterprise.

What this bill proposes in effect is to relinquish the Federal Government's exclusive ownership rights in the facilities which produce or use nuclear material but to retain its exclusive ownership rights in the material itself. As a consequence, the incidents of private and

public ownership are intermingled in such a way that not only may vexatious problems of administration and accounting control arise, but the private companies licensed for a maximum period of 40 years to own and operate production facilities—atomic reactors—legally can depend on the Government to compensate them adequately for whatever they produce during the life of the license. This constitutes a built-in subsidy for licensed atomic enterprise until about the year 2000 A. D. The subsidy implications have been recognized and objected to by industrial spokesmen appearing before our joint committee.

Since the Government, under the bill, owns any nuclear material which now or may hereafter be produced in privately owned plants, it cannot refuse to take and pay for what is produced. If the Government pays less than the cost of production in a given plant, the action would, in effect, be confiscatory. Therefore, the provision in section 56 of the bill that the Atomic Energy Commission shall pay the same fair price to all licensed producers of the same material means that the highest cost and least efficient producer will set the pace on price schedules.

The fact that the Commission is obligated by the same section to consider the value of the material for official Government use in determining a fair price, constitutes no ground for paying less than it costs to produce the material. Conceivably, by some happy turn of international events, the Government's requirements of material for atomic weapons could be drastically reduced; and new dicoveries of source materials or greatly improved processes of production in the Government's own plants could yield a surplusage of material, reducing its value to the Government to virtually nothing. Still the Government would have to take the material it owns off the hands of private producers at a price fair to them for the 40 years during which they may be licensed to do business.

Even though the Commission can establish guaranteed fair prices for only 7 years at a time, as provided in section 56, the Commission is not thereby relieved of the obligation to pay fair prices throughout the life of the license.

If the Commission, to forestall the possibility that it may be saddled in the future with huge amounts of nuclear material it does not need or want, insists on writing into licenses under section 53e or section 183 a cancellation provision against such contingencies, or issues licenses for a much shorter period than 40 years, it is obvious that few firms would be persuaded to enter the field under such uncertainties.

Again, to forestall such conditions, the Commission might easily persuade itself to grant licenses to only a handful of the largest or most efficient producers, thereby denying wide access to competing industrial firms or other interested sectors of industry.

The intertwined complexities implicit in the obligation to compensate producers for the material automatically owned by the Government and to charge licensed users for such material, create further subsidy possibilities.

Section 53 deals with the Commission as a distributor of special nuclear material to qualified applicants, including licensees under section 103; while sections 52 and 56 deal with the Commission as a purchaser of special nuclear material from licensed producers who produce such material in the burning of the nuclear fuel secured from the Commission. In the first instance, the Commission is authorized to make a reasonable charge; in the second, to pay a fair price. But the vague generalities set up in lieu of standards to guide the Commission in determining both these critical figures leaves a degree of discretion in the administrative body that would enable it to pay considerably more for the production than it charged for the original supply of special nuclear material, thus affording private utilities, let us say, subsidies of undetermined magnitude for their participation in the development of nuclear power. Such subsidies resulting from dual transactions might well escape the public eye.

The Federal Power Commission analysis submitted by Chairman Kuykendall, in pointing out the lack of legislative standards and the subsidy possibilities for electric utilities in the sections discussed immediately above, added this note:

> If subsidies are to be permitted, consideration should be given to the question of the desirability of provisions for passing the benefits of such subsidies on to the public. (Hearings, pt. II, p. 1131.)

The legal ramifications of the intermingled incidents of public and private ownership in nuclear-producing facilities have not been explored by the committee. We venture to suggest that private firms, including utilities, may very well find themselves subject to a variety of Federal statutes affecting Government business in private plants, including the Walsh-Healey Act and other labor standards laws, inasmuch as the nuclear material used in their operations will be Government property.

13. OMISSION OF LABOR-MANAGEMENT PROVISIONS

Labor strikes at the Oak Ridge and Paducah plants of the Atomic Energy Commission at the very time when comprehensive legislation to revise the Atomic Energy Act is before the Congress, serves to highlight an area of legislative concern which the sponsors of H. R. 9757 have completely ignored.

Chronic discontent and frequent strife are attributes of employment in atomic occupations. The labor unions in these occupations believe they are unduly handicapped by the use of secrecy and security as a weapon of management to bludgeon their members into submission and to distort or nullify the procedures of collective bargaining. Many union representatives believe, too, that the Atomic Energy Commission has been completely oriented to the management side in labor disputes.

Whether or not legislative provisions can be written to alleviate the persistent sore spots in atomic labor-management relations, certainly the legislation can at least provide for more effective labor-management representation in the councils of the Atomic Energy Commission. The American Federation of Labor representative who testified before our committee on two separate occasions, has voiced the federation's belief that steps toward this end would have a salutary effect. He also observed—hearings, part I, page 278:

> It is worth noting that the membership of the Atomic Energy Commission and other top jobs in that agency have been filled by individuals drawn from the legal profession, Government, business, and finance. Corporation lawyers, investment bankers, Government bureaucrats would seem to be blessed in some mysterious manner with a genius for administering atomic-energy affairs that has been denied to trade-union leaders and officials. We believe that in the ranks of organized labor there are many able and public-spirited administrators who could bring a fresh view to the Atomic Energy Commission and its work and perform a very useful service.

Although the legislation cannot dictate whom the President should appoint to the Commission, at least it can provide for a labor-management advisory committee, coordinate with other advisory committees provided in the bill. Such a committee might well be composed of equal numbers of management and labor representatives, with a public chairman appointed by the President, by and with the consent of the Senate, and serving at the pleasure of the President.

The fields of interest and attention on the part of the labor-management advisory committee would encompass more than assistance in promoting healthier attitudes toward collective bargaining problems in an area hedged in by difficult security requirements.

The whole difficult area of personnel security, which would involve, under this bill, investigations by the Civil Service Commission and the FBI of the character, associations, and loyalty of privately employed persons having access to restricted data, might well come under the continued scrutiny of the labor-management advisory committee.

Assistance could be provided in the application of safety standards, adequate workman's compensation provisions, and other protective measures in licenses for new and hazardous atomic occupations.

Studies and preparatory steps could be undertaken to minimize the impact of atomic enterprises in industries or areas whose populations depend on competing activities for a livelihood. The economic distress of the coal-mining industry, for example, might become even worse by the substitution of atomic fuel for coal in generating electrical power.

The framers of the McMahon Act had such eventualities in mind when they wrote a requirement for the 7 (b) report discussed above. The special Senate Committee on Atomic Energy reported in 1946—79th Congress, 2d session, Senate Report No. 1211, page 20:

> The committee is aware, nonetheless, that the sudden introduction of certain devices utilizing the power released by nuclear fission might precipitate profound economic

disorganization. Great industrial installations representing nationwide investments, employing many thousands of workers, might be rendered obsolete.

14. COMPLICATING INTERNATIONAL ARRANGEMENTS

We stated at the outset our conviction that international matters relating to atomic energy would be better treated in legislation separate from that which seeks to open the atomic field to domestic private enterprise and profit-making opportunities. Our dependence on foreign sources of uranium, our mutual defense requirements, our moral and economic obligations to assist less privileged nations, our never-ending search for world peace—all these would seem to pose problems of an order and magnitude that press more urgently for solution than how to make a profit from the atom.

Some years ago our Government outlined a plan for the international control of atomic weapons. The plan embraced procedures, carefully drawn, to provide for the gradual transfer of our atomic facilities to international control without endangering national security. It was conceived that the international atomic authority would maintain an inspection system to make sure that no nation would deviate from the control arrangements for aggressive ends.

The Soviets would have no part of this plan. In those days, especially before they had atomic weapons, they insisted that such weapons be banned outright by treaty rather than put under the control of an international authority. Nor did they take kindly to the idea of inspectors coming behind the Iron Curtain. In the face of persistent and stubborn refusal by Soviet Russia to consider a control agency, our plan became dormant.

But the United States has never abandoned as a stated policy its willingness to participate in a really effective program of atomic armament control. The goal may be too remote for achievement in our time, but certainly we should do nothing to throw obstacles in the way of that achievement. Whether the creation of vested ownership rights in atomic facilities by private persons will narrow our opportunities to negotiate in matters which may determine the life or death of civilized society is a question deserving of our most earnest consideration.

When President Eisenhower proposed in an address to the United Nations General Assembly the creation of an international agency to develop peacetime uses of atomic energy, new hope was kindled among peoples everywhere that somehow this might be a vehicle for promoting world peace. Even the Soviets did not dare to ignore the compelling force of this appeal for cooperative peaceful endeavor.

Reportedly, our Secretary of State entered into preliminary discussions with the Soviets on the President's proposal. So far as we know, nothing productive resulted from those meetings. Although the dismal record of Soviet intransigeance leaves little to hope for, we see nothing to be gained by clothing the door entirely to possible participation by Soviet Russia in an atomic pool plan for peaceful uses.

Section 124 of the bill would seem to close that door. Whereas the President would be authorized to enter into an international arrangement with a group of nations providing for international cooperation in the nonmilitary applications of atomic energy, and to cooperate with that group in specific atomic endeavor, the proviso is entered that the cooperation must accord with the conditions presented in section 123.

Section 123 requires that agreements for cooperation cannot be undertaken until a series of conditions are fulfilled by the other nation or nations involved, including acceptable security safeguards and standards. It would be utterly unrealistic to suppose that Soviet Russia could ever comply with the security and other requirements laid down in section 123, even though the atomic pool is intended for nonmilitary uses.

The international atomic pool provision comprising section 124 seems to be a last-minute insertion to suggest that the bill is intended to implement President Eisenhower's proposal. Actually, the legislative requirements, if any, of the atomic pool proposal never have been communicated to us. President Eisenhower in his February 17 message to the Congress making recommendations for legislation to facilitate cooperation in atomic affairs with other nations, stated as follows:

> These recommendations are apart from my proposal to seek a new basis for international cooperation in the field of atomic energy as outlined in my address before the General Assembly of the United Nations last December. Consideration of additional legislation which may be needed to implement that proposal should await the development of areas of agreement as a result of our discussions with other nations. (83d Cong., 2d sess., House Doc. No. 328, p. 4.)

Not only would section 124 preclude the "new basis for international cooperation" which the President seeks; the wording of the section is confusing and self-contradictory. It would authorize the President to enter an international arrangement, which by definition in section 11k excludes any agreement for cooperation; and yet section 124 requires that an agreement for cooperation is necessary if the desired cooperation is to be exercised.

The United States might very well find itself in the position under section 124 of consummating agreements with other nations without being able to exercise the cooperation promised by the agreement unless such cooperation conformed rigidly to the formula contained in section 123.

If the contention is that the President could further the atomic pool idea by the conventional treaty route, or by an international agreement—which requires approval by both Houses of Congress under the bill—independent of section 124, then it is difficult to see what purpose the section serves, except a restrictive one.

The President has broad authority now to negotiate treaties under the Constitution. Section 124 attempts to prescribe a rigid and more restrictive formula of negotiation upon the President and his Secretary of State. The authority to negotiate treaties in our opinion should be left unfettered, subject always, of course, to Senate debate and final ratification.

No additional authority is conferred upon the President by the second method embodied in the term "international arrangement," i. e., "international agreement." The President already has the right to send to Congress any international agreement for legislative approval.

Section 124 on its face seems to authorize the President to "enter into an international arrangement with a group of nations," but the proviso requires compliance with the provisions of section 123, which provides for bilateral agreement only between the United States and an individual nation on all peacetime exchange of nuclear material or nuclear information. The reference therefore to a "group of nations" is misleading because of the proviso. Again it is restrictive and inflexible rather than helpful. It could prove to be embarrassing.

While President Eisenhower's original proposal evidently contemplated a single international atomic pool for peacetime purposes under one universal agreement, our country may be obliged, or may wish, to proceed by smaller group or regional stages, particularly in view of the Soviet Union's negative response. If the negotiations must be undertaken through a bilateral approach, then the language of section 124 which on its face indicates a multilateral agreement, again becomes ambiguous and restrictive on the President.

Section 124 appears to us a premature attempt to legislate in a delicate field where international diplomatic negotiations are pending, and it conflicts with the President's admonition in his message to the Congress that legislation to implement the atomic pool proposal "should await the development of areas of agreement as a result of our discussions with other nations."

Section 123, which sets forth a method of cooperation other than treaties or international agreements, is the principal section of the bill dealing with the authority of the President to make executive agreements on the international plane. The President cannot make any such agreement unless it is approved by the Atomic Energy Commission or in case of agreements relating to defense and military matters, by the Department of Defense. Note that the Atomic Energy Commission is an independent agency whose members serve, not at the pleasure of the President, but for a fixed statutory term.

We seriously question the subordination of the President's authority in the conduct of foreign affairs to the judgment of officials who may not be in a position to weigh the importance of countervailing risks, as is the President. In the present juncture of world affairs it cannot be assumed in case of doubt that no agreement is preferable to the only obtainable agreement, even though the obtainable agreement has not all the provisions which those charged with the technical judgments would like it to

have. In place of requiring the consent of the Atomic Energy Commission or the Department of Defense, we would prefer merely that the President, before making an agreement, be required to obtain a statement from the Commission or the Department of Defense as to the desirability and sufficiency of the agreement in respect to the matters referred to in section 123a.

Many of the provisions in section 123 as well as some of the provisions in section 144 to which we will refer seem in part to be based on the obsolete and false assumption that we have a monopoly of atomic materials and weapons, that our allies will have only what we give them and will have nothing to give in return. We know that Great Britain, for instance, has manufactured and exploded atomic bombs.

Section 144a and section 144b both carry a proviso that international cooperation shall not involve the communication of restricted data relating to the design and fabrication of atomic weapons except as to limited external characteristics. Taken in conjunction with the broad definition of "design" in section 11i, which includes drawings, blueprints, and so forth, and the development data behind the design, these restrictions ultimately may work to our own disadvantage. They hark back to the time when we had or thought we had a monopoly in this field.

While it is not suggested that there should be a free interchange of restricted data, we fear that any blanket refusal to exchange restricted data under any and all circumstances in the future might debar us from cooperation in particular projects where we might have much more to gain than to lose. Great Britain, for example, might come up with some discovery comparable in this field to the jet engine in aviation and might be debarred from working with us on it because of our own shortsighted and nonreciprocal policies.

Having in mind that a 1951 amendment which comprises section 10 (a) (3) of the McMahon Act set forth similar restrictions on communicating design and fabrication data, nevertheless we believe that new legislation must consider the changing role of atomic armament in mutual defense. An understanding of this part of the bill is important and we offer this explanation of its meaning so that each member may judge as to whether it goes too far or not far enough.

The exchange of information on weapons is limited to "external characteristics, including size, weight, and shape, yields, and effects, and systems employed in the delivery or use thereof." These areas of disclosure in the main would permit our military personnel to show our allies an atomic or thermonuclear weapon and describe these external characteristics, also the explosive power in terms of equivalent tons of TNT, the blast effect in terms of square miles destroyed, and the degree of radioactive poisoning of land, water, and air in the vicinity. It would allow disclosure of methods of bomb delivery, whether by plane, artillery device, guided missile, and so forth.

Apparently American military personnel would be permitted to train allied personnel in attaching or installing such weapons in delivery vehicles or devices—section 144b (2). But they would not be allowed to instruct our allies as to how the weapons are constructed internally, how they are assembled or disassembled, or how they are triggered for explosion.

It is obvious that we do not intend to deliver any of these weapons to any military ally for their own use, as complete knowledge of the internal working would be necessary for such use or adjustment in case the weapon failed to work just prior to release.

Therefore we must acknowledge that the bill does not implement the use of our atomic or hydrogen weapons by our allies on behalf of the defense of the free world. It does not make it possible to include such armament in the common arsenal of the North Atlantic Treaty Organization forces, except as they are retained in our sole custody.

Therefore we raise the following questions.

For what purpose do we contemplate training allied military personnel under such limitations?

Will such training be considered seriously by those who receive it?

Will the imparted knowledge of "effect" of atomic-hydrogen weapons be considered as inadequate and be used as propaganda by the enemies of America to deride our lack of faith in our allies?

The language of this bill relating to the highly important subject of foreign relations, with immediate reference to sections 123, 124, 141 and 144 is complicated, ambiguous, restrictive and potentially embarrassing to the President. It adds nothing to the President's treaty powers or the right of Congress to pass specific legislation.

In the lowest strata of "agreement for cooperation" with foreign nations, the restrictive procedures imposed would seem to be of limited assistance in the exchange or use of nuclear materials and information with our allies. Those who fear vital disclosure of security information need have but little fear. Those who hope for wider dissemination of nuclear information have but little grounds for their hope.

15. INCREASING MILITARY POSTURE

Although we do not believe H. R. 9757 departs in any fundamental way from the accepted principle of civilian control and management of the atomic energy program, we wish to take this opportunity to alert the Congress and the public to the possibilities that lie ahead.

It is generally acknowledged that atomic weapons are rapidly achieving a conventional status in military planning for national and allied defenses. Accordingly, we may expect that the military will steadily seek increasing control over the weapons phases of the atomic energy program. This is not said in criticism but only as a reminder that there are bounds which the military must not transgress if the principle of civilian control is to be maintained.

Military influence in the Atomic Energy Commission is by no means lacking and, we believe, it is more pervasive than heretofore.

Apart from the exercise of military influence within the Commission, formal organizational arrangements and procedures have been established under the McMahon Act, slightly modified in the pending bill, to administer the military application of atomic energy and to effect the proper liaison between the Commission and the Department of Defense. We believe the joint committee should have inquired into the efficacy of these arrangements in connection with the proposed revisions of the McMahon Act.

The pending bill gives new authority and responsibility to the Department of Defense in various atomic affairs.

The Department of Defense would be permitted to produce nuclear material in connection with atomic facilities operated for power and other purposes within the military programs—section 91b (2).

The Department of Defense would be authorized to manufacture, produce, or acquire atomic utilization facilities, and its contractors would be likewise authorized, without the need for a license from the Atomic Energy Commission—section 110b.

The Department of Defense would have to approve agreements for cooperation undertaken by the President, or by the Department itself at the President's direction, with other nations with respect to specified atomic matters according to the language in sections 123 and 144b. In effect, an attempt has been made to give power to the Department of Defense to check Presidential action. The grant of power is questionable on constitutional grounds, in our opinion, as the President is Commander in Chief and therefore can direct the Department of Defense in matters pertaining to national defense.

The Department of Defense would have joint authority with the Atomic Energy Commission to decide whether certain atomic data could be communicated to other nations—section 144b.

The Department of Defense has joint authority with the Commission to determine when data relating to atomic weapons may be published and what information may be removed from the restricted category in the weapons field—section 142 c and d.

Employees of the Department of Defense, members of the Armed Forces, and contractors of the Department would be authorized to have access to restricted data in certain circumstances determined by the Department of Defense—section 143.

We cite these provisions to indicate the increasing military posture of the atomic energy program.

INCREASED DISABILITY COMPENSATION FOR EX-SERVICEMEN

The SPEAKER pro tempore (Mr. CANFIELD). Under previous order of the House, the gentlewoman from Massachu-

setts [Mrs. ROGERS] is recognized for 5 minutes.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I rise at this time to state that there seems to have been a great deal of propaganda going on regarding the bill H. R. 9020. There was a petition to discharge the Rules Committee from its consideration, filed by the gentleman from New York [Mr. RADWAN]. I do not know the number of signatures on it now, but there were 164 on Friday, which I think is a record for a petition that had been on the desk for only 3 hours.

The propaganda is that there will be a compromise. No compromise has been agreed to. I do not know that any will be agreed to. There has been propaganda to the effect that this bill is a bonus bill. It is not a bonus bill.

The bill provides for 10 percent across the board for service-connected cases, about that for widows, orphans, and dependents, and then in the non-service-connected and the pension class there was an increase of a certain amount for certain veterans' pensions, Spanish American War widows, other widows, and other cases.

It is in no wise a bonus bill, Mr. Speaker. I emphasize that over and over again because there is a curious propaganda that has been going on against the bill, a curious propaganda that there was a compromise. I understand there were 20 Members who on Friday did not sign the petition because they thought an agreement had been reached.

It has been stated that if there is not a compromise the Congress will adjourn before there is time to bring the petition up for action the necessary number of days after it has been signed and been on the Legislative Calendar. If Congress plans to adjourn on the 31st of July, I can see no reason why the Members who are interested in seeing H. R. 9020 pass should not sign the petition. I do not believe for one minute the Congress will adjourn without seeing that the veterans are cared for. They have been the forgotten men all through this legislative year. In spite of repeated requests for rules on our bills, scarcely a rule has been granted. I for one do not know what I can say when I talk to the veterans of the country. I have to tell them we have not passed much legislation. Certainly the veterans of all the people in the United States today should be considered and should have their legislation voted upon. I cannot believe that this Congress will close its doors for the season to veterans' legislation. You cannot say to the veteran when you go home, "You are forgotten, you have been forgotten," because we would not be in Congress today if the veterans had not sent us.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. SCRIVNER on the subject Sport Car Racing on Strategic Air Command Bases and to include a GAO report.

Mr. BURDICK and to include extraneous matter.

Mr. POFF (at the request of Mr. YOUNGER) and to include extraneous matter.

Mr. FORRESTER.

Mr. REAMS.

Mr. DIES.

Mr. ZABLOCKI (at the request of Mr. JOHNSON of Wisconsin).

Mr. ROONEY to revise and extend his remarks made in Committee of the Whole today and to include extraneous matter.

Mr. KNOX.

Mr. SIEMINSKI in two instances and to include extraneous matter.

Mrs. HARDEN.

Mr. BERRY (at the request of Mr. ARENDS).

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 3339. An act to authorize the Farm Credit Administration to make loans of the type formerly made by the Land Bank Commissioner; to the Committee on Agriculture.

S. 3713. An act to give effect to the International Convention for the High Seas Fisheries of the North Pacific Ocean, signed at Tokyo, May 9, 1952, and for other purposes; to the Committee on Merchant Marine and Fisheries.

ENROLLED BILLS SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 2617. An act for the relief of Guillermo Morales Chacon;

H. R. 2846. An act authorizing the President to exercise certain powers conferred upon him by the Hawaiian Organic Act in respect of certain property ceded to the United States by the Republic of Hawaii, notwithstanding the acts of August 5, 1939, and June 16, 1940, or other acts of Congress;

H. R. 4928. An act to authorize the Secretary of Agriculture to convey a certain parcel of land to the city of Clifton, N. J.;

H. R. 6263. An act to authorize the Secretary of Agriculture to convey certain lands in Alaska to the Rotary Club of Ketchikan, Alaska;

H. R. 6642. An act for the relief of Mrs. Augusta Selmer-Andersen;

H. R. 6882. An act to amend the act of September 27, 1950, relating to construction of the Vermejo reclamation project;

H. R. 6975. An act authorizing the Secretary of the Interior to convey certain lands to the Siskiyou Joint Union High School District, Siskiyou County, Calif.;

H. R. 7012. An act for the relief of Nicole Goldman;

H. R. 8549. An act granting the consent of Congress to The Breaks Interstate Park compact;

H. R. 8713. An act to amend section 1 (d) of the Helium Act (50 U. S. C. sec. 161 (d)), and to repeal section 3 (13) of the act entitled "An act to amend or repeal certain Government property laws, and for other purposes," approved October 31, 1951 (65 Stat. 701).

H. R. 9006. An act to authorize the Secretary of the Army to donate 28 paintings to the Australian War Memorial; and

H. R. 9242. An act to authorize certain construction at military and naval installations and for the Alaska Communications System, and for other purposes.

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 2987. An act to provide for the transfer of hay and pasture seeds from the Commodity Credit Corporation to the Federal land-administering agencies.

BILLS PRESENTED TO THE PRESIDENT

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee did on July 16, 1954, present to the President, for his approval, bills of the House of the following titles:

H. R. 1067. An act to authorize the Supreme Court of the United States to make and publish rules for procedure on review of decisions of the Tax Court of the United States;

H. R. 1673. An act for the relief of James I. Smith;

H. R. 5578. An act for the relief of Hatsuko Kuniyoshi Dillon;

H. R. 5731. An act to authorize the Secretary of the Interior to construct facilities to provide water for irrigation, municipal, domestic, military, and other uses from the Santa Margarita River, Calif., and for other purposes; and

H. R. 7664. An act to provide for the development of the Priest Rapids site on the Columbia River, Wash., under a license issued pursuant to the Federal Power Act.

ADJOURNMENT

Mr. ARENDS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 13 minutes p. m.), under its previous order, the House adjourned until tomorrow, Tuesday, July 20, 1954, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1741. A letter from the Executive Director, Rubber Producing Facilities Disposal Commission, transmitting a report prepared by the Reconstruction Finance Corporation, the operating agency, with respect to its expenditures for repairs, replacements, additions, improvements, or maintenance of the Government-owned rubber-producing facilities during the 11-month period in fiscal year 1954, ending May 31, 1954, pursuant to section 15 of the Rubber Producing Facilities Disposal Act of 1953 (67 Stat. 408); to the Committee on Armed Services.

1742. A letter from the Director, Legislative Liaison, Department of the Air Force, transmitting the quarterly report of the number of officers assigned or detailed to permanent duty in the executive element of the Air Force at the seat of the Government as of the end of the fourth quarter of fiscal year 1954, pursuant to section 201 (c) of the Air Force Organization Act of 1951 (Public Law 150, 82d Cong.); to the Committee on Armed Services.

1743. A letter from the Director, Office of Defense Mobilization, Executive Office of the President, transmitting the quarterly report for the quarter ending March 31, 1954, pursuant to section 304 (b) of the Defense Production Act; to the Committee on Banking and Currency.

1744. A letter from the Acting Comptroller General of the United States, transmitting a report on the audit of Fish and Wildlife

Service, an agency in the Department of the Interior, for the fiscal year ended June 30, 1953, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

1745. A letter from the Assistant Secretary of the Interior, transmitting a proposed award of a concession permit to National Park Concessions, Inc., which will, when approved by the regional director, region No. 4, National Park Service, authorize a limited concession operation in the Hurricane Ridge Public Service Building, Olympic National Park, Wash., for the period June 15 to September 15, 1954, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

1746. A letter from the Postmaster General, transmitting a draft of proposed legislation entitled "A bill relating to the payment of money orders"; to the Committee on Post Office and Civil Service.

1747. A letter from the Chief Justice, Supreme Court of the United States, transmitting the report of the proceedings of a special meeting of the Judicial Conference of the United States, held at Washington, D. C., April 15 and 16, 1954, pursuant to title 28, United States Code, section 331. (H. Doc. No. 475); to the Committee on the Judiciary and ordered to be printed.

1748. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting a copy of an order entered in the case of Fintan Patrick Walsh, file 56339/840, who has been found admissible into the United States, pursuant to section 212 (a) (28) (I) (ii) of the Immigration and Nationality Act; to the Committee on the Judiciary.

1749. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in cases where the authority contained in section 212 (d) (3) of the Immigration and Nationality Act was exercised in behalf of such aliens, pursuant to section 212 (d) (6) of the Immigration and Nationality Act; to the Committee on the Judiciary.

1750. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to Public Law 863, 80th Congress, amending subsection (c) of section 19 of the Immigration Act of February 5, 1917, as amended (8 U. S. C. 155 (c)); to the Committee on the Judiciary.

1751. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to section 244 (a) (5) of the Immigration and Nationality Act of 1952 (8 U. S. C. 1254 (a) (5)); to the Committee on the Judiciary.

1752. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders granting the applications for permanent residence filed by the subjects, pursuant to section 4 of the Displaced Persons Act of 1948, as amended; to the Committee on the Judiciary.

1753. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to section 244 (a) (1) of the Immigration and Nationality Act of 1952 (8 U. S. C. 1254 (a) (1)); to the Committee on the Judiciary.

1754. A letter from the Assistant Secretary of the Navy for Air, transmitting the annual report of all claims paid for the fiscal year beginning July 1, 1953, and ending June 30, 1954, pursuant to section 2673 of title 28, United States Code; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, pursuant to the order of the House of July 14, 1954, the following bill was reported on July 16, 1954:

Mr. TABER: Committee on Appropriations. H. R. 9936. A bill making supplemental appropriations for the fiscal year ending June 30, 1955, and for other purposes; without amendment (Rept. No. 2266). Referred to the Committee of the Whole House on the State of the Union.

Under clause 2 of rule XIII, pursuant to the order of the House of July 15, 1954, the following bill was reported on July 16, 1954:

Mr. LECOMPTE: Committee on House Administration. H. R. 9413. A bill to reorganize the Capitol Police force in order to increase its efficiency in the performance of its duties; without amendment (Rept. No. 2267). Referred to the Committee of the Whole House on the State of the Union.

Under clause 2 of rule XIII, pursuant to the order of the House of July 15, 1954, the following bills were reported on July 17, 1954:

Mr. VORYS: Committee on Foreign Affairs. H. R. 9910. A bill to amend section 413 (b) of the Foreign Service Act of 1946; without amendment (Rept. No. 2268). Referred to the Committee of the Whole House on the State of the Union.

Mr. WOLCOTT: Committee on Banking and Currency. H. R. 9756. A bill to increase the borrowing power of Commodity Credit Corporation; without amendment (Rept. No. 2269). Referred to the Committee of the Whole House on the State of the Union.

Mr. WOLCOTT: Committee on Banking and Currency. S. 3589. An act to provide for the independent management of the Export-Import Bank of Washington under a board of directors, to provide for the representation of the bank on the National Advisory Council on International Monetary and Financial Problems and to increase the bank's lending authority; without amendment (Rept. No. 2270). Referred to the Committee of the Whole House on the State of the Union.

Under clause 2 of rule XIII, pursuant to the order of the House of July 15, 1954, the following conference report was filed on July 17, 1954:

Mr. WOLCOTT: Committee of conference. H. R. 7839. A bill to aid in the provision and improvement of housing, the elimination and prevention of slums, and the conservation and development of urban communities (Rept. No. 2271). Ordered to be printed.

[*Submitted July 19, 1954*]

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BURDICK: Committee of conference. H. R. 5185. A bill for the relief of Klyce Motors, Inc. (Rept. No. 2272). Ordered to be printed.

Mr. BURDICK: Committee of conference. H. R. 2098. A bill to provide for determining the compensation of certain persons whose lands have been flooded and damaged by reason of fluctuations in the water level of the Lake of the Woods, Minn. (Rept. No. 2273). Ordered to be printed.

Mr. D'EWART: Committee of conference. H. R. 4854. A bill to authorize the Secretary of the Interior to construct, operate, and maintain the irrigation works comprising the Foster Creek division of the Chief Joseph Dam project, Washington (Rept. No. 2274). Ordered to be printed.

Mr. ARENDS: Committee of conference. H. R. 8571. A bill to authorize the construction of naval vessels, and for other purposes (Rept. No. 2275). Ordered to be printed.

Mr. KEATING: Committee of Conference. S. 252. An act to permit all civil actions against the United States for recovery of taxes erroneously or illegally assessed or collected to be brought in the district courts with right of trial by jury (Rept. No. 2276). Ordered to be printed.

Mr. REES of Kansas: Committee on Post Office and Civil Service. Report on performance rating plans in the Federal Government; without amendment (Rept. No. 2277). Referred to the Committee of the Whole House on the State of the Union.

Mr. REES of Kansas: Committee on Post Office and Civil Service. Second intermediate report pertaining to a survey and study of postal transportation; without amendment (Rept. No. 2278). Referred to the Committee of the Whole House on the State of the Union.

Mrs. ROGERS of Massachusetts: Committee on Veterans' Affairs. H. R. 9888. A bill to amend the laws granting education and training benefits to certain veterans to extend the period during which such benefits may be offered; with amendment (Rept. No. 2279). Referred to the Committee of the Whole House on the State of the Union

Mr. GRAHAM: Committee on the Judiciary. House Joint Resolution 527. Joint resolution to provide for the protection of defense facilities; with amendment (Rept. No. 2280). Referred to the Committee of the Whole House on the State of the Union.

Mr. YOUNGER: Committee on Interstate and Foreign Commerce. H. R. 6310. A bill to amend the Civil Aeronautics Act of 1938 to exempt operations in the transportation of livestock, fish, and agricultural, floricultural, and horticultural commodities from the act and from regulation by the Civil Aeronautics Board thereunder; without amendment (Rept. No. 2281). Referred to the Committee of the Whole House on the State of the Union.

Mr. SHORT: Committee on Armed Services. H. R. 9924. A bill to provide for family quarters for personnel of the military departments of the Department of Defense and their dependents, and for other purposes; without amendment (Rept. No. 2282). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROBSION of Kentucky: Committee on the Judiciary. H. R. 8034. A bill for the incorporation of the Sons of Union Veterans of the Civil War; with amendment (Rept. No. 2283). Referred to the House Calendar.

Mr. PELLY: Committee on Interstate and Foreign Commerce. S. 3464. An act to amend the Communications Act of 1934 in order to make certain provision for the carrying out of the Agreement for the Promotion of Safety on the Great Lakes by Means of Radio; with amendment (Rept. No. 2284). Referred to the Committee of the Whole House on the State of the Union.

Mr. PELLY: Committee on Interstate and Foreign Commerce. S. 2453. An act to amend the Communications Act of 1934, as amended, with respect to implementing the International Convention for the Safety of Life at Sea relating to radio equipment and radio operators on board ship; with amendment (Rept. No. 2285). Referred to the Committee of the Whole House on the State of the Union.

Mr. McCONNELL: Committee of conference. S. 2759. An act to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes (Rept. No. 2286). Ordered to be printed.

Mr. McCONNELL: Committee of conference. H. R. 9040. A bill to authorize cooperative research in education (Rept. No. 2287). Ordered to be printed.

Mr. McCONNELL: Committee of conference. H. R. 7601. A bill to provide for a White House Conference on Education (Rept. No. 2288). Ordered to be printed.

Mr. McCONNELL: Committee of conference. H. R. 7434. A bill to establish a National Advisory Committee on Education (Rept. No. 2289). Ordered to be printed.

Mr. HOPE: Committee on Agriculture. S. 3137. An act to make the provisions of the act of August 28, 1937, relating to the conservation of water resources in the arid and semiarid areas of the United States, applicable to the entire United States, and to increase and revise the limitation on aid available under the provisions of the said act, and for other purposes; with amendment (Rept. No. 2290). Referred to the Committee of the Whole House on the State of the Union.

Mr. GRAHAM: Committee on the Judiciary. H. R. 7130. A bill to provide for the forfeiture of the citizenship of persons convicted of advocating or conspiring to advocate the overthrow of the Government by force or violence; with amendment (Rept. No. 2291). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 642. Resolution for the consideration of H. R. 6004, a bill to amend part II of title III of the Communications Act of 1934, so as to require the installation of an automatic radio call selector on cargo ships of the United States carrying less than two radio operators, and for other purposes; without amendment (Rept. No. 2292). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 643. Resolution for consideration of H. R. 9859, a bill authorizing the construction, repair, and preservation of certain public works on rivers and harbors for navigation, flood control, and for other purposes; without amendment (Rept. No. 2293). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 644. Resolution for consideration of H. R. 9756, a bill to increase the borrowing power of Commodity Credit Corporation; without amendment (Rept. No. 2294). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 645. Resolution for consideration of S. 3589, an act to provide for the independent management of the Export-Import Bank of Washington under a Board of Directors, to provide for the representation of the bank on the National Advisory Council on International Monetary and Financial Problems and to increase the bank's lending authority; without amendment (Rept. No. 2295). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 646. Resolution waiving all points of order against H. R. 9936, a bill making supplemental appropriations for the fiscal year ending June 30, 1955, and for other purposes; without amendment (Rept. No. 2296). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, pursuant to the order of the House of July 14, 1954, the following bill was introduced on July 16, 1954:

By Mr. TABER:

H. R. 9936. A bill making supplemental appropriations for the fiscal year ending June 30, 1955, and for other purposes; to the Committee on Appropriations.

[*Introduced and referred July 19, 1954*]

Under clause 4 of rule XXII public bills and resolutions were introduced and severally referred as follows:

By Mr. EDMONDSON:

H. R. 9937. A bill to authorize the Farm Credit Administration to make loans of the type formerly made by the Land Bank Commissioner; to the Committee on Agriculture.

By Mr. HARRISON of Wyoming:

H. R. 9938. A bill to amend the Internal Revenue Code of 1954 to provide emergency tax relief to livestock growers who are forced to dispose of their herds because of drought or other natural causes beyond their control; to the Committee on Ways and Means.

By Mr JENSEN:

H. R. 9939. A bill making an appropriation for the Little Sioux River, Iowa, flood control project for the year ending June 30, 1955; to the Committee on Appropriations.

By Mr. JONES of Alabama:

H. R. 9940. A bill to authorize the Farm Credit Administration to make loans of the type formerly made by the Land Bank Commissioner; to the Committee on Agriculture.

By Mr. KNOX:

H. R. 9941. A bill to amend the Internal Revenue Code of 1939 with respect to definition of a Western Hemisphere trade corporation; to the Committee on Ways and Means.

By Mr. O'NEILL:

H. R. 9942. A bill to amend paragraph 717 of title I of the Tariff Act of 1930, with respect to duties applicable in the case of fish sticks; to the Committee on Ways and Means.

By Mr. PHILBIN (by request):

H. R. 9943. A bill to amend the Mustering-Out Payment Act of 1944, and for other purposes; to the Committee on Armed Services.

By Mr. RAY:

H. R. 9944. A bill to provide for intensified research into the causes, hazards, and effects of air pollution, and the methods for its prevention and control, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. REES of Kansas:

H. R. 9945. A bill to provide for the purchase of bonds to cover postmasters, officers, and employees of the Post Office Department, contractors with the Post Office Department, mail clerks of the Armed Forces, and for other purposes; to the Committee on Post Office and Civil Service.

By Mrs. ROGERS of Massachusetts (by request):

H. R. 9946. A bill to amend the Mustering-Out Payment Act of 1944, and for other purposes; to the Committee on Armed Services.

By Mr. SIMPSON of Pennsylvania:

H. R. 9947. A bill to amend section 208 (b) of the Technical Changes Act of 1953 (Public Law 287, 83d Cong.); to the Committee on Ways and Means.

By Mr. YORTY:

H. R. 9948. A bill to provide for the construction of the San Luis Reservoir, the San Luis West Side Canal, the Avenal Gap Reservoir, and the Avenal Canal, Central Valley project, Calif.; to the Committee on Interior and Insular Affairs.

By Mr. DIES:

H. Res. 641. Resolution proposing a special committee to investigate public property; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. GWINN:

H. R. 9949. A bill for the relief of Uldric Thompson, Jr.; to the Committee on the Judiciary.

By Mr. KERSTEN of Wisconsin:

H. R. 9950. A bill for the relief of certain Polish orphans; to the Committee on the Judiciary.

By Mr. MASON:

H. R. 9951. A bill for the relief of Margareth Berg Kiessling; to the Committee on the Judiciary.

By Mr. RABAUT:

H. R. 9952. A bill for the relief of Nurhan Akarakcian; to the Committee on the Judiciary.

By Mr. SCHERER:

H. R. 9953. A bill for the relief of Mr. Fu-Ho Chan and Mrs. Fu-Ho Chan; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1106. By the SPEAKER: Petition of the president, National Federation of Business and Professional Women's Clubs, Inc., New York, N. Y., urging favorable consideration of statehood for Hawaii and Alaska; to the Committee on Interior and Insular Affairs.

1107. Also, petition of the city clerk, Ottumwa, Iowa, urging action without further delay by the Federal Government in the matter of the construction of dams on the Des Moines River; to the Committee on Public Works.

EXTENSIONS OF REMARKS

Western Hemisphere Trade Corporation

EXTENSION OF REMARKS

OF

HON. VICTOR A. KNOX

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 19, 1954

Mr. KNOX. Mr. Speaker, under leave to extend my remarks, I wish to include herein a statement pertaining to a measure which I have introduced today to amend the Internal Revenue Code of 1939 with respect to the definition of a Western Hemisphere trade corporation.

In 1942 Congress added section 109 to the Internal Revenue Code, as follows:

SEC. 109. Western Hemisphere trade corporations.

For the purposes of this chapter, the term "Western Hemisphere trade corporation" means a domestic corporation all of whose business is done in any country or countries in North, Central, or South America, or in the West Indies, or in Newfoundland and which satisfies the following conditions:

(a) If 95 percent or more of the gross income of such domestic corporation for the 3-year period immediately preceding the close of the taxable year (or for such part of such period during which the corporation was in existence) was derived from sources other than sources within the United States; and

(b) If 90 percent or more of its gross income for such period or such part thereof was derived from the active conduct of a trade or business.

In explanation of the definition of a Western Hemisphere trade corporation, the Senate Finance Committee report on the 1942 bill contained the following:

SEC. 142. Western Hemisphere trade corporation.

This section, which did not appear in the House bill, exempts from surtax certain corporations deriving their income principally from sources outside the United States and within the Western Hemisphere.

To be entitled, however, to such exemption, it is required that not less than 95 percent of the gross income of such corporations must be derived from sources without the United States, while 90 percent of such gross income must be derived from the active conduct of a trade or business. In addition, the entire trade or business of such corporations must be carried on in the Americas or adjacent areas. However, merely incidental economic contact with other countries outside such geographical sphere will not place such corporations outside the exempt classification. For example, the A corporation is engaged in mining activities in South America and in shipping its products to foreign countries outside the United States, including Great Britain. The mere fact that the A corporation ships its goods to England, retaining title to such goods until acceptance of the bill of lading and draft in order to insure collection of the price, will not be considered as carrying on business outside the Western Hemisphere. (S. Rept. 1631, 77th Cong., 2d sess., p. 111; 1942-2 Cum. Bull. 587-588.)

The 1942 report of the Senate Finance Committee thus clearly stated that a corporation did not lose its Western Hemisphere trade corporation status merely because of "incidental economic contact" with a non-Western Hemisphere area, and illustrated the principle by the example of a sale by a South American mining company which shipped the products to England. It would, therefore, seem to follow obviously that if a transaction involving a sale with shipment to England was not intended to constitute "doing business" outside the Western Hemisphere, then a mere purchase from outside the Western Hemisphere, likewise, is not to be considered "doing business" outside the Western Hemisphere. In line with this congressional intent, the statute was so interpreted by taxpayers and their counsel generally. Moreover, such view was in accordance with all the cases which have ever considered "purchases" in relation to "doing business." The judicial decisions are, and always have been, uniform in the view that mere purchase of goods does not constitute "doing business."

Despite the above, and much to the surprise of everyone, the Bureau of Internal Revenue some 10 years later, in May 1952, issued a ruling to the effect that mere purchase, even insignificant purchase, outside the Western Hemisphere of goods by an otherwise qualified corporation constituted "doing business" outside the Western Hemisphere and resulted in the forfeiture of Western Hemisphere trade status by such corporation.

This surprising ruling brought protests from the American Bar Association, the National Foreign Trade Council, Inc., the United States Chamber of Commerce, and the Machinery and Allied Products Institute, among others.

In its action on H. R. 8300, the Ways and Means Committee, to remedy this situation, modified section 109—section 921 in the new code—as follows:

SEC. 921. Definition of Western Hemisphere trade corporations.

For purposes of this subtitle, the term "Western Hemisphere trade corporation" means a domestic corporation all of whose business (other than incidental purchases) is done in any country or countries in North, Central, or South America, or in the West Indies, or in Newfoundland, and which satisfies the following conditions—

And so forth. In the report on H. R. 8300—page 78—the committee said:

To correct an obvious inequity which has arisen in the administration of this provision, it has provided that incidental purchases made outside of the Western Hemisphere, will not disqualify a corporation from the Western Hemisphere trade corporation credit if it is otherwise eligible for it.

The Senate Finance Committee in its deliberations on H. R. 8300 accepted the House amendment. Because of the policy of both committees that H. R. 8300 would contain no retroactive provisions, such amendment could not be made retroactive in H. R. 8300 and, therefore, to avoid any prejudicial inference which might be drawn from this situation, the Senate added a new sentence to section 921, as follows:

For any taxable year beginning prior to January 1, 1954, the determination as to whether any corporation meets the requirements of section 109 of the Internal Revenue Code of 1939 shall be made as if this section had not been enacted and without inferences drawn from the fact that this section is not expressly made applicable with respect to taxable years beginning prior to January 1, 1954.

Since the inequitable ruling mentioned in the Ways and Means report is being applied back to 1942, it is necessary that the amendment which the Senate and House committees, because of policy considerations, could not make retroactive in H. R. 8300 be made retroactive by a separate bill. Therefore, I have today introduced a bill to correct this situation with regard to taxable years ending prior to January 1, 1954. This bill is noncontroversial in that it makes the identical change to section 109 of the Internal Revenue Code of 1939 as was made by the House and Senate committees in H. R. 8300, namely, the addition of the parenthetical phrase "other than incidental purchases."

The Lesson of Chestertown

EXTENSION OF REMARKS
OF
HON. ALFRED D. SIEMINSKI
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Monday, July 19, 1954

Mr. SIEMINSKI. Mr. Speaker, the question is, Have we learned anything from Chestertown?

On July 16 the press reported 11 dead and some thirty-odd injured as a result of an explosion that rocked the little city of Chestertown, Md., a community of 3,140 people.

The press further reported:

Mass evacuation chokes roads and bridges from Eastern Shore town.

Remember Chestertown, 3,140 people, explosion in plant employing 275 persons, roads and bridges choked, wild confusion, people helpless because transportation system is inadequate; what would happen if a more extensive explosion occurred in a large population center?

Same thing. "Mass evacuation, roads and bridges choked, people panicked, exits blocked, dead-end death."

Our present means of evacuation is totally inadequate. What can we do?

One helicopter for every 100 people, strategically located and maintained in each community, like fire engines, ready for immediate use, might well be the answer.

The Supplemental Appropriation Bill

EXTENSION OF REMARKS
OF
HON. E. Y. BERRY
OF SOUTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Monday, July 19, 1954

Mr. BERRY. Mr. Speaker, I was very much disturbed when I learned that two items were not included in the supplemental appropriations bill as reported by the Appropriations Committee.

One of these items was $22 million for reinstitution of the Federal-aid airport program. In my State of South Dakota, for example, a number of cities and towns and at least one country are extremely desirous of securing Federal assistance for airport construction to keep pace with requirements placed upon them by the growing tendency of our citizens to take to the air for business and agriculture. As you know, general aviation and scheduled airline travel are both increasing.

The $22 million appropriation is considerably less than was originally recommended. Further, the local governments have gone a full year without needed construction.

As evidence of the need for Federal aid for nonairline airports, I would like to point out that there are more than 52,000 private civil aircraft in the United States as compared with approximately 1,300 airline aircraft. The private or general aviation category airplanes are needed to fly to points that the airlines do not serve. Nonscheduled civil aircraft flew more than 8 million hours during 1953 for an estimated 1¼ billion miles and over 3½ billion passenger miles. In view of these facts, I feel general aviation should be given every consideration that is placed on the scheduled airlines. Federal assistance in airport construction is one of the most important considerations due general aviation, and I hope, therefore, that this $22 million item will be appropriated.

The other item in which there is considerable interest in South Dakota and

which was eliminated by the committee was $35 million for aid to States in building hospitals and clinics.

One of the services in which our rural communities are most deficient is adequate hospital facilities. Many of our small South Dakota towns have had difficulty interesting doctors in establishing practices because of the lack of needed hospitals.

As you know, the authorization for this program was just signed by the President last week. It was one of the important parts of his health program. To fail to implement this authorization now with the necessary funds would defeat the purpose for which this legislation was enacted.

I sincerely hope that the two items—$22 million for Federal-aid airports, and $35 million for hospital construction—will be restored.

The Charter of the United Nations Endangers Our Liberties

EXTENSION OF REMARKS
OF
HON. USHER L. BURDICK
OF NORTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Monday, July 19, 1954

Mr. BURDICK. Mr. Speaker, in the late fall and early spring of 1952–53, a subcommittee of the Judiciary Committee investigated American citizens who were in the employ of the United Nations. Twenty-five of these persons who were summoned to testify refused to do so, claiming their privilege under the provisions of the fifth amendment.

When this fact was communicated to Trygve Lie, Secretary-General of the United Nations, all were removed from their service with that organization.

Twenty-one of these people took an appeal to the Administrative Tribunal of the United Nations, sitting at Geneva, Switzerland. This Tribunal consisted of four foreign lawyers. They handed down a decision upholding the Secretary-General in 9 cases, ordered a rehearing on 1 case, and ordered reinstatement of 11, with monetary awards amounting to $170 thousand, and the United Nations was ordered to pay the money, which has been or will be done.

The Administrative Tribunal paid no attention to the laws or the Constitution of this country, and found that the action in dismissing them conflicts with the provisions of regulations 1 and 4 of the Universal Declaration of Human Rights.

I have pointed out time and time again that all the people of the United States have to do if they want to get out of this mess, is to pass a resolution rescinding the approval of the Charter of the United Nations. If that act is passed by the Congress and approved by the President we are out of it. We do not need a Bricker constitutional amendment. We can act directly, and I have cited decision after decision of the Supreme Court of the United States pointing out that a statute passed subsequent to the approval of a treaty controls. If no action is taken a treaty becomes the supreme law of the land, but the way is open, and always has been, for direct legislative action to annul such treaty.

What will those do who are in control of the Government? Will they assert the sovereign rights of the United States, or will they, because of the groundless fear of Russian bombs, meekly pay this outrageous bill and continue right on being controlled by this United Nations organization?

We need intelligence and understanding in everything we do, but on this matter we need something more—we need courage and the unswerving will to protect the United States against all enemies, foreign and domestic. Will we do it? We finally will do it, but it will be when we have no appeasers handling our affairs.

The Declaration of Human Rights has not been approved by the Senate and this universal declaration was approved by no one save the United Nations itself.

Here is a case where a foreign court, without counsel for the United States, and without considering the Constitution of the United States, made its decision, which deeply affects all the people of the United States. Since we pay almost 40 percent of the upkeep of the other 64 nations who are members of the United Nations, it is obvious that a foreign court has assessed damages against the United States on the theory that the laws of the United Nations govern the United States. That is just what the one-worlders want. They want to override the provisions of the Constitution of the United States and set up a supreme organization which will take away the sovereign rights of this great Republic.

The summary action of a foreign court indicates clearly the danger we are in through being a member of an organization like the United Nations. Probably, and very probably, if we do not make appropriations big enough for the United Nations to satisfy foreigners, that organization will directly assess the amount they want against the United States, and if that is done, will the United States abjectly surrender and squander more money for the taxpayers to dig up?

The Administrative Tribunal of the United Nations is composed of Madam Paul Bastid, president; the Lord Crook, vice president; Mr. Sture Pe ren, vice president; Mr. Omar Loutfi, alternate member.

THE AWARDS

Ruth E. Crawford, staff of International Childrens Emergency Fund; award, full salary to date of reinstatement; reinstatement in position; $300 as costs.

Alexander Svenchansky, Radio Division, Department of Public Information; award, full salary to date of reinstatement and $300 costs.

Hope Tisdale Eldridge, Statistical Office, Department of Economic Affairs, award, full salary to date of reinstatement and $300 costs.

Edna Glaser, Secretariat Library Staff member; award, reinstatement with full pay and $300 costs.

AWARDS IN OTHER SEVEN CASES

Jack S. Harris, $40,000 in lieu of reinstatement and $300 costs.

Julia Older, $27,500 in lieu of reinstatement and $300 costs.

Frank C. Bancroft, $12,000 in lieu of reinstatement and $300 costs.

Jane Reed, $10,000 plus retirement pension and $300 costs.

Leon Elveson, $7,000 and costs of $300.

Sidney Glassman, $20,000 in lieu of reinstatement and $300 costs.

Joel Gordon, $6,000 in lieu of reinstatement and $300 costs.

Eugene Wallach, $300 and case remanded for reconsideration.

The dismissals were upheld in the cases of Irving Kaplan, Mary A. Middleton, Martin H. Rubin, Helen-Kagen-Posner, Sonya J. Sokolow, Celia Saperstein, Alfred J. Vam Tassel, and Marjorie and Herman Zap.

Sport Car Races on SAC Bases

EXTENSION OF REMARKS
OF
HON. ERRETT P. SCRIVNER
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Monday, July 19, 1954

Mr. SCRIVNER. Mr. Speaker, during the debate on the military appropriations bill, I discussed the matter of sports car races on Strategic Air Command bases.

This matter had been looked into from various angles by investigators for the Appropriations Committee and by the General Accounting Office.

The GAO report was not available until after the bill had been presented to the House.

Inasmuch as these races have been the subject of magazine and news articles, and editorial comment, parts of the GAO report should be made available to Congress and to the public, although the question is now moot, inasmuch as the Air Force has ordered all but 3 or 4 future races to be canceled.

In view of that cancellation the GAO investigators' work was cut short but even so was sufficiently complete to justify the criticism made and to support the action taken by the Air Force.

The introduction and summary of the GAO follows:

BASIS FOR INVESTIGATION

This investigation was initiated as a result of information received from responsible sources to the effect that sports car races being held from time to time at Air Force cases, particularly bases of the Strategic Air Command, were a serious disruption to normal Air Force business, and provided little, if any, benefit from a financial or morale standpoint. The program has also been the subject of complaint letters from private citizens and comment in congressional quarters.

SCOPE OF INVESTIGATION

Investigation included a visit by investigators to MacDill Air Force Base, Florida, in January 1954 while races were being held, development of information from the records at several bases where races previously had been held, and a fairly comprehensive

examination of the records and files on the sports car racing program at Headquarters, Strategic Air Command. Investigation at SAC Headquarters also included interviews with Gen. Curtis E. LeMay, Commanding General of SAC, and other Air Force officers connected with the program.

SUMMARY OF FINDINGS

The SAC racing program has taken on the proportions of a major activity. Approximately 100,000 man-hours are expended on each race, of which approximately 20,000 represent regularly scheduled duty time.

SAC regulations provide for reimbursement to the Government for the labor costs of Government-employed civilians, for services furnished, and for Government-owned supplies and materials issued which are not returned to base supply in usable condition. The SAC regulations are at variance with regulations applicable to the Air Force generally in that Air Force regulations also require reimbursement for labor costs of military personnel used on this type of activity. The average labor costs per race for military personnel is estimated at $23,000 for regularly scheduled duty time, and $115,000 overall.

In addition to the cost of military labor, one of the major items of cost for which no reimbursement is made is the use of military equipment, including aircraft. Upwards of 40 trips by airplane have been made between Air Force bases by observer groups in connection with the sports car racing program.

There appears to be a strong undercurrent of opposition to the racing program among Air Force personnel, who feel that regular Air Force business operations are seriously disrupted by the general preoccupation of personnel with sports-car racing. No substantial evidence was found that military operations are disrupted.

Information developed in the investigation points up a number of legal problems, such as the basic legal authority for using military installations for sports-car racing, and the legal capacity of the custodian of the Strategic Air Command airmen's living improvement fund to enter into binding agreements with the Sports Car Club of America.

Since the program brings a net return of hardly more than $5 or $6 per enlisted man per year, it does not appear to be an effective means of improving the living conditions of airmen, particularly in relation to the personal sacrifices and disruptions to business entailed.

By orders of USAF headquarters dated April 28, 1954, the scheduling of future sports-car races on Air Force bases was prohibited, and races already scheduled, other than those for which binding contracts existed or for which substantial amounts of funds had been expended, were ordered canceled. As of the time this report is written, 3 races had been canceled, 8 races were allowed to remain on schedule, and the fate of 4 races was still under consideration.

Mr. Speaker, the report which supports the above findings sets out some very interesting points.

RACES BECOME MAJOR ACTIVITY

It points out the fact that the SAC races have become a major activity calling for a 72-page manual of information on how to plan and conduct them. The manual covers layout of course, erection of concession stands, latrines, bleachers, crowd and traffic control, communications, fire fighting, insurance, publicity, and so forth.

Preparations begin three or more months in advance, by military personnel at the base, during duty hours, for the most part; in one or more instances requiring 5 officers and 6 enlisted men. Surrounding towns are visited—via military transportation—for publicity stories and ticket sales.

Let the report speak for itself:

Work details of enlisted men are used to construct ticket booths, latrines, and food and beverage stands, to erect bleachers and snow fences (for crowd control), and to clean up the base before and after the race. At the Offutt race 5 ticket booths were constructed, 16,000 feet of snow fence were erected, 14 outdoor latrines were built, 9 concessionaire stands were constructed, and borrowed bleacher seats for 25,000 persons were secured, erected, dismantled, stacked, and returned.

Base communications personnel install temporary telephones in race committee headquarters, and provide race day telephone service to the judges' stand, to positions around the track, and to the press box. At Offutt these services include the installation of switchboard facilities at the judges stand which were connected with telephones in the pits, at the starter's position, and at various points around the track. Approximately 11 miles of wire were used in making this installation.

Starting several months before the race day with a nucleus of key race committee personnel working on a spare-time basis, prerace activity increases as the date of the race draws near. Three weeks prior to the race 10 or 15 persons are devoting almost all their duty time to it, with perhaps several hundred working part time. On the day before the race, the day of the race, and the day following, several hundred officers and enlisted men are working full time on the project. One commanding officer estimated that over 1,100 enlisted men and 72 officers were actively utilized in putting on the race at his base.

The racing event calls for the use of airfield runways, the erection of barricades and markers requiring the fields to be closed for 2 or 3 days prior to the run, and, of course, the day of the race. Frequently this calls for the transfer of activities to other nearby bases, such as it did at MacDill where operations had to be transferred to Tampa Municipal Airport—contact being kept by shuttle bus.

MILITARY MANPOWER REQUIRED

Crowd control requires many airmen. At Offutt it is reported that this phase of the race alone called for 10,000 airman hours.

The report states:

No records have been maintained of military man-hours spent on sports car racing.

However, estimates have been made which show that at Turner Air Force Base 18,962 duty hours were expended. The comptroller at Offutt, 1953, estimated 117,239 man-hours were used—duty and nonduty. The average man-hours is in the neighborhood of 100,000 at a conservative estimate of $1.15 per hour—or $115,000 per race which far exceeds even the gross sales.

The GAO report shows that there is a great direct and indirect cost to the taxpayers, little of which is accounted for.

Although Air Force regulations required reimbursement to the Government for the cost of duty hour activities in events like this; here is what the GAO report says:

COST TO TAXPAYER

The original SAC regulation on reimbursement to the Government for costs incurred in connection with sports car racing provided that reimbursements would be made "for any military labor utilized during regularly scheduled duty hours, and for any material furnished by the Government."

The regulations went on to say that material used during the event and returned in undamaged condition would not require reimbursement.

It soon became apparent that reimbursement for military labor would probably turn a race profit into a deficit, and this part of the regulation was never enforced. On April 28, 1953, after three SAC races had been run, the regulation was changed to provide for reimbursement to the Government "for labor utilized on work projects during regularly scheduled duty hours." The effect of this change was to limit reimbursement for military labor to that used on normal base maintenance type construction and repair work. This type of labor has been handled by the services as a "costed" item for many years.

On June 24, 1953, shortly before the first Offutt race, and while the local Air Force auditor was pressing for some sort of recordkeeping on military labor being utilized in the forthcoming Offutt race, the regulation was again changed to provide that reimbursement should be made to the Government "for civilian employee labor utilized on work projects." The revised regulation went on to say that "neither reimbursement to the Government for military labor utilized nor the keeping of records thereof is required." The effect of this change was to exempt military labor from reimbursement and to set up a new category of reimbursement, namely, civilian labor, which had not been mentioned in the prior regulations and which is not used to any considerable extent on the sports car races.

HOW LOSS TURNED TO PROFIT

Particular attention is called to the GAO statement:

It soon became apparent that reimbursement for military labor would probably turn a race profit into a loss, and this part of the regulation was never enforced.

The report also shows that, although regulations require reimbursement to the Government for civilian labor used, in all except three, there is no record of reimbursement, although it is quite obvious that civilian employees were engaged in these activities—in administration, supervisory, and secretarial work.

Although the Air Force claimed that the duty time was made up by overtime, GAO could not find evidence of that, even though it is a known fact that many who were assigned to race duty were given leaves or passes with pay.

LITTLE REIMBURSEMENT

Very little reimbursement was made for material, such as lumber, canvas, wire, film, oil and gas, and so forth, and countless other items, which, although small in themselves, eventually run into surprising figures.

No reimbursement is made for use of military vehicles, including planes or the fuel and oil used therein. Neither is there for communication equipment such as telephones and radio, nor office equipment, tools, and the like.

At Offutt, for instance, reported cost of Government transportation furnished

shows that 5-ton tractors were driven 1,886 miles, buses 1,487 miles, and passenger sedans 2,618 miles. The reimbursement? It was $86.90 for gasoline and $1.70 for oil.

However, the GAO reports point out the largest equipment item for which there has been no reimbursement is that of plane used by "observer group" who travel under "temporary duty travel orders." No per diem was authorized, but all other pay and allowances were received.

OPPOSITION IN AIR FORCE

As to the attitude of Air Force personnel, the report shows:

There appears to be a strong undercurrent of opposition to this racing program among Air Force personnel.

Phone calls which I have received and letters sent to me are convincing proof that this is an understatement.

But let us proceed with the report:

This undercurrent has reached such proportions that many officers have gone out of their way to voluntarily express their feelings to GAO representatives during the course of personal and official conversations. The consensus of the feelings of these officers seems to be that regular Air Force business is seriously disrupted by the general preoccupation of personnel at administrative and supervisory echelons with the additional responsibilities placed upon them incident to the sports car races. Two officers told the investigators that they had successfully objected to having military personnel under their jurisdiction detailed to racing duties on the grounds that their official workloads would not permit the diversion. The inference seemed to be that they had taken this stand at some risk to their Air Force careers because it would be interpreted as a failure to support command policy.

MILITARY ACTIVITIES INTERFERED WITH

GAO representatives making an inspection of supply operations at MacDill Air Force Base at the time of the January 1954 race found supply office records in a chaotic condition and the supply division in the process of extensive overhaul. Labor crews, working on special detail from the Warner-Robins air materiel area, were at work packing and crating hundreds of thousands of dollars' worth of excess property that had been generated at the base, apparently due to failure to maintain the necessary paperwork controls over inventories. Nevertheless, on the day following the MacDill races, 22 airmen assigned to the base supply office were away from their jobs working on a cleanup detail.

In another incident, a representative of the GAO, making arrangements to visit an Air Force base to observe supply operations, was requested by the base command to defer the visit until the following week because the base was engrossed in getting ready for a sports-car race.

The foregoing incidents are typical of the hundreds of disruptions, large and small, that necessarily entail from an operation as extensive as the sports-car races. The cost or damage resulting from these disruptions would probably bear no relationship to the value of the man-hours involved. A few hours of neglect in maintaining supply records can result in hundreds of thousands of dollars lost to the Government.

SERVICES VOLUNTEERED?

The Air Force has stated that most, if not all, of the services rendered were voluntary. My mail reflects an entirely opposite view.

The GAO did not go into this phase of the races. However, their report does show that at MacDill orders were actually cut detailing officers and men to specific duties in connection with the race. This, according to General LeMay, was a deviation from Air Force policy, yet the Air Force holds that any injury received by military personnel during any of these events will be considered in line of duty.

Although the Air Force also claimed that, contrary to information given me, leaves and passes were not canceled for a period of time before and after the races, I have in my file a cut order which did cancel leaves and passes for several days before and after the races.

The report goes into some detail as to the purpose for which expenditures are made, but quite naturally does not raise the question of the attitude of the other military personnel who are on duty on the bases where funds cannot be so raised and so used.

REPEAT PERFORMANCE

The report does show that "repeat performances are not financially successful" and concludes that the races are not financial successes. The report states:

	First race	*Second race*
Turner Air Force Base	$47,764	$3,964
MacDill Air Force Base	30,746	23,393
Bergstrom Air Force Base	24,337	8,315

Even if the level of return, which has averaged about $28,000 per race up to the present time, could be sustained, it is doubtful that the racing program can be regarded as a financial success. This return probably represents not more than $5 or $6 per enlisted man a year, a small sum indeed in relation to the effort and personal sacrifice involved on the part of the officers and men in putting on a race, and a drop in the bucket in relation to the overall annual cost to the Government of providing for the housing and welfare of the personnel at any given base.

EFFECT ON MORALE

While effect on morale was not within the specific orbit of their investigation, the GAO report says:

Also for consideration, of course, is the effectiveness of the program from the standpoint of morale. SAC Headquarters has taken the position that apart from the material benefits derived from the program, a direct morale benefit accrues from airman participation in this type of program. Against this intangible benefit there would have to be offset the equally intangible adverse effect on morale of those personnel who do not find the races interesting and whose participation is on something less than a voluntary basis.

Mr. Speaker, as I have previously stated, I have no objection to sports car races, as such. However, the use of Government property at the expense of the taxpayer is something to which I do object. I would be derelict in my duty if I did not. It is my purpose to get the greatest amount of defense possible for the lowest possible number of dollars. Dollars spent for these races are not available for defense.

Personally, I feel that the decision of the Air Force was a proper decision—made upon full consideration of all facts, and that such decision, leaving out some rather complex legal questions, is fully justified by the report of the GAO and that of our committee investigators.

Foreign Service Academy—Part III

EXTENSION OF REMARKS

OF

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 19, 1954

Mr. ZABLOCKI. Mr. Speaker, a short time ago, in presenting its recommendations on the subject of reforming the personnel structure of the State Department, the Wriston Public Committee on Personnel made this statement:

Diplomacy has become serious, urgent, and arduous business. Precisely because diplomacy is so serious, urgent, and arduous, a high state of morale is essential to an effective Foreign Service. The morale of that Service today stands in need of repair.

Similar observations were made in the past, and suggestions were advanced with view toward remedying the situation. For that reason, some short-sighted persons may take the Wriston Report very lightly. But the fact remains that—if we are truly interested in having an effective foreign policy—we cannot afford to adopt such a narrow-minded and unrealistic view. The effectiveness of our foreign policy depends largely on the capabilities and the morale of the men who are entrusted with the job of executing it. For that reason, these matters ought to be of deep concern to each and every one of us.

Under permissions granted on June 23 and July 8, I discussed certain aspects of the personnel problem in our Department of State. I reviewed my proposal for the establishment of a Foreign Service Academy of the United States, and commented on the Wriston Report.

In further reference to those remarks, I wish to include in the RECORD an editorial from the Milwaukee Journal of July 6, 1954, entitled "State Department Morale Is Low, Must Be Restored." It is my hope that this outspoken and informative editorial will receive careful consideration of my colleagues:

STATE DEPARTMENT MORALE IS LOW, MUST BE RESTORED

Administrative reform within the State Department, as recommended by the Wriston committee and ordered by Secretary Dulles, will no doubt improve efficiency and effectiveness. It will not, however, remedy the major malady in the Department—low morale.

The situation is well expressed in these words of the Wriston report:

"Diplomacy has become serious, urgent, and arduous business. Precisely because diplomacy is so serious, urgent, and arduous, a high state of morale is essential to an effective Foreign Service. The morale of that Service today stands in need of repair."

Why is morale so low? There are many reasons.

One is the reduction in force of more than 22 percent under the Eisenhower administration. Another is appropriation cuts which, along with the reduction in force, have resulted in 80 percent of the personnel shifting jobs. Another is poor administration over a long period of time, with no consistent program of promotions or pay raises.

Two more reasons—major ones—remain.

One is the incessant political attacks upon the integrity and morality of State Department personnel, largely from congressional sources. This has driven many good men out of the Service in disgust. It has kept many good young men from entering the Service. It has frightened many men still in Service into becoming little more than reporters of events. They fear that to analyze conditions or express opinions or suggest policies will bring attacks on them, now or in the future, from partisans in Washington.

The other major reason is the administration of the security program within the Department. Here is what the Wriston report says of this:

"The program has been drastic and thorough * * * the task has inevitably occasioned uncertainties, doubts, and fears * * * investigations of such sensitive character should be conducted with the professional impartiality associated in the public mind with the FBI.

"Only as these investigations are carried out with the most scrupulous objectivity will the apprehensions of Government servants be abated * * * if the security program is to achieve its true purpose of protecting the Government and the American way of life, it must be so administered that it does not impair the things it is designed to preserve."

Other critics have not been so unspecific, and so kindly, toward the security program administration and its chief, R. W. Scott McLeod.

Charges have been made that McLeod conceives it his responsibility to clear all Democrats and all liberal Republicans out of the State Department, that he has established a private spy system inside the organization, that people are forced to resign without hearing or trial, or, in some cases, without knowing the charges against them. It is claimed people are plagued into retirement by threats or by repeated investigations. A Washington correspondent recently related that stenographers in the planning division had been directed to make weekly reports of the reading matter of their bosses.

The Wriston committee expressed hope that with the reduction in force about completed and the security review scheduled to end this summer, there would be a quick recovery of morale.

For its part, it reports, it has been impressed by the "high standards of devotion and loyalty" animating our State Department people and "does not hesitate to urge the American people to reinvest their confidence, without reservaton, in the character and steadfastness of both the Department and its diplomatic arm."

We wish we could be as optimistic as the members of the committee. We cannot, however, see how there can be a revival of morale until the inquisitors and informers are gone, until demagogs stop using the Department as a punching bag, until an individual knows that his job is to report facts as he sees them, and until the Secretary of State stands up and fights for his employees.

More Power for Peace

EXTENSION OF REMARKS
OF
HON. ALFRED D. SIEMINSKI
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Monday, July 19, 1954

Mr. SIEMINSKI. Mr. Speaker, I was surprised to learn that there is available to each person in Asia an average of less than 1 horsepower, while in the United States the average is around 30 horsepower.

I am caused to wonder if this ratio of horsepower might not well be related to the difference in standards of living. I also wonder if these great variations in power and living standards might, in a large degree, account for the difficulty in harmony and understanding between these great areas of the earth.

Railroad Retirement

EXTENSION OF REMARKS
OF
HON. RICHARD H. POFF
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Monday, July 19, 1954

Mr. POFF. Mr. Speaker, I understand that the House Committee on Interstate and Foreign Commerce has favorably reported H. R. 7840, pertaining to the Railroad Retirement Act. The bill is now before the Rules Committee awaiting a rule for floor debate.

It happens that approximately 1 out of every 10 people in the Sixth Congressional District of Virginia, which I have the honor to represent, depends directly upon railroad wages for his livelihood. Naturally, all of these people are interested in obtaining as many benefits as possible under the railroad-retirement plan. At the same time, they are also concerned that this plan should be and remain financially sound and strong. They feel, as I feel, that the benefits they now receive are little enough in comparison with the high premium they and their employer pay. That rate is 6¼ cents on each dollar earned, up to $300 a month. A like amount is paid by the railroad company. H. R. 7840 proposes to raise the taxable wage to $350 a month. This will mean an additional cost to each worker of $3.12½ per month. It will also mean a similar increase in the amount to be contributed by the railroad company. On the other hand, the additional benefits proposed by the measure are extremely meager.

I wish to call to the attention of the Honorable CHARLES A. WOLVERTON, chairman of the House Interstate and Foreign Commerce Committee and the Honorable LEO ALLEN, chairman of the House Rules Committee, that I have on my desk a petition, signed by 208 Norfolk & Western railroad workers in Roanoke, Va., in the following language:

DEAR CHAIRMAN WOLVERTON: We, the undersigned, are opposed to H. R. 7840 recently reported out of your committee for the following reasons:

1. To increase the taxable base from $300 to $350 would cost the worker and the railroad an additional tax of $3.12½ each per month and would increase the pension only 5 cents per month. That looks like a fine investment, but for whom?

2. This base change would only benefit the labor union leaders who draw their pay from the unions and the employees of the Railroad Retirement Board.

3. More than 90 percent of the rail workers earn less than $350.

4. Most of the major railroads have a supplemental pension plan which takes care of all earnings over the present base of $300 and which cost less and pay more than the Railroad Retirement Act.

5. Should the taxable base be increased, the railroads would start their supplemental plan at $350, thereby cancelling the plan with respect to those earning between $300 and $350. For example, an employee with 50 years' service who averaged $350 per month for the last 10 years would receive a $25 pension.

6. If the railroads can pay this kind of pension for 4½ percent, it is high time the Congress finds out what is the matter with the Railroad Retirement Act.

7. As for the balance of this bill, the so-called benefits are worthless, meaningless, and impracticable of application.

I favor H. R. 5269, sponsored by the Rail Pension Forum, which is composed of 80 percent of the railroad workers, and which will give direct benefits to those who pay the bill.

Respectfully yours.

I also have in my files a photostatic copy of a petition bearing 270 names addressed to Senator H. ALEXANDER SMITH, chairman of the Senate Committee on Labor and Public Welfare, urging that committee to hold hearings on S. 1911. This is the companion bill to H. R. 5269 on which I testified before the House committee on June 2.

In view of these petitions and as a result of my personal conversations with many of my railroad friends, I am persuaded that a poll of the individual railroad workers would disclose almost universal support for H. R. 5269 and S. 1911 and opposition to an increase in the taxable base.

If the railroad workers thought that they were now receiving all of the benefits they are paying for, I believe that all of them would be willing to pay a little more for reasonable additional benefits. But as long as they can compare their premiums and their benefits with the premiums and benefits available under a commercial insurance policy and find that they are paying for more than they are getting, they are going to resist any effort to increase the taxable base. They realize, of course, that they cannot get something for nothing and they do not want something for nothing. All they want is a dollar's worth of benefits for a dollar's worth of premium. Since the railroad retirement fund belongs not to the Federal Government but to the railroadmen themselves, it seems to me that we, as the trustees of the fund, should lend a sympathetic ear to its owners.

Big Housing Project for Negroes Fails

EXTENSION OF REMARKS
OF
HON. E. L. FORRESTER
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES
Monday, July 19, 1954

Mr. FORRESTER. Mr. Speaker, the Washington Evening Star of Saturday, July 17, 1954, carried on its front page a news item captioned "Big Housing Project for Negroes Fails."

Reading of that news item identifies that project as the swank Rhode Island Plaza, 413-unit interracial apartment at 1300 Rhode Island Avenue NE., in the District of Columbia. The article states that the FHA from the start regarded the project as an important experiment, and that the project received wide publicity as one of the first and biggest of its type to have Federal backing. The FHA guaranteed a mortgage loan which was made by the New York Life Insurance Co. to finance this great experiment in interracial living to the amount of $3,594,000.

Now, Mr. Speaker, according to the above news item, the great experiment has failed, and the New York Life Insurance Co. has notified the FHA that mortgage payments have not been met and that sufficient occupancy has not been obtained to make the project a successful project, and that said life insurance company is calling upon the FHA to pay the mortgage as it guaranteed it would do.

In other words, Mr. Speaker, when the radicals and wild-eyed leftwingers and mongrelizers are given an opportunity to join in these socialized experiments they refuse to do so. The taxpayers of the United States will have to pay for this blunder, unless the advocates of interracial mixing will come to their rescue, as they certainly ought to do. Maybe the members of the ADA will do their duty and move into this apartment project with their families and encourage others to do so. Maybe the officials in the FHA who thought this was a wonderful idea, to such an extent that they gambled taxpayers' money therein, will also move into this project with their families. Maybe those who endorse the recent United States Supreme Court decision will practice what was advocated in that psychological decision abolishing segregated schools and the United States Constitution, and save this experiment. That decision said "separate educational facilities are inherently unequal." If that is true, then separate living quarters are inherently unequal.

I understand that public schools are maintained by taxpayers' money, but this project was also guaranteed by taxpayers' money. A wonderful opportunity is presented to all these people to at last prove that they are honest in what they have advocated, and it is now time for them to move into this project, taking care that the interracial idea is scrupulously and uniformly maintained. If that project was good enough for others, certainly it is good enough for them and by moving into that project they can help salvage something for the taxpayers that they bound to pay this mortgage.

It is time now for these so-called leaders who are always crying "discrimination" to practice what they preach, for up to now that crowd has been living in the most exclusive sections of Washington, and it is high time they come out of hiding and prove they believe what they would put on less fortunate people.

Certainly it does not go unnoticed that the advocates for abolishing segregated schools are sending their children to private schools—notably the United States Attorney General, who filed a brief asking that segregated schools be abolished although the law and the Constitution was against it.

Mr. Speaker, I am wondering if the failure of this project does not teach us a great lesson? Evidently, decent white people and decent Negroes simply do not care to mix. I suggest, Mr. Speaker, that the next time a project like this is undertaken that it will be at the expense of those who advocate these experiments, instead of the taxpayers of this country who are not permitted to say yes or no to these wild and unjustified ventures.

It Would Not Have Happened Had Dies Committee Been Heeded

EXTENSION OF REMARKS
OF
HON. MARTIN DIES
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, July 19, 1954

Mr. DIES. Mr. Speaker, since World War II communism has cost the United States thousands of lives and billions of dollars, and the end is not in sight. No one can predict the outcome. There may be another world war far more destructive and devastating than any war in history.

This situation was caused by the failure of the United States to grasp the fixed purpose of the Kremlin to conquer the world and to understand the tactics employed for the accomplishment of this purpose. On January 3, 1939, the Dies committee unanimously submitted its first report to the Congress and the executive department. Among other things, the committee found:

We have shown that communism is a worldwide revolutionary movement aiming ultimately at the setting up of a world union of Soviet Socialist Republics. This is a proposition which is beyond dispute. It is substantiated by voluminous literature of the Communists themselves.

In this plan for world revolution the Communists have omitted no country or people as too small or insignificant to command their attention. They have, on the other hand, taken the logical position of concentrating their attention upon the richest and most populous countries of the earth. Among these the Communists recognize the United States of America as the foremost. The Communist's conquest of the earth will be far less than complete until it has conquered America and destroyed our free institutions.

It follows logically from the Communist International's plan of world conquest that every possible tactic, device, maneuver, and intrigue would be employed to gain such an end as the communization of America. These tactics, devices, maneuvers, and intrigues are both boldly open and patently subtle, both violent and insidious. The tactics and maneuvers for revolutionary ends are the meat and drink of a Communist. They are the very air he breathes.

If our Government had heeded this finding of the Dies committee, it would not have made enormous concessions to Russia at Yalta and Potsdam. It was these postwar concessions which enabled the Soviet Union to emerge from a third-rate power to the status of a world menace.

Another cause of the Communist menace was the theft by Communists inside our Government of our military, diplomatic, and scientific secrets and the influence which these same Communists exerted upon our foreign policy. If we could have retained these secrets, such as the A-bomb and the H-bomb, as well as many others, it would have been a long time before Russia could have acquired them and thereby neutralized the tremendous advantage which the exclusive possession of these secrets gave us. Long before these secrets were stolen, the Dies committee named the Communists on the Federal payroll and urged their discharge. In its report filed on January 3, 1939, the Dies committee found:

The Communist Party has penetrated the Government itself, with the result that some Communists hold key positions in Federal agencies and projects.

In the report of the Dies committee dated January 2, 1943, are the following findings:

Since the committee's creation in 1938, there has come to its attention from time to time the presence in the Federal Government of high salaried employees who were prominently and definitely identified with communism and its front organizations. Many of these cases were promptly called to the attention of the President, the Congress, and the departmental head concerned by either the committee or its members. At this point, the committee would like to cite a number of examples where this procedure has been followed.

On October 25, 1939, the committee made public the names, positions, and salaries of some 563 Government employees located in Washington, D. C., who were members of the American League for Peace and Democracy. In three reports which this committee has made to the House, it has found the American League for Peace and Democracy to be a Communist-front organization. * * *

Pursuant to this request, the committee on October 17, 1941, sent to the Attorney General the names of 1,124 Federal Government employees who were members of organizations which this committee had found to be subversive. These membership lists had been obtained largely by subpena and have been identified and authenticated by the officials of the organization involved. All of the committee's files were immediately made available to the Attorney General and his investigators, who were charged with carrying out the mandate of Congress as contained in this act.

Thus, it will be seen that before World War II the Dies committee had furnished the executive department with the names of several thousand Government officials and employees who belonged to organizations which the committee and the Attorney General had found to be Communist controlled and subversive. Included in this list were the names of Alger Hiss, Harry Dexter White, and Harold Glasser. These people were kept on the Government payroll for at least 10 years after they were exposed, and the theft of our military, diplomatic, and scientific secrets was made possible because of their presence on the Federal payroll. Furthermore,

these Government officials greatly influenced our foreign policy in favor of Russia.

Another cause which contributed to Communist successes was the failure of our Government to deport and exclude Communist aliens. In 1932, my bill to deport and exclude Communist aliens passed the House of Representatives but was stymied in the Senate by the liberal bloc headed by Senator La Follette. At that time, there were only 20,000 Communists in the United States and 90 percent of them were aliens. If my bill had become a law, these Communists would have been deported and the thousands who came after 1932 would have been excluded. The Communist conspiracy would have been nipped in the bud.

In the committee's report filed on January 3, 1939, is the following finding:

The committee received considerable evidence of the activities of Communist, Nazi, and Fascist aliens in the United States. It does not seem that these aliens experience any difficulty in entering the United States or remaining here after entrance. A large part of un-American activities is inspired and carried on by these aliens. * * *

The committee believes that it will be difficult to ever cope with un-American activities and propaganda in this country so long as the Department of Labor follows its present policy with reference to deportation. The laxity with which the Department of Labor deals with alien agitators would be unbelievable if we did not have before us the most convincing proof. * * *

We further believe that greater care shou'd be exercised in permitting aliens to enter the United States to the end that aliens who believe in or advocate communism, fascism, and nazism will be excluded.

In the committee's report filed January 3, 1940, we recommended:

The mandatory deportation of aliens who advocate any basic change in the form of our government; the enactment of legislation to stop all immigration from foreign countries that refuse to accept the return of their nationals found under American law to be deportable from this country.

Needless to say, this recommendation was more or less ignored. Belatedly, however, 335 deportation orders were issued for alien Communists. A majority of the 335 names appear in the records of the Dies committee. There have been 99 indictments and, in most cases, convictions under the so-called Smith Act, and all but 22 of these persons were named by the Dies committee as Communists.

Another cause of Communist strength and success in the United States was the infiltration of labor unions and seizure of control. Through these labor unions Russia was able to wield great political influence. These unions had the balance of power in some areas. In its report filed January 3, 1939, the committee found:

The Communist Party is boring from within labor unions on a wide scale, seeking to dominate or wreck the unions for purposes that are alien to the interest of organized wage earners. It deliberately projects violence in labor disputes for the purpose of training a revolutionary group in the tactics of civil war. It seeks to sabotage and cripple our economy on every possible front, with the view to its profiting by the resulting economic crisis.

The Dies committee cited the following unions as Communist-dominated:

The United Electrical and Radio and Machine Workers; the United Office and Professional Workers; the United Farm Equipment Workers; the International Union of Mine, Metal, and Smelter Workers; the United Public Workers; the Food, Tobacco, and Agricultural Workers; the American Communications Association; the International Fur and Leather Workers Union; the International Longshoremen's and Warehousemen's Union; the Marine Cooks and Stewards; and the International Fishermen and Allied Workers.

The Dies committee was bitterly assailed by the CIO because it named these unions as Communist-dominated. In my own district where we had strong CIO unions, I was denounced by CIO leaders and publications as a labor baiter and a reactionary. Years later, however—in many instances 10 years later—all of these unions were expelled from the CIO for being Communist-dominated. If they had been expelled promptly after the Dies committee exposed them, as we recommended, the influence of communism in the United States upon our domestic and foreign policies would have been considerably lessened.

Another cause for Communist success in the United States was the infiltration of educational institutions. In its report filed January 3, 1939, the Dies committee found:

The Communist Party is unusually active in our schools, both openly and subtly insinuating its propaganda into the minds of students.

In its report dated January 3, 1941, the Dies committee recommended as follows:

Withhold all Federal financial support from any educational institution which permits members of its faculty to advocate communism, fascism, or nazism as a substitute for our form of government to the student body of these educational institutions.

If this recommendation had been adopted, educational institutions would have been compelled to expel Nazis, Fascists, and Communists from their faculty. This would have struck a telling blow at the Communist conspiracy.

After my bill to deport and exclude Communist aliens was stymied in the Senate, instructions went forth to all Communist aliens to become naturalized. Therefore, in the committee's report dated January 3, 1941, we recommended as follows:

We recommend that the statutory period during which citizenship papers can be revoked under existing law be extended to at least 10 years.

If this recommendation had been followed, our Government could have revoked the citizenship papers of Nazis, Fascists, and Communists and deported at least 90 percent of them.

A contributing cause to the growth of the Communist conspiracy in the United States was the ease with which Communist agents were able to travel to and from the United States. In its report dated January 3, 1945, the committee recommended:

Due to the fact that the committee has discovered that many members of foreign-controlled organizations have traveled on American passports which have been fraudulently obtained, the committee feels that the statute of limitations should be extended from 3 to 7 years. This is made necessary because of the unusual difficulty in apprehending those who resort to the use of fraudulent passports within the period of 3 years.

The most important recommendation made by the Dies committee during the 7 years of its existence was the recommendation contained in the report of 1941, that foreign-controlled political organizations be outlawed. It reads as follows:

The enactment of legislation to outlaw every political organization which is shown to be under the control of a foreign government. As long as these organizations have a legal status in the United States, it will be difficult for any agency of the Government to deal with them. We now know that they furnish the legal apparatus for the operations of saboteurs and the window dressing for espionage. The committee believes that legislation can be worked out to outlaw such organizations, and that this will in no sense constitute a violation of the Bill of Rights since such legislation would only affect organizations controlled or directed by foreign countries.

Mr. Speaker, had this recommendation been adopted in 1941, the Communist conspiracy would have been dealt a death blow. In its 1939 report, the committee found:

The Government, by use of the provisions of the wartime legislation, drove the Communist Party underground, where it remained in an illegal status until 1924, when the repeal of the war measures and the consequent halting of Government activities by the agents of the Department of Justice permitted it to reappear. The Communists came more and more into the open until today they flaunt their revolutionary activities throughout the country. Since 1925 the Department of Justice has had no power, no authority, or no funds from the Congress to investigate Communist propaganda or activities. During the period that the Department of Justice had actual authority, the Communist Party was driven underground where it could not function successfully. Just as long as the agents of the Department of Justice were active, the movement remained comparatively stationary and innocuous. At the present time the Communist Party of the United States is thoroughly and highly organized, nationally and locally, and is extremely active.

Eventually Congress must pass my bill to outlaw the Communist Party and its subsidiary, auxiliary, and frontal organizations, because there is no other way to crush this criminal and treasonable conspiracy.

Mr. Speaker, before concluding this speech I would like to read a few excerpts from my book, The Trojan Horse in America, which was published in the early part of 1940 by Dodd, Mead, & Co. On page 354 I said:

It should, however, be stressed that the Government itself has played an important role in the growth of communism by providing Commnists with jobs and opportunities for recruiting members and fellow travelers. There are few subversive organizations in America which cannot produce letters of endorsement and encouragement from prominent Government officials.

On page 362, I said:

These leftwingers are scattered throughout the Government service and occupy key posi-

tions which enable them to oppose any efforts to combat the fifth column. * * * Until they are removed from their positions, we may expect at best only halfhearted and ineffectual action.

On page 363, I said:

The issue is before the President. He must take the initiative in performing this necessary task in the interest of adequate preparedness.

The President cannot supply the leadership on which our national security rests until he inaugurates a thorough and genuine housecleaning in Government service. This is the plain truth, and to deny or avoid it may prove fatal in the end.

The President must surely realize by this time that his left-wing followers in the Government are the fountainhead of subversive activities.

Whether or not we can develop courageous leadership in this country remains to be seen. It depends upon an awakening of the people. The totalitarian psychology of communism and fascism has taken root in the minds of many of our people. It must be eradicated before the Nation is prepared to defend itself against the assault of totalitarianism.

Government Competition With Business and Industry

EXTENSION OF REMARKS
OF
HON. CECIL M. HARDEN
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Monday, July 19, 1954

Mrs. HARDEN. Mr. Speaker, under leave to extend my remarks, I wish to refer to a subject of interest to all taxpayers.

I am sure that few taxpayers are aware that they are supporting oxygen and nitrogen manufacturing in the Department of Defense and the manufacture of argon, freon, and a great many other things, large and small. The truth is that the Federal Government is engaged in a great many classes of commercial-type activities of which one includes items such as those listed above.

At the beginning of this session of Congress the Subcommittee on Intergovernmental Relations of the House Committee on Government Operations began a program to identify Government commercial-type activities which use but do not pay taxes. The subcommittee thought that the elimination of any unnecessary commercial activities would be a long step toward reducing Federal expenditures and increasing the tax base needed to sustain legitimate functions of the Federal, State, and local governments.

The Department of Defense has joined in the efforts of the subcommittee and has issued a directive calling for a review of its numerous business activities on the installment plan. On March 8, 1954, the Department of Defense called for a listing of individual plants in the following increment of activities: Aluminum smelting or sweating facilities, clothing factory and cloth sponging plants, motion-picture studios, rope walk, bakeries, furniture repair shops, laundries and/or dry cleaning plants, scrap metal baling, coffee roasting plants, paint factories, sawmills, clothing reclamation shops, and ice cream manufacturing plants.

A listing by the Department of Defense of plants indicated that the Army, Navy, and Air Force have 239 facilities in this grouping.

It is hoped and expected that action will be taken to discontinue many of these facilities within the near future.

On June 28, 1954, the Department of Defense issued a call for a listing of facilities in increment No. 2, as follows: Chain manufacturing, automotive repair shops, caustic soda manufacturing, chlorine manufacturing, ice plants, oxygen and nitrogen manufacturing, powerplants, tree and garden nurseries, argon manufacturing, acetylene manufacturing, cafes and restaurants, cement mixing plants, cobbler shops, office equipment repair shops, power line construction, tire retreading activities, wood preservation, and freon manufacturing.

The taxpayers of the Nation should take heart in this program of the Department of Defense though it has just begun. There are many, many more activities in the manufacturing, service, transportation, banking, insurance, and other classes which need to be identified, analyzed, and justified or discontinued. The subcommittee has been hopeful that every agency of the Government would institute the same sort of a program now begun by the Department of Defense. While the Department of Defense is undoubtedly the largest operator in the commercial field, it by no means has a monopoly with respect to other departments.

The subcommittee has also been heartened by the fact that the new Hoover Commission is organizing to make a thorough study of private enterprises in the Federal Establishment. A recent letter from the Executive Director of the Hoover Commission indicates that all agencies of Government have been asked to list their facilities in these classes: Laundries; ice cream plants; coffee roasting plants; clothing manufacture and repair; commissary stores, canteens, civilian cafeterias; dry cleaning plants; meat cutting plants; bakeries; shoe manufacture and repair; and post exchanges.

Who is responsible for this enormous unnecessary growth on our economic system? All of us—the citizen who encourages unneeded Federal activities in his city, the agency which creates the activity and annually justifies it, the Budget Bureau which annually sifts them through a large meshed budgetary process and of course the Congress which appropriates for their continuance.

The effort we are now making through the Subcommittee in Intergovernmental Relations will, upon its conclusion, provide us with the facts we need if we are to meet the problem posed by governmental competition with taxpaying businesses and industries.

I am extremely heartened by the progress which has been made to date.

Trade Has Been Used by the Communists Strictly As a Political Weapon

EXTENSION OF REMARKS
OF
HON. FRAZIER REAMS
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Monday, July 19, 1954

Mr. REAMS. Mr. Speaker, the Reciprocal Trade Agreements Act has been extended for 1 year by this Congress. While the President was disappointed that his request for a 3-year extension was not granted, he has signed the compromise bill.

The reason for cutting the extension from 3 to 1 years is that the House Committee may have an opportunity to study the Randall Commission report on foreign policy. This report came too late to be carefully considered before the Reciprocal Trade Agreements Act was to expire.

This law was largely devised and sponsored by Cordell Hull when he was a Member of the United States Senate. Under its provisions, the United States foreign trade expanded and strong commercial ties were built up between our country and those nations who signed these agreements and chose to trade with the United States on a selective basis. Under this law agreements have been made with these nations setting forth the conditions and the goods which will be traded between the nations. Under this plan those products which each member nation under the agreements can export the most favorably are chosen.

In recent years the agreements have carried the "peril point" provision which provides that we may withdraw specific items from an agreement whenever the continuation of importation into our country of these competitive products has reached a point that imperils an industry here in the United States. The President himself is the final judge of when the peril point is reached on a particular product.

Today I want to discuss with you the very large and important question of United States foreign trade. Particularly, do I want to speak of the controversial question of whether or not we should trade with the Soviet Union and Communist China.

First of all, I believe we can agree that foreign trade is essential to a healthy economy here at home. Since 1940 the productive capacity of our factories and farms has been very greatly increased. We have trained and skilled manpower which must either operate these factories and farms or we face a serious condition of unemployment. Before World War I, 6 percent of unemployment of the workers of our country was not considered a serious matter. Today 6 percent has become the danger point in unemployment. Above this percentage it is a matter of concern to the Government. Therefore, foreign trade is a matter which neither the President, nor the Congress, nor the people can afford to ignore.

The problem of foreign trade in our future is going to be increasingly a matter of competition with the Communist countries dominated and controlled from the Kremlin. Stalin made it very clear before his death that communism sought not only political control of the world but economic control as well. He referred to the fact that World War II had left the economic world divided into two world markets. He said that the sphere of world trade between capitalistic countries would not expand but would contract; that capitalistic opportunities for sales in the world market would deteriorate; that the industries of the capitalistic countries would operate more and more below capacity as the Communists drew a greater part of the world trade. On this premise Stalin drew the conclusion that "wars between capitalistic countries" are inevitable, as each struggles to gain a larger share of the world market, which would be receding for the capitalist nations.

There is much in the history of the world even in the short time since Stalin's death to support his prediction. It should be clear even now to the United States and other free capitalistic nations that we cannot do business with Communists and Communist-dominated nations and expect to win in this battle for world trade. As bait, the Communists may hold out, for the present, short-term gains. They did this in the 1920's when trained engineers from the United States were building the great electrical powerplants and factories in Russia, and our heavy machinery manufacturers were equipping them with dynamos and helping German and English contractors and engineers to develop the basic industry for Russia. It seemed like good business then, just as it apparently seemed like good business in the 1930's and 1940's to accept the peaceful approach of Russia on the political side.

Today marks the era when the Russians are offering the very tempting East-West trade not in order to develop a permanent trade with us but to get equipment they cannot yet obtain within the Communist bloc. It must seem clear by now that this is done only in order that they may become self-sufficient within the Iron Curtain. Then they will not need to trade with us at all. In this manner they expect to make the prophecy of Stalin come true. It was to divide the capitalistic powers in this competition for the Soviet's temporary trade and, eventually, cause discord and war among the free nations that in reality have so much in common with each other and so little with the Communist world.

The United States is going to be tempted greatly to trade with the Soviet nations because the free world market has been contracted by Communist victories at the very time when our productive capacity has been expanded in excess of what we at home can consume in peacetime. It comes at a time, also, when we are especially sensitive to unemployment. We are already hearing in business circles and in the Congress the cry, "Why not trade with Russia and Communist China?"

To answer this question of why we should not trade with Russia or even with Red China, we should look at the basic principles which underlie world trade. When we refer to world trade we must realize that there are both in the political realm and in the field of trade, two worlds: the Communist world ruled from Moscow and the free world of trade made up of many nations each eager to promote its own interests and thereby activated by the spirit of free enterprise and competition.

We must realize that trade must be a reciprocal proposition before it can be on a permanent basis. Each country must have goods to exchange or money with which to buy. Each of the traders must have products which complement rather than compete with the other. To have a permanent trade with a nation there must be political security and stability. American as well as British business has had experience with trade with customers under unstable governments. It is difficult to trade with a country if its government is not going to protect the rules of trade and guarantee a reasonably stable currency or other media of exchange. These required conditions cannot be expected with any reasonable degree of certainty in trading with the Soviet nations. Even with the jealousy and competition which exist among the free nations there has been a code of honor among them going back through the centuries.

The law of merchant developed among the trading nations of Europe and adopted by this country has produced fair trade in the ports of the free world. But this is not true of the Communist world. The representatives in trade of the Soviet Union are not businessmen as is the case of the traders in the free world. They try to appear that way, but they are not. They are political representatives of Soviet governments strictly controlled by the men in the Kremlin. The ultimate end they seek is political not commercial. It is not private enterprise. Time and time again these minions of the Communist rulers come posing as merchants and making attractive offers and promises but have been unable as well as unwilling to carry them out.

The record is clear that in the entire history of the Russian communism there has never been any effort at a continuous, reciprocal trade with any free country. Trade has been used by Communists strictly as a political weapon. It has been on the basis of building a self-sufficiency for the Communist countries and to give a little trade alternately to one country or another as the political advantage indicated.

Chinese Communists follow the same pattern. The dictator Mao has announced on numerous occasions that his plan is self-sufficiency for China through nationalization of industry, collective farming, and all the other Marxian practices which exist in Russia. Sweden is an example of a country which has made a sincere effort to develop East-West trade but has found that even with Czechoslovakia, a country with which it did a satisfactory business as a free nation, that it was necessary to discontinue trade because of unfair practices and unsatisfactory payments.

There is an insistent demand among some of our business people that the United States trade with Communists. This is either because our people do not know the facts, or because it is hard to resist the attraction to trade with China and other Communist countries at a time when a potential market anywhere is attractive to a nation which has overproduced.

Now we come to the question of what is the alternative? The United States must have foreign trade if we are to keep the standards of living which we have come to appreciate and expect. I am greatly indebted in this study of the question of whether or not we should trade with the Soviet Union and Red China to Congressman WALTER JUDD. He made an excellent speech in the House of Representatives on May 28. I have drawn on that speech for some of the facts in this presentation. I have done this because having studied the situation myself, I find the clearest expression of my own beliefs and feelings in some of his words.

With reference to the difficulty of trading with China Dr. JUDD says:

> Some good Americans believe that by increasing trade with Communist China we can detach the Chinese from the Russian Communists, or can drive a wedge between Peiping and Moscow.
>
> But why should Mao move away from the Kremlin if he can have all the advantages of trade with the Western World as long as he needs it and, in addition to this, the closest relations with the Soviet bloc. Does anyone believe that the hard-headed men in the Kremlin would be moving heaven and earth to get Communist China accepted in the United Nations if that would lead or enable Red China to break with Moscow and thereby wreck the Communist world government?

Since Dr. JUDD lived in China for years and understands not only the facts but the philosophy and personality of the Chinese, his words cannot be overlooked. It is my belief that we have already gone as far as we dare go with Communist trade. The free world must build a free, reciprocal trade among the nations that are and expect to remain free from the yoke of Communist domination. We must not let the Communists win any more political victories or trade victories. We must develop our foreign trade first in this Western Hemisphere.

If we continue building a genuine friendship and understanding with the countries in the American continents, we can have a reciprocal trade that will take care of most of the output of our factories and absorb the surpluses from our farms. Sound trade is based on the fact that different products traded in are complementary, not competitive. East-West trade implies by its very name that we are trading with those products that can be raised or produced under about equal circumstances in the same latitude. But from Alaska to the tip of South

America there is every degree of temperature; every type of soil and probably every mineral product needed in industry. If through a better prepared and instructed exchange of tourists; through an expanded student exchange program; through a more effective diplomatic exchange and an effective governmental policy, we approach the problem of a free foreign trade, not exclusively but predominately in the Western Hemisphere, we will not need be tempted by the siren of trade with Russia and Red China.

We should continue through the United Nations to fight Communists on the diplomatic level but build a sound trade with free countries.

SENATE

TUESDAY, JULY 20, 1954

(Legislative day of Friday, July 2, 1954)

The Senate met at 10 o'clock a. m., on the expiration of the recess.

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Eternal Father, once more we enter the stream of life with its rush and pressure of public affairs. We pray for the quickening awareness of Thy constant presence. May we face all the duties which the day may bring in the firm confidence that Thou art our sufficient shield and defense. With that assurance may we know that neither disappointment nor weariness, nor any temporary defeat, can separate us from Thy love.

Thou hast kindled a divine light on the altar of our souls. Always may we remember that we are guardians of that sacred flame. Guide us to find the burning bush that glows in the drab valley of daily duty. In all our dealings with distressed humanity, yearning for a more abundant life, keep us faithful to the spirit of the Master who came not to be ministered unto, but to minister. We ask it in His name. Amen.

THE JOURNAL

On request of Mr. KNOWLAND, and by unanimous consent, the reading of the Journal of the proceedings of Monday, July 19, 1954, was dispensed with.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, its reading clerk, announced that the House had passed the following bills of the Senate, severally with an amendment, in which it requested the concurrence of the Senate:

S. 2670. An act to provide for the termination of Federal supervision over the property of certain tribes, bands, and colonies of Indians in the State of Utah and the individual members thereof, and for other purposes;

S. 3197. An act to authorize the acceptance of c nditional gifts to further the defense effort; and

S. 3344. An act to amend the mineral-leasing laws and the mining laws to provide for multiple mineral development of the same tracts of the public lands, and for other purposes.

The message also announced that the House had passed the bill (S. 3487) to authorize the Central Bank for Cooperatives and the regional banks for cooperatives to issue consolidated debentures, and for other purposes, with amendments, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H. R. 1843. An act to increase the retired pay of certain members of the former Lighthouse Service;

H. R. 4118. An act to authorize the preparation of rolls of persons of Indian blood whose ancestors were members of certain tribes or bands in the State of Oregon, and to provide for per capita distribution of funds arising from certain judgments in favor of such tribes or bands;

H. R. 5796. An act to amend the Bankruptcy Act to make tax liens of States and their subdivisions valid against trustees in bankruptcy;

H. R. 5832. An act to authorize the Commissioner of Public Lands of the Territory of Hawaii to sell public lands to certain lessees, permittees, and others;

H. R. 6223. An act to amend section 87 of the National Defense Act of June 3, 1916, as amended (32 U. S. C. 47), to relieve the States from accountability and pecuniary liability for property lost, damaged, or destroyed except in cases where it shall appear that the loss, damage, or destruction of the property was due to carelessness or negligence or could have been avoided by the exercise of reasonable care;

H. R. 6399. An act granting the consent and approval of Congress to an interstate forest fire protection compact;

H. R. 6814. An act to facilitate the acquisition of non-Federal land within areas of the National Park System, and for other purposes;

H. R. 7568. An act to authorize and direct the Farm Loan Board of Hawaii to convey certain land and to ratify and confirm certain acts of said Farm Loan Board;

H. R. 7734. An act to amend section 47 of the National Defense Act concerning the requirement for bond covering certain property issued by the United States for use by Reserve Officers' Training Corps units maintained at educational institutions;

H. R. 7912. An act to abolish the Old Kasaan National Monument, Alaska, and for other purposes;

H. R. 8205. An act to authorize the conveyance by the Secretary of the Interior to Virginia Electric & Power Co. of a perpetual easement of right-of-way for electric transmission line purposes across lands of the Richmond National Battlefield Park, Va., such easement to be granted in exchange for, and in consideration of, the conveyance for park purposes of approximately 6 acres of land adjoining the park;

H. R. 8783. An act to provide for the conveyance of certain housing units owned by the United States to the Housing Authority of St. Louis County, Mo.;

H. R. 8898. An act to amend section 401 (e) (2) of the Civil Aeronautics Act, as amended;

H. R. 9302. An act to permit retired members of the uniformed services to revoke elections made under the Uniformed Services Contingency Option Act of 1953 in certain cases where the elections were made because of mathematical errors or misinformation; and

H. J. Res. 359. Joint resolution designating the period from October 11 to October 16, inclusive, 1954, as National Nurse Week.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

H. R. 7466. An act to authorize the Secretary of the Interior to execute an amendatory repayment contract with the Pine River irrigation district, Colorado, and for other purposes; and

H. R. 8026. An act to provide for transfer of title to movable property to irrigation or water users' organizations under the Federal reclamation laws.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. KNOWLAND, and by unanimous consent, the Committee on Interior and Insular Affairs, the Committee on Finance, the Committee on Government Operations, and the Subcommittee on Rules of the Committee on Rules and Administration were authorized to meet during the session of the Senate today.

ORDER FOR TRANSACTION OF ROUTINE BUSINESS

Mr. KNOWLAND. Mr. President, I ask unanimous consent that immediately following the quorum call there may be the customary morning hour for the transaction of routine business, under the usual 2-minute limitation on speeches.

The VICE PRESIDENT. Without objection, it is so ordered.

CALL OF THE ROLL

Mr. KNOWLAND. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Aiken	Gore	Mansfield
Bennett	Hayden	Murray
Bricker	Hill	Payne
Burke	Holland	Robertson
Butler	Johnson, Tex.	Saltonstall
Clements	Kerr	Smith, Maine
Dirksen	Kilgore	Thye
Dworshak	Knowland	Welker
Flanders	Langer	Wiley
Gillette	Lehman	Williams

Mr. CLEMENTS. I announce that the Senator from Missouri [Mr. HENNINGS] is necessarily absent.

The Senator from Tennessee [Mr. KEFAUVER] and the Senator from Arkansas [Mr. MCCLELLAN] are absent on official business.

The VICE PRESIDENT. A quorum is not present.

Mr. KNOWLAND. Mr. President, I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

The motion was agreed to

The VICE PRESIDENT. The Sergeant at Arms will execute the order of the Senate.

After a little delay, Mr. ANDERSON, Mr. BARRETT, Mr. BEALL, Mrs. BOWRING, Mr. ERIDGES, Mr. BUSH, Mr. BYRD, Mr. CAPEHART, Mr. CARLSON, Mr. CASE, Mr. CHAVEZ, Mr. COOPER, Mr. CORDON, Mr. CRIPPA, Mr. DANIEL, Mr. DOUGLAS, Mr. DUFF, Mr. EASTLAND, Mr. ELLENDER, Mr. ERVIN, Mr. FERGUSON, Mr. FREAR, Mr. FULBRIGHT, Mr. GEORGE, Mr. GOLDWATER, Mr. GREEN, Mr. HENDRICKSON, Mr. HICKENLOOPER, Mr. HUMPHREY, Mr. IVES, Mr. JACKSON, Mr. JENNER, Mr. JOHNSON of Colorado, Mr. JOHNSTON of South Carolina, Mr. KENNEDY, Mr. KUCHEL, Mr. LENNON, Mr. LONG, Mr. MAGNUSON, Mr. MALONE, Mr. MARTIN, Mr. MAYBANK, Mr. MCCARRAN, Mr. MCCARTHY, Mr. MILLIKIN, Mr. MONRONEY, Mr. MORSE, Mr. MUNDT, Mr. NEELY, Mr. PASTORE, Mr. POTTER, Mr. PURTELL, Mr. REYNOLDS, Mr. RUSSELL, Mr. SCHOEPPEL, Mr. SMATHERS, Mr. SMITH of New Jersey, Mr. SPARKMAN, Mr. STENNIS, Mr. SYMINGTON, Mr. UPTON, Mr. WATKINS, and Mr. YOUNG entered the Chamber and answered to their names.

The VICE PRESIDENT. A quorum is present.

Routine business is now in order.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

PAUL A. SMITH

A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to authorize the President to place Paul A. Smith, a commissioned officer of the Coast and Geodetic Survey, on the retired list, in the grade of rear admiral (lower half) in the Coast and Geodetic Survey, at the time of his retirement, with entitlement to all benefits pertaining to any officer retired in such grade (with an accompanying paper); to the Committee on Interstate and Foreign Commerce.

REPORT ON TORT CLAIMS PAID BY DEPARTMENT OF AGRICULTURE

A letter from the Administrative Assistant Secretary, Department of Agriculture, transmitting, pursuant to law, a report on tort claims paid by that Department for the period July 1, 1953, to June 30, 1954 (with an accompanying report); to the Committee on the Judiciary.

The VICE PRESIDENT appointed Mr. CARLSON and Mr. JOHNSTON of South Carolina members of the committee on the part of the Senate.

EXPRESSION OF THANKS FOR ASSISTANCE GIVEN MEXICAN CITIZENS DURING RECENT FLOODS

The VICE PRESIDENT laid before the Senate a letter from the Assistant Secretary of State, transmitting a translation of a note from the Ambassador of Mexico, expressing the appreciation of the Government and people of Mexico for the assistance given to Mexican citizens in the border area during the recent floods along the Rio Grande, which, with the accompanying paper, was referred to the Committee on Foreign Relations.

RECLAMATION—TELEGRAM FROM EXECUTIVE HEAD OF RURAL ELECTRIC COOPERATIVES, BISMARCK, N. DAK.

Mr. LANGER. Mr. President, I am in receipt of a telegram from R. G. Harens, executive head of the Rural Electric Cooperatives, Bismarck, N. Dak., embodying a resolution adopted by that organization at Bismarck, N. Dak., relating to the problem of reclamation. I ask unanimous consent that the telegram be appropriately referred and printed in the RECORD.

There being no objection, the telegram was referred to the Committee on Appropriations, and ordered to be printed in the RECORD, as follows:

BISMARCK, N. DAK., *July 19, 1954.*

Senator WILLIAM LANGER,
Washington, D. C.:

May we present for your interest the following resolution:

"Whereas recent experience has forcibly demonstrated to us the urgent necessity of having adequate spare transformers in order to restore service within the shortest possible time; and

"Whereas it would seem of utmost importance that the Bureau of Reclamation should have adequate mobile spare transformers located in our region that could readily be moved to any Bureau substation in our region where an emergency developed: Now, therefore, be it

"*Resolved*, That we, the North Dakota Association of Rural Electric Cooperatives, in annual meeting assembled in Bismarck, N. Dak., this 15th day of July 1954, hereby urgently recommend that the Bureau of Reclamation forthwith obtain and henceforth maintain in our region such readily movable spare mobile transformers which may be transported over our State highways."

We urge Congress to appropriate such funds as may be necessary to accomplish this in the pending supplemental appropriation bill for the Bureau of Reclamation.

Your help on this matter will be appreciated.

R. G. HARENS.

FULL PARITY FOR FARMERS—LETTER AND PETITION

Mr. LANGER. Mr. President, I am in receipt of a letter from Theodore Carlson, of Dunn Center, N. Dak., transmitting a petition signed by businessmen of Halliday, N. Dak., favoring the enactment of legislation providing full parity for farmers. I ask unanimous consent that the letter and petition be appropriately referred and printed in the RECORD, together with the names of businessmen of Halliday who signed the petition.

There being no objection, the letter and petition were referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, together with all the signatures thereto, as follows:

DUNN CENTER, N. DAK., *July 16, 1954.*

Hon. Senator WILLIAM LANGER,
Washington, D. C.

MY DEAR SENATOR LANGER: Am sending you a petition signed by businessmen of Halliday, N. Dak., backing farmers for full parity. I thank you for your strong efforts on your part backing up the farmers program.

I am the chairman of the Dunn County A. S. C. in North Dakota. What can be done, to retain the old committees, Benson's plan to change all committees is not advisable as far as I can see it. What can be done to stop Mr. Benson with his devastating program? Are farmers going to be the victims of another period of depression?

With sincere wishes to you and your staff.

Sincerely,

THEODORE CARLSON.

"PARITY FOR THE FARMER" SAY TOWN BUSINESSMEN

Since the State of North Dakota is a major agricultural State, the businessmen of this city feel that it is most imperative that we work side by side with all those who are attempting to maintain a farm program which will enrich and develop the agricultural activities wherever they are a major industry or source of livelihood. In view of the above conclusion, the Halliday merchants have adopted the following resolution:

"*Resolved*, That we go on record condemning any effort on the part of any Congressman, the Department of Agriculture, or any agency for attempting to disrupt the present farm stabilization program, affecting all basic farm commodities.

"We further resolve that Congress shall not only maintain 90 percent of parity, but shall endeavor to establish 100 percent of parity for basic farm commodities. We do not favor any tendency toward flexibility of price support, but urge Congress to maintain a production control program which is essential in order to have stabilized price support.

"We further resolve to condemn any form of prosperity based on war and bloodshed, but favor a genuinely sane and sound economic program, particularly for the producer, which shall be based on industry, security, and individual initiative.

"We further urge all business groups in other cities of this State as well as those of other agricultural States to go on record favoring similar resolutions."

Swenson, Richard Weisenburger, Gertrude Robers, Mrs. Daniel Mann, Frankie Fiegal, O. D. Weydante, Irene Waith, M. J. Howard, Frank Martin, Jr., V. L. Smith, Lloyd Scelle, Geo. Boeckel, Simon W. Bouch, Irwin Cuhau, all of Halliday, N. Dak.

PRICE SUPPORTS, ETC.—RESOLUTIONS OF NORTH DAKOTA STOCKMEN'S ASSOCIATION, DICKINSON, N. DAK.

Mr. LANGER. Mr. President, I present for appropriate reference, and ask unanimous consent to have printed in the RECORD, resolutions adopted by the North Dakota Stockmen's Association, at Dickinson, N. Dak., relating to price supports, and so forth.

There being no objection, the resolutions were referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

RESOLUTIONS ADOPTED AT THE 25TH ANNUAL CONVENTION OF THE NORTH DAKOTA STOCKMEN'S ASSOCIATION, DICKINSON, N. DAK., JUNE 7–8–9, 1954

RESOLUTION 1

Price supports

Whereas in the present depressed market conditions, occasional suggestions have come forth that the cattlemen should have price supports on their cattle; and

Whereas the North Dakota Stockmen's Association has traditionally opposed government handouts and favored a free market without support or ceiling controls on cattle: Now, therefore, be it

Resolved, That we oppose any form of direct Government support for our product.

RESOLUTION 2

Government beef buying

Government beef buying program, which has recently come to a close after purchases of about 250 million pounds of beef, representing about 865,000 of the lower grade beef animals, has been of great value to the cattle industry in bolstering sagging cattle prices.

This program, suggested early in 1953 by the American National Cattlemen's Association, is not at the expense of the taxpayer because purchases were made (1) with section 32 funds derived from import duties on cattle, beef, and beef products, and (2) with a small percentage of foreign aid funds already voted.

Most of the purchases under this program have been for school lunches and the remainder for foreign aid. We believe the public benefits by the school lunch program and that it is better to send beef than dollars to needy foreign nations.

In conducting the program this year, the Department of Agriculture should plan purchases to coincide with anticipated major runs of cows and grass beef to market, and should avoid contracting for future delivery at a date so distant as to encourage speculation on the markets. Also the Department of Agriculture should arrange any future beef buying program to begin if the necessity presents itself, and to buy a larger volume over a longer period and utilize available mutual aid funds.

RESOLUTION 3

Economy in government

We have seen government spending reach such astronomical heights that we have felt it our duty early to call attention to the need for economy. We feel we should reiterate our stand in this regard even though some economics have been effected. There is need for further retrenchment in spending. As an example of less government and more efficient government, we cite and commend the action of Secretary of Agriculture Benson in reorganizing his Department. We urge Congress to scrutinize closely each appropriation for our Federal agencies. We urge Congress also to eliminate needless agencies and duplicating services.

RESOLUTION 4

Beef education

Whereas there is a well-recognized need for more intensive advertising of beef and a broader public relations campaign for more intensive research in the field of marketing and for the development of new uses for beef and its byproduct, we do therefore endorse the beef promotion campaign which has been instituted and do commend for their active work in this campaign the American National Cattlemen's Association, the National Livestock & Meat Board, the packing industries, restaurants and cafes, the Cow-Belles, both national and local, and most especially our own Don Short and his committee.

RESOLUTION 5

Constitutional amendment

Whereas we believe that the proposed graduated land tax opens the door to discriminatory legislation: Now, therefore, be it

Resolved, That we oppose this initiated measure as being un-American in principle.

RESOLUTION 6

Calfhood vaccination

Resolved, That we continue our support of a calfhood vaccination program on a voluntary basis for the control and eradication of brucellosis.

RESOLUTION 7

World trade

Resolved, That we oppose any favorable action on the part of Congress relative to the report of the Randall Committee.

RESOLUTION 8

Vic Christensen

Our beloved president, Vic Christensen, passed away last fall. We cannot fully realize the enormity of the loss that Mrs. Christensen and the family have suffered, but we as members of this association, which he helped form and so ably guided through its 25 years of existence express to his wife and family our sincere sorrow at this time.

RESOLUTION 9

Departed members

Since we last met we have lost through death a number of our other members. We miss the friendship and council of these men, and we as members of the North Dakota Stockmen's Association wish hereby to express our heartfelt sorrow and our deepest sympathy to their families in the loss of these our friends.

RESOLUTION 10

Thanks

The city of Dickinson has afforded us a fine and successful convention. Therefore we wish sincerely to thank those organizations and individuals who have provided us with facilities, refreshments, and entertainment.

We wish also to thank our convention speakers, the several committees, our president, our officers, generally our secretary and his staff for their work in our behalf.

USE OF SURPLUS FOOD FOR OVERSEAS AID—TELEGRAM

Mr. WILEY. Mr. President, I present a telegram which I was glad to receive from Mrs. M. B. Hodge, on behalf of the National Council of American Baptist Women, Green Lake, Wis., who vigorously endorses our sound program for overseas relief aid through encouraging the work of voluntary agencies.

I ask unanimous consent that the telegram be printed in the RECORD, and appropriately referred.

There being no objection, the telegram was referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

GREEN LAKE, WIS., *July 16, 1954.*

Hon. ALEXANDER WILEY,
Senate Office Building,
Washington, D. C.:

National Council American Baptist Women in session Green Lake, Wis., wholeheartedly endorses action to release surplus food to voluntary agencies for shipment overseas. We pledge effort to increase funds for distribution abroad. Urge you to continue to use every device to make United States food resources available to fight world hunger.

Mrs. M. B. HODGE,
President.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. CORDON, from the Committee on Interior and Insular Affairs, without amendment:

H. R. 8038. A bill to authorize the conveyance to the Hot Springs School District and to Garland County, Ark., for school and for other public purposes, of certain land originally donated to the United States and situated in Hot Springs National Park, Ark., and for other purposes (Rept. No. 1939).

By Mr. LANGER, from the Committee on the Judiciary, without amendment:

S. 3104. A bill for the relief of Theodore J. Harris (Rept. No. 1948);

S. 3105. A bill for the relief of Stanley Rydzon and Alexander P. Anderson (Rept. No. 1949);

S. 3326. A bill for the relief of P. H. McConnell (Rept. No. 1950);

H. R. 3516. A bill for the relief of Anna K. McQuilkin (Rept. No. 1951); and

H. R. 5986. A bill for the relief of Harold E. Wahlberg (Rept. No. 1952).

By Mr. LANGER, from the Committee on the Judiciary, with an amendment:

S. 17. A bill to provide general rules of practice and procedure before Federal agencies (Rept. No. 1953);

S. 1692. A bill for the relief of Francis C. Pollard (Rept. No. 1954);

S. 3076. A bill to provide for the reimbursement of Meadow School District No. 29, Upham, N. Dak., for loss of revenue resulting from the acquisition of certain lands within such school district by the Department of the Interior (Rept. No. 1955);

S. 3517. A bill to amend section 144 of title 28 of the United States Code (Rept. No. 1956);

H. R. 2024. A bill for the relief of Frank L. Peyton (Rept. No. 1957);

H. R. 3008. A bill for the relief of Esther Smith (Rept. No. 1958);

H. R. 3951. A bill for the relief of Frank G. Koch (Rept. No. 1959); and

H. R. 5093. A bill for the relief of Mrs. Dorothy J. Williams, widow of Melvin Edward Williams (Rept. No. 1960).

By Mr. LANGER, from the Committee on the Judiciary, with amendments:

S. 47. A bill for the relief of Joseph Andrew Wright (Rept. No. 1961);

S. 1022. A bill for the relief of L. R. Swarthout and the legal guardian of Harold Swarthout (Rept. No. 1962);

S. 3304. A bill conferring jurisdiction upon the Court of Claims of the United States to consider and render judgment on the claim of the Cuban-American Sugar Co., against the United States (Rept. No. 1963);

H. R. 4175. A bill for the relief of Charles R. Logan (Rept. No. 1964); and

H. R. 5460. A bill for the relief of Chancy C. Newsom (Rept. No. 1965).

By Mr. WELKER, from the Committee on the Judiciary, with amendments:

H. R. 2163. A bill for the relief of Lillian Schlossberg (Rept. No. 1940).

By Mr. McCARTHY, from the Committee on Government Operations, without amendment:

H. R. 179. A bill to amend section 7 of the Administrative Expenses Act of 1946, as amended (Rept. No. 1944); and

H. R. 8501. A bill to provide for the conveyance of certain land in Sumter County, Ga., to the Americus and Sumter County Chamber of Commerce (Rept. No. 1945).

By Mr. McCARTHY, from the Committee on Government Operations, with an amendment:

H. R. 8020. A bill authorizing the transfer of certain property of the United States Government (in Klamath County, Oreg.) to the State of Oregon (Rept. No. 1946).

By Mr. MUNDT, from the Committee on Government Operations, with amendments:

H. R. 8753. A bill to amend the Federal Property and Administrative Services Act of 1949, as amended, to authorize the Administrator of General Services to establish and operate motor vehicle pools and systems and to provide office furniture and furnishings when agencies are moved to new locations, to direct the administrator to report the unauthorized use of Government motor vehicles, and to authorize the United States Civil Service Commission to regulate operators of Government-owned motor vehicles, and for other purposes (Rept. No. 1941).

By Mr. ERVIN, from the Committee on Government Operations, without amendment:

S. 3709. A bill to provide for the conveyance of certain real property to the town of Beaufort, N. C. (Rept. No. 1942); and

H. R. 6658. A bill to provide for the conveyance of certain lands by the United States to the county of Cumberland, State of North Carolina, without remuneration (Rept. No. 1943).

AMENDMENT OF SECTION 413 OF THE FOREIGN SERVICE ACT OF 1946—REPORT OF A COMMITTEE

Mr. WILEY. Mr. President, from the Committee on Foreign Relations, I report an original bill amending section 413 of the Foreign Service Act of 1946, and I submit a report (No. 1947) thereon.

The VICE PRESIDENT. The report will be received, and the bill will be placed on the calendar.

The bill (S. 3778) amending section 413 of the Foreign Service Act of 1946, reported by Mr. WILEY from the Committee on Foreign Relations, was read twice by its title and placed on the calendar.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. POTTER:

S. 3776. A bill to extend the authority of the American Battle Monuments Commission to all areas in which the Armed Forces of the United States have conducted operations since April 6, 1917, and for other purposes; to the Committee on Armed Services.

By Mr. CARLSON:

S. 3777. A bill to provide for the purchase of bonds to cover postmasters, officers, and employees of the Post Office Department, contractors with the Post Office Department, mail clerks of the Armed Forces, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. WILEY:

S. 3778. A bill amending section 413 of the Foreign Service Act of 1946; placed on the calendar.

(See the remarks of Mr. WILEY when he reported the above bill from the Committee on Foreign Relations, which appear under a separate heading.)

By Mr. LEHMAN:

S. 3779. A bill for the relief of Moosa Ebrahimian; to the Committee on the Judiciary.

By Mr. SALTONSTALL (by request):

S. 3780. A bill to amend the National Service Life Insurance Act of 1940, as amended, to assure payment of the full face value of national service life insurance policies on which payments were commenced prior to September 30, 1944; to the Committee on Finance.

AVAILABILITY OF CERTAIN FUNDS TO COMMITTEE ON GOVERNMENT OPERATIONS

Mr. MUNDT submitted the following resolution (S. Res. 288), which was referred to the Committee on Government Operations:

Whereas the Senate Permanent Subcommittee on Investigations of the Committee on Government Operations has incurred extraordinary expenses as a result of the recent inquiry conducted by a special subcommittee of such permanent subcommittee with respect to certain charges made by the Secretary of the Army suggesting improper influence on the part of the chairman of such permanent subcommittee, and certain members of the staff of such subcommittee, and certain countercharges made by said chairman suggesting coercion on the part of said Secretary, and certain other personnel of the Department of the Army, to halt the work of such permanent subcommittee; and

Whereas such extraordinary expenses as a result of such hearing make necessary additional funds in order that the Senate Permanent Subcommittee on Investigations will be able to carry out its functions; and

Whereas it was unanimously agreed by such special subcommittee, headed by Senator MUNDT, that it would ask the Senate to reimburse the Committee on Government Operations for the exact amount of the expenditures necessitated by its special investigation growing out of such charges and countercharges rather than to request in advance a separate fund to meet the estimated costs of the investigation: Now, therefore, be it

Resolved, That the Committee on Government Operations, or any duly authorized subcommittee thereof, is hereby authorized to expend from the contingent fund of the Senate $24,605.67, in addition to the amount, and for the same purposes and during the same period, specified in Senate Resolution 189, 83d Congress, agreed to February 2, 1954.

AGRICULTURAL ACT OF 1954—AMENDMENT

Mr. ANDERSON submitted an amendment intended to be proposed by him to the bill (S. 3052) to encourage a stable, prosperous, and free agriculture and for other purposes, which was ordered to lie on the table and to be printed.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles, and referred as indicated:

H. R. 1843. An act to increase the retired pay of certain members of the former Lighthouse Service; and

H. R. 8898. An act to amend section 401 (e) (2) of the Civil Aeronautics Act, as amended; to the Committee on Interstate and Foreign Commerce.

H. R. 4118. An act to authorize the preparation of rolls of persons of Indian blood whose ancestors were members of certain tribes or bands in the State of Oregon, and to provide for per capita distribution of funds arising from certain judgments in favor of such tribes or bands;

H. R. 5832. An act to authorize the Commissioner of Public Lands of the Territory of Hawaii to sell public lands to certain lessees, permittees, and others;

H. R. 6814. An act to facilitate the acquisition of non-Federal land within areas of the National Park System, and for other purposes;

H. R. 7568. An act to authorize and direct the Farm Loan Board of Hawaii to convey certain land and to ratify and confirm certain acts of said Farm Loan Board;

H. R. 7912. An act to abolish the Old Kasaan National Monument, Alaska, and for other purposes; and

H. R. 8205. An act to authorize the conveyance by the Secretary of the Interior to Virginia Electric & Power Co., of a perpetual easement of right-of-way for electric transmission line purposes across lands of the Richmond National Battlefield Park, Va., such easement to be granted in exchange for, and in consideration of, the conveyance for park purposes of approximately 6 acres of land adjoining the park; to the Committee on Interior and Insular Affairs.

H. R. 5796. An act to amend the Bankruptcy Act to make tax liens of States and their subdivisions valid against trustees in bankruptcy; and

H. J. Res. 359. Joint resolution designating the period from October 11 to October 16, inclusive, 1954, as National Nurse Week; to the Committee on the Judiciary.

H. R. 6223. An act to amend section 87 of the National Defense Act of June 3, 1916, as amended (32 U. S. C. 47), to relieve the States from accountability and pecuniary liability for property lost, damaged, or destroyed except in cases where it shall appear that the loss, damage, or destruction of the property was due to carelessness or negligence or could have been avoided by the exercise of reasonable care;

H. R. 7734. An act to amend section 47 of the National Defense Act concerning the requirement for bond covering certain property issued by the United States for use by Reserve Officers' Training Corps units maintained at educational institutions; and

H. R. 9302. An act to permit retired members of the uniformed services to revoke elections made under the Uniformed Services Contingency Option Act of 1953 in certain cases where the elections were made because of mathematical errors or misinformation; to the Committee on Armed Services.

H. R. 6393. An act granting the consent and approval of Congress to an interstate forest fire protection compact; to the Committee on Agriculture and Forestry.

NOTICE OF HEARING ON OMNIBUS FLOOD CONTROL-RIVERS AND HARBORS BILL, H. R. 9859

Mr. BUSH. Mr. President, on behalf of the Subcommittee on Flood Control-Rivers and Harbors of the Committee on Public Works, I desire to give notice that public hearings have been scheduled for Thursday, July 22, 1954, at 9:30 a. m. in room 412, Senate Office Building, on the omnibus flood control-rivers and harbors bill, H. R. 9859. We expect to take up those additional projects which have been submitted to Congress subsequent to the conclusion of the hearings by the House Committee on Public Works.

"WRIT IN WATER"

Mr. BENNETT. Mr. President, the history of the arid West has been, and always will be, literally "writ in water."

The first Mormon pioneers learned this the morning after their arrival in the valley of the Great Salt Lake—107 years ago this week. Only when they had softened the sun-baked soil with the waters of a little mountain creek could they plow and plant their precious seeds, and only by repeating this process could they mature their crop.

This was the first of many lessons in the vital value of water, from which our whole pattern of irrigation has developed. They not only learned to control and share the precious water in the fertile valleys, but how to catch and save it on the mountainsides, to which nature delivered it as snow.

In my State of Utah the availability of water is everywhere controlling. It dictated the location of our early settlements and still controls their size. It sets the pattern of our economy in industry as well as agriculture. It influences our social structure and our education, and will do for all time.

We in the intermountain West want to share in the new growth and gains that are envisioned for America. We think we have great still-dormant values to contribute to it. But the key to this is still more water, which we can no longer get without Federal help. We did not need help in the beginning. The men of each community joined to make best use of the local water sources. We have appreciated the Federal help we have had with the intermediate streams, but we have come to the end of these now, and the time has arrived when we must draw on the water bank of last recourse—the Colorado River.

This is our 107th anniversary, and, looking back to the empty desert, we are proud. Looking forward to another century, we see a population doubled. The key then and tomorrow was and will be water. It will take most of the next century to develop the full potential of our agreed-to share of the Colorado.

We hope that Congress by its authorization of the upper Colorado development will write in water an assurance that our next century will be a prosperous one.

APOLOGIES TO SENATORS BRIDGES AND WELKER FOR PEARSON TELECAST

Mr. GOLDWATER. Mr. President, on June 20, over television station WTOP-TV, Drew Pearson made an unwarranted, uncalled-for, and cowardly attack, filled with untruths, against two outstanding Members of the United States Senate, the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Idaho [Mr. WELKER].

The sponsors of the Pearson telecast, the Capital Transit Co., recognizing the gross errors in the telecast, have written letters to the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Idaho [Mr. WELKER] apologizing for the telecast.

I ask unanimous consent that both letters be incorporated in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

CAPITAL TRANSIT CO.,
Washington, D. C., July 12, 1954.

Hon. STYLES BRIDGES,
Senate Office Building,
Washington, D. C.

DEAR SENATOR BRIDGES: On behalf of Capital Transit Co., I want you to know how much we regret any embarrassment that may have been caused you by the statements which were made about you in the telecast by Mr. Drew Pearson over station WTOP-TV, Washington, D. C., on June 20, 1954.

As you know, Capital Transit Co. sponsored a series of weekly telecasts by Mr. Pearson. However, I am sure you realize that Capital Transit Co. had no control over what Mr. Pearson said in his telecasts. In fact, at the conclusion of each telecast a statement was made that, "The views expressed were those of Mr. Pearson and not necessarily those of Capital Transit or this station."

Being fully aware of your long and distinguished record of public service both in the United States Senate and in your own State, we do not believe that you would be a party to a plan to intentionally injure one of your colleagues. If we had had an opportunity to review Mr. Pearson's script before he went on the air, we would have demanded that the references to you be deleted.

We do not intend to renew our contract with Mr. Pearson.

Again, we want you to know that we regret exceedingly that Mr. Pearson referred to you in his telecast of June 20, and to assure you unequivocally that Mr. Pearson's statements in the aforementioned telecast in no way reflected the views of Capital Transit Co.

With kindest personal regards, I am,

Yours sincerely,

J. A. B. BROADWATER,
President.

CAPITAL TRANSIT CO.,
Washington, D. C., July 12, 1954.

Hon. HERMAN WELKER,
Senate Office Building,
Washington, D. C.

DEAR SENATOR WELKER: On behalf of Capital Transit Co., I want you to know how much we regret any embarrassment that may have been caused you by the statements which were made about you in the telecast by Mr. Drew Pearson over Station WTOP–TV, Washington, D. C., on June 20, 1954.

As you know, Capital Transit Co. sponsored a series of weekly telecasts by Mr. Pearson. However, I am sure you realize that Capital Transit Co. had no control over what Mr. Pearson said in his telecasts. In fact, at the conclusion of each telecast a statement was made that "the views expressed were those of Mr. Pearson and not necessarily those of Capital Transit or this station."

Being fully aware of your long and distinguished record of public service both in the United States Senate and in your own State, we do not believe that you would be a party to a plan to intentionally injure one of your colleagues. If we had had an opportunity to review Mr. Pearson's script before he went on the air, we would have demanded that the references to you be deleted.

We do not intend to renew our contract with Mr. Pearson.

Again, we want you to know that we regret exceedingly that Mr. Pearson referred to you in his telecast of June 20, and to assure you unequivocally that Mr. Pearson's statements in the aforementioned telecast in no way reflected the views of Capital Transit Co.

With kindest personal regards, I am,

Yours sincerely,

J. A. B. BROADWATER,
President.

REHABILITATION OF THE HANDICAPPED—A MAJOR ACHIEVEMENT OF 83D CONGRESS

Mr. WILEY. Mr. President, one of the great achievements of the 83d Congress is the adoption of the conference report on the bill which provides for a greatly expanded program of rehabilitation for the physically handicapped.

I believe that all officials at Federal, State, and local levels who contributed to the success of this legislation, and the American Federation of the Physically Handicapped, which helped spearhead the public drive for it, as well as other sources, are to be congratulated on this outstanding accomplishment.

I send to the desk the text of an article which had been written by Dr. Howard A. Rusk, as carried in the New York Times of July 11, following the passage of the Senate version. Dr. Rusk pointed up the welcome degree of unanimity which had been recorded on this legislation.

I ask unanimous consent that the article be printed in the body of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BILL TO AID THE HANDICAPPED STIRS ONLY POSITIVE DISSENT—CRITICISM OF SENATE MEASURE AS NOT GIVING ENOUGH HELP PRECEDES UNANIMOUS VOTE

(By Howard A. Rusk, M. D.)

A long cherished dream of those concerned with rehabilitation services for the handicapped approached fruition last week when both the Senate and the House unanimously passed legislation greatly increasing the scope of the Nation's program in this field.

This action represents the second of two major steps requested by President Eisenhower in his message to Congress in January.

The first, which was passed by the Congress and is now awaiting the President's signature, was a section of the Hill-Burton hospital-construction legislation. This authorized an expenditure of $10 million a year for the next 5 years for grants to States, counties, municipalities, and nonprofit agencies for facilities for rehabilitation services.

Although a number of amendments adopted by both the House and the Senate must now be resolved in conference, the major provisions of the legislation passed last week are:

Broadening the scope of the current Federal-State vocational rehabilitation program under which 60,000 disabled persons are rehabilitated each year, under the new act, this number will be expanded to 70,000 next year and 100,000 in 1956, and increased subsequently until a goal of 200,000 is reached in 1959.

Authorizing the Department of Health, Education, and Welfare to conduct a program of grants, stipends, and fellowships to increase the supply of critically needed physicians, physical therapists, occupational therapists, counselors, and other specialized personnel required for rehabilitation and for research.

ONLY AREA OF DISAGREEMENT

This was the only phase of the legislation on which there was disagreement, and even this was on the positive side. Senator HERBERT H. LEHMAN, Democrat, of New York, and others declared emphatically that in view of the critical personnel needs the appropriation of $1 million for this year for training was unrealistically small.

Increasing State and local responsibility for administering the Federal-State vocational rehabilitation program by making possible greater flexibility, less Federal control, and more responsiveness to the specific needs of the States in meeting the problems of their disabled citizens.

This will be accomplished by removing certain limitations and by requiring the States to establish their own standards rather than adhere to those set up by the Federal Government.

Providing an improved system of Federal participation in the financing of the Federal-State vocational rehabilitation program

under which the States may ultimately assume a larger proportional share of the financial costs. Both the House and Senate versions, however, insure that there will be no reduction of any kind of Federal support below the present level of operation in any State.

The bills, introduced in the upper Chamber by Senator H. ALEXANDER SMITH, Republican, of New Jersey, and in the House by Representative SAMUEL K. MCCONNELL, Jr., Republican, of Pennsylvania, will increase the Federal investment in rehabilitation in the next year from the current $23 million to $30 million.

As Senator WILLIAM A. PURTELL, Republican, of Connecticut, told the Senate: "The committee believes this bill would accomplish two things that are essential in an expansion of vocational rehabilitation services for the disabled. First, the bill provides State agencies with a maximum of responsibility and operational freedom to carry out that responsibility. Second, it provides express authority to the Department of Health, Education, and Welfare to perform the Federal functions which are clearly necessary for the success of any major undertaking in this Federal-State partnership."

INVESTIGATIONS ALSO PROVIDED

Other major features of the new legislation are provisions that:

The Department shall make studies, investigations, demonstrations, and reports on various aspects of the problems of disabled people and their needs.

The Secretary is authorized to render technical assistance to the States in the conduct of their rehabilitation programs.

The Federal Government shall participate in the establishment of sheltered workshops under public and nonprofit auspices where severely disabled persons are able to work for pay.

The Senate version also provides for the establishment of a National Advisory Council on Vocational Rehabilitation to review applications for special project grants of importance in rehabilitation and to make recommendations to the Secretary on such projects.

Both the social and economic wisdom of this new legislation expanding rehabilitation services for the handicapped has been repeatedly demonstrated. It is estimated, for example, that from savings in public welfare relief costs and from increased tax revenues by the rehabilitation of increased numbers of currently nonproductive persons into taxpaying citizens, the Federal and State Governments will receive back $4 for each dollar invested in this new program. The social values which will accrue are immeasurable.

ADMINISTRATORS CONFIDENT

To increase the number of handicapped persons rehabilitated under the Federal-State vocational rehabilitation program from the current 60,000 a year to 200,000 will not be an easy job even under the new legislation. It will require the development of new rehabilitation centers and services and a greatly accelerated program of training professional rehabilitation personnel. Those responsible for the administration of the program, however, believe that this can be done.

There are two factors of great significance in the unanimous action of the House and the Senate last week. The first is that for the first time in our Nation's history we are approaching the problem of disability boldly by planning by 1959 to rehabilitate each year 200,000 of the 250,000 persons who are permanently disabled annually.

The second is that rather than approaching the problem in a piecemeal fashion, Congress, at the urgent request of the President, has provided a balanced program aimed at increasing rehabilitation facilities, training more personnel, discovering new knowledge and techniques through research and demonstration projects, and establishing adequate and sound financing.

With these tools there is reason to be confident that the goal will be achieved and the words "new hope for the handicapped" will become a reality.

PURE MILK ASSOCIATION RECOMMENDS 90 PERCENT PARITY

Mr. WILEY. Mr. President, I was pleased to receive from the distinguished president of the Pure Milk Producers Cooperative, representing 18,000 dairy families in America's dairyland, a message endorsing the Senate Agriculture Committee's version of farm parity maintenance. The telegram came from Bill Groves, one of the great dairy leaders of my State and of the Nation, a personal friend, and a fine American.

I ask unanimous consent that it be printed at this point in the body of the RECORD as a sound indication of grassroots thinking in the heart of America.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

FOND DU LAC, WIS., *July 16, 1954.*

Hon. ALEXANDER WILEY,
Member of Congress,
Senate Office Building:

The State Board of Pure Milk Products Cooperative has adopted a resolution strongly endorsing Senate bill No. 3052. This bill supports dairy prices at 85 percent of parity. The board which represents 18,000 dairy families urges you to support this measure.

WM. F. GROVES,
President, Pure Milk Products Cooperative.

USE OF SURPLUS FOODS TO HELP EUROPEAN FLOOD VICTIMS

Mr. HUMPHREY. Mr. President, I rise to urge the administration to act speedily and hastily in order to alleviate the suffering now taking place in central Europe, particularly in Bavaria and Austria, as a result of the severe floods that have hit that area. Hundreds of thousands of Europeans—men, women, and children—are today suffering from hunger, poverty, and dislocation as a result of these floods. Newspaper reports indicate that the wheat crop is lost, cattle have been destroyed, and homes are gone.

This presents us with a challenge. Large stocks of surplus crops are now in storage in this country. I suggest that we share our surplus with these underprivileged peoples. Congress has already expressed by legislation its desire that the Government of the United States do just this with our surplus food and fiber. This is written into law—it remains only for the administration to act. I call, therefore, upon the administration to act immediately to ship butter, dried milk, wheat, beans, and other essentials of living to help those who suffer.

It is my conviction that it is our religious duty to do this, and it is also in our national self-interest.

I again say that, as a matter of justice and common friendship, and as an expression of generosity on the part of the American people, the shipment of surplus supplies, particularly into the areas of Austria, where the people have demonstrated their desire for freedom, and into the areas of Bavaria, where floodwaters have demolished many communities, would be a most worthy project. Certainly it deserves the immediate attention of the responsible officials of the administration.

CIVIL SERVICE, PATRONAGE AND THE EISENHOWER ADMINISTRATION

Mr. NEELY. Mr. President, the Washington Post and Times Herald, under the ownership of the eminent Mr. Eugene Meyer, and the management of his distinguished son-in-law, Mr. Philip Graham, is one of the few great, influential and praiseworthy newspapers of the Nation. To my regret, it vigorously and effectually supported General Eisenhower's candidacy for President of the United States. Until it made that unfortunate error, it could have justifiably sung after the manner of the Sheriff of Nottingham in Robin Hood—

> I never yet have made one mistake,
> I'd like to—for variety's sake.

But, alas, that degree of absolute perfection has been irretrievably lost. However, the Post, which recently became the Post and Times Herald, still is and will, in my opinion, long continue to be one of the country's outstanding dailies.

Yesterday it carried a timely and important article by Mr. Jerry Kluttz entitled "Drive for Patronage Seeks Added Jobs," which should be brought to the attention of all patriotic men and women who believe in decency and integrity in government. As a service to the public in general and to the Federal employees in particular, I purpose to read this article to the Senate, from beginning to end, in order that it may appear in the body of the CONGRESSIONAL RECORD, and thus obtain wider publicity. It is as follows:

The Eisenhower administration is making a determined effort to assume partisan political control over many thousands of Federal jobs both in and out of the civil-service system.

The drive for patronage is being directed from the White House.

The Republican National Committee set up an elaborate system here to "clear" people down to the precinct level for both Federal appointments and promotions.

Army, Navy, Air Force, Foreign Operations and bipartisan agencies that have been more or less insulated from political patronage demands in the past are not excluded from the present drive for jobs.

It is routine—and expected—for the administration in power to exercise political control over many jobs outside the civil service and other merit systems such as those operated by TVA, FBI, etc.

But the current drive also includes some jobs under the civil-service system, jobs which are supposed to be free from partisan political considerations and to be filled on the basis of merit.

Outside the Post Office Department, where politics has been considered for years in appointments and promotions to many of its jobs, civil service and otherwise, the civil-service system in general has been relatively free of partisan political influences.

A high-ranking official says the present Civil Service Commission "seems to have closed its eyes" to the growing influence of partisan political considerations on appoint-

ments to some of the jobs under its merit system.

The patronage drive, now well under way, has helped to silence demands on the Eisenhower administration for jobs from GOP Members of Congress and from the Republican National Committee.

Soon after the Eisenhower administration was swept into power, the Republican National Committee, as was expected, attempted to dictate appointments to many Federal jobs.

At first, the committee had very little success. Its officials were told repeatedly that this or that job in question was under civil service or the person in it had either permanent civil-service status or veterans' preference rights.

Gradually, however, a few of the agencies began to clear appointments, including those for some civil-service jobs, with the committee. This was done through a top-level appointee in the agency whose job is to check the political angle on appointments and promotions.

A notable example of political operation along this line is Harold Stassen's Foreign Operations Agency, where even stenographers and clerks have been required to produce the proper political clearance. No appointment or promotion can be finally approved in the agency unless it has the approval of the lady there who is Stassen's liaison with the administration's political arm.

Other agencies, however, continued to make appointments and promotions within the civil-service process and they did not clear them in advance with the Republican National Committee.

Somewhere along the line came a recent showdown at the White House and the decision there was apparently cast with the patronage forces.

In recent weeks, agency heads have received "Confidential: Not for publication" letters on White House stationery, in which they were directed to clear certain of their jobs with the committee before making appointments to them.

Strangely, the letters were not signed. Only a small supply was printed. Reportedly, they were delivered by hand to some agency heads for their information only. Precautions were taken to keep copies from the public eye.

However, it is reported on excellent authority that many agency heads have been instructed either by letter or orally to clear appointments to these jobs with the Republican National Committee.

Jobs in grade 14 ($9,600 starting salary) and upward irrespective of whether they are in or out of the civil-service system;

So-called 303-jobs, positions under civil service but which the CSC cannot fill with sufficient qualified eligibles. In such cases CSC authorizes the agencies to hire people on the open market for them. The agencies, however, are supposed to require appointees to meet minimum CS standards for the jobs, to follow veterans' preference, etc.

Jobs, such as attorneys and others, outside the civil service system.

Even though the White House directive on jobs was unsigned, officials assume it came from the office of Sherman Adams, the assistant to the President. Adams' assistant on patronage matters is Charles F. Willis, Jr., and he is the contact man with the National Committee and most agency officials.

Despite the directive, several agency heads whose jobs are under civil service are said not to have cooperated to the point desired by the patronage forces.

One top-rank official, an Eisenhower appointee, is said to have threatened to resign with a blast at the patronage drive.

Meantime CSC, the agency charged with strengthening the merit system, is compiling details on many thousands of non-civil-service jobs which will be turned over to the patronage forces.

Mr. President, the foregoing supplies highly convincing but wholly unnecessary, additional evidence that the great Eisenhower crusade for political purity, which began as a fraudulent farce, has become a notorious fizzle. The great crusader, as he boarded the train in Denver for the Chicago convention which nominated him, said:

I'm going to roar clear across the country for a clean, decent operation. The American people deserve it.

Mr. President, please let me appeal to you to roar across the country, or at least from the White House to the nearest golf course, for "a clean, decent operation" for all the Government's meritorious civil service employees. They deserve it. Please protect these faithful public servants against the devastating White House-directed patronage drive to which the foregoing article from the Washington Post and Times Herald refers, and thus restore some of the former confidence in your administration which long since vanished away.

EXECUTIVE SESSION

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE REPORT OF A COMMITTEE

The following favorable report of a nomination was submitted:

By Mr. CORDON, from the Committee on Interior and Insular Affairs:

Clarence A. Davis, of Nebraska, to be Under Secretary of the Interior, vice Ralph A. Tudor, resigned.

The VICE PRESIDENT. If there be no further reports of committees, the secretary will state the nominations on the Executive Calendar.

UNITED STATES DISTRICT JUDGES

The Chief Clerk read the nomination of Emett C. Choate to be United States district judge for the southern district of Florida.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of Fred M. Taylor to be United States district judge for the district of Idaho.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

NOMINATIONS PASSED OVER

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the next two nominations on the Executive Calendar, that of Herbert S. Boreman, to be United States district judge for the northern district of West Virginia, and that of Joseph E. Hines to be United States attorney for the western district of South Carolina be passed over.

Mr. KNOWLAND. Mr. President, I have no objection to passing those nominations over today. I hope we may consider them at a very early date.

Mr. JOHNSON of Texas. I may say that I know of no specific objection to either of these nominees. However, this is the first time their names have appeared on the Executive Calendar, and we have been unable to make the required clearance. As soon as I am able to do it, I shall notify the distinguished majority leader. I am sure we will be able to take prompt action.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the President be immediately notified of the nominations confirmed today.

The VICE PRESIDENT. Without objection, the President will be notified forthwith of the nominations confirmed today.

LEGISLATIVE SESSION

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

ADDITIONAL OFFICIALS IN TREASURY DEPARTMENT

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 3605) to abolish the offices of Assistant Treasurer and Assistant Register of the Treasury and to provide for an Under Secretary for Monetary Affairs and an additional Assistant Secretary in the Treasury Department, which were, on page 1, line 4, strike out "(39" and insert "(31", and on page 3, line 3, strike out "234." and insert "SEC. 234."

Mr. KNOWLAND. Mr. President, the bill, S. 3605, passed the Senate some time ago. Amendments were made to it in the House, which are purely technical in character. The matter has been cleared with the minority, and, at the request of the chairman of the Senate Finance Committee [Mr. MILLIKIN], I move that the Senate concur in the House amendments.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from California.

The motion was agreed to.

SALE OF CERTAIN WAR-BUILT PASSENGER-CARGO VESSELS — CONFERENCE REPORT

Mr. BUTLER. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the joint resolution (H. J. Res. 534) to authorize the Secretary of Commerce to sell certain war-built passenger-cargo vessels, and for other purposes. I ask unanimous consent for the present consideration of the report.

Mr. KNOWLAND. Mr. President, I wonder if the Senator from Maryland will withhold his motion. I think we can make progress with the conference report if the minority and majority leaders have an opportunity to clear the matter. I think we can do it in a fairly short period of time.

Mr. BUTLER. I will say to the majority leader that I have already conferred with Members on the minority side, and the report is a unanimous report.

Mr. KNOWLAND. I understand that, but the acting minority leader has not been informed——

The VICE PRESIDENT. Does the Senator from Maryland withdraw the report at this time?

Mr. BUTLER. Yes, Mr. President.

Mr. MUNDT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. GORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. BUTLER. I object.

Mr. GORE. I do so at the request of the Senator from Delaware [Mr. WILLIAMS].

Mr. BUTLER. I withdraw the objection.

The VICE PRESIDENT. Is there objection to the request of the Senator from Tennessee. The Chair hears none, and it is so ordered.

THE PROBLEM OF THE JUNIOR SENATOR FROM WISCONSIN

Mr. FLANDERS. Mr. President, the objective of the junior Senator from Vermont in recent speeches and motions has been to end the harmful influence of the junior Senator from Wisconsin in the affairs of the Senate, the Nation, and the world. His activities have not always been harmful. He has done some useful work in his chosen field of hunting out Communists but this has been greatly overadvertised and overestimated. For evidence of this I would call the attention of the Senate to the series of articles which appeared last week in the Scripps-Howard newspapers under the byline of Frederick Woltman. The material which Mr. Woltman presents is factual and is taken from the record.

While my purpose is to end the harmful influence referred to, it is conceivable that the Senator might do this on his own account by promptly announcing a complete change of method and policy. That opportunity has been offered in a spirit of Christian charity. In the absence of such a public statement we must proceed to whatever means may best be devised for keeping him from continuing in the future the damage which he has done in the past.

Many times the junior Senator from Vermont has been asked, "Why do you raise these matters now? Why did you not raise them long ago instead of at the end of a crowded session of Congress?" The answer to that is that I have long been uneasy with regard to this matter, and it was the accumulation of uneasiness which led me to make my first speech on this subject on the floor of the Senate on March 9, as reported on page 2886 of the CONGRESSIONAL RECORD. From that time on, however, events and evidences have accumulated and particularly have been falling into patterns of a most disturbing sort. Perhaps a better way of explaining it is to say that the figure of the Senator has been fitting into a series of frames which I will now proceed to describe.

The first frame is that of the history of civilizations, and of our own civilization in particular, and leads to the reasonable speculation that ours has passed through its maturity and is approaching its end. Let me say at once that this is a personal opinion. I do not expect others to join in this thought with me unless they, too, have been studying the life history of civilizations in the works of such historians as Flinders Petrie, Oswald Spengler, and Arnold Toynbee.

These authors arrange the facts of history in different ways and give it different interpretations. All three, however, agree that civilizations are born, go through a period of youth, come to maturity, and then decline into an old age which ends in death or continuing decay.

In particular Arnold Toynbee expressed the conviction that all civilizations end in a time of troubles through which none has successfully passed. We seem to be in our time of troubles now. One of the aspects of the time of troubles of our country is that, willy nilly, our country exercises the leadership of the world during this period of crisis. It should so act that the world looks to it with confidence and support for leadership, which will, for the first time in human history, bring our civilization safely through. This is the frame. What picture shall we put within it?

We put within it a picture of confusion in leadership to which the Senator from Wisconsin has made a major contribution. The picture is that of the Senator's two assistants—Messrs. Cohn and Schine—in their fantastic and riotous gallimaufry through the capitals of the Western World. This picture is not a still; it can only be shown as a slapstick movie. One reputable American correspondent reported a slapping of one by the other in a Frankfort hotel corridor. His paper did not publish the dispatch but a German paper did. Another event was reported to be the jumping of their hotel bill in Paris, leaving the Embassy to pick up the check.

No one who has not been in contact with responsible citizens of Europe can imagine the disgust and dismay which the incidents of this expedition brought to our reputation and influence. This is the contribution of our Senator to world leadership.

The next frame to which I would direct the attention of the Senate is that which has been constructed out of my experience of repeated visits to Germany in the period between the two World Wars. In those visits I saw the growing power of communism which formed the basis of Hitler's rise to power. I saw the German people at various periods during that rise. Since my visits were business visits, I had an opportunity to talk to Germans on more intimate terms than would be the case of the casual traveler. Furthermore, since these visits were spaced at intervals of two or more years apart, they enabled me to see the social, political, and moral alteration of the nation and its people far more clearly than would have been the case had I lived there continuously during the period and been conscious only of day-to-day events.

In the first place the excuse for Hitler's intervention was far greater than for that of our Senator. In Berlin in 1926 the Communists were rioting in the streets and were being dispersed by streams of water from the hoses of the fire departments. On a railroad journey from Düsseldorf to Berlin, as the train climbed out of the Ruhr Valley onto the plateau, we passed a prison which, as we passed, blossomed forth with hands clenched in the Communist salute. Germany was in infinitely more danger than we are, although our dangers are real.

Hitler exploited the issue of communism, and on it he rose to power. When it became convenient, he allied himself with it. But ultimately he went far afield from communism. He set his nation against the Jews and brought them to unimaginable cruelties. He destroyed the free labor union. He set up his private police force and spy system. He worked toward, and ultimately achieved for himself, the sole authority in government, in business, and in society in general. Curiously enough, his financial support came from wealthy businessmen, some of whom lived to regret the contributions they had made—while others did not live at all.

Each of these features finds its parallel, though it must be admitted to a weaker degree, in the career of the junior Senator from Wisconsin. The most disturbing resemblance comes in his now little-remembered crashing the gate in Senator Baldwin's investigation of the Malmedy massacres. It will be remembered that at Malmedy, armed Nazi ruffians slew unarmed American prisoners. The junior Senator from Wisconsin seemed determined to prove that the unarmed American soldiers were the aggressors, and that the Nazi ruffians had been tortured by the buddies of these American soldiers into making a false confession. This is one of the most peculiar passages in all the history of congressional investigations. It does, however, fit in neatly with the other parallels between the amateurish Senator from Wisconsin and the accomplished and successful dictator of Germany.

The principal result of that investigation in the Senate was to play its part in driving from the Senate floor into the obscurity of a judicial post one of the most honorable and fine-spirited men who has ever graced this body. Ray Baldwin was too sensitive a soul to withstand the "Indian Charlie" tactics of the Wisconsin Senator.

The parallelism with Hitler is strengthened by an analysis of my correspondence. It contains many thousands of letters supporting my efforts, and signed by people from all walks of life and from every religious faith. On the other hand, there are a significant number of letters which are unsigned, supporting the junior Senator from Wisconsin, and fanatically anti-Semitic in content.

Let us therefore place within this second frame a picture of the Senator as fuehrer, and that perhaps without con-

scious intention on his part. He is just naturally going that way.

The third frame is one which I would bring to the particular attention of my Republican friends on this floor. Our party is 100 years old this year. Though it has had its ups and downs, we can look back on that 100 years with enthusiasm and inspiration. Whose picture shall we place in that frame?

Let my Republican associates go in search of that picture. Let us in imagination set forth from the west front of the Capitol down through the Mall to where we can gaze at that splendid monument which commemorates the character and the services of our first President. As we pass that let us glance to the left across the lagoon toward the dome of Vermont marble under which stands the upright figure of the great Virginian, defender of freedom and the rights of man. Still continuing, we come to the white marble memorial and stand in reverence before the patient, noble figure of our first and greatest Republican President. Surely this picture must be set within this third frame.

But there was, and appropriately was, another picture there as well. That picture was the Eisenhower whom we nominated and elected to the Presidency of the United States 2 years ago. It, too, was a noble picture, and it aroused the rightful enthusiasm of millions of young voters and of independents. This is a picture on which my party can look with pride and which would continue to draw the support of the young and of the independent, whose votes are absolutely necessary to continue a Republican Congress and administration.

But what do we see? We see the bright lights of the television blot out that fair picture. It superimposes another figure and obliterates all else. The obliterating picture, known to millions of those who have followed the hearings in the caucus room, is that of the junior Senator from Wisconsin sitting at the table with his assistant, whose lips are glued to his ear, whispering, whispering, whispering.

May I say to my fellow Republicans that we have been on the way for 100 years. We have come at the end of this century to a parting of the ways. On the one hand, we move in the path and under the influence of the great Lincoln. If we turn the other way, we choose the leadership of the junior Senator from Wisconsin. In the words of Joshua, who led the children of Israel into the Promised Land, "Choose you this day whom you will serve."

What I have just said is political. It is impossible to avoid politics in this matter, and we might as well face that fact. But the root and essence of the problem far transcend its political aspects. It is at bottom and in its far reaches a matter of national ideals and of international influence and reputation.

The junior Senator from Wisconsin has rendered a not inconsiderable service to his country in alerting his fellow citizens to one part of the Communist danger—that of internal subversion. But his greatest service is in giving us the opportunity to appraise our national political morality in this year of our Lord 1954. For this opportunity we must ever be grateful.

The question raised is, indeed, greater than the personal issue. It concerns the spirit in which we approach our serious domestic problems. It concerns the national character which we display to the world in carrying out our fateful responsibilities in the world at large. We face them, in the words of Lincoln, "in the spirit which prized liberty as the heritage of all men, in all lands everywhere."

To put the appraisal of our moral assets into effect, I shall offer for the consideration of the Senate a resolution, which I have decided on as being preferable to a motion to discharge the Rules Committee from considering my earlier one, Senate Resolution 261. I shall now read the new resolution:

Resolved, That the conduct of the Senator from Wisconsin, Mr. McCARTHY, as chairman of the Senate Permanent Subcommittee on Investigations, is unbecoming a Member of the United States Senate, is contrary to senatorial traditions, and tends to bring the Senate into disrepute, and such conduct is hereby condemned.

In accordance with my public statement of yesterday, I shall send the resolution to the desk on July 30 as a privileged matter and move its adoption at that time without reference to committee.

Mr. President, at this point I ask unanimous consent to have printed in the body of the RECORD as a part of my remarks the series of articles by Frederick Woltman to which I referred in the first paragraph of my statement.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Daily News of July 12, 1954]

WHO IS FRED WOLTMAN?

Fred Woltman, author of the story which starts on page 1 today, is often called Freddy the Fink by the Daily Worker, Communist newspaper—but he doesn't mind.

He is what soft-brained liberals call a "Red baiter." Matter of fact, he is the premier "Red baiter" among American newspaper reporters.

Frederick Woltman joined the staff of the New York Telegram (now the World-Telegram and Sun) in 1929. For most of those years since, his articles also have been published in the Washington Daily News and in other Scripps-Howard newspapers.

HE ANTEDATES JOE

He started exposing Communists and Communist fronts 16 years ago—in 1938—when young JOE MCCARTHY was practicing law in Shawano County, Wis., years before unmasking Reds became his prime political pursuit.

Fred wrote news articles exposing the twisting Communist Party line, the "Letterhead" organizations the Communists used as fronts, their dupes and fellow travelers, the Communist infiltration into trade unions, schools, politics, religious, and social groups.

In 1944, Earl Browder, then head of the Communist Party of America, wrote: "The journalistic unmentionable, Frederick Woltman, issues public orders to some of the most powerful men and women in America—and they jump to obey him with an alacrity they would never display to an order from the President of the United States."

PULITZER PRIZE

Of course, that wasn't true either. But it was true that even then Fred Woltman was recognized as the American reporter who knew most about the Communists. FBI agents, Army and Navy intelligence officers, investigators of the Civil Service Commission came regularly to his office to check Fred's mammoth files on American Communists.

In 1945, Fred broke the story of Communist involvement in the infamous Amerasia case, in which "top secret," "secret," and "confidential" documents were stolen from Government files.

CONGRATS FROM HOOVER

For his work in 1946—the year JOE MCCARTHY was elected to the Senate—Fred won the Pulitzer prize in journalism for distinguished national reporting exposing Communist infiltration. Among his many exclusive stories that year was one fingering Gerhart Eisler, alias Hans Berger, as the top secret Kremlin agent in the United States. The FBI picked up Eisler the next day. He was later convicted, jumped bail and escaped to Communist Germany.

Regarding that award, J. Edgar Hoover wrote that Fred's work earned "great credit and distinction to himself and the paper he serves."

Gov. Thomas E. Dewey sent his congratulations; so did James A. Farley.

Bishop Fulton Sheen described his work as "journalism at its best, not in reporting of an event, but in the fearless crusade for the highest ideals."

The Silurians, organization of veteran New York newsmen, and the Catholic War Veterans have also given Fred awards for his work exposing Communists.

In 1949 he again attracted national attention by being the first to report the Kremlin's anti-Semitism crusade in Russia.

Fred Woltman became acquainted with Senator MCCARTHY in 1950, shortly after the Wisconsin Senator took his plunge into the issue of communism. Because of his work, Fred necessarily has followed Senator MCCARTHY'S activities closely, adding several thousand clips to the famous Woltman files.

Three months ago, with MCCARTHY controversies monopolizing the headlines, the editors of Scripps-Howard newspapers asked Fred Woltman to draw up a balance sheet on Senator MCCARTHY'S contribution to the struggle against communism.

Fred was chosen for the assignment because his vast knowledge of the Communist movement in America qualified him to give an informed appraisal. He has written these articles without wraps or guidance. He says they constitute another "agonizing reappraisal."

[From the Washington Daily News of July 12, 1954]

SENATOR MCCARTHY

In 1946, a Scripps-Howard reporter called the House Committee on Un-American Activities to check on the alleged Communist affiliations of an individual then figuring in the news in Ohio.

He was given such information as the committee had in its files but was advised to call Frederick Woltman at the New York World-Telegram if more details were desired.

"Woltman has more information on these characters than we have," the committee clerk remarked.

Thus, among the experts in that field, Fred Woltman had established a reputation for his research on Communist activities.

So when Mr. Woltman writes about Senator MCCARTHY and communism, as he is doing in this series beginning in this newspaper today, he is on familiar ground. He pioneered in exposing communism through the News and other Scripps-Howard newspapers long before JOE MCCARTHY was elected to the Senate from Wisconsin, and he has followed the Senator's activities from day to day from the beginning.

Mr. Woltman's conclusion that the Senator from Wisconsin has become a liability to the cause he so loudly pretends to serve may provoke angry indignation in some quarters, but the thoughtful reader who reviews the case Mr. Woltman has presented is likely to subscribe to that finding.

HOW JOE MCCARTHY HAS PLAYED INTO THE HANDS OF THE REDS

(By Frederick Woltman)

Senator JOSEPH R. MCCARTHY has become a major liability to the cause of anticommunism.

That is the conclusion of this writer after 3 months of rechecking the Senator's record since he first embarked on the Red hunt on February 9, 1950—soon after which we got to be friends.

From the start, the record shows, Senator MCCARTHY played into the hands of the Communists. And he has made the going tougher for the many others who long before had been fighting to stop the spread of communism at home and abroad.

He has distorted the present-day picture of communism out of all semblance to reality. And, thereby, he has spread a blanket of confusion over an area where clear thinking is imperative.

He has introduced a slam-bang, rabble-rousing, hit-and-run technique into the serious business of exposing the Communist conspiracy. And in so doing he has jeopardized an even graver Government function which requires exceptional professional skills—the detection of penetration and espionage by a foreign power.

With Asia and West Europe threatened, he has distracted public opinion from the world's critical danger spots. And he has thereby weakened America's leadership against Soviet aggression.

He has brought to public life a special brand of reckless, knee-to-the-groin tactics which violate our tradition of fair play. Justifying these tactics as essential to exposing communism, he uses them indiscriminately—against political foes and other non-Communists, as well as Communists.

In his recent brawl with the Army, Senator MCCARTHY immeasurably lowered Senate prestige by forcing a subcommittee to investigate itself, then making a shambles of the hearings.

He has widened the split in his own Republican Party; and demonstrated that, unless he has his way, he's willing to destroy the Eisenhower administration at a time when it's grappling with a world crisis.

Now, after 18 months of Republican rule, Senator MCCARTHY still is hammering out accusations of treason and espionage in Government without producing evidence. There may be Soviet spy rings still at work, but Senator MCCARTHY has come up with no proof.

On the credit side, the Senator without question helped make the man in the street more security conscious. But the debit side, in the opinion of this writer, far overbalances the credit on the McCarthy balance sheet.

It was in April 1950, that I first met Senator MCCARTHY. He invited me to dinner. Scripps-Howard had assigned me to try to reopen the whitewashed Amerasia case of stolen secret wartime records. The Senator was embroiled with the Tydings Senate subcommittee which was making a pass at investigating his charges of Reds in the State Department.

Two or three or more nights a week with mutual friends he'd drop into my apartment at the Hotel Congressional. I got to know the man.

He was intensely restless, forever on the go. He had a grim singleness of purpose with no particular interest in national affairs which failed to touch him directly. He had a brash courage and contempt for redtape or stuffiness. His superb sense of press agentry made him a natural headline-getter.

At times he appeared to be playing a game.

One night the Senator arrived with the draft of a speech to be delivered next day in the Senate.

In it, Senator MCCARTHY announced excitedly that he was accusing Secretary of State Dean Acheson of treason.

Those present were aghast.

Treason, they pointed out, was a high crime punishable by death. He couldn't possibly sustain the accusation and he would only discredit himself. Mr. MCCARTHY toned down the charge.

But not for long. A few days later he took the Senate floor and accused Secretary Acheson of treason. Naturally he hit the headlines. The FBI evidently never bothered to investigate.

Some weeks later the Senator came by again in high spirits. For the first time, in a Capitol elevator, he said gleefully, he'd run into Secretary Acheson. There were no handshakes. But news photographers snapped the two together.

There was Senator MCCARTHY beaming into the camera, standing beside the Nation's foreign policy chief he'd been calling a traitor. The Senator obviously was getting a kick out of it.

Four years later his face looked grimmer when he gazed into the TV cameras at the Army hearings. The pattern hadn't changed, however.

Now he was accusing Secretary of the Army Robert T. Stevens of protecting "Communist coddlers" in the Army. In effect, the Army, with the backing of President Eisenhower, was protecting traitors in the Armed Forces.

At one point Senator MCCARTHY spoke of "the evidence of treason that has been growing up over the past 20 * * *" he paused, and he added, with deliberation, "21 years." He was extending the treason charge to the Republican regime.

The clear imputation, which he was to make many times afterward, was that the Eisenhower administration was "soft" on Communists. Yet 2,100 employees had been weeded out of the Government under the President's strict security program.

(NOTE.—Latest official Civil Service Commission figures show that 2,486 persons have left the Government during this administration, with major security charges pending. Of these 1,400 resigned, some on request and some without knowing of the charges, and the rest were fired. The Commission said 429 of the 2,486 had information relating to possible subversive activity in their files, 207 information relating to sexual perversion, and the rest information on criminal records, drunkenness, loose talk, or other factors considered in the security program.—Editor.)

And, although held completely loyal, J. Robert Oppenheimer, who made the first atom bomb, had been denied further access to atomic secrets because of past associations and failure to observe security rules.

That's not enough for JOE MCCARTHY.

President Eisenhower, obviously pointing to the Senator, has warned against inflating the current Communist danger on the domestic front. So has Vice President RICHARD NIXON, who recognized and did something about the Communist peril years before Senator MCCARTHY.

The fact is there's nothing today like the Red climate in America of 10 years ago. The public is alert to the Communist conspiracy. Mr. MCCARTHY's contribution to that alertness was a definite one, though later. The party liner, who operated openly—and brazenly—in official circles in the 1930's has disappeared. Communism has lost most of the intellectuals.

The fellow traveler, who joined fronts, lending his prestige indirectly to a cause he dared not join directly, is virtually an extinct animal.

No one knows this better than the Congressional committees seriously charged with the task of investigating communism. So far as the overt Communist movement is concerned, the field is growing fallow.

Yet Senator MCCARTHY continues to use the blunderbuss, firing in all directions at once.

The Reverend John F. Cronin, S. S., one of the Catholic Church's leading experts on communism, has criticized the Senator on this score. Father Cronin, assistant director of the National Catholic Welfare Conference, favors the sharpshooter approach, firing only at vulnerable targets.

"You don't need an atom bomb to kill a rat," he says.

Moreover, Senator MCCARTHY is handing the public a false picture of communism today.

During one of his diversionary tactics at the recent hearings, he charged he was prevented from uncovering 130 Reds in defense plants. Perhaps he does have 130 names of fifth-amendment witnesses.

But it was pure McCarthy fantasy for the Senator, grabbing for a headline, to add that the 130 are "poised with a razor blade over the jugular vein of this Nation."

The Communist movement here might be laughed off were it not for the immense power behind it of the Soviet Union and international communism. While that power exists, domestic communism remains a great potential danger. The mortal peril, though, comes from without.

To this Senator MCCARTHY resolutely closes his eyes; otherwise he loses his headlines. Therefore, he takes wild fliers into foreign affairs, at the expense of allied unity, and to the embarrassment of the Eisenhower foreign policy.

While the Korean war was on last year, Senator MCCARTHY carried on a running battle with Harold E. Stassen, the administration's foreign-aid chief. Five years before he had supported Mr. Stassen in the Wisconsin Republican presidential primaries. The name of Gen. Douglas MacArthur was entered.

On a Senate letterhead to the voters, Senator MCCARTHY helped torpedo the 71-year-old general's candidacy by stressing his age and his divorce.

In the foreign-aid hassle, the Senator accused the British of shipping arms to Red China.

This the British denied. Mr. Stassen called the charge "fantastic, unbelievable, and untrue."

The Senator retorted by reading Britain out of the Korean war. "Let them withdraw and be damned," he declared. "Let us sink any accursed ship which is carrying arms to the Communists killing American boys."

Senator MCCARTHY's go-it-alone threat was promptly slapped down by his senior Senator from Wisconsin, ALEXANDER WILEY, chairman of the Foreign Relations Committee. Another Republican, Senator H. ALEXANDER SMITH, of New Jersey, said:

"I can imagine nothing more pleasing to the Kremlin than the present battle between Westminster and Washington, for the major aim of Communist strategy is to isolate America and turn our allies against us."

Senator MCCARTHY's wild twisting of facts and near facts repel authorities in the field. They simply don't want to get mixed up with him.

By crying "wolf" so often, he has only helped convince one segment of the American people that the dangers of communism are mythical.

He has long boasted of employing Red methods to fight Reds. But he went far afield when he began to equate McCarthyism with true Americanism, thus claiming to be the final arbiter of loyalty.

So, in his blowup with the Army, he could accuse the Pentagon of covering for Communists, and threaten Secretary Stevens: "Robert, I am going to kick the brains out of anyone who protects Communists. If that is the policy of you, just go ahead and do it. I will guarantee that you will live to regret it."

His strategy of calling those who disagree with him Reds or protectors of Reds gets a sharp rebuke from the Senator's own biographers. They are William F. Buckley, Jr., and L. Brent Bozell, authors of the recent defense of the Senator, "McCarthy and His Enemies." Senator McCarthy opened his records to the writers and gave the book his blessing by appearing at a publication cocktail party in New York.

A basic McCarthy "assumption," say his biographers, is that "one cannot at one and the same time vigorously oppose communism and McCarthy."

"McCarthy's sporadic reliance on these assumptions," they go on, "this aspect of his 'method,' not only weakens his claim to responsible conduct but seriously undermines his effectiveness."

Although disapproving, the authors pass lightly over this McCarthy sin, this compulsion by the Senator to wrap himself up in the American flag.

The McCarthy strategy of "you're either for me or a friend of the Communists," is, in this writer's opinion, a boon to the Communists.

On the one hand, it enables his pro-Red or confused opponents to belittle such solid anti-Communist achievements as the monumental Jenner subcommittee reports on the Institute of Pacific Relations and interlocking subversion, prepared by its counsel, Robert Morris, now a New York judge. And it gives them an argument to bolster their nonsensical claim that a "reign of terror and thought control" stalk the land.

On the other hand, it has this net effect: It separates people into extremes—the McCarthy backers at one pole and the Communists at the other. There can be no temperate, middle course. Each extreme prospers by inflating the menace of the other. The Communists feed on it. For them Joe McCarthy's a made-to-order adversary.

The McCarthy "assumption" leads up some weird alleys.

One of the Senator's staunch friends and close advisers nowadays is George Sokolsky, a columnist. As the McCarthy-Stevens embroilment cooked up, Mr. Sokolsky castigated the Army for what he held to be discrimination against Pvt. G. David Schine, Senator McCarthy's former unpaid aide.

The columnist's indignation soared until he demanded:

"What does one have to do to be protected these days, join the Communist Party?"

It sounded like the old Truman days. But it happened 14 months after the Republicans—and Senator McCarthy—came to power.

McCarthy Myths: They Don't Stand Up in the Cold Light of Facts

(Second article by Frederick Woltman)

The war on communism today is hamstrung by a succession of McCarthy myths. They are:

That Senator Joseph R. McCarthy stopped communism in America.

That he exposed and routed a Red spy nest in the State Department.

That he is an able, dedicated anti-Communist investigator—in fact, the best qualified in the country, therefore indispensable.

That he stands as the Nation's bulwark against the Kremlin conspiracy.

The record will expose these myths.

It will show that by his excesses, his scarehead accusations that eventually evaporate, his thumb-in-the-eye tactics and his inevitable injection of partisan politics, whether aimed at the Democrats or at critics within his own party, Senator McCarthy has completely befogged a major issue of the day.

That was brought graphically to the American people by the recent unhappy McCarthy-Army hearings. But the story goes back to February 9, 1950.

On that evening Senator McCarthy stumbled onto communism.

He made an obscure Lincoln Day speech to the Women's Republican Club of Wheeling, W. Va. "In my hand," the Senator dramatically told the ladies, he had a list of 205 Communists, known to Secretary of State Dean Acheson, "who nevertheless are still working and shaping the policy of the State Department."

At the moment, Senator McCarthy hadn't the slightest notion of the impact his talk would make. He spoke only from a few notes. But he set off a slow-fused atom bomb. There was launched one of history's most controversial political figures; and a new word—McCarthyism—which was to be supercharged with emotion the world over.

Until then, the 41-year-old Joe McCarthy had attracted slight attention in the Capital. A Wisconsin Democrat, he had turned Republican. During his first 3 years in Washington, he dipped into the 5-percenter scandals, fought to end sugar rationing for industry, opposed the Truman housing program and got to be known as a friend of the real-estate lobby.

At one stage, he was an anti-isolationist, cosponsoring the Kefauver resolution to explore an Atlantic union.

He'd embarked on one venture which might have wrecked any other Senator. A forerunner of his later attacks on the Army, it concerned the infamous Malmedy massacres in which Nazi troopers slaughtered hundreds of American prisoners during the Battle of the Bulge.

A Senate subcommittee in 1949 investigated reports of brutality by American officers in exacting war-crime confessions from these Nazis. Not a member, Senator McCarthy interjected himself into the hearings, an advocate of the brutality charges. He tried to paint a picture of atrocities—by the Americans, not the Nazis—that were "worse than anything we have accused the Russians of doing."

Getting nowhere, he accused the committee of a "deliberate" whitewash; its chairman, Connecticut Republican Raymond Baldwin, of "criminally wrong" conduct; the Army of "condoning a brand of brutalitarianism worse than any practiced by the morally degenerate in either Hitler's or Stalin's camp."

Infuriated, Senator Baldwin charged that Mr. McCarthy had accepted the word of Hitler's war criminals over the sworn testimony of American military personnel. Typical of subsequent tactics, the Wisconsin Senator finally walked out in high dudgeon when the committee rejected his demand to use lie detectors on the American officers.

The committee unanimously decided there had been no such physical torture; but that agitation in America and Germany for the convicted Nazis seemed to be part of a concerted move to discredit Americans abroad.

Senator McCarthy survived this bizarre episode in his career.

Four years and four months after the Wheeling speech, the Senator at the McCarthy-Army hearings delivered a lecture on communism before a TV audience of millions. He exhibited a huge chart to illustrate the progress of the march on communism in America.

Across the top he had printed: "Communist Party Organization, U. S. A., February 9, 1950."

Before February 9, 1950, Senator McCarthy had displayed virtually no practical interest in combating communism. Red-baiting, as it was derisively termed, had been an unpopular cause in which the News and all other Scripps-Howard newspapers, and this writer, took a leading role for over a decade.

By 1950, however, with Russian truculence growing, it had become almost fashionable to expose the Communist conspiracy.

Before February 9, 1950, nearly all the important counteroffensive measures launched against communism in the United States were well under way. In most of the celebrated cases of individuals, there had been exposures, dismissals and/or convictions.

Senator McCarthy, although he often took credit, had no hand in them.

Those vast global projects, the Truman doctrine, Marshall plan and Atlantic Union, had been launched to contain Soviet aggression and bolster the weaker nations. The loyalty program had started 3 years before, although it still badly needed stiffening.

Twelve of the top Communist Party leaders had been convicted under the Smith Act 4 months earlier. Gerhart Eisler, the secret Kremlin agent, operating here under the alias of Hans Berger, was first publicly exposed by this writer in the News and other Scripps-Howard newspapers on October 17, 1946. The next day he was due to embark for Europe. On that day, the FBI, which had had him under surveillance, picked up Eisler though previously they had been under orders to let him sail. He was subsequently convicted of passport fraud. On May 6, 1949, Eisler skipped bail and fled to Soviet Germany.

By 1950, Carl Marzani, George Shaw Wheeler, William Remington had either been discharged from the Government or convicted. Harry Dexter White, former Assistant Secretary of the Treasury, died of a heart attack in 1948 after he was charged with spying for the Russians.

Louis Budenz, editor of the Daily Worker, Communist official organ, had broken with the party 5 years before 1950 and laid bare the Communist conspiracy. Elizabeth Bentley had testified about a spy ring which led to the White House through Lauchlin Currie, administrative assistant to President Roosevelt. Mr. Currie denied the charges under oath.

Whittaker Chambers had told his fantastic story about Soviet spy rings in Washington—and nailed it down. So, 19 days before Joe McCarthy's emergence into the Communist scene, Alger Hiss was convicted of perjury. The case shook the Nation.

Six days before February 9, 1950, the British arrested Klaus Fuchs for passing atomic secrets to the Russians. From British tips, the FBI broke the atom espionage ring in America. And the Rosenberg couple eventually were executed.

Senator McCarthy played no part in any of this.

Indeed, at the time of his Wheeling speech, Senator McCarthy's knowledge and understanding of communism were sparse.

The following April, over highballs at his apartment, this writer heard a somewhat querulous young woman ask the Senator point blank:

"Tell me, Senator, just how long ago did you discover communism?"

"Two and a half months!" Mr. McCarthy readily responded.

The nightmare of confusion, charges, and countercharges and fancy footwork loosed by his Wheeling talk eventually corroborated the Senator's honest reply.

On February 9, he had a list of 205 "Communists" in the State Department. Next day, at Salt Lake City, it was a list of "57 card-carrying members." The Senator telegraphed President Truman: "I have in my possession the name of 57 Communists who are in the State Department at present." Failure to reveal their loyalty records, he

added, injecting politics with a vengeance, "will label the Democratic Party as a bedfellow of international communism."

The State Department asked for the names, promising dismissal. They were not forthcoming.

For a week Washington went through a bad case of jitters.

On February 20, Senator McCarthy took the Senate floor. He represented that he had not used the "205" figure in Wheeling. This time he came up with a list of "81 Communists or fellow travelers." And he toned down some of the original charges, conceding some might get a clean bill of health.

His main accusation—that the State Department knowingly harbored Reds—eventually fell flat. His lists, it turned out, were 3 and 4 years old. Someone else had done the spade work. Subsequently, he admitted using the "205" figure. It came from a 1946 letter, signed by former Secretary of State James F. Byrnes. The "81" figure came from a 1947 House Appropriations Committee report.

How many or how few of any list were still in the State Department and how many of these had been given loyalty clearance remained a puzzle. Only one was ever indicted. The Justice Department under the Eisenhower administration had the indictment dismissed, as obtained by misrepresentation. The assistant in charge of the case was suspended.

For 4 months in 1950, a Senate Foreign Relations subcommittee stewed over the McCarthy charges. The circus atmosphere of the hearings almost matched that of the recent McCarthy-Army spectacle. The chairman, Senator Millard E. Tydings, seemed determined to go down the line for the State Department and the Truman administration. An orderly productive inquiry was doomed.

Senator Tydings failed to call some key witnesses. His handling of others friendly to the administration was amiable; of some of its accusers, fierce. The flagrant partisanship of the Democratic majority produced a whitewash.

Then, as now, Senator McCarthy's raucous antics, wild exaggerations and readiness to turn the Communist issue into a political football compounded the confusion. The Democrats happily joined in making Senator McCarthy the issue.

During the hearings, Mr. McCarthy demonstrated his talents for twisting a minor irrelevant fact into headline news that could be punctured by a pin prick.

The Scripps-Howard Newspapers had been attempting to reopen the whitewashed Amerasia case of the stolen wartime secrets. In the midst of the Tydings inquiry, Mr. McCarthy made the sensational charge that the case involved the theft and transmission of atomic secrets to Russia 6 months before the first bomb dropped on Hiroshima.

There was no substance at all to the charge. It was based solely on the vague recollection of an investigator that, 5 years earlier, he had seen the notation, "A-bomb," on an unopened envelope in the Amerasia office. That would have been 6 months before the bomb fell and newspaper copyreaders invented "A-bomb" for headline use. Senator McCarthy beat a hasty retreat.

In a very real sense, he was the creature of his adversaries. The Senator can thank President Truman, as much as anyone, for his phenomenal rise. For the President ignored his wire about the "57 Communists." Had he turned it over to the FBI for investigation, Mr. Truman would have taken the play away from Mr. McCarthy. Instead, he assailed the Senator as a "pathological character assassin," and put him in further headlines.

JOE HAS HIS OWN FORMULA

[From the Washington Daily News of July 14, 1954]

(Third article by Frederick Woltman)

Senator JOSEPH R. McCARTHY has brought a sinister concept into the American scene which can do incalculable harm to our free political system. It might be called the McCarthy formula of treason.

It consists of imputing treason, treasonable motives, plots and conspiracies to one's opponents. It's a convenient political weapon with JOE McCARTHY.

For instance, he said that Dean Acheson was guilty of treason when he was Secretary of State, and that the Democratic Party chalked up "20 years of treason." He said Gen. George C. Marshall, who masterminded the Nation's World War II military strategy, was part of "a conspiracy so immense, an infamy so black, as to dwarf any of the previous history of man."

Those with whose decisions Senator McCARTHY disagrees are, in his book, in league with traitors.

The Army, by its own admission, dragged its feet on one security case. To Senator McCARTHY, therefore, the Army was guilty of deliberately "protecting, promoting, covering up * * * known Communists." Because the White House backs the Army against his charges of "Communist coddling," he now reads treason into the Eisenhower administration. (See accompanying date tabulation on the headlines Senator McCARTHY has managed to whip up against the Republican administration appearing at the end of a series of articles).

The treason formula has grown to be almost as strong an obsession with Senator McCARTHY as the "Marxist-Jewish-Communist conspiracy" myth was with Hitler.

Like the latter, it falsifies history. It splits down the middle, between traitors and the fellow travelers and dupes and the exponents of true Americanism, for which the Senator says "McCarthyism" stands.

It inevitably churns up hatred and misunderstanding among people, racially, religiously and politically.

Furthermore, the McCarthy treason pattern makes it all the harder for the average man to tell the difference between criminal acts and bad judgment, between disloyalty and unpopular ideas. It stretches the definition to include people Senator McCARTHY doesn't like.

At best, this creates an atmosphere that rules out strict political accountability for past errors. The Senator's flair for exaggeration takes care of that. And the Senator himself is by no means oblivious to the dangers inherent in making political capital out of treason and communism.

In late 1952, he did say:

"If the fight against communism is made a fight between America's two great political parties, the American people know that one of those parties will be destroyed and the Republic cannot endure very long as a one-party system."

But, on February 4, 1954, he found it in his heart to say:

"The issue between the Republicans and Democrats is clearly drawn. It has been deliberately drawn by those who have been in charge of 20 years of treason. The hard fact is that those who wear the label Democrat wear it with the stain of a historic betrayal."

He thus pinned the label of treason on 26,898,281 American citizens who voted the Democratic ticket in 1952.

Senator McCARTHY arrived at this epic conclusion by a series of frauds.

Whatever the faults of the Truman administration, no responsible political figure could charge to it, as did Senator McCARTHY, "a planned betrayal" in the Korean war. Or that the Truman State Department "signed the death warrant of every American boy who died in Korea." Or that the American Government—the executive as well as the military—was headed by "dupes and traitors" who "tried to make sure we did not win the battle" and led us to defeat in Korea. Thus, the McCarthy treason formula.

The Senator's attack on Gen. George Marshall June 14, 1951, will probably go down as one of the most disgraceful orations in congressional history.

It was a 60,000-word speech, to be "fully documented," Senator McCARTHY had announced, exposing "a great conspiracy" that "shall be forever deserving of the maledictions of all honest men."

As Chief of Staff, General Marshall had favored a channel invasion as the most direct route to the heart of Germany and the least costly in lives. Prime Minister Churchill pushed for a Mediterranean invasion, with the idea of assuring the Western nations a power balance in postwar Europe.

The Marshall strategy prevailed. Years later Senator McCARTHY called it an intentional surrender to Stalin. He pictured Gen. Dwight D. Eisenhower, Allied European commander, as "invariably" siding with his chief, General Marshall.

As the Senator droned on for 3 hours, shocked colleagues began to fade away. When the floor had almost emptied, Senator McCARTHY abruptly cut off the reading. But the sensational conspiracy charges against a five-star general, whom many regarded as a military hero, hit headlines.

Then, eager to forget the farce, the Senator passed on to new headlines. He succeeded, however, in silencing for the time being honest critics of General Marshall's Far Eastern and other foreign policies which had been under fire.

Last year, while chairman of the powerful Senate Permanent Investigations subcommittee, he made two more irresponsible headline bids. These ended in the ashcan.

In one, Senator McCARTHY charged the Truman administration with a treasonable shortage of ammunition in Korea—"one of the most inexcusable scandals that has ever been brought to light."

Republican Senator LEVERETT SALTONSTALL of Massachusetts, chairman of the Armed Services Committee, put out a quick denial.

Despite the denial, Senator McCARTHY renewed the charges 2 months later. This time, with the Republicans in office 8 months, he asked publicly how many traitors were still left in Washington.

In another bid for headlines, he implied that President Truman had concealed from the FBI a list of 150 Soviet atom spy suspects which had been turned over by the Canadian authorities.

The Canadian spy-list charges had been kicking around for 3 years. If true, the FBI must have been sitting on its hands. Attorney General Herbert Brownell announced 2 weeks later there was no such list. Again, JOE McCARTHY beat a hasty retreat.

In his "indictment" of the Democratic Party for "treason on 20 counts," he demanded that Adlai Stevenson, defeated candidate for President, plead guilty or not guilty "before the greatest of all juries, the American people."

The press gravely reported the McCARTHY "indictment."

The "counts" dealt with past foreign and military policy decisions, many of them generally approved at the time, others opposed.

In one "count," Senator McCARTHY accused President Truman, when the Korean war broke out, of ordering the 7th Fleet to halt attacks on Chiang Kai-shek's forces on the Red mainland of China. He failed to mention the rest of the directive: that the 7th Fleet was to protect Formosa against Red attacks.

Another "treason count" was based on American recognition of Russia in 1933. If that was treason, the McCarthy "indictment" should have included such outstanding Americans as Senator William E. Borah and Alfred E. Smith, who worked for recognition. The Scripps-Howard newspapers played a leading role in behalf of recognition.

By last May, the reckless McCarthy accusations had so disrupted the Capitol that Senator William F. Knowland, Republican floor leader, repudiated them from the floor.

President Eisenhower followed up 24 hours later. He said:

"If we allow ourselves to be persuaded that every individual—or party—that takes issue with our own convictions is necessarily wicked or treasonous, then indeed we are approaching the end of freedom's road."

With the return to power of the Republicans after 20 years, Senator McCarthy was expected to ease off his role of Communist hunter. By rank he was slated to head the Government Operations Committee of the Senate. This watchdog committee and its investigative subcommittee heretofore had left communism to the properly designated committees.

Reached in Phoenix, Ariz., November 8, 1952, the day after election, Senator McCarthy told this writer he planned "an entirely different role." His emphasis, he said, would be on graft and corruption.

"The picture has so definitely changed," he said then. "Now it will be unnecessary for me to conduct a one-man campaign to expose Communists in Government. We have a new President who doesn't want party-line thinkers or fellow travelers. He will conduct the fight."

But the lush headline potential was too attractive. By December 10, 6 weeks before the inauguration, he told an audience there'd be "no slackening" of his campaign against communism. "We have only scratched the surface," said the Senator.

The Senator didn't give his own party a chance to make good its campaign pledge to toughen up on the Reds.

[From the Washington Daily News of July 15, 1954]

JOE McCARTHY'S FORMULA: ANYTHING FOR A HEADLINE—HOW HE THREATENED TO WRECK FUNCTIONS OF UNITED STATES INTELLIGENCE SYSTEM

(Fourth article by Frederick Woltman)

In his grab for headlines, Senator Joseph R. McCarthy was ready to give Central Intelligence Agency, America's supersensitive $1 billion-a-year watchdog against communism abroad, the same treatment he handed the Army.

With CIA, a McCarthy workout could be disastrous.

The Army, its banners tattered and soiled, was able to survive.

But CIA depends on the strictest secrecy for all its operations. By disrupting its cooperation with intelligence arms of allied governments, the McCarthy treatment would dry up foreign sources.

The Wisconsin Senator months ago started a hatchet job on the agency and its director, Allen W. Dulles, brother of Secretary of State John Foster Dulles.

UNSUPPORTED

During the McCarthy-Army hearings, he casually tossed out grave—but totally unsupported—charges against CIA as though they were accepted facts.

The agency harbors "traitors," he said. It "is more heavily infiltrated by Communists than any agency of the Government." It presents "a worse situation than the Army."

Even before that, last year, he told the press that a Communist Party member, according to "evidence," had access to CIA secrets.

"An extremely bad situation," the Senator solemnly added.

Evidently it wasn't bad enough for Mr. McCarthy to do anything about it, but he did cash in on headlines at the time.

At the Army hearings he found himself in a tight spot. So he unexpectedly revived the CIA accusations, with the clear implication that the Eisenhower administration was covering up.

This time, the Senator indicated, he was really going to town.

President Eisenhower, however, resolved in no circumstances to expose CIA to Mr. McCarthy. He was ready for a showdown and moved fast. On July 5, it was announced the Hoover Commission would make a study of the agency and that Gen. Mark W. Clark would head the job.

This gave Senator McCarthy, whose case against CIA was ephemeral to begin with, a chance to get himself off the hook. He grabbed it fast and zigzagged away from the CIA issue. He was glad to see the study and would postpone his own investigation.

NO INVESTIGATOR

Whether or not Senator McCarthy abandons for good plans for his own CIA inquiry, it must be borne in mind that essentially he's no investigator. He's a headline maker.

His "press briefings," held often after closed one-man committee hearings, get him the headlines. There, he's accountable to no one. He can feed out at will exaggerated versions of secret testimony and unproved hearsay.

Reporters who cover Mr. McCarthy are only too familiar with this phase of his methods. It so often leaves them or their newspapers holding the bag.

In his Government Printing Office inquiry, the Senator did succeed in flushing out a bookbinder who was a fifth-amendment security risk. The GPO, he brought out, had been lax and inept in handling the case.

But this wasn't enough for Senator McCarthy. Earlier he made sensational headlines by telling the press of secret testimony. It showed, he said, that the employee had access to atom- and hydrogen-bomb secrets. He was "trying to establish," he said, whether Red spies slipped nuclear secrets to Russia, thereby speeding development of the Russian H-bomb.

The headlines never stood up. The testimony turned out to be that of a woman who had reported her suspicions long before to the FBI, and nothing happened. This did not, however, restrain the Senator from cashing in on them years afterward.

The Senator kept the espionage at Fort Monmouth boiling for months this way and caused the first break between himself and the Army. Secretary of the Army Robert T. Stevens concluded Mr. McCarthy was misrepresenting the facts and injuring Army morale.

Senator McCarthy, Mr. Stevens testified later, was "very mad and felt I had double-crossed him by denying 'current espionage'."

But when the time came to make good on the charges, the Senator ducked out.

He had "no real hope" of proving espionage, Senator McCarthy told the subcommittee. He went further: "It is not our function to develop cases of espionage."

Despite the unproved charges and countercharges, the unending flow of contradictory testimony and the irrelevancies, the Army-McCarthy hearings seemed to bear out an earlier remark by Defense Secretary Charles E. Wilson. Namely, that while one Communist in the Army was too many, the McCarthy holocaust was fiddling while Rome burns compared with the momentous defense problems of meeting the threat of global war.

PERESS CASE: WHAT REALLY HAPPENED?

Take the case of Maj. Irving Peress. Although he failed to fill out his loyalty questionnaire, the dentist had been commissioned, promoted, then, after pleading the fifth amendment, honorably discharged.

This started Senator McCarthy on his allegation of "Communist coddling" by higher-ups in the Army.

Yet, 6 months before Mr. McCarthy called the major to a closed hearing, the Army had recommended the dentist be separated from the service.

And a year before that the Army had issued a directive which should have prevented such slip-ups in the future.

Secretary Stevens frankly admitted the Army's screening process had broken down in the Peress case. He took immediate steps to prevent a recurrence. The faults were obviously administrative.

Senator McCarthy insisted, nevertheless, on reading a sinister plot into the affair. He magnified it to ridiculous proportions.

Or take the case of the "35" (actually 36) Monmouth civilian employees used by Mr. McCarthy as a limb on which to hang his recurrent cries of "Communists" and "espionage." The 36 had been suspended on a security recheck. The Senator took credit for forcing the suspensions.

But the Army had been investigating months before Senator McCarthy crashed the act.

Mr. McCarthy kept referring to the "35 Communists" during the hearings. Occasionally he made oblique references to "traitors." Yet—

All 35 (36) denied the Communist charges.

Not one invoked the fifth amendment.

Of the 36, not 1 has been finally dismissed.

Fourteen have since been reinstated, four with full clearances.

Monmouth illustrates the unique McCarthy distortion technique: stating as facts a set of nonexisting circumstances; then repeating them as facts when challenged.

Completely lost to the public in the McCarthy-Army polemic is the Senator's principal target—the unknown higher-ups in the Pentagon who have been "coddling the Communists."

These are the real culprits, according to Mr. McCarthy.

DISBANDED PANEL

This sinister aggregation turns out to be the Army's Loyalty-Security Appeals Board, a panel of 20 men named under the Truman loyalty program. When the Eisenhower security program took over in April 1953 the panel was disbanded. Its members returned to their regular jobs.

The panel consisted of regular Army colonels and lieutenant colonels along with high-level Army career employees in the salary grades of $9,600 up. The civilians came from the Judge Advocate General's office, from G–2, finance, Army education and other branches.

They decided appeals according to the then existing loyalty standards, under which current loyalty alone was the test. They had no alternative but to follow those standards.

But under the Eisenhower security program, security risks, based on past associations, takes precedent over present loyalty.

Senator McCarthy refuses to recognize the different official standards.

So he wants to subpena the 20 and interrogate them on their reasons for reversing some dismissal recommendations by the hearing boards.

President Eisenhower made up his mind not to subject these Army officers and career men to the Senator. The President could hardly forget the "abuse" Mr. McCarthy heaped on Brig. Gen. Ralph W. Zwicker, the decorated World War II combat officer, at a private hearing. The Senator said the general was unfit to wear his uniform. That blew the lid off.

NO BLACK AND NO WHITE

Moreover, the executive branch, present and past, holds that any loyalty program would be destroyed if Congress could sit as a superjury to review cases. Most Members of Congress agree. Cases on appeal are never black or white.

They are in the gray area, requiring decisions of judgment on which reasonable men may disagree.

Appeals board members, confronted with the prospect of having to explain themselves later to a congressional committee—or to Senator McCARTHY—are apt to render political decisions.

That's the crux of the controversy between Mr. McCARTHY and the White House which shaped up at the hearings.

Should Mr. McCARTHY open up again on our foreign intelligence service, CIA Director Dulles will have some lessons to guide him from the Army-McCarthy clash.

For one thing, the Senator's fancy footwork.

First he accused the Army of using his former unpaid aid, Pvt. G. David Schine, as a "hostage" to "blackmail" him into dropping the Monmouth inquiry. Two days before the hearings opened, he shifted strategy, and contended that Assistant Defense Secretary H. Struve Hensel masterminded Army charges that the Senator demanded special treatment for Schine. Why? So Senator McCARTHY would be shunted off from an inquiry into "serious charges of misconduct and possible law violations" by Mr. Hensel in a wartime Navy deal—according to the McCarthy version.

But there the plot enlarged, and the instigators had become Attorney General Herbert Brownell, Jr., his chief deputy, William P. Rogers, and Sherman Adams, Assistant to the President.

Further along, the Senator saw a chance to pin it all on the Democrats.

It was the Democrats who "shoved" Secretary Stevens into the battle, but by the time Mr. McCARTHY took the witness stand, Secretary Stevens had become "essentially" an honest man, "mouse-trapped" by the Democrats, bewildered by "the rough and tumble of Washington politics."

So Senator McCARTHY had backed away completely from his original charges.

The Hensel charges, meantime, evaporated. Mr. McCARTHY at an executive session admitted he based them on an assumption, arrived at when he "added 2 and 2 together." According to Mr. Hensel, he'd even offered to withdraw them if possible without seeming a "damn fool."

OLD INDIAN CHARLIE

In an affidavit to the committee, Mr. Hensel swore the Senator had explained the origin of the charge: An Indian he once knew named "Charlie" advised young Joe that in a scrap one should start kicking below the belt as fast as possible until one's opponent was rendered helpless.

The "Charlie" explanation rings true to the oft-repeated McCARTHY boast that he uses such tactics on Communists. Except, of course, the Assistant Defense Secretary could, by no stretch, be called a Communist.

CIA Director Dulles has another lesson before him: The humiliating spectacle of the Army truckling to the Senator and his ambitious, uncurbed chief counsel, Roy M. Cohn.

Altogether, the testimony shows there were some 70 phone calls, conversation, or other contacts between the Army and the McCarthy staff on the question of favored treatment for Schine.

Mr. Stevens fraternized with the 27-year-old private as an intimate. Three times the Army Secretary went over the question of a Schine commission with the Defense Secretary. Once he met CIA Director Dulles at 8:15 in the morning to propose an intelligence assignment for Schine.

THE CIRCUMSPECT MR. SCHINE

Though unable to control his own chief counsel, Mr. McCARTHY could make an errand boy out of Army Department Counselor John G. Adams. At one point, Mr. Adams reported happily to the McCarthy staff that Schine was "behaving in a circumspect manner" at Camp Gordon.

Why, Private Schine was such a good boy he's sold his Cadillac, gone into Augusta and, Mr. Adams reported, got himself a "second-hand Chevvie."

A high point of silliness was struck at a McCarthy-Adams conference on January 22 when the Senator presented the Army counseler with a cheese and some sausage.

It was at this conference, Mr. McCARTHY testified, that Mr. Adams tried to blackmail him.

A GIFT CHEESE FOR THE SECRETARY

Secretary Stevens, who also got a gift cheese, and the Senator had a monitored phone talk afterward. The transcript goes as follows:

"Secretary of the Army. I want to thank you first of all for the marvelous cheese you and Jeannie sent me—we are most grateful to you, Joe. It would be in or out of order to buy you a cocktail that you might name?

"Senator McCARTHY. Why don't you drop over here about 5 and we can go across the street and have a drink."

It was some time later the Army decided you can't do business with JOE McCARTHY.

[From the Washington Daily News of July 16, 1954]

HOW McCARTHY DEMORALIZED THE VOICE—A VICTORY FOR THE KREMLIN—HERE'S AN EXAMPLE OF HOW NOT TO RUN AN INVESTIGATION

(Fifth article by Frederick Woltman)

Senator JOSEPH R. McCARTHY is bringing into disrepute one of the most vital functions of Congress. It is the power to investigate—an invaluable weapon in America's arsenal against communism.

Senator McCARTHY's methods menace in particular the future of the two committees created to deal with the Communist conspiracy. They are the Velde Un-American Activities Committee in the House of Representatives and the Jenner Internal Security Subcommittee in the Senate.

Both have developed sound, fair, and judicial procedures. Yet they increasingly are tarred with the McCarthy brush.

For the Wisconsin Senator has given a powerful shot in the arm to those who would take Congress altogether out of the business of exposing communism. The Communists and the anti-anti-Communists are delighted.

THIS WAS HIS WORST

His supreme disservice to date to the investigative role of Congress was the degrading spectacle of the McCarthy-Army hearings. No one understands this better than his own Republican colleagues most concerned with communism.

To save what was left from the wreckage and to restore public confidence, the Senate Republican policy committee on July 1 offered a new code of conduct for committees. One objective was to "assure the rights of witnesses" and guard against "smears."

Senator McCARTHY'S position up to now has been: "To hell with everybody. I'll make my own rules."

As a case history of his methods, this writer made a special study of the Senator's first venture after inheriting chairmanship of the powerful Senate Government Operations Committee in January 1953. It was his melodramatic inquiry into the Voice of America and our overseas information program. Then in the State Department, this $88 million-a-year agency has been waging the Government's propaganda counter-offensive against Soviet communism.

HIS JOB ON THE VOICE

The committee and its permanent investigations subcommittee, before Senator McCARTHY took over, had achieved a creditable reputation for uncovering waste and corruption. It had scrupulously steered clear of communism, leaving that to the two other committees. At the same time, President Eisenhower took office pledged to make subversion in Government the responsibility of the executive branch.

Hardly before the new President was sworn Senator McCARTHY moved in.

The two central figures in the recent Army-McCarthy wrangle, Roy M. Cohn, his counsel, and G. David Schine, his unpaid aide, carried the ball on the Voice inquiry.

For months running they generated blazing headlines of "Mess," "Scandals," "Sabotage," and "Subversion."

In the judgment of this writer, it will go down as one of the most disgraceful, scatterbrained, inept, misleading, and unfair investigations in congressional annals.

The public hearings (770 pages of transcript) and the final reports, as well as the Senator's day-to-day press feedouts, gave a totally distorted picture of what, by 1953, had become a potent force in the psychological war against communism.

As a result, the work of the agency was disrupted for months; its staff was demoralized; America's influence abroad was damaged; the Red press of the world had a field day; it was a mighty victory for the Kremlin.

The record of the McCarthy Voice inquiry offers a revealing lesson on how not to run a congressional investigation. It could serve as a useful guide to the current hearings on committee methods, conducted by the Senate Rules Subcommittee and its counsel, Robert Morris.

The McCarthy-Cohn-Schine trio set out to show sabotage and subversion. Evidence to the contrary was brushed aside.

UNCHECKED SUSPICIONS

The few Voice employees who fancied "plots"—on the flimsiest pretexts—were rushed into public hearings.

Responsible anti-Communist employees, who did not, were never called.

Unchecked suspicions and grievances of witnesses with an ax to grind were presented on TV as believable evidence. Second-hand testimony was used which first-hand evidence would have exploded.

Salient documentary evidence was not brought to the attention of the committee members.

In some instances Senator McCARTHY picked as a target solidly anti-Communist Voice officials. One was Edwin M. J. Kretzmann, the VOA policy adviser, who had always backed an aggressive anti-Communist policy in the broadcasts. On second-hand hearsay, later refuted, Senator McCARTHY tried to make an atheist out of VOA's religious editor. This got headlines.

Their cops-and-robbers, 18-day whirlwind tour of 7 European countries made a laughing stock of Messrs. Cohn and Schine and of their Government.

Ostensibly there to find Red-authored books in American libraries, they sailed through with a blaze of press interviews that would have brought instant dismissal had they been, for instance, FBI agents.

It was a performance inconceivable under any other congressional committee chairman.

For calling them "junketeering racketeers," Theodore Kaghan, acting public affairs director for the United States High Commissioner in Germany, was brought back, grilled mercilessly by Senator McCARTHY, mostly on irrelevancies, and cashiered.

The McCarthy staff ignored Mr. Kaghan's outstanding record in directing the anti-Soviet propaganda war in Austria and Germany, attested to by leading German anti-Reds.

Nor did it matter that High Commissioner James B. Conant, appointed by President Eisenhower, defended Mr. Kaghan as "an effective" fighter against communism.

Secretary of State John Foster Dulles had to plead for 6 months "to correct errors," but said he would not be "dictated to."

Panicked at one point, Mr. Dulles ordered that henceforth no Communists could be quoted in Voice broadcasts behind the Iron Curtain.

Quoting Stalin's words to make him eat them had been a useful psychological tool against the Kremlin. Later Mr. Dulles reversed the order.

Senator McCARTHY put on a full-dress show over his charge of Communist books in overseas libraries.

The number turned out to a tiny fraction of the 2 million volumes.

The Senator disregarded the fact that the Government was acutely aware of the problem and already was weeding out the books. A Government spokesman testified that the book charges were exaggerated "out of all proportion."

Senator McCARTHY's final Voice reports were 1-man documents signed by the Senator. Compared with those of the Velde and Jenner groups, they were, to say the least, half-baked.

In some instances, blistering conclusions were reached which flatly contradicted the evidence; in others, out-of-context excerpts were used which the full text would have refuted.

BAKER EAST AND BAKER WEST

Possibly the Senator's most shocking exhibition concerned Baker East and Baker West.

Here he tried to pin a fantastic sabotage plot on Voice engineers and their superiors. What was involved was nothing more than a problem of radio transmission. Had he bared the full story, Senator McCARTHY's "plot" would have had to include such institutions as the Radio Corporation of America and Massachusetts Institute of Technology.

Yet the Senator kept throwing out innuendos of treason which guaranteed him headlines.

In the midst of this, the Voice engineer who had done the spade work on the Baker projects, Raymond Kaplan threw himself in front of a truck in Boston. Quickly after the suicide, Senator McCARTHY announced there was no evidence of "any wrongdoing of any kind" against Mr. Kaplan.

In a suicide note to his wife and son, Mr. Kaplan wrote he was being made "the patsy." He added: "You see, once the dogs are set on you, everything you have done from the beginning of time is suspect."

Bakers East and West were part of an enormous top-level project for piercing the Iron Curtain. The idea, known as the Ring plan, was to build a necklace of superpower radio transmitters around the Soviet-dominated countries to break Russian jamming. Bakers East and West were to be the two shortwave stations on American soil.

The State Department retained MIT's Research Laboratory of Electronics to recommend locations. After exhaustive research and based on reports from RCA's Central Propagation Laboratory, the Bureau of Standards and the Army Signal Corps, MIT proposed one site in North Carolina, and another near Seattle.

A technical disagreement later came up over the locations. Here Senator McCARTHY entered the picture. An unhappy ex-assistant engineer had opposed the Seattle site.

On the basis of his testimony, Senator McCARTHY and his staff created a false issue over the sites. From it, they tried to spell out a subversive plot to mislocate the stations for the Soviet Union.

At first they played down the role of MIT and RCA. They failed to bring out official correspondence that would have showed the sites were recommended and re-recommended by the outside agencies.

They failed to call a single one of the prominent electronics engineers and scientists who made the recommendations and would have backed the sites.

Senator McCARTHY, to show great waste, kept repeating that the MIT study cost $600,000.

Actually it cost $6,000.

The issue narrowed down to one man, Dr. J. B. Wiesner, director of the MIT electronics laboratory, who signed the report favoring Seattle. Senator KARL MUNDT, Republican, of South Dakota, and other Senators pressed Senator McCARTHY and Roy Cohn to produce the MIT scientists in order to get the facts straight.

Mr. Cohn finally told them he had talked with Dr. Wiesner, with "three of us on the line."

"Dr. Wiesner," he assured the Senators, stated "that it was his conclusion that Baker West, from a standpoint of efficiency and reliability, should be moved south and away from Seattle, and that he would just as soon not come here and testify, as that was his conclusion."

That satisfied the Senators.

Dr. Wiesner was never called.

In his final report to the Senate, Senator McCARTHY slightly watered down his original accusations of "deliberate sabotage" which got him the headlines. But he was still able to boast that he "uncovered waste and mismanagement of such a magnitude to suggest deliberate sabotage as a possible alternative to hopeless incompetence."

This writer recently visited Dr. Wiesner at MIT in Cambridge, Mass. There he directs a staff of 350 which is doing basic scientific research on radar communications under Government contract.

Dr. Wiesner told me that Mr. Cohn had misrepresented him.

Virtually all of the engineers still favor Seattle, he said.

"I told Cohn my technical judgment was still to put Baker West in Seattle," said Dr. Wiesner.

"We had a long, heated discussion in which he tried hard to get me to agree that the Seattle site was inferior. I refused. He misrepresented my position.

"Also, at the end of our final discussion, Cohn said: 'I don't intend to subpena you, but you are free to come down and make any statement you want to.' He did not ask me to come.

"Since I had no idea he was going to misrepresent me, I thought I had no need of coming.".

Mr. Cohn had also suggested sabotage.

"I told Cohn I saw no evidence of sabotage," Dr. Wiesner asserted. "I felt at the time and still do that the sabotage charge was completely unfounded and ridiculous."

By failure to present Dr. Wiesner's vital testimony, Senator McCARTHY could report mismanagement approaching sabotage. And he could boast of having "effected a saving of over $18 million" in the Baker projects alone.

At the McCarthy-Schine hearings the Senator gave much of the credit for the $18 million savings to Schine, now an Army private.

The figure turns out to be not quite so.

On the heels of his sabotage charges, the Baker projects were scrapped. But $8,434,000 had already been spent.

And the world's two largest radio transmitters now lie useless in Government warehouses, declared surplus property.

It's these free-wheeling McCarthy tactics that put the Velde and Jenner committees at a murderous disadvantage. The Senator can out-talk and out-shout them. His exaggeration and distortions assure headlines. Their quiet, orderly methods do not.

What is needed in America today is continued vigilance by the FBI and other police agencies; plus a joint congressional watchdog committee, under a responsible chairman, with fair and sound rules of procedure.

Last February the Republicans got worried over the effect of Senator McCARTHY's committee methods on public opinion. Senator HOMER FERGUSON (Republican, of Michigan), chairman of the Senate Republican Policy Committee, announced a unanimous decision to push for certain committee procedural reforms. They were endorsed specifically by President Eisenhower and Vice President NIXON.

The Senator's reply was defiance.

He didn't "give a tinker's damn," Senator McCARTHY asserted, about "how high or how low" were his critics in either party. To emphasize he meant the President and Senate Republican leaders, he repeated slowly and deliberately: "How high or how low."

[From the Washington Daily News of July 14, 1954]

BLASTS FROM A STUCK WHISTLE—McCARTHY VERSUS THE GOP

With the election of Dwight D. Eisenhower and the return of the Republicans to power, Senator McCARTHY lost little time in harassing the new regime.

As under the Democrats, the McCarthy stuck-whistle charges continued—of Communists, subversion, treason, in Government. Here is a calendar tabulation of the headlines the Senator was able to make for himself under the Republican administration:

November 8, 1952 (day after election): Tells reporter his "emphasis will not be on communism, but on graft and corruption. * * * We have a new President who doesn't want party-line thinkers or fellow travelers. He will conduct the fight."

December 10: Says in Washington there would be no slackening of his campaign against communism. "We have only scratched the surface."

December 12: Demands the President-elect give him the Executive files on crooks or Communists in Government.

January 1953: Launches attack on the Eisenhower nomination of James B. Conant, president of Harvard, as High Commissioner to Germany. A few weeks before, announced he was going to investigate Communist thinkers in Nation's colleges.

February 13: Announces, after one closed hearing, he has found evidence of sabotage in the Voice of America, under the new Secretary of State, John Foster Dulles.

February 14: Promises sensational disclosures of "waste, incompetence, and subversion," in the Voice of America.

February 28: Mr. Dulles pleads for 6 months to correct the accumulated errors in the past 20 years. Senator McCARTHY steps up his attacks, turning them on the United States information program abroad.

March 21: Launches drive to scuttle President's nomination of Charles E. Bohlen, Russian expert, as Ambassador to the Soviet Union. Asserts latter is security risk. Accuses Mr. Dulles of double talk and untrue statements in defending Mr. Bohlen and demands lie-detector test of Mr. Bohlen. Mr. Bohlen confirmed after Republican Senator Robert A. Taft contemptuously answers McCarthy charges. And after Republican policy chairman, Senator WILLIAM F. KNOWLAND, assails them.

March 29: Begins bitter, drawn-out controversy with Eisenhower Foreign Aid Chief, Harold E. Stassen, over Greek ship trade with Reds in Orient. Mr. Dulles warns of dangers in congressional committees entering field of foreign relations.

April: McCarthy aides Roy M. Cohn and G. David Schine make 18-day whirlwind

sweep through West Europe to ferret out subversion in United States overseas information program.

May 4: Delivers go-it-alone speech to Senate, daring our allies to pull out of Korean war. Republican colleagues reply nothing could be more pleasing to the Kremlin.

June 14: President assails "book burners," term generally directed at Senator McCarthy for his campaign on State Department's libraries abroad.

July 9: Turns guns on Central Intelligence Agency and its Director, Allen W. Dulles, brother of Secretary of State.

August 4: Accuses CIA Director Dulles of "coverup."

August 5: Claims Reds "still" in Department of Agriculture.

August 10: Tells press Communist Party member has access to secrets of CIA, Military Establishment, and Atomic Energy Commission through Government Printing Office. Hints Red spies stole nuclear secrets which helped Russia develop H-bomb. "An extremely bad situation."

October 11: Claims evidence that has "all the earmarks of extremely dangerous" and "extremely recent" espionage in Army Signal Corps radar laboratories at Fort Monmouth.

November 21: Announces "We've got to take a lot more positive stand against Communists . . . We haven't even scratched the surface yet."

December 1: Attacks Government for soft treatment of Allies over trade to China. "Are we going to send perfumed notes, following the style of the Truman-Acheson regime?" Secretary Dulles replies, with approval of President, that Senator McCarthy "attacks the very heart of United States foreign policy."

December 2: Without mentioning his name, President takes sharp issue with Senator McCarthy's tactics for dealing with Communists at home and abroad.

December 15: Announces he will demand names of Navy personnel who "cleared Communists."

January 13, 1954: Announces investigation of possible Red influence in Hawaii.

February 2: Insists again he uncovers "very, very current espionage" at Fort Monmouth.

May 30: At Army-McCarthy hearings, finally extends "20 years of treason under the Democrats" to "21 years of treason," bringing it into the Eisenhower administration.

Mr. LEHMAN. Mr. President, will the Senator from Vermont yield?

Mr. FLANDERS. I yield.

Mr. LEHMAN. Mr. President, I wish to compliment the distinguished Senator from Vermont on his eloquent and convincing remarks. At a later date I shall speak at considerable length on the resolution he has just read and on the evils and dangers of "McCarthyism," on which I have spoken so frequently in the past 3 or 4 years, both on the floor of the Senate and elsewhere.

However, in the meantime, let me assure the distinguished Senator from Vermont of my wholehearted support of the resolution he will call up. I express the deep hope and the expectation that the deadline for the presentation of the resolution will be not later than July 30; otherwise, I greatly fear that in the press of the business of the Senate, the resolution may be sidetracked, and Members of the Senate may be deprived of an opportunity to express their views on this all-important subject, which so closely affects the dignity, the duties, and the responsibilities of the Senate, in which the distinguished Senator from Vermont and I have the honor of serving.

Mr. FLANDERS. I heartily thank the Senator from New York.

SECRET ARMY INFORMATION AND ARMY CONTRACTS TO UNDERWORLD ASSOCIATES

Mr. WILLIAMS. Mr. President, in 1951 a charge was presented to the Senator from Kansas [Mr. Schoeppel] and myself that associates of the underworld had been given clearance to secret contracts and information by the Department of the Army, and that a company controlled by this group was being awarded Government contracts at prices higher than other responsible bids.

Also the charge was made that this company, controlled by a man who definitely was connected with the underworld, had placed a representative in a key position as assistant to the Director of War Mobilization Board, and that this representative had been given this high position without any FBI check.

Mr. BUTLER. Mr. President, will the Senator from Delaware yield?

The PRESIDING OFFICER (Mr. Kuchel in the chair). Does the Senator from Delaware yield to the Senator from Maryland?

Mr. KNOWLAND. Mr. President, I ask that the Senator from Delaware yield only for questions. I expect to insist that the rules be rather rigidly enforced until we dispose of the unfinished business.

Mr. BUTLER. Mr. President, will the Senator from Delaware yield for a question?

Mr. WILLIAMS. I yield.

Mr. BUTLER. Did I correctly hear the Senator from Delaware? Did he say that a man with definite connections with the underworld had placed in a high position in our Defense Establishment another man without FBI clearance?

Mr. WILLIAMS. That is correct. I think the documents I shall place in the Record today will substantiate that statement. In fact, I shall quote at this time from a letter signed by Mr. Charles E. Wilson, Director of the War Mobilization Board—and I may say this Mr. Wilson is not the Charles Wilson who is the Secretary of Defense. The letter is dated March 31, 1952:

> The fact is that he was not investigated by the FBI prior to being sworn in as an employee of the Office of Defense Mobilization.
>
> In a preceding letter by Mr. Wilson I was advised that the customary rule requiring persons appointed to such positions be cleared was not followed. This case is the only exception of which I know.

Mr. BUTLER. Mr. President, will the Senator from Delaware yield for another question?

Mr. WILLIAMS. I yield.

Mr. BUTLER. Does the Senator from Delaware know how this was accomplished?

Mr. WILLIAMS. I put the same question to Mr. Wilson. In a letter dated February 28, 1952, I was advised—and I now quote from the letter:

> Mr. Lamb was recommended for the position by Gen. Harry Vaughan.

Mr. BUTLER. Is that the General Vaughan who was the personal aide to Harry S. Truman, former President of the United States?

Mr. WILLIAMS. That is correct.

Mr. BUTLER. Do I correctly understand that the personal aide to the then President of the United States placed a man who had connections with the underworld in one of our defense establishments, with a top secret rating?

Mr. WILLIAMS. No; that man was given a "secret" rating; however, another individual who controlled the company that sent him to Washington and who did have a direct connection with the Costello gang, did get top secret clearance. It should be said, as to the background of this man who got secret clearance that I know nothing other than the fact that he was a representative of a company in New York which was definitely organized with money from members of the underworld and that clearance was given to him without an FBI check, and apparently solely upon the recommendation of General Vaughan.

Mr. President, recognizing the seriousness of these charges, we immediately reported the charge to the agencies affected and began to check. Today we are in a position to render a report.

First, I wish to discuss how top-secret clearance was given by the United States Army to an individual who not only has an unsavory record of his own, but also was definitely established as having financial connections with prominent members of the Frank Costello gang. The name is Louis I. Pokrass, 115 Central Park West, New York City.

Mr. BUTLER. Mr. President, will the Senator from Delaware yield?

Mr. WILLIAMS. I yield.

Mr. BUTLER. I know the reputation for accuracy of the Senator from Delaware, and I know he has never made a statement on this floor that he could not back up and document. Is it the statement of the Senator from Delaware at this time that this man did have top-secret clearance?

Mr. WILLIAMS. The man I am discussing now, Mr. Pokrass, did get top-secret clearance, and I can definitely establish here, today, the fact that he was financially connected with members of the underworld, including Frank Costello, Meyer Lansky, and Bugsy Siegel, and so forth.

Louis I. Pokrass was born in Korsun, Russia, July 17, 1898. He came to the United States in either 1913 or 1914; enlisted in the United States Navy in 1918; was naturalized in New York City on September 5, 1918; received an honorable discharge from the Navy in 1919; and has resided in New York since that time.

During the prohibition era Mr. Pokrass was arrested four times for violations of the National Prohibition Act, with the charges being dismissed in each instance.

After the repeal of the Prohibition Act, Mr. Pokrass joined other individuals, most of whom had questionable backgrounds, in organizing numerous wholesale and retail liquor establishments.

During the succeeding years the records show that at periodic intervals Mr. Pokrass or his companies were involved in numerous conflicts of the law. One particular case involved a serious charge of floor-stock-tax evasion on the part of the Capitol Wine & Spirits Corp., under which name they were at that time operating, and resulted in recommendations for criminal prosecution, as well as civil liability. On July 3, 1942, he successfully negotiated a compromise settlement with the Department of Justice, wherein he paid $95,000 in lieu of further civil liabilities; and an additional $5,000 was paid to the Department of Justice in lieu of criminal prosecution.

Mr. BUTLER. Mr. President, will the Senator from Delaware yield?

Mr. WILLIAMS. I yield.

Mr. BUTLER. Does the Senator from Delaware know who investigated those charges and who made that settlement?

Mr. WILLIAMS. I am going to incorporate in the RECORD a letter from the Department of Justice outlining the complete details.

Mr. BUTLER. Does the Senator from Delaware feel that any further investigation should be made of that phase of the matter?

Mr. WILLIAMS. I shall place this case in the RECORD; and I think it would be well for every Member of Congress to review the case and also to have it reviewed by the congressional committees that are responsible.

In the public hearings held by the Kean subcommittee last year the record showing how Mr. Pokrass made various payments and gifts, including two $1,000 checks, a new car, and a fur coat to Carroll Mealey, Deputy Commissioner of Internal Revenue, who was then serving as Chief of the Alcohol Tax Unit, was fully documented and exposed. These payments were made during a period when Mr. Pokrass had an application pending before Mr. Mealey's department.

Mr. BUTLER. Mr. President, will the Senator yield at that point?

Mr. WILLIAMS. I yield.

Mr. BUTLER. Did Mr. Mealey have anything to do with the settlement of the floor-tax case?

Mr. WILLIAMS. No, not the floor-tax case.

Mr. BUTLER. The Senator is now referring to another case?

Mr. WILLIAMS. This is another case, in which the Kean subcommittee developed that Mr. Pokrass had made various payments of the nature described to Mr. Mealey, who was then chief of the Alcohol Tax Unit.

We also developed later from our record that Mr. Mealey intervened in this case in what might be considered a rather irregular manner and obtained a favorable decision for Mr. Pokrass.

Mr. BUTLER. The floor-tax case would have been handled through Mr. Mealey's tax unit, would it not?

Mr. WILLIAMS. Yes, but Mr. Mealey was not connected with it at that time. I do not think Mr. Mealey had anything to do with the other case.

In 1952 Mr. Pokrass successfully dodged the subpena issued by the King subcommittee, which at that time was attempting to check this same transaction.

In addition to an unsavory record of his own including numerous conflicts with the law and the bribery of a public official the record also shows that Mr. Pokrass had been directly connected with some of the country's most notorious underworld characters.

In 1946 Mr. Pokrass joined Benjamin (Bugsy) Siegel in building the Flamingo Hotel in Nevada. Mr. Pokras put up $250,000 in this venture.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield to the Senator from Maryland.

Mr. BUTLER. Did not Mr. Siegel meet a very untimely death at that very hotel?

Mr. WILLIAMS. That is correct.

Mr. BUTLER. And he was one of the partners with Frank Costello, Pokrass and others interested in this defense plant?

Mr. WILLIAMS. Mr. Siegel was not interested in the defense plant, but Pokrass was connected with Mr. Siegel in the Flamingo Hotel. I cited that solely to show the connection of that individual with these prominent members of the underworld and that they did have financial connections through the years.

Mr. BUTLER. Can the Senator show that they had a financial interest in this company?

Mr. WILLIAMS. Frank Costello and others had a financial interest in this company when it was established. That can be definitely shown, although there is the claim that prior to taking the defense contracts Pokrass had purchased their interest.

Mr. BUTLER. In any event, at some time during the history of the company persons financially interested, including Bugsy Siegel——

Mr. WILLIAMS. No; they did not include Bugsy Siegel in this company which got the defense contract. They included Frank Costello, Meyer Lansky, and it was reported Joe Adonis—and Mr. Pokrass.

Mr. BUTLER. We do know that the company itself, or Mr. Pokrass, the head of the company, had a top secret clearance for our defense secrets, and we know that Mr. Lamb had a secret clearance for our defense secrets.

Mr. WILLIAMS. That is correct.

Mr. BUTLER. Not only that, but he had a key position in our Defense Establishment, at the appointment, apparently, of General Vaughan, who was the aide to the President of the United States.

Mr. WILLIAMS. That is correct, although there is a claim that these individuals had separated from this company prior to the time of these latter happenings. Nevertheless, that claim does not remove the fact that an associate of these men, a man who had an unsavory record of his own, was given a top secret clearance and he was represented in the Office of Defense Mobilization. That was a dangerous situation.

In 1947 Mr. Pokrass became interested in television and organized the Consolidated Television Corp. On November 10, 1948, the name of this company was changed to the Tele-King Corp. Mr. Pokrass was a top official and principal figure in both companies.

On October 11, 1951, Mr. George Goldstein, certified public accountant, Newark, N. J., testified before the Kefauver crime committee to the effect that Frank Costello, under the name of his attorney George Wolf, was a stockholder with this same Mr. Pokrass in the Consolidated Television Co., the predecessor company for Tele-King.

On March 21, 1951, Frank Costello, under oath before the Kefauver crime committee, confirmed that both he and Meyer Lansky had joined Louis I. Pokrass in financing this television company, and, according to his testimony, he later sold his interest to Louis Pokrass.

On February 14, 1951, Meyer Lansky, another notorious racketeer and member of the Costello gang, when testifying under oath before the Kefauver crime committee in New York City, likewise confirmed that both he and Costello had invested in this television company, of which Louis Pokrass was the principal figure. Mr. Lansky in his testimony on that same date stated that Joe Adonis was also a partner in the company, although I should say at that point that this is the only information I have with reference to Joe Adonis.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. BUTLER. A moment ago the Senator mentioned an address in New York. Is that the address of another notorious underworld character, other than the man to whom the Senator is now referring?

Mr. WILLIAMS. I was about to make the statement that during this period the listed address of Louis I. Pokrass was 115 Central Park West, New York City, which address was exactly the same as that of Frank Costello.

On February 13, 1952, an FBI report containing practically all this information regarding the background of this group was submitted to the White House. However, it was not until December 9, 1952, that any action was taken to revoke a "top secret" clearance which had been granted to Mr. Pokrass.

I may say that since I prepared this speech, and just before I started speaking, Lieutenant Colonel Walker, from the Defense Establishment, called my office. While at first the Defense Department was unable to establish the fact that there was a top secret clearance for Mr. Pokrass, and while I am incorporating in the RECORD today a letter in which the Defense Establishment officials said that this individual received no more than secret clearance, I was advised just a few minutes ago that they had reexamined their files since I insisted that he had been given top secret clearance, and they now find that I am correct in my statement.

Later today I will incorporate in the RECORD their letter confirming this one remaining question.

Mr. BUTLER. Mr. President, will the Senator yield before reading the memorandum?

Mr. WILLIAMS. I yield.

Mr. BUTLER. The Senator said this information had been sent to the White House. Tell us again when it was sent.

Mr. WILLIAMS. February 13, 1952.

Mr. BUTLER. When was action taken upon it?

Mr. WILLIAMS. The clearance was not revoked until December 9, 1952.

Mr. BUTLER. Almost a year after the information was sent to the White House?

Mr. WILLIAMS. That is correct.

Mr. BUTLER. As a member of the Internal Security Subcommittee I have heard of instances similar to that. Indeed, several cases in which information was sent to the White House during the last administration and nothing was done about it. Does not that point up the need for a Senate committee or committees to keep track of some of these things, to see that the executive departments do not fall down in instances of this kind?

Mr. WILLIAMS. Unquestionably there is weakness or laxity somewhere. I fail to find any reasonable excuse for what happened. Remember that at the time this took place we were in the midst of the Korean war.

Mr. BUTLER. It is almost inconceivable that it could have happened in the first instance; but when it was brought to the attention of the White House, it is completely inexcusable, in my opinion, that the situation was permitted to continue for almost a year without being remedied.

Mr. WILLIAMS. The memorandum which was dictated to my secretary this morning was to the effect that on March 20, 1951, Louis I. Pokrass was given "top secret" clearance, and that on May 26, 1951, that clearance was changed to secret clearance. However, he retained his "secret" clearance until December 9, 1952.

Mr. BUTLER. If the Senator can do it, will he please define, for the benefit of the American public, what "top secret" means?

Mr. WILLIAMS. It is my understanding that it is the highest clearance that can be given any civilian.

Mr. BUTLER. It is the very highest classification; and a man with top-secret clearance can see secret documents, no matter how vital they may be to the defense of this great country. Is not that true?

Mr. WILLIAMS. That is my understanding—even including documents which are not available to Members of Congress.

Mr. CASE. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. CASE. Was the party in question cleared for receiving all top-secret information or for receiving contract specifications of a top-secret character?

Mr. WILLIAMS. Contract specifications, which makes a difference, as the Senator knows.

Mr. CASE. Yes; there is a difference. To be wholly accurate, it is possible that this man was given the right to examine contract specifications of a top-secret character, and it does not necessarily mean that he had access to all top-secret information.

Mr. WILLIAMS. That is correct. However, the Senator from South Dakota knows that top-secret clearance, even to that extent, does give an individual the right, as a prospective contractor, to examine the top-secret work which this country is considering. That can include radar or work in the atomic field.

Mr. CASE. Yes; I would agree to that. It points up a very disturbing situation, when a man of such character, unreliable, or at least undesirable, should have access to that type of information.

Now I should like to ask the Senator, reverting to the question asked by the Senator from Maryland [Mr. BUTLER] some time ago, whether I understand correctly that Mr. Pokrass was given this position and this access to top-secret contractual specifications on the recommendation of General Harry Vaughan.

Mr. WILLIAMS. No; I do not know how Mr. Pokrass got it; however, his representative who was employed in the Office of Defense Mobilization was endorsed by General Vaughan.

Mr. CASE. How did Vaughan get into the picture?

Mr. WILLIAMS. There are two different individuals about whom we are speaking. Mr. Pokrass is the only one who received top-secret clearance. As to whether his clearance was as a result of an FBI check I do not know.

Mr. CASE. How did Vaughan get into it?

Mr. WILLIAMS. The other individual, Mr. Franklin Lamb, was a representative of the company which was owned by Mr. Pokrass, which company was operating on a defense contract. He got a position as an assistant to Mr. Charles E. Wilson, of the Defense Mobilization Office. He received that clearance without any FBI check, based on the recommendation of Gen. Harry Vaughan.

Mr. CASE. Is it suggested that Harry Vaughan was taking the place of the FBI in providing clearance for that man?

Mr. WILLIAMS. I read the statement of facts as I found them.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. BUTLER. While that individual was holding the position with the ODM he was also drawing a salary from the company, was he not?

Mr. WILLIAMS. That is correct to the extent that he was on a per diem basis.

Mr. BUTLER. In other words, he was drawing a Federal salary and at the same time was drawing a salary from his company.

Mr. WILLIAMS. That is correct.

Mr. CASE. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. CASE. In view of the facts and circumstances which the Senator from Delaware has related, would he say that some of us were justified in objecting to the confirmation of the appointment of Gen. Harry Vaughan to the permanent rank of major general, when that promotion came before the Senate last year?

Mr. WILLIAMS. As one who objected at that time, I certainly have found nothing since then to change my opinion about him.

Mr. CASE. As a member of the Committee on Armed Services I objected to the consideration of the nomination.

Mr. WILLIAMS. I shall now read an excerpt from a letter addressed to me by Mr. Charles E. Wilson, of the Office of Defense Mobilization, dated February 28, 1954, in which he outlines the procedure which was customarily followed in selecting personnel. He says:

> All employees of the Office of Defense Mobilization are subjected to complete background investigations conducted either by the Federal Bureau of Investigation or the Civil Service Commission. Mr. Lamb's full field investigation failed to disclose any derogatory information whatsoever concerning him or his past activities.

Now I should like to read from another letter, also written by Mr. Charles E. Wilson, of the Office of Defense Mobilization. It is dated March 31, 1952, and reads in part as follows:

> With respect to your second question as to whether or not he was cleared—

That is, Mr. Lamb—

> by the FBI prior to employment, the fact is that he was not investigated by the FBI prior to being sworn in as an employee of the Office of Defense Mobilization.

It was also pointed out in this correspondence that Mr. Lamb was recommended to the Office of Defense Mobilization by Gen. Harry Vaughan.

A short review of Mr. Pokrass' record shows that he entered this country as an immigrant from Russia at the approximate age of 15. Throughout his entire life he has been in numerous conflicts with the law—first as a four-time alleged violator of the National Prohibition Act and later as he attempted to operate various liquor companies after the repeal of the act. With this unsavory record of Mr. Pokrass as outlined above—most of all which has been public information—and the fact that under dates of February 14, 1951, and March 13, 1951, such notorious racketeers as Frank Costello and Meyer Lansky had publicly testified before the Kefauver Crime Committee of their business association with Mr. Pokrass, I was amazed to find that just a few weeks later, on March 20, 1951, this same Louis I. Pokrass, as chairman of the board of directors of the Tele-King Corp., was granted clearance for employment on or access to top-secret contracts and information by the Department of the Army.

In a letter dated June 26, 1954, signed by Lt. Col. L. H. Walker, Chief, Staff Operations Branch, Department of the Army, he confirmed that Mr. Pokrass on March 20, 1951, had been cleared for secret contracts and information. However, I have good reason to repeat my statement that the original clearance of Mr. Pokrass on that date was not just secret clearance but top-secret clear-

ance. I do not think the accuracy of that statement will be challenged.

Just a few minutes before I began to make my speech, as I related before, I received a telephone call from Lieutenant Colonel Walker, in which he said that a reexamination of the records confirmed the fact that he was in error in his letter when he said Mr. Pokrass had received only secret clearance, and that he found that the original clearance which Mr. Pokrass had was top secret. I will later today incorporate that letter in the RECORD.

I shall now incorporate in the RECORD the basis of my charge that Mr. Pokrass originally financed his entrance in the television business with the assistance of some of the country's most notorious racketeers. I shall also incorporate in the RECORD reports of how this company during the Korean war was awarded approximately $7 million in Government contracts at prices averaging nearly 20 percent higher than other responsible bids.

More complete information regarding Mr. Pokrass' background can be substantiated from the records of the hearings of the Kean subcommittee held in early 1953.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. BUTLER. As a member of the Committee on Interstate and Foreign Commerce, which has jurisdiction of matters affecting the dissemination of information on television and other means of communication, I would be interested in knowing whether or not this man is now engaged in the television business and whether he now operates a television station.

Mr. WILLIAMS. The company is now in bankruptcy. Whether or not they went out of the television business or continued after getting the Government contracts, I do not know. I shall incorporate in the RECORD a series of reports which will show that this company, after getting the first Government contract, in the amount of approximately $3½ million, and at a price approximately 20 percent higher than the price at which another contractor was making the same product for the Defense Department, applied for a $2 million loan from the Federal Reserve Board. This was rejected on the basis of a weak financial position and, as the Board said, for "other unsatisfactory features." The Board did not describe those features.

Later, the Defense Establishment, to help out this company, adopted a procedure whereby, through the advance-payment plan, money was furnished to the company. It was, in effect, the lending of money without a note.

Mr. BUTLER. Was that through the Small Defense Plant Administration?

Mr. WILLIAMS. I assume so. At any rate, it was through one of the Government establishments, and I believe that was the one.

Mr. BUTLER. Does the Senator's investigation show that the company actually had a license to make television or radio broadcasts?

Mr. WILLIAMS. Not to my knowledge.

Mr. BUTLER. It never had?

Mr. WILLIAMS. No.

Mr. BUTLER. It would be amazing to me if the Federal Communications Commission should issue a license to it.

Mr. WILLIAMS. No; this was a manufacturing concern only. It later went into bankruptcy. A few weeks ago I was advised that about a half million dollars' worth of work on the original $7 million worth of contracts remains to be delivered, against which we have advanced payments of about $200,000 outstanding.

It should be remembered also that this company was originally awarded these $7 million in defense contracts at a price which cost the taxpayers over $1 million over that which they could have been bought from more responsible sources.

Mr. President, I ask unanimous consent to have incorporated in the RECORD a letter dated June 26, 1954, signed by Lt. Col. L. H. Walker, in which is confirmed the fact that on March 20, 1951, Mr. Pokrass received clearance for access to secret information. I also ask unanimous consent to have incorporated in the RECORD a photostatic copy of the alleged original clearance which shows that Mr. Pokrass received clearance for access to secret contracts. However, as I said before, it has been confirmed this morning that this is not the original, that it is a changed copy. Top-secret clearance was given on that date rather than just secret as indicated in this report.

I ask unanimous consent that both these communications be incorporated in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE ARMY,
OFFICE OF THE CHIEF OF STAFF,
Washington, D. C., June 26, 1954.

Hon. JOHN J. WILLIAMS,
United States Senate.

DEAR SENATOR WILLIAMS: With respect to your oral request concerning the current clearance status of the Tele King Corp. and some of its officers, the following information is submitted:

a. The Tele King Corp. was granted a secret clearance by the Office of the Provost Marshal General on February 26, 1951. Consent for employment on or access to secret contracts and information was also granted to Calvin E. Bell, Scott W. Donaldson, Franklin Lamb, Warren J. Oestreicher, Harvey L. Pokrass, and Louis I. Pokrass on the same date (inclosure 1).

b. On March 20, 1951, Headquarters, First Army, also issued a letter of consent for access to secret information and material to Louis I. Pokrass (enclosure 2).

c. On the basis of information subsequently developed relating to the suitability of Louis I. Pokrass for access to classified information, his clearances and that of the Tele King Corp. were revoked on December 9, 1952. No formal revocation action was necessary on the other five individuals as their clearances as officers of the Tele King Corp. automatically become invalid when the facility's clearance was revoked.

d. No appeal action is now pending and the revocation of the clearances of Louis I. Pokrass and the Tele King Corp. remains in effect.

The foregoing embodies all information that I have been authorized to make available at this time regarding security determinations involving this firm.

Sincerely,

L. H. WALKER,
Lieutenant Colonel, GS, Chief, Staff Operations Branch Office Chief Legislative Liaison.

HEADQUARTERS, FIRST ARMY,
Governors Island, N. Y., March 20, 1951.

TELE KING CORP.,
New York, N. Y.
(Attention: Personnel manager.)

GENTLEMEN: Reference is made to the personnel security questionnaire recently submitted by your company in the case of the citizen whose name appears hereon.

In conformance with SR 380-405-1, consent is hereby granted for employment on or access to secret contracts and information of the Department of the Army in the case of the following citizen. This grant of consent is subject to the conditions and requirements set forth on the reverse side hereof.

Porkass, Louis I., chairman, board of directors, SSN: 109-03-8223.

By authority of the Secretary of the Army:

E. P. PARKER,
Major General, USA,
The Provost Marshal General.

(Not valid unless authenticated by the appropriate continental army commander.)

For the Army commander:

KENNETH J. WHITE,
Major, AGC, Adjutant General.

CONDITIONS AND REQUIREMENTS

1. Consent granted for the employment of an individual is your authorization to utilize the service of the individual on aeronautical and classified (secret, confidential, or restricted as indicated in each consent letter), Army contracts being performed by you within the geographical limits or under the jurisdiction of the continental army from which you received the consent.

2. Before you may employ an individual on contracts of the type described above, within the geographical limits or under the jurisdiction of another command, consent must be obtained by request submitted to the command in which, or under the jurisdiction of which, the individual is to be employed. The request must be accompanied by a photostatic or certified copy of the original letter of consent and a new alien questionnaire (NME form 49) or personal security questionnaire (NME form 48), whichever is applicable.

3. If information comes to your attention which indicates that your employment of the individual is, or may be, inimical to the interests of the United States, you are required promptly to make complete report to the office from which you received the consent letter, in order that appropriate action may be taken.

4. All correspondence or inquiries in connection with this matter should be directed to the office from which you received the consent letter.

E. P. PARKER,
Major General, USA,
The Provost Marshal General.

Mr. WILLIAMS. Mr. President, I ask unanimous consent to have incorporated in the RECORD excerpts from the testimony of Meyer Lansky as given before the Kefauver crime committee under date of February 14, 1951, in which he confirms his partnership with Mr. Pokrass.

There being no objection, the excerpts from testimony of Meyer Lansky

were ordered to be printed in the RECORD, as follows:

Mr. HALLEY. Were you ever in any business with Zwilliman? Were you in this television outfit, Consolidated Television?

Mr. LANSKY. Yes; I was.

Mr. HALLEY. Will you tell the committee the story of Consolidated Television, what was that all about?

Mr. LANSKY. Well, to the best of my knowledge, because we had the knowledge of distribution of juke boxes, I think Ed Smith was approached to form a—what do you call it—he claimed he had two good mechanics for television, and they formed a company, and we took an interest in it.

Mr. POLAKOFF (his attorney from New York City). You bought stock?

Mr. LANSKY. Yes; we bought stock.

The CHAIRMAN. I think for the benefit of the reporter this is very difficult for him to get. Please speak up.

Mr. LANSKY. I am sorry. We started to build television sets and I think that we went in at the wrong end of it. We thought that the commercial end was the best part. We should have gone into the home-set end, and maybe I would have been a very rich man today.

Mr. HALLEY. What were you making them for, bars and restaurants?

Mr. LANSKY. At that time they were mostly for bars. You did not have—what do you call it—those reel cabinets, you just bought the set.

Mr. HALLEY. Who was this that approached Ed Smith?

Mr. LANSKY. Pokrass.

Mr. HALLEY. Pokrass had the Air King Co., too, did he not?

Mr. POLAKOFF. The Tele-King; is it not?

Mr. HALLEY. Tele-King?

Mr. LANSKY. I do not know if he changed the name, but I think that we opened it up as Tele-King. What it is today, I could not say.

Mr. HALLEY. That was with Pokrass, too?

Mr. LANSKY. He approached them on the assumption that we were acquainted in the field and we knew all the distribution points. We knew every place that had a juke box, and that would be a good place to have television.

Mr. HALLEY. Now, getting back to television, who else was in Consolidated?

Mr. LANSKY. There was Pokrass, there was Ed, there was Bill Bye, there was myself, and there was Costello in there. He bought a piece, but he did not buy it from my doings.

Mr. POLAKOFF. When you say that, you mean he bought stock?

The CHAIRMAN. Let's all talk a little louder. I can tell that the reporter just cannot hear you.

Mr. HALLEY. Costello was in it?

Mr. LANSKY. Yes; he bought stock.

Mr. HALLEY. And Joe Adonis was in it, was he not?

Mr. LANSKY. He bought some stock.

Mr. HALLEY. How much money did you invest in it?

Mr. LANSKY. I think about $15,000 or $16,000.

Mr. HALLEY. Did you get any back?

Mr. LANSKY. Nothing.

Mr. HALLEY. The whole thing was a flop?

Mr. LANSKY. That part of it was, but I understand it is successful now.

Mr. HALLEY. You mean Tele-King is now successful?

Mr. LANSKY. That is what I understand.

Mr. HALLEY. And you no longer have any connection with it?

Mr. LANSKY. No.

Mr. HALLEY. Do you know whether Adonis or Costello have any present connection with it?

Mr. LANSKY. No; the whole company busted up, and he went ahead with it on his own, as I understand it, at the time, because nobody else cared to invest any money in it, and Bill Bye and Smith and I, we did not want to go any further, and we quit.

Mr. WILLIAMS. Mr. President, I ask unanimous consent to have incorporated in the RECORD excerpts from the testimony of Frank Costello as given before the Kefauver committee on March 13, 1951, in which he too confirms the fact that he was in investor in this company with Mr. Pokrass.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

Mr. HALLEY. Now, what other legitimate businesses do you have?

Mr. COSTELLO. None at present.

Mr. HALLEY. Well, you did have a television company; is that right?

Mr. COSTELLO. Yes.

Mr. HALLEY. What was that?

Mr. COSTELLO. I didn't have a television company. I bought an interest. I bought some stock.

Mr. HALLEY. In what company?

Mr. COSTELLO. I believe it's the Tele King.

Mr. HALLEY. And who were your partners there?

Mr. COSTELLO. Louis Pokrass.

Mr. HALLEY. And who else?

Mr. COSTELLO. I made an investment in there. I happened to know the gentleman. I invested around $20,000. Then later I found out—which was later—that Meyer Lansky had also an interest.

Mr. HALLEY. And did you also find out that Joe Adonis had an interest?

Mr. COSTELLO. No.

Mr. HALLEY. You still don't know that he had an interest?

Mr. COSTELLO. I still don't know if he had an interest.

Mr. HALLEY. And if the testimony is that he had an interest, you wouldn't doubt it, though, would you?

Mr. COSTELLO. Well, not coming from me——

The CHAIRMAN. Mr. Costello, either sit a little nearer the mike, or bring it a little closer to you.

Mr. HALLEY. How did you find out that Meyer Lansky had an interest?

Mr. COSTELLO. I believe I met him one day, and I told him, and he says, "Well, the funny part is I made an investment also," in that particular company .

Mr. HALLEY. You know Joe Adonis pretty well, too, don't you?

Mr. COSTELLO. Yes, sure.

Mr. HALLEY. Didn't he ever happen to mention to you that he made an investment there?

Mr. COSTELLO. Never.

Mr. HALLEY. What came of that investment, the $20,000?

Mr. COSTELLO. I believe they wanted be to invest a little more money there, or loan the company some money; which I wouldn't; I didn't have much confidence in this.

They told me, would I relinquish part of my stock which I did. And they returned me part of my money back.

Then, later, I turned my stock in and they paid me back in full.

Mr. HALLEY. You got your $20,000 back?

Mr. COSTELLO. Yes.

Mr. HALLEY. From Mr. Pokrass?

Mr. COSTELLO. Yes.

Mr. HALLEY. Where was that company located?

Mr. COSTELLO. It is located on Ninth Avenue. I have never been up there.

Mr. WILLIAMS. It is interesting to note that Mr. Costello's testimony was given on March 13, 1951, and that 7 days later, on March 20, 1951, Mr. Pokrass was given his "top secret" clearance by the Army.

Mr. President, I now ask unanimous consent to have incorporated in the RECORD a letter from the Department of Justice, under date of February 16, 1953, outlining the settlement of a case by Mr. Pokrass, wherein he paid $95,000 in lieu of forfeiture and $5,000 in lieu of criminal prosecution.

Mr. LANGER. Mr. President, will the Senator from Delaware yield?

Mr. WILLIAMS. I yield.

Mr. LANGER. May I have the name of the writer of the letter?

Mr. WILLIAMS. It was the attorney general who confirmed this setlement.

Mr. LANGER. I want only the name of the man who signed the letter for the Department of Justice.

Mr. WILLIAMS. Mr. Brownell; however, he refers to about 12 individuals involved, and in the absence of knowing the exact individual who was responsible for the settlement, I would rather the Senator would read the letter. I know what the Senator has in mind, and I think the responsibility should be placed at some particular point; however, I do not have the information.

Mr. President, I ask unanimous consent that the letter of February 16, 1953, from the Department of Justice to which I have just referred be printed in the RECORD at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF JUSTICE,
Washington, D. C., February 16, 1953.

Hon. JOHN J. WILLIAMS,
United States Senate,
Washington, D. C.

MY DEAR SENATOR: Reply is made to your letter of January 26, 1953, making inquiry regarding the acceptance on July 8, 1942, of a $100,000 compromise offer from the Capitol Wine & Liquor Corp., of New York, respecting certain liability allegedly incurred through violations of the floor-stocks tax laws. It is assumed that you refer to offers totaling that amount accepted from the Capitol Wine & Spirit Corp., of New York, on July 3, 1942.

The following concerns that settlement which related to the alleged law violations in connection with the floor-stocks tax of 75 cents per proof-gallon on certain distilled spirits allegedly held for sale by the Capitol Wine & Spirit Corp. on July 1, 1940. This tax was imposed by the Revenue Act of 1940, approved June 25, 1940, as an amendment to section 2800, Internal Revenue Code. Under that act this tax was made payable on or before August 1, 1940. Although the act was silent in respect to making of an inventory, the Secretary of the Treasury by regulations (TD–4976) issued June 26, 1940, required all persons so holding liquor to make an inventory thereof before commencing business on July 1, just 5 days later.

As the result of an investigation at the premises of the Capitol Wine & Spirit Corp. on July 1, 1940, agents of the Alcohol Tax Unit ascertained that 20,577.90 proof-gallons of distilled spirits discovered that morning on a number of trucks, some in garages and others parked on the streets of New York, were not included on an inventory of the liquor held by this corporation, a large-scale wholesale liquor dealer. Seizure of this liquor and the trucks was made by the Alcohol Tax Unit as having been used with intent to defraud the revenue of the floor-stocks tax amounting to $15,433.42. However, declaration of this liquor was made to the appropriate revenue office on or before August 1, 1940, and the tax on this liquor was paid within the time prescribed

by the law. Thereafter, on December 14, 1940, the case was reported to the United States attorney for the southern district of New York by the New York office of the Alcohol Tax Unit with a recommendation for prosecution and a statement that the investigation was continuing. A libel was filed against the seized property, but no indictment was returned.

Complying with the specific requests in your letter, you are informed that—

1. There was no tax due at the time the offer was accepted, the $15,433.42 having been paid timely. Consequently there was no assessment of taxes or tax penalties.

2. The accepted compromise offer embraced forfeiture liability of liquor valued at between $100,000 and $130,000 and 5 trucks having a value of about $2,500 and criminal liability. This liquor, if forfeited, could not have been sold in view of section 2805, Internal Revenue Code. Previous offers ranging from $9,855.60 to $60,000 were rejected by the Attorney General.

3. The total of the offers accepted was $100,000—$95,000 being in lieu of forfeiture and $5,000 in lieu of criminal prosecution. The proponent also paid storage charges of over $700.

4. The following names or initials of attorneys or officials appear in the Department's file as having recommended or approved the acceptance of these offers:

(a) Initials E. N. B., believed to be those of Earl N. Bishopp, assistant United States attorney, southern district of New York.

(b) Mathias F. Correa, then United States attorney, southern district of New York.

(c) S. S. Haggerty, then attorney, Bond and Spirits Division.

(d) Julian D. Simpson, then Chief, Compromise Section, Bond and Spirits Division.

(e) Harry B. DeAtley, then Assistant to the Director, Bond and Spirits Division.

(f) Joseph Lawrence, then Director, Bond and Spirits Division.

(g) Initials M. D. K., believed to be those of Mahlon D. Kiefer, then attorney, Criminal Division.

(h) Initials H. A. F., believed to be those of Hugh A. Fisher, then attorney, Criminal Division.

(i) Wendell Berge, then Assistant Attorney General, Criminal Division.

(j) J. R. Benney, then attorney, Assistant Solicitor General's office.

(k) Initials N. A. T., believed to be those of N. A. Townsend, then attorney, Assistant Solictor General's office.

(l) Oscar Cox, then Assistant Solicitor General.

The offers were accepted July 3, 1942, initials F. B., assumed to be those of Francis Biddle, then Attorney General.

It is trusted that the above sets forth the information sought. Should further data respecting basis for this settlement as revealed by the Department files be desired, it will be made available at your request.

Sincerely,

———— ————,
Attorney General.

Mr. WILLIAMS. Mr. President, I ask unanimous consent to have incorporated in the RECORD the secret clearance which was given to the Tele-King Corp., and the officials connected with the company.

There being no objection, the clearance was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE ARMY,
OFFICE OF THE PROVOST
MARSHALL GENERAL,
Washington, D. C., February 26, 1951.

TELE-KING CORP.,
New York, N. Y.

GENTLEMEN: Reference is made to the personnel security questionnaires recently submitted by your company in the case of the citizens whose names appear herein.

In conformance with SR 380-405-1, consent is hereby granted for employment on or access to secret contracts and information of the Department of the Army in the case of the following citizens. This grant of consent is subject to the conditions and requirements set forth on the attached page.

Bell, Calvin E.
Donaldson, Scott W.
Lamb, Franklin.
Oestreicher, Warren J.
Pokrass, Harvey L.
Pokrass, Louis I.

By authority of the Secretary of the Army:

E. P. PARKER,
Major General, USA,
the Provost Marshal General.

Authenticated by:

M. J. FITZGERALD,
Colonel, MPC, Executive Officer.

Mr. WILLIAMS. Mr. President, under date of March 13, 1953, I addressed a letter to Maj. Gen. George I. Back, Chief Signal Officer, Department of the Army, making inquiry with reference to a list of all Government contracts during the past 5 years which the Defense Department had given the Tele-King Corp. Under date of April 2, 1953, I received a reply thereto giving a breakdown of six contracts totaling, in the aggregate, $6,926,874.78, and spreading over a period from April 30, 1951, to August 6, 1952. In that breakdown it is shown that the first contract of approximately $3¼ million was given to the Tele-King Corp. on the basis of a per unit charge of $1,578.49. They purchased the same product from the Lewyt Corp., in New York, for $1,256.39. There were three other intermediate bids all of which were lower than the bid of the Tele-King Corp. In addition, in the year 1952, this company received a little more than $2¼ million worth of contracts. This contract was awarded to the Tele-King Corp. at a price basis of $1,593.82 per unit, while the Lewyt Corp. on exactly the same date was given another contract at a unit price of $1,407.49.

Mr. President, I ask unanimous consent that my letter to Major General Back, of March 13, 1954, and the reply thereto, outlining all these contracts and the manner of payments as they were made by the Government, be incorporated at this point in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MARCH 13, 1953.

Maj. Gen. George I. Back,
Chief Signal Officer,
Department of the Army,
Washington, D. C.

DEAR GENERAL BACK: Will you please furnish me with a complete list of all Government contracts during the past 5 years with the Tele-King Co.,[1] of New York.

With the information I want the dollar volume, a description of the material purchased, the date of the contract, a record of deliveries, and a record of the payments made either as advancements or upon delivery. Also, please advise the amount of pending contracts with this company and the amount of advancements which might have been made against future deliveries.

This company to which I have referred is the one represented by Louis I. Pokrass, Franklin Lamb, and others.

Should your particular procurement division not have any record of purchases with this company, would you advise me what other agency of the Government might have been doing business with them. Likewise, in the event you do have some purchases and know of any other agency of the Government which has also utilized their services, please advise.

Yours sincerely,

JOHN J. WILLIAMS.

P. S.—To assist in expediting this report I list what I understand might be some of the contract numbers: DA-36-039-SC-9384; No. 3142-PH-51-01.

DEPARTMENT OF THE ARMY,
OFFICE OF THE CHIEF SIGNAL OFFICER,
Washington, D. C., April 2, 1953.

Hon. JOHN J. WILLIAMS,
United States Senate.

DEAR SENATOR WILLIAMS: Reference is made to your letter of March 13, 1953, relative to Signal Corps contracts awarded the Tele-King Corp. of New York and to our interim reply of March 16, 1953.

The enclosed chart lists all the Signal Corps contracts awarded to the Tele-King Corp., and the information you requested. It should be noted that the outstanding balances for the first two contracts appearing on the chart represent spare parts not yet delivered, and accounts receivable for goods already shipped. The end items on these contracts were delivered on schedule.

Reference is also made to your telephone conversation on March 27, 1953, with Mr. John E. Pernice of this office in which you asked for the additional information set forth below.

The contracts awarded to Tele-King Corp. were entered into as a result of negotiation without formal advertising. The contract prices of the producers of the AN/ORC-9 for the years 1951 and 1952 are indicated by the following table:

1951 CONTRACTS

Contractor	Date of contract	Unit price
Lewyt Corp., New York	June 18, 1951	$1,256.39
Crosley Division, AVCO Manufacturing Corp., Ohio	June 30, 1951	1,403.69
Hoffman Radio Corp., California	——do——	1,550.00
Crosley Division, AVCO Manufacturing Corp., Ohio	June 16, 1951	1,574.50
Tele-King Corp., New York	Apr. 30, 1951	1,578.49

1952 CONTRACTS

Lewyt Corp., New York	Jan. 31, 1952	$1,407.49
Do	Apr. 4, 1952	1,447.71
Tele-King Corp., New York	Jan. 31, 1952	1,593.82
Crosley Division, AVCO Manufacturing Corp., Ohio	Feb. 8, 1952	1,605.87

Sources in addition to Lewyt Corp., the low bidder, were required under a policy directive from the Secretary of Defense, dated December 18, 1950, which stated, "It is essential, in complying with those instructions, that contracts be spread across industry as widely as possible in order to broaden the industrial base of our procurement program." The directive also stated, "Whenever time permits, and in order to broaden the mobilization base, additional contractors should be utilized in lieu of multishift or overtime operation."

It is the understanding of this office that the Munitions Board is handling your inquiry as to the contracts the other services may have awarded the Tele-King Corp.

If you desire any further information, please do not hesitate to write.

Sincerely yours,

ROBERT B. TOMLINSON,
Lieutenant Colonel,
Signal Corps Executive.

[1] May be listed as the Tale King Corp.

Contract information Tele-King Corp., Mar. 20, 1953

Contract No.	Dollar value	Item	Date of contract	Delivery—Scheduled for completion	Payments made to date	Pending delivery or accounts receivable
DA-36-039-SC-9384 (order No. 3142-PH-51)	$3,540,333.36	Radio set (AN/GRC-9), with spare parts.	Apr. 30, 1951	August 1952	$3,151,742.42	$388,590.94.
DA-36-039-SC-30754 (order No. 15174-PH-52)	2,730,532.00	do	Jan. 31, 1952	March 1953	[1] 292,520.88 2,249,868.22 [2] 100,992.73	$480,663.78.
DA-36-039-SC-40319 (order No. 20888-PH-52)	26,933.85	Facilities contract	June 30, 1952	August 1952	21,866.34	$5,067.51.

DA-36-039-SC-28421 (order No. 41617 PH-52)	627,973.07	Generator (DY-88)	June 26, 1952	March 1953	74,715.00	$553,258.07.
DA-36-039-SC-44554 (order No. 1248-PH-53)	390.00	Tube shields	Aug. 6, 1952	October 1952	390.00	Completed Oct. 15, 1952.

[1] This figure represents the unliquidated balance of partial payments totaling $1,695,404.58. This balance will be recouped by completion of the contract. The partial payments were made prior to delivery of completed items on work in progress pursuant to the contract clause prescribed by sec. 7-150.1 of the Army procurement procedure. Under this clause, title to such property chargeable to the contract vests in the Government.

[2] This figure represents the unliquidated balance of partial payments totaling $1,001,097.92. This balance will be recouped by completion of the contract. The payments were made under the conditions described above.

[3] 2,996 units of 5070 shipped as of Mar. 20, 1953.

NOTE.—Total dollar value as of Mar. 1, 1953: $6,926,874.78. Total undelivered dollar value as of Mar. 1, 1953: $1,427,580.30.

Mr. WILLIAMS. Mr. President, I have a letter signed by Mr. William McC. Martin, Jr., Director of the Board of Governors of the Federal Reserve System, dated April 27, 1953, in which he points out that the Federal Reserve Board had recommended that the application of this company for a loan be declined. Quoting from the letter, "The primary reason given was the weakness in the corporation's financial structure, and there were other unsatisfactory features."

I ask unanimous consent that the letter be incorporated in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

BOARD OF GOVERNORS OF THE
FEDERAL RESERVE SYSTEM,
Washington, April 27, 1953.

The Hon. JOHN J. WILLIAMS,
United States Senate,
Washington, D. C.

DEAR SENATOR WILLIAMS: Reference is made to your letter of April 21 wherein you ask whether or not the Federal Reserve Bank of New York filed an unfavorable report in 1951 on an application involving a proposed V-loan to the Tele-King Corp., in the amount of $2 million.

As you know, the Federal Reserve banks act only as fiscal agents of the United States in connection with these V-loans and in that capacity make confidential credit investigations and reports to the procurement agencies of the Government participating in the defense program and suggest terms and conditions to be incorporated in the loan documents which, in the opinion of the Federal Reserve banks, are necessary to adequately protect the interests of the Government. Neither the Federal Reserve banks nor the Federal Reserve Board have any authority to decline or approve these loan guaranty applications.

In the case of the Tele-King application the Federal Reserve Bank of New York in its credit report to the Department of the Army recommended that the application be declined. The primary reason given was the weakness in the corporation's financial structure, and there were other unsatisfactory features. However, the Federal Reserve bank did suggest terms and conditions to the Department of the Army for use in the event that Department felt that the prospective borrower's production was essential to the defense effort.

As I advised you in my letter of April 7, this application with the Federal Reserve bank's unfavorable report was presented to the Department of the Army for consideration on November 10, 1951, but before action was taken by the Department, the application was withdrawn and the V-loan never consummated. In this instance the financing institution which filed and later withdrew the application was the Public National Bank & Trust Co. of New York City.

If there is any further information which you want in this case or any other case, please call on us.

With kindest regards,

Sincerely yours,

WM. MCC. MARTIN, JR.

Mr. WILLIAMS. Mr. President, under date of April 22, 1953, I inquired as to the list of officers, directors, and principal stockholders of the corporation, and I received a reply dated May 15, 1953, from Lt. Col. Robert B. Tomlinson, giving a list of the officers, directors, and principal stockholders. I ask unanimous consent that the letter be incorporated in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MAY 15, 1953.

Hon. JOHN J. WILLIAMS,
United States Senate.

DEAR SENATOR WILLIAMS: Reference is made to your letter of April 22, 1953 requesting the names of all officers, directors, and principal stockholders of the Tele-King Corp., and to our interim reply of April 28, 1953.

Our records show the following officers, directors, and stockholders of the Tele-King Corp. in September 1950:

Chairman of the board of directors: Louis I. Pokrass. One of two stockholders. He and his family own 300,000 shares.

Vice chairman of the board of directors: Franklin Lamb. He owns 20,000 shares.

President and treasurer: Harvey L. Pokrass.

Vice president and secretary: Calvin E. Bell.

Vice president in charge of Government contracts: Scott W. Donaldson.

Vice president in charge of engineering: M. J. Morris.

Our records list Gen. George MacDonald as vice president in charge of Government contracts in October 1952.

If you desire any further information, please do not hesitate to write.

Sincerely,

ROBERT B. TOMLINSON,
Lieutenant Colonel, Signal Corps,
Executive.

Mr. WILLIAMS. Mr. President, under date of June 2, 1954, a further letter was directed to Lieutenant Colonel Tomlinson, and on June 12, 1954, I received a reply thereto, in which he said that the company was in bankruptcy and that there was an outstanding balance to be delivered on the contracts representing a little more than half a million dollars. Quoting from the letter, "The outstanding balance of such progress payments is $203,188.51."

Mr. President, I ask unanimous consent that the letter be incorporated in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE ARMY,
OFFICE OF THE CHIEF SIGNAL OFFICER,
Washington, D. C., June 10, 1954.

Hon. JOHN J. WILLIAMS,
United States Senate.

DEAR SENATOR WILLIAMS: Reference is made to your letter of June 2, 1954, containing queries relative to Signal Corps contracts awarded the Tele-King Corp., of New York, and referencing our previous correspondence under dates of March 13, 1953, and April 2, 1953.

The present status of outstanding Signal Corps contracts with Tele-King is as follows:

Contracts	Dates	Amount of contract as of last amendment	Balance to be delivered
DA-36-039-SC-9384	Apr. 30, 1951	$3,504,119.86	$128,236.34
DA-36-039-SC-30754	June 31, 1952	2,742,551.60	355,354.88
DA-36-039-SC-28421	June 26, 1952	619,523.79	11,320.05
DA-36-039-SC-40319	June 30, 1952	26,933.85	5,112.06
Total			500,023.33

The items remaining to be delivered consist of spare parts and literature. It is anticipated that these contracts will be completed by the end of December 1954. The Signal Corps has made progress payments to the company for material to be delivered to the Government. The outstanding balance of such progress payments is $203,188.51.

No additional contracts have been awarded Tele King Corp. The Tele King Corp. is now operating under a Chapter XI Bankruptcy Act arrangement.

This office is taking action to ascertain the status of the appeal which you referred to with respect to the revocation of clearance. This information will be transmitted to you without delay.

Sincerely yours,

FRED J. JOHNSTON,
Major, Signal Corps,
Assistant Executive.

(For Robert B. Tomlinson, lieutenant colonel, Signal Corps executive.)

Mr. WILLIAMS. Mr. President, under date of June 24, 1954, certain additional information was furnished by the Signal Corps regarding these contracts, which I ask unanimous consent to have incorporated in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE ARMY,
OFFICE OF THE CHIEF SIGNAL OFFICER,
Washington, D. C., June 24, 1954.

Hon. JOHN J. WILLIAMS,
United States Senate.

DEAR SENATOR WILLIAMS: This is in answer to your letter of June 18, 1954, containing further questions regarding the Tele King Corp. The information relative to the status of the appeal with reference to the revocation of clearance for this company has not yet been received.

The Tele King Corp. filed a petition for an arrangement under chapter XI of the Bankruptcy Act on February 4, 1954, in the United States District Court for the Southern District of New York.

No receiver has been appointed. Tele King is operating as "debtor in possession" pursuant to an order of the district court dated February 5, 1954. The present management of the Tele King Corp. is as follows:

Franklin Lamb, chairman of the board of directors.

Harvey L. Pokrass, president.

Calvin E. Bell, executive vice president.

Sol Predeger, vice president.

The Signal Corps has advanced no money to the Tele King Corp. since February 4, 1954. The present balance of outstanding progress payments is $43,981.96.

Tele-King has made deliveries in the amount of $106,687.05 on its Signal Corps contracts since February 5, 1954.

Your understanding of our letter of June 10, 1954, expressed in the fifth paragraph of your letter is correct; however, the figures mentioned in the two preceding paragraphs should also be kept in mind.

Sincerely yours,

ROBERT B. TOMLINSON,
Lieutenant Colonel, Signal Corps,
Executive.

Mr. WILLIAMS. However, Mr. President, there is another chapter in this story, and it is this last chapter which gave both the Senator from Kansas [Mr. SCHOEPPEL] and myself the most concern. Also it was this phase of their operations which was really responsible for our entry into the case.

In the latter part of 1951 information was presented to the Senator from Kansas [Mr. SCHOEPPEL] and myself to the effect that members of the underworld had planted a representative in a key position in the Office of the Director of Defense Mobilization. It was pointed out how with a representative in this key position the group would automatically have had access to advance information on all allocations of critical materials, the inauguration of rationing or price controls, or such other important actions which would have a major effect on prices of key commodities in this country during the war.

Recognizing the seriousness of this charge, Senator SCHOEPPEL and I began our inquiry—an inquiry which has extended over a period of nearly 3 years.

The records which have been incorporated and those which follow will establish that Mr. Franklin Lamb was employed as an assistant to Mr. Charles E. Wilson, Director of Defense Mobilization, and that Mr. Lamb's resignation from that position was accepted about the time we began our inquiry.

Our report will also establish that during the period in which Mr. Lamb was employed by the Government as an assistant to the Director of the Office of Defense Mobilization, he did not draw any Government salary but only a per diem allowance; but at that time he was also on the payroll of and a stockholder in the New York company—Tele-King—which was referred to above as being owned by Louis Pokrass and his associates.

Furthermore, our records will show that Mr. Lamb was assigned to this important position without an FBI check but solely upon the recommendation of Gen. Harry Vaughan. His clearance to secret contracts and secret information was included in the blanket clearance given to the Tele-King Corp. and all its officials under date of February 26, 1951.

The report on Franklin Lamb follows.

Mr. President, I ask unanimous consent to have incorporated in the RECORD a letter signed by Robert Ramspeck, chairman, United States Civil Service Commission, under date of January 23, 1952, in which Mr. Ramspeck points out the Government employment record of Franklin Lamb and confirms the fact that he was employed as an assistant to Mr. Wilson from September 4, 1951, to October 24, 1951.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UNITED STATES CIVIL SERVICE COMMISSION,
Washington, D. C., January 23, 1952.

Hon. JOHN J. WILLIAMS,
United States Senate.

DEAR SENATOR WILLIAMS: Due to the fact that we did not have the given name of Mr. Lamb about whom you wrote me under date of January 14, we were unable to locate any record of him in this office, but it was ascertained from the Office of Defense Mobilization that a Mr. Franklin Lamb had been employed as an assistant to Mr. Wilson from September 4, 1951, to October 24, 1951, on which date he was separated.

Our records do show that Mr. Lamb was employed under a war service appointment as consulting expert at the rate of $22.22 per diem when actually employed on the War Savings Staff, Office of the Secretary of the Treasury, from June 10, 1942, until his services were terminated on August 11, 1942. The records further show that he was appointed as a small-business analyst on July 1, 1944, in the Bureau of Foreign and Domestic Commerce, Department of Commerce, and was terminated March 30, 1946. His rate of pay at the time of his appointment was $5,600 per annum when actually employed.

I might add there is no information in the Commission's files detrimental to Mr. Lamb.

Sincerely yours,

ROBERT S. RAMSPECK, *Chairman.*

Mr. WILLIAMS. Mr. President, under date of January 29, 1952, I addressed a letter to Charles E. Wilson, Director of the Office of Defense Mobilization, making certain inquiries as to the appointment of Mr. Lamb, and his background. Since the letter is very brief, I wish to read it for the benefit of the Senate:

JANUARY 29, 1952.

Mr. CHARLES E. WILSON,
Director, Office of Defense Mobilization,
Washington, D. C.

DEAR MR. WILSON: It has been reported to me that a Mr. Franklin Lamb was employed as an assistant in your office from September 4, 1951, to October 24, 1951, on which date he was separated after it had been called to your attention that Mr. Lamb was connected with either Frank Costello or certain other undesirable characters in New York.

Will you please advise me if this report is correct; and if so, furnish me with a report of whatever information you have regarding Mr. Lamb's background or outside connections. Is it true that Mr. Lamb was recommended to his position by General Vaughan?

Yours sincerely,

JOHN J. WILLIAMS.

Under date of February 28, 1952, a reply was received from Mr. Wilson, in which he said:

With reference to your statement concerning Mr. Lamb's possible connection with Frank Costello or certain other undesirable characters, I can only say that to the best of my knowledge, such statements are pure rumor.

Mr. Wilson also confirmed the fact that Mr. Lamb was recommended for his position by Gen. Harry Vaughan. He also emphasized the policy that all employees of the Office of Defense Mobilization were cleared either by the FBI or the Civil Service Commission prior to their appointment.

Mr. KNOWLAND. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. KNOWLAND. I wish to ask the question merely as a matter of information, since there are two Charles E. Wilsons. As I understand, the Charles E. Wilson to whom the Senator refers was the Director of Defense Mobilization, and not the Secretary of Defense?

Mr. WILLIAMS. That is correct. I have no reason to believe that Mr. Wilson did not write the letter in all sincerity and that the reason for the misinformation was the fact that someone was feeding him a lot of false information. I may not be accurate, but that is my opinion.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield to the Senator from New Mexico.

Mr. ANDERSON. Does not the Senator believe that both of the Charles E. Wilsons are men of high character, and unquestioned integrity?

Mr. WILLIAMS. Certainly I think they are. While I am incorporating this correspondence as a matter of record, as I said before, I can understand how a man in his position would take reports which were handed to him by men who were working with him. I cannot help but think that this report or this letter was written by Mr. Wilson without his having all the facts.

However that does not excuse individuals like General Vaughan or others who certainly must have known the

background of these individuals. They should be held responsible. Mr. Wilson should assist in placing that responsibility.

I understand that 15 days prior to Mr. Wilson's letter of February 28, 1952, or on February 13, 1952, to be exact, the FBI report outlining substantially this same information was presented to the White House. I do not believe Mr. Wilson had access to that information.

Mr. ANDERSON. I recognize the feeling which the majority leader has with respect to Senators making statements and not asking questions, but I wish to commend the Senator from Delaware for checking into the matter, and to say to him that I think both the Secretary of Defense and the former head of the Office of Defense Mobilization are men of the highest character. While I have had a great deal more dealings with Mr. Charles E. Wilson, who was the head of the Office of Defense Mobilization, it is to be deplored that these men who came into the Government from private industry and assumed the tasks which they did, should have had some subordinates occasionally mislead them about individuals. It was just as regrettable to have had it happen to the former head of the General Electric Co. as if it had happened to the former head of General Motors Corp.

Mr. WILLIAMS. That is correct.

Mr. ANDERSON. Both the former Director of Defense Mobilization and the present Secretary of Defense are high-minded men of sterling character.

Mr. WILLIAMS. The Senator is correct. I have not changed my high opinion of Mr. Charles E. Wilson, former Director of Defense Mobilization. Surely had he seen the report he would not deliberately have given out wrong information. I am confident of that. However, I do not believe that excuses those who prepared for him the wrong information in answer to our questions. I am certain the Senator agrees with me as to that.

Mr. ANDERSON. I certainly agree with the Senator from Delaware.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield for a question.

Mr. JOHNSTON of South Carolina. I merely wished to inquire if Senate bill 3690, relating to the revision of the Atomic Energy Act, is now under consideration?

Mr. WILLIAMS. No, I am not discussing the atomic energy bill. I am making a report on certain other matters. I shall finish in a few minutes.

Mr. JOHNSTON of South Carolina. There has been talk about a filibuster being in progress. The Senator from Delaware is not participating in a filibuster, is he?

Mr. WILLIAMS. I may say to the Senator from South Carolina if it is, it is a filibuster which Members on his side of the aisle, who were in control of the administration at the time these events happened, should have been conducting. I am certain that had the Senator had, during that period, the information which I am presenting to the Senate today, he would have presented it then. I hope the Senator will not criticize me for making this report, even though it is at this belated date.

Mr. JOHNSTON of South Carolina. I am not criticizing the Senator from Delaware for making any report whatsoever. I merely wished to make it clear that he was bringing up another matter while the Senate has under discussion the atomic energy bill.

Mr. WILLIAMS. I am certain that if he will sit down and patiently wait, I shall conclude my remarks in 5 minutes, and there can be a vote by 12 o'clock unless he again starts talking.

Mr. JOHNSTON of South Carolina. I simply wanted to say——

Mr. WILLIAMS. I do not yield to the Senator from South Carolina to turn my statement into a filibuster, and I hope he will not defend these racketeers.

Under date of March 5, 1952, I wrote another letter to Mr. Charles E. Wilson, Director of the Office of Defense Mobilization, making certain inquiries regarding his question and on March 31, 1952, I received a reply.

I ask unanimous consent that both letters may be printed at this point in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MARCH 5, 1952.

Mr. CHARLES E. WILSON,
Director, Office of Defense Mobilization, Executive Office of the President, Washington, D. C.

DEAR MR. WILSON: I acknowledge receipt of your letter of February 28, 1952, in reference to the employment of Mr. Franklin Lamb in your office.

Will you please furnish me with the following additional information:

1. The date of Mr. Lamb's employment in your office and the title of his position.

2. Was he cleared by the FBI prior to his employment?

3. Is it not customary to clear men employed in your department with the FBI prior to their employment?

4. Was Mr. Lamb checked by the FBI subsequent to his employment? If so, give the date on which his case was referred to the Bureau, the date upon which the report was received, and the substance of that report.

Yours sincerely,

JOHN J. WILLIAMS.

EXECUTIVE OFFICE OF THE PRESIDENT,
OFFICE OF DEFENSE MOBILIZATION,
Washington, D. C., March 31, 1952.

Hon. JOHN J. WILLIAMS,
United States Senate,
Washington, D. C.

DEAR SENATOR WILLIAMS: Your letter of March 5, 1952, requested additional information regarding the employment of Mr. Franklin Lamb by this Office.

In response to your first question, Mr. Lamb was employed by this Office for a period of 6 weeks from September 4, 1951, to October 24, 1951, as an Assistant to the Director.

With respect to your second question as to whether or not he was cleared by the FBI prior to employment, the fact is that he was not investigated by the FBI prior to being sworn in as an employee of the Office of Defense Mobilization.

This Office received on August 28, 1951, a photostat of a clearance issued by the Department of the Army, Office of Provost Marshal General, clearing Mr. Lamb for access to documents up to and including those classified "secret." Accordingly, on September 4, 1951, Mr. Lamb was employed under the conditions outlined above. On September 10, there was made available to this Office a complete background investigation which had been conducted on July 9, 1942, by the Internal Revenue Bureau covering Mr. Lamb and which was entirely favorable. On September 7, 1951, request was made by this Office to institute a complete background investigation by the FBI, which was completed on December 29, 1951, as previously stated. This full field investigation failed to disclose any derogatory information whatsoever concerning Mr. Lamb or his past activities.

Your third question asked if it is not customary to clear an employee with the FBI prior to his employment. The ODM regulations permit an employee to be engaged prior to the completion of a full field background investigation by either the FBI or the Civil Service Commission if preemployment checks have been made and have failed to reveal any derogatory information. The reasoning behind this ruling is that under the best possible conditions, the complete background investigation normally requires from 60 to 120 days. Experience has indicated that if a hard and fast rule were promulgated requiring a prospective candidate to wait that long for complete security clearance after it was decided that he was otherwise qualified, it would be a major deterrent in securing staff members for this Office.

Accordingly, a preliminary preemployment investigation is secured from all or anyone of a number of agencies on each prospective employee and if the check fails to reveal any derogatory information, the individual is given an appointment conditioned upon subsequent clearance based on a complete background investigation. Until such time as the clearance is received the individual is not permitted access to any "top secret" or higher classified material.

The above information has also answered question No. 4, with one exception, and that is your request for the substance of the FBI report covering Mr. Lamb. In accordance with the President's directive of March 15, 1948, this request must be respectfully declined.

Sincerely,

CHARLES E. WILSON.

Mr. WILLIAMS. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a letter under date of April 23, 1953, signed by Arthur S. Flemming, Director of the Office of Defense Mobilization.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE
OF THE PRESIDENT,
OFFICE OF DEFENSE MOBILIZATION,
Washington, D. C., April 23, 1953.

Hon. JOHN J. WILLIAMS,
United States Senate,
Washington, D. C.

DEAR SENATOR WILLIAMS: Your letter of April 13, 1953, asked that you be advised of the annual leave accruing to a former employee of the Office of Defense Mobilization, Mr. Franklin Lamb, and also the date and amount of any lump sum paid to him.

Mr. Lamb was appointed on a WOC basis on September 4, 1951, and terminated October 24, 1951. Consultants serving without compensation in an advisory capacity do not accumulate leave or receive lump-sum payments when leaving the agency. Accordingly, Mr. Lamb received no payment for services rendered the Government other than the per diem in lieu of subsistence to which all WOC's are entitled under the terms of the Defense Production Act.

If you wish additional information, please do not hesitate to call.

Sincerely yours,

ARTHUR S. FLEMMING, *Director.*

Mr. WILLIAMS. Mr. President, under date of April 24, 1953, I received a letter from Maj. Gen. W. H. Maglin, the Provost Marshal General, containing certain additional information with regard to Mr. Lamb and others having been given their clearance. I ask unanimous consent to have that letter printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE ARMY,
OFFICE OF THE PROVOST MARSHAL GENERAL,
Washington D. C., April 24, 1953.

Hon. JOHN J. WILLIAMS,
United States Senate.

DEAR SENATOR WILLIAMS: Reference is made to your letter of April 21, 1953, concerning Tele King Corp.

Tele-King Corp. and the following individuals were cleared by the Office of the Provost Marshal General on February 26, 1951: Calvin E. Bell, Scott W. Donaldson, Franklin Lamb, Warren J. Oestreicher, Harvey L. Pokrass, Louis I. Pokrass.

I have looked into this matter and find that the Army-Navy-Air Force Personnel Security Board, which acted for the Secretaries of the Army, Navy, and Air Force, revoked the clearances of Tele-King Corp., and Mr. Louis Pokrass on December 9, 1952. They appealed this decision to the Industrial Employment Review Board and their entire case files were forwarded to that Board on December 22, 1952.

On March 27, 1953, these Boards were abolished by order of the Secretary of Defense who also directed that regional boards be established. These boards are in the process of being organized. Pending their formation I have been advised that all files on cases being processed by the Industrial Employment Review Board are now held by the Assistant Chief of Staff, G–2, Department of the Army.

The records of my office do not contain any additional information on Tele-King Corp.

I trust the above information will be of assistance to you in this matter.

Sincerely yours,

W. H. MAGLIN,
Major General, USA, the Provost Marshal General.

Mr. WILLIAMS. Mr. President, I ask unanimous consent to have printed in the RECORD a copy of the clearance which was given to Mr. Lamb.

There being no objection, the clearance was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE ARMY,
OFFICE OF THE PROVOST MARSHAL GENERAL,
Washington, D. C., February 26, 1951.

TELE KING CORP.,
New York, N. Y.
(Attention Mr. S. W. Donaldson.)

GENTLEMEN: Reference is made to the personnel security questionnaires recently submitted by your company in the case of the citizens whose names appear herein.

In conformance with SR 380–405–1, consent is hereby granted for employment on or access to secret contracts and information of the Department of the Army in the case of the following citizens. This grant of consent is subject to the conditions and requirements set forth on the attached page.

Bell, Calvin E.
Donaldson, Scott W.
Lamb, Franklin.
Oestreicher, Warren J.
Pokrass, Harvey L.
Pokrass, Louis I.

By authority of the Secretary of the Army:

F. P. PARKER,
Major General, United States Army, the Provost Marshal General.

Authenticated by:

M. J. FITZGERALD,
Colonel, MPO Executive Officer.

Mr. WILLIAMS. Mr. President, on April 20, 1953, I addressed a letter to Mr. Gordon E. Dean, Chairman of the Atomic Energy Commission, asking whether or not Mr. Lamb had been cleared for employment in the atomic-energy field.

I ask unanimous consent that both my letter and his reply be printed at this point in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

APRIL 20, 1953.

Mr. GORDON E. DEAN,
Chairman, United States Atomic Energy Commission, Washington, D. C.

DEAR MR. DEAN: It is my understanding that on or about September 26, 1951, your agency requested clearance on a Franklin Lamb, who at the time was being considered for employment and that this report was delivered on or about November 13.

Please advise whether or not such a report was requested, and if so, the results.

Was Mr. Lamb subsequently employed? If so, furnish a record of his employment along with a notation as to whether or not he was cleared for top secrets.

Yours sincerely,

JOHN J. WILLIAMS.

MAY 1, 1953.

Hon. JOHN J. WILLIAMS,
United States Senate.

DEAR SENATOR WILLIAMS: Reference is made to your letter dated April 20, 1953, wherein you made inquiry concerning possible employment and security actions taken by the Atomic Energy Commission with respect to Mr. Franklin Lamb.

We have no record in our central clearance index of Mr. Lamb ever having been employed or granted security clearance by this Commission. However, our records do reflect that a request for security clearance for him was received during September 1951 from the Office of Defense Mobilization. We were advised that Mr. Lamb's duties as a consultant with that agency would require his being afforded access to atomic energy restricted data.

On September 21, 1951, we requested the Federal Bureau of Investigation to conduct an investigation relative to Mr. Lamb's character, associations, and loyalty in order that we might determine his eligibility for security clearance. His eligibility, however, was not resolved, for by letter dated November 21, 1951, the Office of Defense Mobilization advised that Mr. Lamb's services had recently terminated with ODM and, as a consequence, it would not be necessary to process his case for AEC security clearance. Accordingly, we closed our file on Mr. Lamb without further action.

I hope this information will be of assistance to you.

Sincerely yours,

H. D. SMYTH,
Acting Chairman.

Mr. WILLIAMS. Mr. President, after developing the case to this point, I called and personally talked with Mr. Franklin Lamb, feeling that, in all fairness, I should obtain his side of the question.

Under date of May 22, 1953, I received a letter from Mr. Franklin Lamb, giving his own explanation as to his part in the matter.

I ask unanimous consent to have the letter of May 22, 1953, printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

TELE KING CORP.,
New York, N. Y., May 22, 1953.

Senator WILLIAMS,
Senator from Delaware,
Senate Office Building,
Washington, D. C.

DEAR SENATOR WILLIAMS: With respect to your telephone conversation with me, you suggested that I give you certain information, which of course, I am glad to furnish.

I joined Tele King Corp. in September 1949. I was recommended to Mr. Pokrass and Tele King Corp. by Mr. Lawrence Thees, sales manager of the parts division of Radio Corporation of America.

At that time, I had been negotiating with RCA to go with them and had been offered a position by the late vice president, Joseph Wilson at Camden, whom I had met through my old business friend, Frank Folsom, president of RCA.

When I joined Tele King it was entirely owned by Mr. Louis I. Fokrass and his immediate family, however, I did not purchase stock in the company until the middle of 1950.

When I was assistant to Mr. Charles E. Wilson in the ODM, I was appointed on a WOC basis and my company gave me a leave of absence with pay during the time I was with the ODM. While I was with them, other than attending the meetings of the Board of Directors, which I was permitted to do by law and received such a ruling from the legal department of the ODM, I entered into no part of the business activities of Tele King.

You have indicated that you wish to ask me additional questions. I do not know the purpose of these questions and although I am willing to answer any questions you wish to ask in full detail, I prefer you to write them to me so that I can gather the information and data and give you the full facts.

Because of the fact that my company has been very badly persecuted with adverse publicity, most of which has been distorted and is untrue, I prefer to give you my answers in writing in detail so that you will have any answer to any question that is in your mind in full detail.

I am suggesting this method for dealing with your questions so that neither of us will be misquoted.

Very truly yours,

FRANKLIN LAMB.

Mr. WILLIAMS. Mr. President, in the letter Mr. Lamb confirms the fact that he did have leave with pay from the Tele King Corp. during the time of his employment by the Government.

In the letter which I have just incorporated in the RECORD Mr. Lamb suggested that rather than come to Washington, as had at first been suggested, he would rather I drafted my questions in the form of a letter, following which he could put the answers in writing.

Therefore, on May 28, 1953, I directed a letter to Mr. Lamb, outlining a series of nine questions, including questions regarding the connections of Frank Costello and some of the other racketeers

in the Tele King Corp., or in business with Mr. Pokrass.

I ask unanimous consent that the letter be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MAY 28, 1953.

Mr. FRANKLIN LAMB,
Vice Chairman of the Board,
Tele King Corp., New York, N. Y.

DEAR MR. LAMB: I acknowledge your letter of May 22, 1953. I had hoped that you would find it convenient to be in Washington, at which time you could explain certain questions which have arisen in connection with your employment by the Government and your relationship with the Tele King Corp. However, in the meantime, pending such an interview, I would appreciate the following information:

1. The date the Tele King Corp. was organized, its capitalization, and a list of the stockholders at that time.

2. Did the Tele King Corp. succeed, or take over the assets and liabilities of the Consolidated Television Co.?

a. What was the capitalization of the Consolidated Television Co. at the time it was merged with the Tele King Corp., and who were its officers and stockholders?

3. The present capitalization of the Tele King Corp., and a list of its stockholders.

4. Is Frank Costello now, or has he ever been a stockholder, either directly or indirectly, in the Tele King Corp.?

a. If his interests have been sold, the date of the sale, to whom they were sold, and the number of shares involved.

5. Was Frank Costello a stockholder, either directly or indirectly, in the predecessor company, Consolidated Television?

a. If so, give full details including the amount of stock owned, the date sold, and the purchaser.

6. If Meyer Lansky was a stockholder in either the Tele King Corp. or the Consolidated Television Co., please furnish complete information regarding the date he entered the company, the date he left, the number of shares involved, and from whom the stock was purchased as well as to whom it was sold and the amounts involved.

7. If Joe Adonis was at any time a stockholder in either of these companies, please furnish complete information regarding the date he entered the company, the date he left, the number of shares involved, from whom the stock was purchased, to whom it was sold, and the amount involved.

8. Who recommended that you apply for the position as assistant to the Director of Defense Mobilization?

9. Has Gen. Harry Vaughan ever been connected with the Tele King Corp., either as a stockholder or as an employee?

Yours sincerely,

JOHN J. WILLIAMS.

Mr. WILLIAMS. Mr. President, on June 5, 1953, I received a partial reply from Mr. Lamb, who stated at that time that questions numbered 2, 4, 5, 6, and 7, of my letter were being referred to the general counsel, Jerome Handler, Esq., from whom I would hear in the early future with reference to the questions.

I might say that those questions related to the connection of those racketeers with Mr. Pokrass or his company, as can be noted from the preceding letter.

Mr. President, I ask unanimous consent that the letter be printed in the RECORD at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

TELE KING CORP.,
New York, N. Y., June 5, 1953.

Senator JOHN J. WILLIAMS,
Senator from Delaware, United States Senate, Washington, D. C.

DEAR SENATOR WILLIAMS: Re your letter of May 28, inasmuch as I joined Tele King Corp. in September of 1949, having resigned the month previous as president of Rex Manufacturing Corp., 302 Fifth Avenue, New York, I had no prior contact, either directly or indirectly with Tele King and therefore, questions No. 2, 4, 5, 6, and 7, are being referred to our general counsel, Jerome Handler, Esq., from whom you will hear in the early future.

No. 1: Tele King Corp. was organized November 10, 1948 with a capitalization of 500 shares of no par value, and the stockholders were Louis I. Pokrass and H. Roy Penzell holding 30 shares each.

No. 3: The present capitalization of Tele King Corp. is 500,000 shares, par value of $1 each. The stockholders are:

	Shares
Louis I. Pokrass	164,660
Harvey L. Pokrass	67,670
Ina Pokrass Bell	67,670
Franklin Lamb	20,000
	320,000

Balance of the stock is in the treasury.

No. 8: No one recommended that I apply for the position as assistant to the Director of Defense Mobilization. This was my own idea.

No. 9: Gen. Harry Vaughan has certainly never been connected with Tele King either as a stockholder or an employee or on any other basis.

Very truly yours,

FRANKLIN LAMB.

Mr. WILLIAMS. Mr. President, under date of July 7, 1953, I received the letter from the attorneys, as promised by Mr. Lamb, and signed by Jerome Handler. I read the first paragraph from that letter:

DEAR SENATOR WILLIAMS: Based upon the corporate records and personal knowledge of certain of the facts, we will answer as best we can the questions set forth in your letter of May 28, 1953, sent to Mr. Franklin Lamb of the Tele King Corp. We will follow the numbers used by you in your letter. The data set forth in this letter is confidential, and for your information only, and is not to be published or otherwise disseminated by you without the written consent of ourselves or our client.

* * * * *

Very truly yours,

SCHUR, HANDLER & JAFFIN,
By JEROME HANDLER.

In the absence of the permission of the attorneys, I shall not incorporate the full letter in the RECORD at this point. Because the correspondence was received without any official status on my part, I do not feel at liberty to incorporate the entire letter in the RECORD. However, I close my remarks with the statement that if Mr. Lamb or his attorneys feel that the incorporation of the complete letter into the RECORD would in any way change the picture as it now stands I will upon their request ask that the full letter be placed in the RECORD.

SALE OF CERTAIN WAR-BUILT PASSENGER-CARGO VESSELS—CONFERENCE REPORT

Mr. BUTLER. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the joint resolution (H. J. Res. 534) to authorize the Secretary of Commerce to sell certain war-built passenger-cargo vessels, and for other purposes. I ask unanimous consent for the immediate consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The Chief Clerk read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the joint resolution (H. J. Res. 534) to authorize the Secretary of Commerce to sell certain war-built passenger-cargo vessels, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows: That the Senate recede from its amendment.

JOHN M. BUTLER,
CHARLES E. POTTER,
WARREN G. MAGNUSON,
Managers on the Part of the Senate.
THOR C. TOLLEFSON,
JOHN J. ALLEN, JR.,
JOHN H. RAY,
HEBERT C. BONNER,
JOHN F. SHELLEY,
Managers on the Part of the House.

Mr. KNOWLAND. Mr. President, will the Senator yield for a question?

Mr. BUTLER. I yield.

Mr. KNOWLAND. Is this the conference report we had up earlier, which the Senator has since discussed with the minority leader and the majority leader?

Mr. BUTLER. It is.

Mr. KNOWLAND. I have no objection.

Mr. BUTLER. Mr. President, I move that the Senate proceed to the consideration of the conference report.

The motion was agreed to; and the Senate proceeded to consider the conference report.

Mr. BUTLER. The Senate Conferees on House Joint Resolution 534 to authorize the sale of two war-built passenger-cargo vessels to the American President Lines, Ltd., have agreed unanimously to recede from the amendment proposed by the Senator from Delaware [Mr. WILLIAMS] during floor consideration of the bill, and acquiesced in by me as Chairman of the Water Transportation Subcommittee.

Following approval by the Senate of the amendment, there were submitted to our subcommittee by the General Accounting Office and the Maritime Administration statements not previously presented to us, to the effect that the point raised by the Senator from Delaware in his amendment had been considered thoroughly by those two responsible Government agencies in their negotiations preceding the drafting of the companion bills.

I ask unanimous consent that the letters from the General Accounting Office

and the Maritime Administration be made a part of the legislative record and be printed in the RECORD at the conclusion of my remarks.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington.

Hon. JOHN MARSHALL BUTLER,
Chairman, Subcommittee on Water Transportation, Interstate and Foreign Commerce Committee, United States Senate.

DEAR MR. CHAIRMAN: Pursuant to your request, I have had examined in this Office the amendment to House Joint Resolution 534, a bill to authorize the sale of the vessels *President Cleveland* and *President Wilson* which was proposed on the floor of the Senate on July 8, 1954, by Senator WILLIAMS and later adopted by the Senate.

If the sale of the vessels were to take place as of April 1, 1954, at a sales price of $6,500,000, it would seem that a necessary incident of such a sale would be a refund of the charter hire paid by American President Lines from April 1, 1954, to the date of enactment of House Joint Resolution 534. Since this charter hire represents 8½ percent per annum of the vessels' valuation of approximately $7,900,000, the Government would stand to lose more under such an arrangement than under the bill as it stood prior to amendment. The 8½ percent charter hire includes interest of 3½ percent on the Government's money right up to the date House Joint Resolution 534 is enacted.

It is believed that some confusion exists by reason of the fact that April 1, 1954, was used as a target date from which to compute depreciation in order to arrive at the final sales price. However, the deal, as contemplated by House Joint Resolution 534 in its original form, was for the sale of the vessels at a fixed price. The depreciation rate was used only to reduce the agreed figure of $6,500,000 on April 1, 1954, for the short period during which the bill was passing through the legislative process. It is not to be treated in the same way as the 5-percent portion of the charter hire representing depreciation which has been and is now being paid by American President Lines for the use of the vessels.

Accordingly, it is the view of this Office that the effect of the amendment is to charge twice for interest on the Government's investment in the ships from April 1, 1954, to the date of enactment of House Joint Resolution 534.

Sincerely yours,

———— ————,
Acting Comptroller General of the United States.

COMPTROLLER GENERAL OF
THE UNITED STATES,
Washington, D. C.

Hon. JOHN MARSHALL BUTLER,
Chairman, Subcommittee on Water Transportation, Interstate and Foreign Commerce Committee, United States Senate.

DEAR MR. CHAIRMAN: Pursuant to your request, I have had examined in this office the amendment to H. J. Res. 534, a bill to authorize the sale of the vessels *President Cleveland* and *President Wilson* which was proposed on the floor of the Senate on July 8, 1954, by Senator WILLIAMS and later adopted by the Senate.

If the sale of the vessels were to take place as of April 1, 1954, at a sales price of $6,500,000, it would seem that a necessary incident of such a sale would be a refund of the charter hire paid by American President Lines from April 1, 1954, to the date of enactment of House Joint Resolution 534. Since this charter hire represents 8½ percent per annum of the vessels' valuation of approximately $7,900,000, the Government would stand to lose more under such an arrangement than under the bill as it stood prior to amendment. The 8½-percent charter hire includes interest of 3½ percent on the Government's money right up to the date House Joint Resolution 534 is enacted.

It is believed that some confusion exists by reason of the fact that April 1, 1954, was used as a target date from which to compute depreciation in order to arrive at the final sales price. However, the deal, as contemplated by House Joint Resolution 534 in its original form, was for the sale of the vessels at a fixed price. The depreciation rate was used only to reduce the agreed figure of $6,500,000 on April 1, 1954, for the short period during which the bill was passing through the legislative process. It is not to be treated in the same way as the 5 percent portion of the charter hire representing depreciation which has been and is now being paid by American President Lines for the use of the vessels.

Accordingly, it is the view of this office that the effect of the amendment is to charge twice for interest on the Government's investment in the ships from April 1, 1954, to the date of enactment of House Joint Resolution 534.

Sincerely yours,

———— ————,
Acting Comptroller General of the United States.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

REVISION OF THE ATOMIC ENERGY ACT OF 1946

The Senate resumed the consideration of the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

Mr. LANGER. Mr. President——

The PRESIDING OFFICER (Mr. BARRETT in the chair). The Senator from North Dakota is recognized.

Mr. LANGER. I have a special interest in the controversy which is being debated today. During all of the years I have been a Member of the Senate, I have devoted a large part of my time and energy to the battle of securing low-cost electric power and energy for the farmers of my State, North Dakota. This has been no easy job. On all fronts the power monopolies have battled constantly to prevent the necessary appropriations to finance the construction of the dams on the Missouri River and the generating facilities which were necessary to make electric energy available at a cheap enough rate to enable the rural electric cooperatives to develop economically feasible projects.

It is so easy to forget today that when I started my battle in the Senate for the farmers of North Dakota, less than 1 farm in 16 enjoyed the blessing of electricity. The private electric power companies simply refused to extend service to the farms under terms which the farmer could afford to pay. If one had traveled up and down the roads of the farm communities of North Dakota as I have, he would have realized the drudgery and rigors which the farm wife had to endure before the rural electric cooperatives, financed by the Federal Government, made the use of electricity on the farms possible.

With the advent of the REA, the situation underwent a complete change. Today almost all of the farms are served with electricity. It is an enduring satisfaction to me to receive letters from farm families thanking me for my help in making life so much easier and more enjoyable for them. Likewise, the income of the farmers of North Dakota has been greatly increased by the use of this new hired hand, which can do so much faster and more efficiently, the multitude of laborious jobs which must be done every day on the farm.

Only after we succeeded in getting the appropriations for the dams on the Missouri River could we go ahead on a wide front with the REA program in my State. The farms are so apart, and the number of farms which can be served by one mile of line is so small—the density is only a little greater than one farm per mile—that the farmers found it impossible even to develop a non-profit cooperative distribution system on an economically feasible basis, at the wholesale rates for electricity which they were forced to pay the private electric utility companies. The Bureau of Reclamation now sells power to those cooperatives at considerably less than one-half the price they were forced to pay the private companies.

In my fight for the farmers of North Dakota, I soon learned that the farmers of the rest of the country were faced with the same problems which confronted my constituents in North Dakota. I was impressed by the fact that in the Tennessee Valley for years the REA cooperatives had been able to purchase electricity from the TVA at only a fraction of the cost our North Dakota farmers had to pay to the private companies.

Now the TVA is being threatened by the President's directive to the Atomic Energy Commission to enter into a deal with private utilities, the Dixon-Yates group, to take over a part of the public power load in Memphis, and on terms which may cost the Government from $90 million to $150 million more than if TVA carried the load. But, as I see it, the most harmful effect of the Dixon-Yates deal will be its ultimate effect on the REA cooperatives and, through them, on the farmers of the valley. Of course, the disastrous consequences will not be limited to the farmers of the Tennessee Valley. I call that fact to the attention of every Senator on the floor, no matter from what State the Senator may come. It is not merely a fight for the Tennessee Valley Authority, for once the TVA yardstick is destroyed, the rates of the cooperatives in States surrounding the Tennessee Valley will also be raised. Already in my State, in Bowman County, where an REA has been hampered by the Department of the Interior, the rates have been doubled, and farmers in that area who used to pay $24 a month for electricity suddenly found their bills had increased to almost $48 a month. They

were unable to pay such high rates, and, of course, had to disconnect their electricity and go back to the kerosene lamp.

Eventually most of the country, if not all, will be harmed by the loss of the yardstick. Not only does the Dixon-Yates deal contain possibilities of real harm to the farmers, but we were greatly upset because the new proposed Atomic Energy Act failed to protect the farmers and the rest of the consuming public. It appears to the senior Senator from North Dakota that the new bill turns all the benefits of this new source of power over to the monopolistic power trust, with no safeguards whatsoever for the farmers, the REA cooperatives, or the general public welfare; yet eventually the benefits of this source of power will enable it to dwarf the hydroelectric power capacity of the country.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator from North Dakota yield to me?

Mr. LANGER. I yield.

Mr. JOHNSTON of South Carolina. I wish to compliment the Senator from North Dakota for the statement he is making. At this time I should like to read into the record a few figures showing how the States benefit when the TVA yardstick can be used.

Mr. LANGER. I gladly yield for that purpose.

Mr. JOHNSTON of South Carolina. These are the average charges for hydroelectric power purchased by rural-electric cooperatives; 4.8 mills in Tennessee, where the Tennessee Valley Authority is the only source of supply; 5.3 mills in Mississippi, close by, where the TVA yardstick is being used; 5.8 mills in Alabama; 6.4 mills in Georgia; 7.1 mills in South Carolina.

Across the Mississippi River, in the neighboring States of the Southwest, we find that the average charges for electricity sold to rural-electric cooperatives amount to 5.5 mills in Louisiana; 6 mills in Arkansas, 5.8 mills in Texas; and 6 mills in Oklahoma.

Moving to the North, which is said to be so far advanced, we find that, on the average, the cooperatives are paying 15.4 mills in Maine; 12.3 mills in New Hampshire; 12.3 mills in Vermont; 11.2 mills in the great State of New York; 10.5 mills in Pennsylvania, or twice as much as the rate in the vicinity of the TVA, where the power companies are furnishing the power; 12.8 mills in Michigan; 13.7 mills in Wisconsin; 12.6 mills in Iowa; 14 mills in Minnesota; 11.2 mills in North Dakota; and 11.7 mills in South Dakota. All those States are far away from the TVA yardstick.

Let me say that I am glad the Senator from North Dakota is making his speech at this time, in the effort to keep the TVA from being done away with in an underhanded manner. So I thank the Senator from North Dakota for yielding to me at this time. I am vitally interested in this matter, for I do not want the rates in my State to be doubled.

Mr. LANGER. Mr. President, it is always a pleasure to yield to the junior Senator from South Carolina, whose entire record in the Senate has been one in behalf of the small consumers, the laboring men, and the small farmers. His record here is very natural in view of his experience, for when he was 11 years old he supported an entire family by working in a mill. His record in the Senate is proof that the efforts he made in his youth have had their effect and have gained for him the confidence of the people of South Carolina, and, I may add, the confidence of the entire Nation. The people of South Carolina recognized his great ability and made him their Governor. So I am always glad to yield to the distinguished Senator from South Carolina.

Mr. President, let me say that the pending bill should be most carefully considered by every Senator; and I care not whether it takes 5 days, 10 days, or 5 months to give the bill the adequate consideration it requires. The people of the United States should be aware of what this crowd is trying to put over on the floor of the Senate.

Mr. President, as I began to say a moment ago, it appears to me that the pending bill turns all the benefits of this new source of power over to the monopolistic Power Trust, with no safeguards whatsoever for the farmers, the REA cooperatives, or the general public, including labor, the small municipalities, and the rank and file of people everywhere in the Nation.

I am very glad the distinguished Senator from South Carolina submitted the figures on the rates in various States, thus showing what is taken out of the pockets of the poor people, because, being in the majority, in the last analysis they are the ones who pay. I do not care whether one refers to taxes or to rates; in any event, every Senator knows that, in the last analysis, the poor people are the ones who pay.

Mr. President, this new development should be a great blessing for mankind. It was made at a cost of billions of dollars of the taxpayers' money, but it is being shamefully handed over to a greedy few. This is the biggest giveaway yet. I plead with my colleagues to support the necessary amendments to give some degree of protection to the public, and to the REA cooperatives, in particular.

Another reason for my special interest in this matter arises from my being chairman of the Subcommittee on Antitrust and Monopoly, of the Committee on the Judiciary. We have held some hearings on the monopoly features of the Dixon-Yates proposal. We plan to hold more hearings to go to the bottom of this matter. Although, of course, we shall not be in a position to decide whether the anti-monopoly laws of the country have been violated, until after all the evidence is in, we have heard enough to cause us great concern. The engineering firm which was employed by a syndicate which attempted to submit a bid withdrew as engineer, after the bid was publicized. The head of the syndicate, Mr. Von Tresckow, testified before my committee that the president of the engineering firm told him the firm withdrew because of the pressure brought to bear upon it by its utility clients.

Of course, Mr. President, when a project is built for the Government, the customary procedure is to advertise for bids, and to accept the lowest responsible bid. That applies whether the project is to be constructed in a city, in a town, or in a village. After all, in handling the taxpayers' money, the general rule is to award the contract to the lowest responsible bidder who will do the work well. However, in this case, when a syndicate tried to bid to help do the job, the engineering firm which was employed by the syndicate, which attempted to submit a bid, withdrew after the bid was publicized. Incidentally, this was not a case in which a fly-by-night engineer was employed. On the contrary, one of the outstanding engineering firms in America was used.

The president of the engineering firm wrote a most interesting letter which was entered in the record of our hearings. I should like to read the letter to the Senate:

DEAR MR. VON TRESCKOW: In our original discussion we had no knowledge of the fact that any private utilities were interested in the construction and operation of a generating station in the Tennessee Valley area for the Atomic Energy Commission.

It now develops that unauthorized use of our name has been made in connection with a proposal to the Atomic Energy Commission counter to one submitted by Middle South Utilities and the southern companies.

On April 28 we pointed out to you that Gibbs & Hill, Inc., could not afford to have its name linked with any endeavor contrary to the interests of any privately owned public utilities in this country.

The use of our name has come to the attention of Mr. Dixon—

Of Dixon-Yates—

president of Middle South Utilities, and through him to Mr. England, president of Atlantic City Electric, one of our clients, and to a number of electrical equipment and boiler manufacturers. One of the subsidiaries of Middle South Utilities is the New Orleans Public Service Co., with whom we have been endeavoring to negotiate an agreement for the design and/or construction supervision of their new station.

In view of the foregoing, it would seem necessary to have statements issued in such newspapers, as Gibbs & Hill's name has been mentioned in connection with this project, to this effect: That we will not participate in any activity detrimental to the privately owned public-utility industry in the country.

Any personal names or company names used above are confidential and have been mentioned for the sole purpose of adequately presenting Gibbs & Hill's position.

Yours very truly,

DAVID B. SLOAN.

I may say that I had the great satisfaction, as chairman of the subcommittee, to have Mr. Sloan under oath before the subcommittee to find out why he wrote that letter. The testimony is most interesting. Undoubtedly it has already been placed in the RECORD, or will be placed in the RECORD.

The testimony of the representatives of the Von Tresckow group before our committee also indicated they had received a brushoff from the AEC, although the Dixon-Yates people always received a royal welcome and assistance from AEC, the Budget Bureau, and the Federal Power Commission representatives.

It is interesting to note that only this morning I received a telegram, which I

wish to read in full. I ask Senators to remember this telegram as I continue with my remarks, when I deal with finances. The telegram is dated July 19, 1954, and reads as follows:

NEW YORK, N. Y., *July 19, 1954.*

Senator WILLIAM LANGER,
Senate Office Building,
Washington, D. C.:

We, the undersigned, have made an offer to finance, design, build, and operate a steam generating station at Fulton, Tenn., to supply the power needs of the TVA in the Memphis area. The cost of this power is to be 3½ mills per kilowatt-hour or less. This is practically at the same rate as power produced by the TVA. Our offer will cost the Government between $90 million and $150 million less than any alternative proposal you have for consideration. We are repeating this offer, made to TVA and other governmental agencies concerned, to you and to every other Senator and Representative. We are now adding to this offer as follows:

"We will build steam generating stations on the same basis wherever they are needed in the TVA area. Power from these generating stations will also be available to the private utility companies in the adjacent territory at the same rates as TVA."

We repectfully ask that you interest yourself in the consideration of this offer by the proper Government agency, for the following reasons:

It is best for the Government, because: It saves $90 to $150 millions. It eliminates the need for the AEC to make a power contract to supply the needs of TVA it takes the AEC out of the power business. It eliminates need for further Government appropriations for the construction of TVA generating stations.

It is best for TVA, because the Authority can continue to make its own power contracts for its own needs. It enables the TVA to supply all the power the AEC needs at the cheapest price. The Authority retains its ability to meet the growing needs of its own customers. The cost of power remains the same to its present customers. The great benefits, brought by TVA to the area it serves in seven States, are maintained through private money and private initiative.

It is best for the private utility companies in the territory adjacent to TVA, because it enables them for the first time to obtain power at TVA rates and to compete with TVA on a price basis.

It is best for the consumer, because his monthly bill for electricity in the TVA area remains the same and will be substantially less than he is paying now in the adjacent territory.

It is best for the country, because it spreads the benefits of low-cost power over a vastly greater territory to a larger number of people.

Respectfully yours,

Walter von Tresckow, for Walter von Tresckow, New York City; Burns & McDonnell Engineering Co., Kansas City, Mo.; Salomon Bros. & Hutzler Investment Bankers, New York City; Long Construction Co., Kansas City, Mo.; Robert W. Larrow, Burlington, Vt.; Harvey Weeks, New York City; George H. Schwartz, Zelig R. Nathanson, Schwartz, Nathanson, I. Cohen, New York City; John N. Mitchell, Caldwell, Marshall, Trimble & Mitchell, New York City.

Mr. President, those who signed the telegram are outstanding financiers, lawyers, brokers, and engineers. They renewed the offer they had previously made. They testified before our committee. How in the name of heaven any Senator can possibly vote to have the Dixon-Yates proposal go through, at an additional cost to the Government of between $90 million and $150 million is beyond the comprehension of the senior Senator from North Dakota.

The following intraoffice memorandum, written by a member of the engineering firm's staff which was entered into the record of our hearings is most illuminating:

Yesterday Mr. Waite, of the Federal Power Commission office in New York, called to inquire whether the publicity released in Memphis by the law firm of Burch, Porter, and Johnson had been retracted. Not knowing the situation I told him I was under the impression that a retraction was in process and suggested that you, E. H. A. or J. B. S. would give him the details. In the meantime, however, I found in the file a clipping from the Memphis paper, the Commercial Appeal of May 7, as well as a copy of your letter to the McGraw Hill Publishing Co. on the same subject which I told Mr. Waite about in a subsequent phone call. He seemed to be obviously pleased and relieved that the retraction was an accomplished fact, and stated that he had been requested to ascertain exactly this by the main office of the Commission in Washington.

B. D. J.

Why should the Federal Power Commission be obviously pleased and relieved that the engineering firm had withdrawn from representation of a possible competitor of Dixon-Yates? What has been the true role the FPC has played in this?

Mr. GORE. Mr. President, will the Senator from North Dakota yield?

Mr. LANGER. I am delighted to yield to the Senator from Tennessee.

Mr. GORE. The able Senator referred to the Von Tresckow group as a possible competitor. I wish to point out to the Senator that under the data sheet and specifications submitted and prepared by the Atomic Energy Commission for those who wanted to submit so-called competing proposals, only one group could qualify as a genuine competitor. I never at any time could understand how the Von Tresckow group could compete on the basis of the requirements of the Atomic Energy Commission. The power requirements which the Von Tresckow group could not meet was that the party submitting a proposal must have a dependable back-up of power. Who had a dependable back-up of 600,000 kilowatts of power except the utility operating in that area?

Another requirement was that it could use the extra electricity, if not needed by AEC, for their own use. Who could meet that requirement except the operating utility in the area?

That is why I have said repeatedly that there was no room for competition. There was only one concern that could meet the requirements. This deal was tailor made for one concern, and one concern only. Not only was it given an exclusive contract, but it was guaranteed profits and given tax immunity.

Mr. LANGER. The Senator is stating the exact truth as it appears from the sworn testimony given before our committee. That is exactly the situation.

Mr. GORE. Mr. President, will the Senator yield further?

Mr. LANGER. I yield further.

Mr. GORE. I have never thought the Von Tresckow group or any other private group should build this plant to supply this need unless it could do so as economically as TVA could. Not even the Von Tresckow group believes it can do that. However, from the additional offer which the Senator has read, surely if the TVA is to be denied the privilege of building a plant to supply its own needs, and if private enterprise is to be depended upon to supply the power, we ought to have genuine competition. What is wrong with the competitive system? Why do those who plead against the TVA in the name of private enterprise want no part of it, but instead want an exclusive contract on which no one except a particular group can bid successfully?

Mr. LANGER. That is exactly right.

Mr. CARLSON. Mr. President, will the Senator yield?

Mr. LANGER. I yield.

Mr. CARLSON. As I heard the telegram read by the distinguished Senator from North Dakota, it seemed to me that the offer was to furnish electricity cheaper than TVA could furnish it.

Mr. LANGER. At the same rate.

Mr. CARLSON. At the same rate. In other words, if private industry can compete with TVA, it should be given the opportunity to do so.

Mr. LANGER. That is right.

Mr. GORE. Mr. President, will the Senator yield?

Mr. LANGER. I yield to the Senator from Tennessee.

Mr. GORE. I took that position with respect to the supplying of power to the Atomic Energy Commission plant at Paducah. If private enterprise can supply the Atomic Energy Commission's needs at Paducah as reasonably as can the TVA, my position is already taken, and that is how I voted.

Mr. LANGER. The telegram refers to furnishing power at 3½ mills to the private companies, and they can use it where they want to.

Mr. GORE. Mr. President, I should like to point out to my distinguished friend from Kansas [Mr. CARLSON] that the Atomic Energy Commission has been ordered not to consider the proposal to which reference has been made, not to consider contracts which other people may submit, but it is ordered to negotiate a contract with one concern only, and it is ordered to see that certain provisions shall be in the contract, one of which is complete reimbursement of all taxes.

Mr. CARLSON. Mr. President, will the Senator from North Dakota yield?

Mr. LANGER. I yield.

Mr. CARLSON. If I understand correctly, the taxpayers of the United States have poured $1,800,000,000 into the Tennessee Valley Authority. We now have a private corporation saying it will furnish electricity at the same rate. We do not have any Federal money to expend there at this time. We have to borrow every dollar we use.

Mr. GORE. Mr. President, will the Senator from North Dakota yield?

Mr. LANGER. I yield.

Mr. GORE. The order precludes consideration of the Von Tresckow offer.

The order is to negotiate a contract with Dixon-Yates. The AEC is told to negotiate what kind of a contract, Mr. President? A contract guaranteeing a profit with complete tax reimbursement. It is a "sugar" deal.

Mr. LANGER. Mr. President, there are several unexplained features in the Dixon-Yates situation which cast a very dark shadow over the protestations of innocence of its proponents. First, I have yet to hear a satisfactory explanation of why the Tennessee Valley Authority was not instructed by the President to enter into this contract, rather than the Atomic Energy Commission. Why, Mr. President? The people of the United States are going to ask why a thousand times. Was it Bobby Jones? After all, Mr. President, no one can dispute the fact that the Atomic Energy Commission performs no real function along this line. Private utilities will construct the plant and generate power. The power will go into the TVA transmission lines and, indeed, will be contracted for by TVA. What function, in the name of heaven, what possible function, does the Atomic Energy Commission have in connection with this matter? Will some Senator answer that, if he can? I will yield to him to permit him to answer, if he can.

Mr. President, the Atomic Energy Commission is simply a middleman, a broker. It has no real function in this set-up. Can it be that this complicated arrangement has been established to confuse the situation and to take the focus away from the fear of the administration that TVA itself really has no legal right to enter into arrangements with private utilities? Certainly, Mr. President, although there has been much talk about it, we do not know how the construction of the plant at West Memphis is to be financed. We only know that it will cost approximately $100 million. Unless the Government estimates are incorrect, the Dixon-Yates group will put up only approximately $5 million. They are going to finance it at great cost to the Government. Over the life of the contract the cost may be $3½ million a year greater than it would be if TVA furnished the power. No Senator upon this floor—I challenge him to tell us—has told us how the Dixon-Yates group plan to finance this project and raise the rest of the money necessary for its completion.

So far as we know, neither the Director of the Bureau of the Budget, Mr. Hughes, nor the Atomic Energy Commission, has inquired into this. It is a startling fact indeed. Surely, one would think that the Government, embarking on a project of such vast dimensions, would want to know who was going to put up the money and from where the money would come. If the money is to come from the sale of bonds or of stocks, the Government ought to know what investment banking firms will underwrite the issue, what terms they have procured, on what basis such an issue will be offered to the public, and, generally, whether or not the Dixon-Yates group have substantial and definitive agreements with underwriting houses to assure the Government that they really will raise the necessary capital.

Mr. President, I say, solemnly, that I cannot recall a single instance during the many years I have spent in the Government service, of a large contract being made by the Government without its finding out in advance who is going to put up the money and on what terms.

The mystery is a deep one. Can it be that the Government has not asked about this? Or, if the Government has asked about it, why does it not make the information public? Is something being concealed from us? If so, what is being concealed, and why?

Mr. President, these are serious questions, and we have had no answer to them. That fact alone should preclude any Senator from lending his voice to hasty and ill-considered approval of this proposition.

Mr. President, the Subcommittee on Anti-Monopoly wrote a letter to the Atomic Energy Commission and asked them to hold up this contract until the hearings were concluded. So far, we have not received a response, except an acknowledgment of the letter.

Mr. President, the action of the executive department in this case smacks so much of other actions on its part in two other areas of the country which have been investigated by my committee, that it seems obvious it is a part of a general pattern which seems to exist in the administration's relations with power companies and REA cooperatives.

The first such matter involved the Missouri Basin criteria issued by the Department of the Interior. The second related to the treatment of REA cooperatives in the Southwest by the same Department of the Interior. I shall not take up the time of the Senate to go into those details, but I ask my colleagues to read the records of the hearings to see what this administration is doing to REA cooperatives in other parts of the country.

Mr. President, the administration is acting in violation of the promises made by Dwight Eisenhower, when he was a candidate, speaking at Kasson, Minn.; in South Dakota; and, on October 4, 1952, at Fargo, N. Dak. It was at Fargo that he specifically pledged that, if he was elected President, he would do all he possibly could do to extend the REA, and to help the REA. The farmers were led to believe that he was a friend of the REA and a friend of the housewife.

Today there are 3 million farmers in the Southwest who are trying to get REA, but who must get along with kerosene lamps, while the Department of the Interior is doing all it can to harass those people.

While, as I have said, I have not prejudged the monopoly features of this transaction, let me say what I think of the proposed Dixon-Yates deal. It follows the same pattern of trying to destroy the public power and cooperative power institutions of the country which I have just been talking about. The administration does not even have the honesty to say that is what they are trying to do.

I do not mind having a man disagree with me. I have had many disagreements with good friends. I am willing to go before the public at any time, on any issue, and to let the people decide. But I have no use for a man who does one thing, and tries to tell the people that he is doing something else—and that is exactly what this administration has been doing in the power field ever since it came into office. If any Senator wishes to debate that question upon the floor, I will debate it with him.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. LANGER. I yield to the Senator from Oregon.

Mr. MORSE. I do not wish to debate it; I merely wish to associate myself with the Senator's remarks, and to say that he has spoken the absolute truth with respect to the sorry record of this administration.

Mr. LANGER. I thank the Senator from Oregon.

Here is a quotation from a statement made by Secretary of the Interior McKay this week in Portland, Oreg. Speaking about the Dixon-Yates deal, the Secretary said:

> The power needed by the Atomic Energy Commission can be obtained more cheaply from private utilities than by TVA construction of steam plants—and the private utilities pay taxes, too.

Mr. President, what do you think of a Secretary of the Interior who can issue statements to the press which contain such misinformation, such plain misstatements of fact? Everyone knows that it will cost the AEC a considerably greater sum of money under the Dixon-Yates deal than if TVA were allowed to construct the Fulton plant. That is the sworn testimony, and the Secretary of the Interior knows it. And it will cost a lot more money without taxes. The only question is, Will it cost $3,500,000 more a year, $5,500,000 more a year, or even more than that? Everybody knows it will cost more; everybody admits it; everybody, that is, except Secretary of the Interior McKay. He tells the people that the Dixon-Yates deal is a good one because it means cheap power.

Listen to what he says about taxes:

> And the private utilities pay taxes, too.

Remember, he is discussing the Dixon-Yates deal, and in that deal the Government will have to pay all of the taxes for Dixon-Yates, in addition to giving them their profit. I am becoming sick and tired of governmental officials, such as this man McKay, who continuously tries to mislead the public. I am becoming sick and tired of officials who draw pay from the people, and then use their talents and energy to mislead and deceive the people. I say, here on the floor, that we shall have an opportunity to help put a stop to it.

But, Mr. President, I do not want to be too hard on the Secretary of the Interior, Mr. McKay. After all, he is only a hired man. After all, he has to take his orders from the boss—the President. That is where the responsibility lies. It is with the President.

It was the President who was looking for votes, as I said a few minutes ago, throughout the western area. It was the President, not Mr. McKay, who promised

the people that the integrity of the TVA would be respected, and that he would do what he could to help in the expansion of REA. It was Dwight Eisenhower, not Douglas McKay, who made those promises.

It was the President who promised honesty in Government. It was the President who promised a businesslike administration.

Mr. President, what has happened to the integrity of the TVA? What has happened to the businesslike administration of our Government?

Here is a deal which eventually will destroy the TVA, if we do not stop it. Here is a case in which a member of the President's Cabinet, chosen by the President, and responsible to him, deliberately tries to mislead the people as to the facts. Here is a case in which an attempt is being made to give away—yes, I mean exactly that—to give away millions of dollars of the taxpayers' money for the benefit of the power monopolies. It is an attempt to take money out of the pockets of poor people, or of rich people—of the taxpayers—and to turn it over into the pockets of private monopoly.

What about the power monopoly in this case? What about the Public Utility Holding Company Act? Has that been repealed? Is this administration now going to try to extend the power monopoly of the Power Trust, instead of restricting it and keeping it within its proper bounds, as provided for in the Public Utility Holding Company Act? Is the Government going to try to expand the established territory of the Dixon-Yates monopoly power group into Tennessee?

Mr. President, this is not a case of turning the clock back; it is a case of throwing the clock out the window.

I think that it is about time that Congress paid more attention to what the monopolies, especially the power monopoly, are doing. As I see it, they are trying as quickly as possible to take over all the power facilities of the Government. They do not want any more yardsticks like TVA, because even though they are making more money under that yardstick than they ever made before, they are not satisfied. They want to destroy the TVA yardstick and every other public power yardstick, so that they can make even greater profits at the expense of the people. I do not think that Congress will let them do that. I intend to do everything I can to keep the power monopoly within its proper bounds and not let it gobble up the entire power supply of the country.

Mr. President, I want to remind my colleagues that when we are dealing with the power trust, we are dealing with a monopoly, a monopolistic group, and not a free enterprise group. Every once in a while some of the defenders of private monopoly talk about free enterprise—oh, free enterprise. It is almost as sacred to some as the Bible. In this case we are dealing with a power trust, with a monopoly group, not with a free enterprise group.

Mr. MORSE. Mr. President, will the Senator yield for a few questions?

Mr. LANGER. I yield to the Senator from Oregon.

Mr. MORSE. Am I correct in my understanding that one of the points of criticism of the Senator from North Dakota against the bill is that there is nothing in the bill that protects the public in regard to the sale and distribution of power once this monopolistic power group is allowed to get an economic stranglehold on the atomic energy program?

Mr. LANGER. There is not a word, not a syllable, not a sentence, not a paragraph in the entire bill which protects the common man or the common people, as the Senator from Oregon very well knows. He is a very able lawyer and has read the bill.

Mr. MORSE. Will the Senator yield further?

Mr. LANGER. I yield.

Mr. MORSE. What does the Senator from North Dakota think would have been the position of the great George Norris, of the great senior La Follette, or, for that matter, the junior La Follette, or of Ladd, Couzens, or Johnson of California, the statesmen in the history of the Senate of the United States who, along with others, fought for the passage of a Federal power policy which would guarantee to all the people the protection of a preference clause?

Mr. LANGER. The distinguished Senator from Oregon knows as well as I that if the pending bill is enacted into law there will be no provision made for the preference clause, and that the men referred to, who are now in their graves, would be betrayed, but not by those of us in the Senate who are trying to carry the torch, headed by such men as the distinguished Senator from Oregon himself. It is our sacred duty to carry on that fight, regardless of the odds, regardless of who may be Secretary of the Interior, regardless of who may be President. Under our oaths, we owe that duty to the people of the country.

Mr. MORSE. Will the Senator yield further?

Mr. LANGER. I yield.

Mr. MORSE. I wish my record in the Senate in the field of fighting for the public interest and public power could begin to approach the great record the Senator from North Dakota has made during his many years of service in the Senate. He stood steadfast in the Senate when some of the great men to whom I referred really fought the battle in regard to the public-power yardstick.

My next question is this: Is the Senator aware of the fact that one of the gimmicks, one of the sleepers, and one of the betrayals of the public interest in the bill is that it provides that the Federal Government shall lease to the private utilities the uranium process, and buy back the plutonium ash, with the result that, in all probability, the private utilities will get the whole thing for nothing, in that the Government will pay more for the plutonium ash and for the so-called defense plant than the private utilities will pay for the leasehold interest? In addition, there is no reservation of the right of the Federal Government to build a reactor for the purpose of selling and distributing the electric power accumulated by the process. Is the Senator from North Dakota aware of that fact?

Mr. LANGER. Of course the Senator from North Dakota is aware of that fact. He has listened to various addresses on the subject, among them that of the Senator from Oregon, and has read the report on the bill. What the Senator states is all the more reason why we should try to get the matter squarely before the people of the country so that they, too, may understand. They do not get from the press all the information they should have, as the distinguished Senator from Oregon very well knows. If this fight is kept up, regardless of consequences, sooner or later the people will get to know the issue involved and understand it, and they will get to know and understand the issue through the leadership of such distinguished statesmen as the junior Senator from Oregon.

Mr. MORSE. Will the Senator yield further to me?

Mr. LANGER. I yield.

Mr. MORSE. Does the Senator from North Dakota agree with me that it is of great importance to emphasize in the debate that, under the provisions of the bill, the Government will turn over to a private-utility monopoly the complete authority and the complete power to build necessary reactors for the development of electric power, and that the bill seeks to prevent the Federal Government from building reactors for the purpose of selling electric power?

Mr. LANGER. The Senator from North Dakota agrees, and I should like to call particular attention to the fact that the proposal is for a 25-year contract. What difference will it possibly make whom we elect to be President 2 years from now, or 6 or 10 years from now? If a 25-year contract is signed, it will last for 25 years, if the contract proves to be legal, and if it is sustained by the Supreme Court. In the meantime, the people will be absolutely hamstrung.

Mr. MORSE. Will the Senator yield further?

Mr. LANGER. I yield.

Mr. MORSE. Does the Senator agree with me that if heretofore there had been followed the same principle the bill enunciates, there would not have been passed the power policy act which authorized the Federal Government to build great multipurpose dams, self-paying, self-liquidating in nature, from which could be generated power which now serves millions of consumers in the Tennessee Valley and the Pacific Northwest, but that the people of those areas would have had to pay tribute to the private utilities for obtaining power which they now get at cheap rates as a result of the exercise of the public power yardstick? Does the Senator agree with that statement?

Mr. LANGER. Certainly I agree. If the present administration had its way, it would do away with all public-power projects.

Mr. MORSE. A few days ago we heard a Republican spokesman suggest that TVA is a communistic plot in America, and it has been stated that we ought to turn TVA over to the private utility monopolies. That is one reason why it

is well for us to hold the floor of the Senate these days long enough to awaken the American people from their lethargy and inform them of what this administration is doing by way of giving away the heritage of future generations of American boys and girls in the natural resources of the country.

Mr. LANGER. I agree fully with the distinguished Senator from Oregon.

Mr. MORSE. Does the Senator agree with me that it is very important that we warn the American people, before a vote is taken on the bill, of the tax giveaway in the bill, and let them know how cleverly it is worded and that the result will be that the private utilities which will build the reactors will, to all intents and purposes, stand tax-exempt, because the Government will take over the tax burden under the kind of terms the President of the United States proposes in the contract with the private monopoly combine?

Mr. LANGER. Certainly that states the situation as simply as it can be stated.

Mr. MORSE. Will the Senator yield further?

Mr. LANGER. I yield.

Mr. MORSE. Does the Senator agree with me that probably as adequate a phrase as any to describe what the administration is up to in the bill is that it is proposing to sell the American people into monopolistic economic bondage, forcing them to pay tribute to monopoly for years to come for the electric power which will be produced by atomic energy plants?

Mr. LANGER. That is correct; except I would say the administration is selling the consumer down the river.

Mr. MORSE. Let me say good naturedly that I am glad to hear another Republican dare stand on the floor of the Senate and forewarn the American people what this ex-Republican forewarned them about a good many months past, because it was as clear as the nose on one's face what would happen if we did not stop the administration's giveaway program.

Does the Senator from North Dakota agree with me that we must eliminate the monopolistic features of the bill and we must insist that there be written into it amendments to provide for the following, as a minimum, to wit: First, a public-preference clause; second, jurisdiction on the part of the Federal Government to build its own reactors, so power can be sold to the American people from the Government's own reactors in competition—by way of a public-power yardstick—with private monopoly; third, elimination of any tax-benefit features which will accrue to private monopolies if the bill in its present form is enacted; and, fourth, that the so-called private-utility reactors be so distributed in the United States that no monopoly for power development can be obtained by a monopolistic combine over the economy of any large segment of the country? Does the Senator from North Dakota agree with me that unless those safeguards and guaranties are written into the bill, it would be better that no bill at all be passed?

Mr. LANGER. That is entirely correct; and I am going to support every one of those amendments, if they are submitted on this floor.

Mr. MORSE. They will be submitted, as the Senator from North Dakota knows, plus many more.

Mr. LANGER. They are most vital.

Mr. MORSE. In referring to those amendments, we outline some of the great dangers and some of the most vicious principles that are incorporated in the bill. In order to eliminate them, we must adopt amendments along the line of the four principles I have just suggested.

Last of all, let me ask the Senator from North Dakota whether he agrees with me that we really are discussing on the floor of the Senate, insofar as domestic legislation in the field of natural resources is concerned, one of the issues that must be taken to the platforms of the country between now and election day in November, in order to make clear to the American people why some of us insist that at the election boxes we must place a check upon the Eisenhower administration in the field of natural resources, as well as in other fields?

Mr. LANGER. I concur fully and completely in that statement. I sincerely hope the distinguished Senator from Oregon may be given good health, so that he can be in the very forefront of that fight. It would be a terrific loss to the people of the United States if, during the coming months, something should happen to the distinguished Senator from Oregon, either by illness or some other untoward event, so that he would be unable to keep up his fight for the rank and file of the people of the country.

Mr. MORSE. I appreciate the interest of the Senator from North Dakota, but let me say to him that in all my life I was never in better fighting shape than I am in now; and in the campaign we will take the fight to President Eisenhower, because in a recent press conference he laid down the issue, when he said he was willing to take his legislative record to the people in the coming campaign. I am ready to meet him on that issue, because on that issue he does not deserve a Republican majority in the Congress, as a result of the November 1954 election.

Mr. LANGER. Mr. President, I wish to continue with my remarks. Once more I desire to remind every Member of the Senate that when we are dealing with the power trusts, we are dealing with a monopoly group, not a free enterprise group. It has been pointed out over and over again that private electric utilities are not part of the free-enterprise system. They are protected monopolies. They are kept free of competition; and anyone in their area who wants electricity must buy it from them, and must pay their rates. If their costs go up, legally or otherwise, they get an increase in their rates. Why, Mr. President, even the salaries of the various lobbyists they hire to do their work in Washington are included in the costs which are paid by the taxpayers. One of those lobbyists is paid $65,000; and all those costs are added to the rates for electricity, and are paid by the people who use it. All those costs are placed upon the backs of the taxpayers.

Protected as they are, and with electricity as important to modern life as it is, these monopolies have practically a guaranteed profit. They are not free enterprise, and they are not entitled to use the arguments of free enterprise in their favor. Let us remember, and never forget, that they are protected monopolies completely outside of our system of free enterprise.

Mr. President, this is not the case of a farmer who takes his chances with drought, heat, chinch bugs, and all the other problems the farmer has to meet. This is not the case of a miner who, because of a drop in the price of zinc or lead, may lose his job. This is not the case of a small-business man who takes his chance of surviving in the struggle for existence. These monopolies are protected, and they are guaranteed a profit. They are not a part of the free enterprise system we hear so much about. Let us never forget that they are a protected monopoly, completely outside our system of free enterprise.

I wonder how many of us have given really serious thought to what the President has done in this case, quite aside from the power issue, as such. He has put probably the most important agency in the Government, the Atomic Energy Commission, right in the middle of the most controversial of all matters, namely the power issue. He has made the Commission an instrument in the fight of the power trust against the public power and cooperative power institutions of this country. This is one of the rottenest aspects of this whole proposition. The Atomic Energy Commission should never be made a controversial agency. It has too much important work to do. It must not be put in a position where it is bound to lose the respect and trust of a large percentage of the people. Let it stick solely to matters of atomic energy, and keep out of the attempt to scuttle public power.

Mr. President, can you not see the harm that will be done if this deal goes through? In that event, can we expect the people in the Tennessee valley to have any faith in the Atomic Energy Commission? Can we expect them to believe that the Atomic Energy Commission has the people's interests at heart, and will administer atomic energy for the greatest good of the people? Outside of the Tennessee Valley, the countless millions of our citizens need these public power installations, need these rural electric cooperatives, and believe that power is a natural resource, and should, wherever possible, be used for the greatest benefit of the people, instead of for the greatest profit for the power trust. Can these people any longer have faith or trust in the Atomic Energy Commission? I tell you, Mr. President, if this deal goes through, the President will have destroyed the Atomic Energy Commission as an effective instrument for administering the atomic energy problems of the country. At

some future date—and not too far in the future—he will have to scrap the AEC and establish a new body, because the people will have lost their faith in the AEC.

Do we dare permit this to happen in this critical moment of the world's history? Can we let the President destroy the effectiveness and integrity of one of the most important agencies in our Government?

Where will this process stop? If we let the President destroy the statutory powers of AEC, if we let him remove all of their discretion and substitute his own orders in place of their considered opinions, how can we object if he later tells the Federal Power Commission how to decide the big disputes before it? Or the Federal Communications Commission, or the Federal Trade Commission or the Interstate Commerce Commission, or any other independent agency of the Government? If we let this disgraceful deal go through, we shall have set a precedent which can destroy the entire structure of our executive branch.

This is one of the most disgraceful deals I have yet encountered in all my service in government. What makes it even more disgraceful is the fact that it comes straight from the White House. The President himself has ordered this deal. I say that it is high time that this body stepped in to stop the President from making this deal.

The bill before us today would make possible more Dixon-Yates deals in the future. It will take us further along the road to the destruction of public power in this country. As was stated so eloquently a few moments ago by the distinguished Senator from Oregon [Mr. MORSE], it would make possible the ultimate and complete sellout of the power resources of this Nation to private interests so that public power can be exploited for selfish and swollen profits.

I am against this bill. I am against it because it contains no preference provisions for cooperative and public power groups. I am against it because it contains no antimonopoly provisions. I am against it because it favors large corporations at the expense of small business. I am against it because it surrenders the public interest, and the rights of farmers, laborers, and consumers to the selfish interests of big business. I am against it because it violates the right of the people to control the natural resources of this county; and that includes power and electrical energy.

Mr. President, this is bad, rotten legislation; and for the reasons I have stated, I shall vote against the bill, and I urge my colleagues to do likewise.

I expect within a short time to deliver another speech on this floor on this subject, before we are called upon to vote on perhaps the most important piece of domestic legislation we shall be called upon to consider at this session.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Aiken	Gore	Martin
Barrett	Green	Murray
Bricker	Hayden	Neely
Burke	Hendrickson	Payne
Bush	Hickenlooper	Russell
Butler	Hill	Saltonstall
Carlson	Holland	Schoeppel
Cordon	Jenner	Stennis
Crippa	Johnson, Tex.	Thye
Dworshak	Johnston, S. C.	Upton
Ervin	Knowland	Welker
Ferguson	Kuchel	Wiley
Flanders	Langer	Williams
Fulbright	Lennon	Young
Goldwater	Mansfield	

The PRESIDING OFFICER (Mr. PAYNE in the chair). A quorum is not present.

Mr. MARTIN. I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

The motion was agreed to.

The PRESIDING OFFICER. The Sergeant at Arms will execute the order of the Senate.

After a little delay Mr. ANDERSON, Mr. BEALL, Mr. BENNETT, Mrs. BOWRING, Mr. BRIDGES, Mr. BYRD, Mr. CAPEHART, Mr. CASE, Mr. CHAVEZ, Mr. CLEMENTS, Mr. COOPER, Mr. DANIEL, Mr. DIRKSEN, Mr. DOUGLAS, Mr. DUFF, Mr. EASTLAND, Mr. ELLENDER, Mr. FREAR, Mr. GEORGE, Mr. GILLETTE, Mr. HUMPHREY, Mr. IVES, Mr. JACKSON, Mr. JOHNSON of Colorado, Mr. KENNEDY, Mr. KERR, Mr. KILGORE, Mr. LEHMAN, Mr. LONG, Mr. MAGNUSON, Mr. MALONE, Mr. MAYBANK, Mr. MCCARRAN, Mr. MCCARTHY, Mr. MILLIKIN, Mr. MONRONEY, Mr. MORSE, Mr. MUNDT, Mr. PASTORE, Mr. POTTER, Mr. PURTELL, Mr. REYNOLDS, Mr. ROBERTSON, Mr. SMATHERS, Mrs. SMITH of Maine, Mr. SMITH of New Jersey, Mr. SPARKMAN, Mr. SYMINGTON, and Mr. WATKINS entered the Chamber and answered to their names.

The PRESIDING OFFICER. A quorum is present.

The question is on agreeing to the amendment offered by the Senator from Michigan [Mr. FERGUSON].

Mr. ERVIN. Mr. President, in rising for the purpose of offering a substitute for the amendment proposed by the distinguished senior Senator from Michigan [Mr. FERGUSON], and for the purpose of explaining my substitute, I am ignoring the rule that a new Senator, like a child, should be seen, rather than heard.

After all, I have the honor of aiding my colleague, the distinguished Senator from North Carolina, in representing in this body the 4 million people of our State.

Within the past few years, death has entered the Senate Chamber 3 times to still the throbbing hearts of 3 great North Carolina Senators. As a consequence, if the voice of North Carolina is to be heard in the Senate, it is necessary that it be through the voice, so far as I myself am concerned, of a Senator who is a neophyte.

The people of olden times did not use some of the terms which we use in discussing the problems which arise in connection with section 164 of the proposed bill. They did not speak about amperes, volts, or watts. They talked about horsepower. In rising, I hope I may be able to contribute just a little horsesense to the discussion about horsepower.

The TVA has done a wonderful task in the Tennessee Valley in harnessing the streams of the valley, in promoting flood control, and in preventing soil erosion. The taxpayers of the United States have been very generous to the TVA, because they have contributed altogether, according to my understanding, $1,800,000,000 to the development of the Tennessee Valley. The magnitude of that sum is more readily understood by me when I realize it is the equivalent of a contribution of $450 from every man, woman, and child in North Carolina.

I think the situation can be clarified if we remember that we are not concerned with the harnessing of the waters in the rivers of the Tennessee Valley; that we are not concerned with the promotion of flood control in the Tennesee Valley; that we are not concerned with the prevention of soil erosion in the Tennessee Valley; that we are not even concerned with the erection or the operation of an auxiliary steam plant to supplement hydroelectric power generated from the streams of the Tennessee Valley in times of low water.

So far as section 164 of the bill is concerned, we are fundamentally and solely concerned with a determination of who shall operate a steam plant to furnish the electric power necessary for the operation of the atomic energy installation at Paducah, Ky. According to my way of thinking, the questions of who shall erect a steam plant and who shall shovel coal into the furnaces of such a steam plant, in order to generate electric power, are fundamentally commercial questions.

According to my way of thinking, the Federal Government, either itself, or through any of its agencies, ought not to furnish a commercial service, if a private industry is able and willing to furnish such service at reasonable rates.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. ERVIN. First, I wish to finish my statement; then I shall yield to the Senator. I trust I shall not be too long in my statement.

The substitute which I propose for the amendment to section 164, offered by the distinguished senior Senator from Michigan, is twofold in nature. In the first place, it incorporates, in exact terms, the proposal made by the distinguished senior Senator from Michigan. As he explained in presenting his amendment, some question has been raised concerning the legal capacity of the Atomic Energy Commission to enter into the proposed contract, or any other contract of that nature, and he has offered his amendment simply to clarify the situation.

I have incorporated his amendment in my proposed substitute, so that any doubt may be removed as to the legal capacity of the Atomic Energy Commission to make a contract either with a private utility or with any governmental agency, or with anyone else on the face of the earth, to obtain replacement power necessary for the atomic energy

installation at Paducah. So I think that if we adopt the substitute containing that clarification, all we shall be doing is to follow in the footsteps of the good Lord, when He confronted His disciples and found that 1 of the 11 was somewhat doubtful about whether He had actually risen from the dead. He merely clarified the situation for doubting Thomas.

The first part of my proposed substitute does nothing whatsoever except to clarify the question of the legal right and the legal power of the Atomic Energy Commission to enter into a contract with any person, whether it be a private utility or a governmental agency, to obtain replacement power of the nature required for its operations. I do not see how anyone could object to that part of the substitute amendment.

Before coming to the second part of my amendment in the nature of a substitute, I should like to tell a story. It may be an old one, but it points a moral. I live in the foothills of the Blue Ridge Mountains of North Carolina. One of my mountain constituents came down to my home town to pay his grocery bill. When he was informed by the storekeeper as to the amount of the grocery bill, he thought the amount was a little higher than it should have been, so he began to grumble.

The storekeeper got his account books, laid them on the counter in front of my mountaineer friend, and said, "Here are the figures. You know, figures do not lie."

My mountain friend scratched his head and said to the storekeeper, "I know that figures do not lie. But liars surely do figure."

Not only do liars figure, but honest and honorable men, like Members of the Senate, disagree as to the interpretation and meaning of figures. I have listened to Senators who have taken one side or the other in connection with the proposal allegedly made to the Government by the Dixon-Yates group and about the negotiations heretofore had with that group. Some Senators, in whom I have implicit confidence, say that the figures which have been mentioned in the negotiations thus far indicate that the Government is about to be ravished. Other Senators who have spoken on the same subject, and in whom also I have implicit confidence, have stood on the floor and said that all the figures mentioned in the negotiations are fair and just to the Government.

I should like to believe Senators who have taken positions on both sides of the proposal, but I simply do not know which Senators are right. I do not think the floor of the Senate is the place for us to determine that question; nor do I think a contract can be written on the floor of the Senate.

Therefore, I have included in my amendment in the nature of a substitute a proposal which I have borrowed from the distinguished junior Senator from New Mexico [Mr. ANDERSON]. I have lifted it bodily from his proposed amendments, or from some which he has announced he intends to propose. After the provision giving the Atomic Energy Commission undoubted legal power to make a contract with any private utility or any governmental agency to furnish the replacement power which is necessary, my amendment provides that the contract must be submitted to the Senate and House Joint Committee on Atomic Energy, and shall lie before the joint committee for 30 days while Congress is in session, unless that requirement is waived by the committee, in writing.

I do not propose to favor any particular contract, and I do not propose, as a Senator, to say which group is right in its interpretation of the figures. Therefore, I offer the second part of my substitute for the amendment proposed by the senior Senator from Michigan, in order to provide, in the first place, that the members of the Atomic Energy Commission, in whom I have implicit confidence, shall have the legal right to enter into a contract with whichever private utility or Government agency may be able and willing to make power available.

As an additional safeguard, I propose that after the members of the Atomic Energy Commission have made such a contract, they shall file it with the Joint Committee on Atomic Energy of Congress, which is composed of some of the ablest Members of the Senate and the House of Representatives. On that committee is a Representative from my State, CARL DURHAM, whom I have known ever since he and I were college mates at Chapel Hill. I would be willing at any time to place the welfare of the United States in the hands of CARL DURHAM, because I know he is intellectually honest, and courageous to the highest degree.

I am willing to trust the integrity, the intelligence, and the patriotism of the members of the Atomic Energy Commission to make a contract with any private utility or any public body which will furnish needed electric power for the use, indirectly, of the Atomic Energy Commission, at reasonable rates. If it is felt the Commission cannot be trusted, Senators may still vote for this provision with good grace, because the additional protection is provided that the contract will be scrutinized by the members of the Joint Committee on Atomic Energy before the contract can become effective.

I am willing to put implicit confidence in the integrity, the intelligence, the patriotism, and the good business judgment of the distinguished members of this body and of the House who are members of the joint committee.

I have briefly stated the purpose of my amendment in the nature of a substitute for the amendment of the Senator from Michigan.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. ERVIN. I yield to the Senator from Arkansas.

Mr. FULBRIGHT. First, I should like to compliment the Senator on his very good judgment and discrimination in regard to this matter, as evidenced by his remarks. I think he understands the situation quite well. I should like to inquire whether it is the Senator's intention to make approval by the Joint Committee on Atomic Energy a condition precedent to the effectiveness of the contract.

Mr. ERVIN. That is not my intention, because I believe the question of writing a contract is executive in nature, rather than legislative. Under my proposal if the members of the joint committee of the Senate and the House do not approve the contract, it will then lie before them for 30 days while Congress is in session. If Congress thinks the contract as proposed is improper or unfair to the Government, it can take such action as it sees fit.

Mr. FULBRIGHT. Suppose a Member of Congress did object to it, made a speech on the floor of Congress condemning it, and then the 30 days elapsed, would the contract then be legally effective?

Mr. ERVIN. If the contract were lodged with the joint committee for 30 days while Congress was in session, then the contract would become effective unless Congress took affirmative action to the contrary. That is my understanding. But nothing can be done without the consent of the joint committee until the contract has been in a sense on the table before the committee for 30 days, while Congress is in session.

Mr. FULBRIGHT. So far as I can see at the moment, I think the proposal is a worth-while contribution; I should like to consider it a little longer, but it strikes me as having much merit. However, if it is to be adopted, I deem it important that it should be very clear, because it might be objectionable from the standpoint of assuming to interfere with the executive function. It is not the Senator's intention, is it, that the provision should operate as a veto or should give the power of veto to the Joint Committee on Atomic Energy, or should actually affect the validity of the contract other than result in a delay of 30 days?

Mr. ERVIN. I think the making of a contract is a matter for the executive branch of the Government, in a sense, and that the legislative branch ought not to interfere with that function of the Executive. The provision would merely guarantee that if the joint committee did not approve a contract, it would have to lie before it for a certain period, so that the legislative branch of the Government might consider whether the contract was so outrageous in character that it should review the power to make such a contract.

Mr. FULBRIGHT. What the proposal of the Senator is guaranteeing is consultation rather than approval of a veto power, is it not?

Mr. ERVIN. That is right.

Mr. FULBRIGHT. I thank the Senator.

Mr. ERVIN. Mr. President, I offer my amendment as a substitute for the amendment of the Senator from Michigan [Mr. FERGUSON]. I send my amendment to the desk, and request its immediate consideration.

The PRESIDING OFFICER (Mr. BUSH in the chair). The amendment will be stated.

The LEGISLATIVE CLERK. In lieu of the amendment submitted by Mr. FERGUSON,

it is proposed to insert the following on page 80, in line 9:

The authority of the Commission under this section to enter into new contracts or modify or confirm existing contracts to provide for electric utility services includes, in case such electric utility services are to be furnished to the Commission by the Tennessee Valley Authority, authority to contract with any person to furnish electric utility services to the Tennessee Valley Authority in replacement thereof. Any contract hereafter entered into by the Commission pursuant to this section shall be submitted to the joint committee and a period of 30 days shall elapse while Congress is in session (in computing such 30 days, there shall be excluded the days in which either House is not in session because of adjournment for more than 3 days) before the contract of the Commission shall become effective: *Provided further,* That the joint committee, after having received the proposed contract, may by resolution in writing, waive the conditions of or all or any portion of such 30-day period.

Mr. LENNON. Mr. President, will my colleague yield to me?

The PRESIDING OFFICER (Mr. REYNOLDS in the chair). Does the junior Senator from North Carolina yield to his colleague?

Mr. ERVIN. I am glad to yield to the senior Senator from North Carolina.

Mr. LENNON. Mr. President, I should like to express my appreciation to my distinguished colleague for the submission of the substitute amendment, which I think will go a long way toward clarifying the understanding and the feeling of the Members of the Senate regarding this measure.

I wish to ask my colleague a question. He has heard the debate and the colloquy on the bill during the last number of days. From what he has heard, is he of the opinion that the Dixon-Yates proposal can actually and truthfully be considered an assault on the TVA system, as such?

Mr. ERVIN. I do not so consider it, because in my opinion the TVA system fundamentally is for the generation of hydroelectric power, for soil conservation, and for flood control, rather than to engage in a commercial business.

Mr. FERGUSON. Mr. President, will the Senator from North Carolina please speak louder, so that we on this side of the aisle can hear him?

Mr. ERVIN. I shall be glad to. I was giving an explanation, in answer to a question put to me by my senior colleague. I said that I do not consider that the action of the Atomic Energy Commission in obtaining needed replacement power from a private industry could properly be considered an attack on the TVA system, because I consider the TVA fundamentally to be dedicated to the harnessing of water power and to developing hydroelectric power, soil conservation, and flood control, and not to be for the purpose of engaging in commercial business.

Mr. LENNON. Mr. President, will the Senator yield for one further question?

Mr. ERVIN. I yield.

Mr. LENNON. Much has been said in recent days in the debate on the pending bill to the effect that one of the most objectionable features of the proposed contract was that there were no bids to furnish power from private utilities. I wonder if the Senator can tell us whether or not it would have been practicable for the Government, in its effort to obtain electricity for the plant at Paducah, to have obtained bids.

Mr. ERVIN. All generators of power necessarily have to obtain certificates from their State regulatory bodies authorizing them to engage in the production and sale of power, since they are necessarily public utilities. It is quite natural to ask for bids from the power companies which are now authorized to do business in the area where the power is to be generated. I do not know whether that is a sufficient answer.

Mr. LENNON. Then, judging from what the Senator says, it would have been impracticable to obtain bids from those industries or power companies which would have been able to provide power for this particular plant.

Mr. ERVIN. Yes. However, if this substitute were adopted, the Atomic Energy Commission would be at liberty to obtain the necessary replacement power under contract from any source which might be able to make such power available.

Mr. LENNON. I wonder if the Senator finds anything unconscionable about the proposal to obtain power from private industry for the use of the Atomic Energy Commission plant at Paducah.

Mr. ERVIN. I do not, because I think the mere operation of a steam plant, the shoveling of coal into a steam plant and the generation thereby of electric power, is fundamentally a commercial enterprise. I think all commercial enterprises ought to be conducted by private enterprise if private enterprise is able and willing to conduct the operation at reasonable rates.

Mr. LENNON. Has the Senator any views with respect to the discussion which has been had on the floor of the Senate, to the effect that this particular private enterprise should have a refund of Federal taxes?

Mr. ERVIN. I have a conviction that anyone who is engaged in business must pass his taxes on to his consumers, and that when his consumer happens to be the Federal Government, he must pass them on to the Federal Government. I do not think anyone in the present age could stay in any kind of business and not pass on his Federal income taxes, whoever his consumer may be.

Mr. LENNON. Does the Senator believe that there would have been any other manner in which the AEC power could have been obtained except through private negotiations such as have been suggested?

Mr. ERVIN. I think the power would have to be derived from a private source by negotiations between the governmental agency concerned and the private source, because there is no way to write a contract on any other basis. All contracts are give-and-take propositions.

Mr. LENNON. I understand that the Senator is not opposed in any manner to the policy which has been followed by the Congress over a period of years, of providing help in the development of hydroelectric power.

Mr. ERVIN. I am not. I am strongly in favor of any proposal for the Federal Government to assist in the conservation of the natural resources of the country; and wherever it is necessary for the Federal Government to step in and aid with those problems I will be in favor of it as long as I am here.

Mr. LENNON. I thank the Senator for his explanation.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. ERVIN. I yield.

Mr. BUSH. I do not quite see why the Senator wants to have the contract stalled in the joint committee for any period of time. Let us assume that the amendment becomes law. There is a proposal before the Atomic Energy Commission for an organization to spend $105 million or $107 million, all based upon present rates for money, present costs of construction, and all that. I believe, of course, that the joint committee should be advised, and have complete details with respect to any contract of this nature. I should like to see the amendment provide that any such contract be filed with the joint committee, so that the committee may examine it; but the possibility of holding up the transaction for a period of months seems to me not to have very much point to it, the idea being, as the Senator has said, that when the Congress comes back into session some Member of either House may make a speech about the contract if he does not like it. If he knows what is in the contract, and if he does not like it, he can make a speech about it later. I have the feeling—perhaps the Senator can correct me—that this is somewhat an invasion of the rights of the executive branch, and puts the legislative branch in a contract-making position, which is not quite what is intended by the Constitution.

Mr. ERVIN. I will say to the distinguished Senator from Connecticut that up until the 11th day of June I had some responsibility in connection with interpreting laws, and I could speak with some authority. However, I relinquished the position in which I could speak with authority on the question of interpreting laws.

The proposed substitute contains the following proviso:

Provided, however, That the Joint Committee, after having received the proposed contract, may, by resolution in writing, waive the conditions of or all or any portion of such 30-day period.

My interpretation may be wrong. It is my individual interpretation that under that provision the Joint Committee on Atomic Energy could act, even in the absence of a session of Congress, but it would not act if it did not think the contract was a proper contract; and in that event the 30-day provision would come into effect.

Mr. FERGUSON. Mr. President, will the Senator yield?

Mr. ERVIN. I yield.

Mr. FERGUSON. Let me present one or two hypothetical questions.

Suppose the Congress was in adjournment sine die on September 1, and there was delivered to the Joint Committee on

Atomic Energy a contract. The first hypothetical case is one in which nothing is done by the Joint Committee. As I understand, the Senator's interpretation would be that, 30 days after the Congress met, the Executive could enter into a contract. Is that correct?

Mr. ERVIN. Yes. When the 30 days expired and Congress had not done anything about it, it would become operative.

Mr. FERGUSON. The second hypothetical case is this: On September 1, when Congress is not in session, a contract is delivered to the Joint Committee on Atomic Energy. The joint committee holds a meeting, and at a regularly constituted meeting—which is authorized under the statute whether Congress is in session or not, because it is a statutory committee, a continuing committee—the joint committee waives both the question of the Congress not being in session, which is covered by the language "waive the conditions of," and also waives the time limit. Therefore, the contract could go into effect at the date of the waiver under a resolution of the joint committee?

Mr. ERVIN. That is my personal interpretation.

Mr. FERGUSON. The Senator is offering this amendment as a substitute for the amendment of the Senator from Michigan.

Mr. ERVIN. Yes.

Mr. FERGUSON. The first part of the Senator's proposed substitute is identical with the amendment which the Senator from Michigan has offered.

Mr. ERVIN. As the Senator from Michigan knows, of course, the personal interpretation of any one person may be different from that of a court which decides a case. This is my personal interpretation.

Mr. FERGUSON. Both the Senator and I have served on the bench. It is true, is it not, that if the interpretation of those presenting the proposal, or of the committee, as shown by the RECORD, is ambiguous, the interpretation by the court is based upon what is considered to have been the intention in the legislative process.

Mr. ERVIN. Yes. As the Senator from Michigan has pointed out, the joint committee would have the right to waive both the conditions and the time. One of the conditions relates to the question of whether or not the Congress is in session; and the time is 30 days. If the joint committee is satisfied with the fairness of the contract, and if it meets in the absence of a session of Congress, it may waive the conditions. If it does not waive them, then the 30 days do not begin to run until Congress is in session. In that way protection is afforded against any improper contract being entered into, and the procedure is expedited if the joint committee thinks the contract is fair.

Mr. BUSH. Mr. President, will the Senator yield for an observation?

Mr. ERVIN. I yield to the Senator from Connecticut. Then I shall yield to my distinguished senior colleague.

Mr. BUSH. I believe I understand the purpose of the Senator's amendment, and I believe it has some merit in providing that certainly the joint committee should be fully advised in connection with any important contract of this kind. However, I do not like the possibility, as presented in the theoretical case of the Senator from Michigan [Mr. FERGUSON], of a possible delay in the execution of a contract by as much as 6 or 7 months, which could result from this kind of amendment.

Contracts of this kind are based on conditions approximately current. The money market is a very important consideration in the financing of a $100 million contract. The same situation applies to the cost of machinery, and everything else that goes into a steam plant. In other words, the costs must be considered, and they are an important element in a large contract. The machinery and other things that go into the kind of plant we are considering amounts to another $100 million of cost.

I believe such an amendment would place a restraint on the Executive if it were necessary for the joint committee to have a look at the contract before it could become effective, and it would cause a delay of perhaps as long as 6 or 7 months and the delay could be longer, if Congress adjourned earlier.

I beg the Senator to give that point a little more consideration before we come to a vote on the amendment. I do not wish to ignore the Joint Committee on Atomic Energy in its proper place in this procedure. I believe it has a proper place, but I do not think it should have contract-making authority.

Mr. ERVIN. I do not believe it would have contract-making authority under my amendment. I am not interfering with the joint committee. I am not giving it veto power over any action of the Atomic Energy Commission in connection with any contract the Atomic Energy Commission might make. I merely provide in the amendment that unless the joint committee is satisfied that the contract is fair, there will be an opportunity for Congress at the next session to withdraw the legislative authority to make the contract.

I can appreciate the Senator's position, but my answer is a fundamental answer. I believe private enterprise can do this job in 1954. I believe private enterprise can do it in 1955. Therefore, I am not worried too much about the difficulty private enterprise might have in 1955 over what it might have in 1954.

Mr. BUSH. Mr. President, will the Senator yield further?

Mr. ERVIN. I yield.

Mr. BUSH. If the Senator from North Carolina insists on giving the joint committee an opportunity to look at a contract before it becomes effective, I wish he would give some further consideration to an alternative which would provide that a contract once signed should be submitted immediately to the joint committee, and that the joint committee should have an opportunity for a period of, say, 30 days to study the contract. If the Atomic Energy Commission did not hear further from the joint committee, the contract would become effective. If the joint committee had some serious reservations, it would have an opportunity to take the matter up with the executive. It could even ask for an extension of 30 days, if it had some serious objections. However, I do not believe we should run the risk of having a contract stalled for as long as 6 or 7 months.

Mr. ERVIN. The distinguished Senator from Connecticut may come up with a proposition that I may like better than my own. If I do, I shall be glad to accept it.

Mr. BUSH. I thank the Senator.

Mr. ERVIN. I now yield to my distinguished senior colleague.

Mr. LENNON. With respect to all that has been said about the Dixon-Yates proposal, and it being considered by many as somewhat of an innovation, does not the Senator believe that to give the Joint Committee on Atomic Energy an opportunity to look at the contract would have a very salutary effect by assuring the people of the Nation that the contract would be in the public interest?

Mr. ERVIN. It would assure the people of the Nation that we are more concerned with getting the needed electric power from private enterprise at reasonable rates than we are in providing that any particular private utility shall furnish the power.

Mr. LENNON. The Senator believes, does he not, that by his amendment, which assures the American people that their representatives in Congress, through the Joint Committee on Atomic Energy, shall have a "look see" at these contracts, that the American people will have confidence that the contracts are in the public interest and not in the interest of a so-called private monopoly, as the reference has been made on the floor.

Mr. ERVIN. The Senator is absolutely correct.

Mr. LENNON. I share the Senator's views on his amendment.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. ERVIN. I yield.

Mr. COOPER. May I ask the distinguished Senator from North Carolina if I am correct in understanding that the prime purpose of his amendment is to make it clear that AEC could enter into a contract with a power company to replace power in the Tennessee Valley Authority system?

Mr. ERVIN. That is correct.

Mr. COOPER. Is that the essential purpose of the amendment?

Mr. ERVIN. That is one of the essential purposes of the amendment. The other is that after a contract is made it shall be scrutinized by the joint committee.

Mr. COOPER. I shall take the first essential purpose. In offering the amendment, has the Senator done so because he has doubts that section 164 on page 79 of the bill authorizes the replacement of power to the TVA?

Mr. ERVIN. I do not personally have any grave doubts on that score. However, some Members of the Senate, for whose judgment I have a very high respect, do have such doubts. Therefore I am willing to extend to them what I believe we should extend to them, namely, the same consideration that the good

Lord extended to Doubting Thomas, by removing their doubts.

Mr. COOPER. Of course, the amendment speaks about the making of a contract. Does the Senator imply that to make the contract effective the TVA must also assent to the introduction of power into its system?

Mr. ERVIN. No, I do not; because I concede that the Tennessee Valley Authority is a servant of all the people of the United States, and that the Tennessee Valley Authority is willing to obey any direction given to them by Congress.

Mr. COOPER. Is it not true that both the Tennessee Valley Authority and the AEC are independent agencies created by Congress? I know that the distinguished Senator is an experienced lawyer. Does he think that either has any power other than the power defined in the acts which created them and granted to them by Congress?

Mr. ERVIN. In reply I should like to say that I believe the powers of any agency are those which are given expressly by law or those which are necessarily implied by law. I do not know whether I misconstrue the Senator's question.

Mr. COOPER. I should like to propound a hypothetical question to the Senator. Let us suppose we are not dealing with the TVA at all, and that the area of the TVA was being served by a private power company. Would the Senator say that if AEC wanted to contract with X company or with the Dixon-Yates Co. to replace power furnished by a private power company, that it could be done unless the private power company wanted or needed the power itself?

Mr. ERVIN. I do not know whether I understand the question. If I do, my answer is that the Tennessee Valley Authority is an agency of the United States, and the Tennessee Valley Authority ought to be willing to do anything which Congress directs it to do, even though it might not satisfy the notions of some of those in charge of the TVA.

Mr. COOPER. The amendment does not require the Tennessee Valley Authority to accept power. The Senator says the AEC can make the decision as to the amount of power the Tennessee Valley Authority might need in replacement and could force the introduction of that power into its system.

Mr. ERVIN. I have a high respect for the TVA and what it has accomplished. If this substitute should be adopted the TVA should not be willing to obey the law of Congress. I think we have created a Frankenstein. I cannot imagine TVA not obeying. I believe it is implied that it will comply with whatever is done under this substitute, if the substitute shall become law.

Mr. COOPER. I am not talking about what the effect would be if there should be a voluntary agreement. I am speaking of the power given the authority. Does the Senator consider that AEC has the power and authority to make a decision affecting a primary function of the Tennessee Valley Authority made so by statute enacted by Congress?

Mr. ERVIN. If the substitute shall become law, and it authorizes the AEC to make a contract it supersedes, as matter of law, every provision of law to the contrary, because the last word of Congress is the law of the land. The other provisions of law would be modified to that extent.

Mr. COOPER. Does the Senator believe that his amendment would require the Tennessee Valley Authority to accept replacement power even if, in its own opinion and determination, it would not be best for the operation of the system?

Mr. ERVIN. I do, because I do not think the servant ever becomes greater than the master. If the Tennessee Valley Authority insisted on its way, when its way conflicted with the will of Congress, I think we would have a very bad situation. I think it would yield; I think it would accept power furnished under the contract authorized by this substitute, whether the head of TVA thought it was justified or not.

Mr. COOPER. What the Senator is saying is that the AEC would make policy determinations.

Mr. ERVIN. No. I am saying that the AEC would have the legal right to obtain the power and could require the TVA to accept that power to be fed into its distribution system, which was not built at the expense of the TVA, but at the expense of all the taxpayers of the United States.

Mr. COOPER. Then the purpose of the Senator's amendment is to give the AEC power to determine policy for the TVA.

TRANSFER OF HEALTH FACILITIES FOR INDIANS TO PUBLIC HEALTH SERVICE—CONFERENCE REPORT

Mr. WATKINS. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 303) to transfer the maintenance and operation of hospital and health facilities for Indians to the Public Health Service, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 303) to transfer the maintenance and operation of hospital and health facilities for Indians to the Public Health Service, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede its disagreement to the amendments of the Senate Nos. 1 and 3 and agree to the same.

That the House recede from its disagreement to the amendment of Senate No. 2, and agree to the same with an amendment, as follows: In lieu of the matter inserted by the Senate, insert the following: Page 2, line 2, after "Welfare" insert ": *Provided*, That hospitals now in operation for a specific tribe or tribes of Indians shall not be closed prior to July 1, 1956, without the consent of the governing body of the tribe or its organized council."

And the Senate agree to the same.

ARTHUR V. WATKINS,
HENRY C. DWORSHAK,
THOMAS H. KUCHEL,
CLINTON P. ANDERSON,
ALTON LENNON,
Managers on the Part of the Senate.
WESLEY A. D'EWART,
E. Y. BERRY,
JACK WESTLAND,
WAYNE N. ASPINALL,
JAMES A. HALEY,
Managers on the Part of the House.

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

Mr. GORE. Mr. President, in the absence of a Member of the Senate who is interested in this report, I suggest the absence of a quorum. I shall withdraw my request as soon as that Senator returns to the chamber.

The PRESIDING OFFICER. The Clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BUSH in the chair). Without objection, it is so ordered.

Is there objection to the present consideration of the conference report.

Mr. KNOWLAND. Mr. President, I understand that it is agreeable to the distinguished Senator from Utah [Mr. WATKINS] that action on the conference report be deferred at present, until the Senator from Oklahoma [Mr. MONRONEY] can be in the Chamber. I ask unanimous consent, therefore, that the report be temporarily laid aside.

The PRESIDING OFFICER. Without objection, the report will be temporarily laid aside.

REVISION OF THE ATOMIC ENERGY ACT OF 1946

The Senate resumed the consideration of the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

Mr. REYNOLDS. Mr. President, on a number of occasions during the course of the debate the word "socialism" has been used in connection with the activities of the Tennessee Valley Authority. The proponents of that philosophy have challenged such an application of the word. In the prairie country, whence the junior Senator from Nebraska hails, we have a rather quaint custom of referring to a volume known as Webster's Dictionary when we have any doubt as to the meaning or the application of a word. I have followed that custom in this connection and have referred to the Senate's own copy of Webster's Dictionary, which I take it is the last authority on the floor of this body as to the meaning of words. Webster's definition of "socialism" is as follows:

A political and economic theory of social organization based on collective or government ownership and democratic management of the essential means for the production and distribution of goods.

I submit that if that is not an accurate definition of the activities of the TVA, then the late Noah Webster should perhaps be recalled to write a new one.

While the eminent and learned Noah is universally known as a leading authority on lexicology, few people have referred to him as a prophet. But what marvelous foresight, what amazing foresight he had when he wrote into his definition of the word "socialism" the two words "democratic management," although the printer failed to print "democratic" with a capital "D."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from North Carolina [Mr. ERVIN], in the nature of a substitute, to the amendment of the Senator from Michigan [Mr. FERGUSON].

Mr. HILL obtained the floor.

Mr. HICKENLOOPER. Mr. President, will the Senator from Alabama yield to permit me to insert a statement relative to a colloquy on the floor yesterday about the ability of the Atomic Energy Commission to construct powerplants?

Mr. HILL. Mr. President, with the understanding that I shall not lose my right to the floor, I shall be glad to yield to the Senator from Iowa.

Mr. HICKENLOOPER. I shall not take the Senator's time to read the statement; I shall merely ask to have it printed in the RECORD.

Mr. HILL. With the understanding that I do not lose my right to the floor, I shall be glad to yield to the distinguished vice chairman of the Joint Committee, so that he may make an insertion in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HICKENLOOPER. I thank the Senator from Alabama.

Mr. President, yesterday a question arose as to whether the Atomic Energy Commission has authority under the bill to construct substantial atomic powerplants. In general, the idea was discussed that under the research and development provisions of the bill the Commission did have such authority. I agreed to place in the RECORD a more formal statement, pointing out that authority. Therefore, I ask unanimous consent to have the statement printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

A problem has been raised several times in our discussions on S. 3690 which I feel must be clarified. It has been asked whether or not the Atomic Energy Commission is authorized by this bill to construct large experimental or demonstration atomic powerplants capable of producing economically competitive and commercially usable electricity. The answer to this question is clearly in the affirmative.

Section 31 (a) (4) on page 18, line 12, of the bill authorizes the Commission to make arrangements for the conduct of research and development activities relating to the utilization of special nuclear material for industrial uses. Section 32, on page 19, line 13, also authorizes the Commission to conduct these same activities in its own facilities.

The term "research and development" is defined in section 11 (q), on page 8, line 18, to include the extension of investigative findings into practical application for demonstration purposes, including the experimental production and testing of models, devices, equipment, materials, and processing.

I have intentionally omitted certain intervening language in each of these citations in order to clarify my reading of them.

One of the purposes of the act in section 3-a on page 4, line 3, is for the conduct of a program of research and development in order to encourage maximum scientific and industrial progress. I believe the Commission clearly has the authority under section 31 and section 32 to carry out this purpose.

The Atomic Energy Commission now has underway a 5-year program directed at solving some of the basic problems involved in the development of economic atomic power. It is unlikely that any of the plants built under this 5-year program will in fact produce competitive economic power, but it is also a fact that the Government and the Commission are committed to the continuation of the construction of whatever plants prove to be advisable in order to provide the necessary demonstration of economic practicability. Research and development in the atomic energy business does not mean laboratory work alone in the normal sense. I would like to call the attention of my colleagues to the very expensive and complicated experiments which have been conducted in the Pacific in order to prove the practicality of certain atomic and thermonuclear weapon ideas. Many of the advances in the atomic art which are essential to our progress cannot be proved except on a major scale. I do not believe that either nuclear scientists or engineers would dispute the contention that proof of economically practical atomic power will have to be demonstrated and that that demonstration will constitute an experiment.

It is not probable that any atomic powerplant can be constructed in the next decade which will not be essentially experimental. Any electric power produced by such plants built by the Commission will in fact be byproduct energy as defined under section 44. That energy is byproduct in the sense that it is incidental to the experiment. The experiment in these cases will be designed to contribute to the success and economic operation of large plants capable of direct adaptation for industrial and commercial use. The energy itself is closely interwoven with the nature of the experiment, but the emphasis throughout this program is on the development aspect of the effort.

The Atomic Energy Commission is basically a development and regulatory agency. The only production that it does is in connection with weapons. There are other Federal agencies which historically have been producers of electric power and distributors of electric power on a commercial scale. If these agencies under authority of the Congress should find it desirable to produce electricity from atomic energy, there is nothing in this bill, which prohibits them from doing so. Whenever commercial feasibility has been demonstrated, these Federal and other public agencies are certainly not barred by the bill from seeking and obtaining licenses to construct and operate atomic powerplants.

It has been suggested that the limitation on authority contained in section 261, on page 102 of the bill, in some way deprives the Commission of authority to build such experimental and demonstration atomic powerplants. This is not the intention of this section. This limitation has become almost standard practice to prevent large Government agencies from starting major construction projects without the specific authority of the Congress. The authorizing procedure as a preliminary to appropriations is one with which we are all familiar.

The authority contained in S. 3690 permitting the Commission to build and operate atomic powerplants arises from the research and development provisions of the bill.

Any projects for atomic powerplant construction and operation by the Commission, either singly or jointly in participation arrangements with others, must be primarily for research and development purposes.

Varying amounts of energy may be generated by such projects. Section 44 authorizes the Commission to dispose of this byproduct power which would be, in fact, incidental to the research and development objective, but it is not the intention of the framers of this legislation to turn the Commission into a federally sponsored, commercial electric power generating agency.

This is not a power bill. This is a bill to advance research and development in aid of the art of making atomic machines—or of using atomic fuel—for the generation of power.

Mr. HICKENLOOPER. Mr. President, the Senator from South Dakota [Mr. CASE] yesterday raised a question as to whether the Atomic Energy Commission could, in fact, accept without payment—that is, accept as a gift or a transfer, without having to purchase—certain property located in South Dakota, near some of the hydroelectric operations which the Government has installed. I advised the Senator that I would attempt to get an answer.

I have learned that the answer is that if the Atomic Energy Commission does not have to pay for the installations which it receives from another branch of the Government, it can accept them as a donation or a gift or a transfer.

I ask unanimous consent to have printed at this point in my remarks, a memorandum I have received from Mr. George Norris, Jr., counsel to the Joint Committee on Atomic Energy.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

JULY 19, 1954.

Memorandum from George Norris, Jr.

Mr. Hal Price, AEC, called this afternoon to tell me that under section 12 a. (7) the Commission has the authority to acquire any real property. Under section 202 of the Federal Property and Administrative Services Act, another Government agency can transfer to the Commission through the General Services Administration excess property that it owns, including real property.

This is the method of transfer that has been commonly used by the Commission in acquiring lands from other agencies.

The Commission would have to receive congressional approval, under section 261 of the bill, for such transfer if appropriations are needed for the land and when appropriations are needed to build the special buildings which would be needed for any new facility.

Mr. CASE. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The Senator from Alabama has the floor.

Mr. HILL. With the understanding that I do not lose the floor, I shall be glad to yield to the Senator from South Dakota, to permit him to ask a question of the Senator from Iowa.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CASE. I wish to ask the distinguished Senator from Iowa if this information does not largely confirm our colloquy of yesterday, to the effect that if the Army engineers declare property

to be excess to their needs, and make it available to the General Services Administration, the property can be transferred to the Atomic Energy Commission, and the Commission can receive it if no cost is involved in the transfer.

Mr. HICKENLOOPER. The answer, as I have been advised by counsel to the committee, is, Yes, that could be done.

Mr. CASE. I appreciate the Senator's statement.

Mr. HICKENLOOPER. I thank the Senator from Alabama.

Mr. HILL. It has been a pleasure to yield to the distinguished Senator from Iowa.

Mr. President, I understand that the distinguished Senator from Utah is now ready to proceed with the conference report which he presented to the Senate a short time ago, but which was temporarily laid aside. I ask unanimous consent that I may yield to the distinguished Senator from Utah for the purpose of proceeding with the conference report, without losing my right to the floor.

The PRESIDING OFFICER. With that understanding, it is so ordered.

TRANSFER OF HEALTH FACILITIES FOR INDIANS TO PUBLIC HEALTH SERVICE—CONFERENCE REPORT

Mr. WATKINS. Mr. President, what is the parliamentary situation with regard to the conference report on the bill (H. R. 303) to transfer the maintenance and operation of hospital and health facilities for Indians to the Public Health Service, and for other purposes?

The PRESIDING OFFICER. The question is on the request of the Senator from Utah to proceed to the consideration of the conference report. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. KERR. Mr. President, I rise to object to the acceptance of the conference report. As amended by the Senate, H. R. 303 had become less objectionable than it was in the form in which it was passed by the House. However, in conference substantial deletions and impairments of the provisions of the bill as passed by the Senate were made, with the result that in its present form the bill is but little better than as passed by the House.

Mr. President, H. R. 303 has been presented by its sponsors as legislation which will save money. I do not agree with that suggestion, and the Director of the Bureau of the Budget does not agree with it. Therefore, the Budget Bureau opposed the passage of the bill.

H. R. 303 was presented as a measure to improve the health services provided to the people affected, to wit, the American Indians. Yet the bill is strenuously opposed by the Department of Health, Education, and Welfare. It is the opinion of the senior Senator from Oklahoma that it will result in impaired service rather than in improved service.

H. R. 303 was presented as a measure for the benefit of Indians. Yet in Oklahoma, where one-third of all American Indians reside, the opposition to the bill is practically unanimous by the people for whom it was purportedly introduced and in whose interest it was sought to be passed. The bill is opposed not only by those who would be served by it, but by those who would render service under it.

As I interpret H. R. 303, it is the result of the desire of a limited minority to impose their will upon the great majority.

Therefore, Mr. President, on any basis of consideration, the conference report should not be approved, and the Senate should stand firm in its purpose not to accept it unless the House accepts the amendment adopted by the Senate when it passed H. R. 303.

Mr. MONRONEY. Mr. President, I am greatly disappointed in learning that one protective feature which was written into the bill when it was before the Senate, namely, the amendment by the Senator from Mississippi [Mr. STENNIS], has been largely nullified in the conference.

The bill, which purports to turn over the administration of the Indian hospitals of the Nation to the Public Health Service, will be used, we fear, mainly for the purpose of liquidating the Indian hospital service as we have known it through the years.

Granted that the Indian hospital service has not been of the high character we would have liked to see, granted that it was not so complete or so well staffed with competent physicians as was to be desired, the fault did not rest on the Indian Service, but in the halls of Congress. Congress consistently failed to vote funds to bring the hospitals up to date and to staff them with proper medical officers.

In the amendment to the bill offered in the Senate by the Senator from Mississippi, a safeguard was provided against the unwise and wholesale liquidation of the Indian hospitals. Such hospitals are located in the backwoods of the country, where most of the Indians, particularly those of Oklahoma and of the Midwest, were driven as the white settlers came into the Territories and took over the lands which the Indians once owned in fee.

We are fearful that the present Indian hospitals, which have been looked upon as insufficient, as too small, and as not meeting modern hospital standards, will be looked upon with disfavor, and that we will see in a short time, under the Public Health Service, the discontinuance of the hospitals located where the Indians reside, far away from metropolitan areas. We are fearful that the Indians will be told that they can no longer have the 10-, 20-, or 50-bed hospitals which serve a tribe or a number of tribes at distances far removed from metropolitan areas, and that they must go to a metropolitan center, and be served in a teaching hospital which is more modern and proficient from a medical standpoint.

Those who urge that course may be correct in their analysis of the problem, and the medical service that would be provided in the metropolitan centers may be far better than that available in the small, remote hospitals, where the Indians have been receiving their hospitalization. It has been a difficult task through the years to get the Indians to forget their local tribal medicine man, or to abandon the primitive medication that old-time chiefs and others have devised, and to seek the medical service which has been offered in the Indian hospitals. The Indians will not go into metropolitan centers. They are afraid of them. They like to go to a place near home. They like to go where other members of the tribe have been, who can tell them they have been there and that the white man's medicine was genuinely healing medicine and they could safely trust the doctor in the small hospital located near their home.

We fear that the brand new fight with public health medicine will cut loose the advisory capacity of the Office of Indian Affairs, which has been consistently maintained up until very recent weeks. The bill does split off the medical service and turn it over to another agency, and leaves the Office of Indian Affairs with nothing whatever to say about the medical service, which is perhaps 50 percent of the task of maintaining the welfare of the Indians.

We find that all the tribes in Oklahoma vigorously oppose the bill. They are opposed to it because one by one they have seen the pledges and the promises made by the white man, as he has taken over their land for various purposes—pledges and promises to the Indians to be kept as long as fire burns and water runs—disappear, and the Indians are fearful that under the bill being passed today they will have none of the medical care that is provided now in the far off reaches of the States where Indians reside.

We have been having conferences with the medical authorities regarding this measure. We have received some verbal assurance that, in so far as possible within the limitations of appropriations and administrative difficulties, they will try to maintain in the local areas the same degree of medical service, and will not try to consolidate in one metropolitan location the services now being rendered in the far-off reaches where the Indians live. However, this measure does not contain any provision to carry out that assurance.

In the amendment submitted by the Senator from Mississippi there was a provision that such a change could not be made without tribal authority. However, that provision regarding the consent of the Indians has now been watered down; and once the bill becomes operative in 1955, the Indians' pleas or advice will not be considered, and they will be cast adrift, on the good mercy of the Public Health Service, for it to decide whether their traditional hospitals will be kept open or will be closed. If they are closed, the Indians will then have to seek such service elsewhere.

I agree with my distinguished colleague that the change will not save money. In fact, it will cost more money than the present plan costs. I fear the change will result in less medical service than the Indians are receiving today, and I believe that fewer and fewer Indians will avail themselves of the promises traditionally made to them in treaties,

namely, that the white people will protect the best interests of the Indians.

Mr. President, for these reasons I still feel this measure is a bad one for the Indians and is a bad one for the taxpayers. I do not believe this measure will achieve the end results the sponsors of the bill urged as a reason for its passage.

I wish the Senate would send the bill to a further conference, and would insist upon the inclusion, verbatim, in the form in which the Senate passed it, of the amendment of the distinguished junior Senator from Mississippi [Mr. STENNIS]. That would at least give the Indians some protection from the loss of their present hospital facilities.

Mr. CASE. Mr. President, will the Senator from Utah yield for a question?

Mr. WATKINS. I yield.

Mr. CASE. I should like to ask the distinguished Senator from Utah, the chairman of the committee having charge of this measure, about a tubercular sanatorium known as the Sioux Sanatorium, at Rapid City, S. Dak. That sanatorium serves a number of tribes, and provides facilities for the treatment of tuberculosis. Obviously, no individual tribe could be consulted regarding the continuation of that hospital; no particular tribe would be able to express the sentiment of all the other tribes.

In the opinion of the able Senator from Utah, would such a hospital be closed, under the operation of this measure?

Mr. WATKINS. I cannot say what the Public Health Service may do after the bill goes into effect, and beyond July 1, 1956. But my judgment is that the sanatorium would not be closed, provided, of course, it is serving a large number of persons and is really accomplishing the objectives for which it was instituted.

Mr. CASE. This hospital provides facilities for the treatment of tubercular patients among the Indians of 8 different reservations, with a population in excess of 30,000. So I trust that the assurance of the Senator from Utah will be effective, and will insure the maintenance and operation of the hospital as long as there are any patients who need it.

Mr. WATKINS. That is my judgment. Of course, I cannot speak for the Public Health Service.

Mr. STENNIS. Mr. President, will the Senator from Utah yield briefly to me?

Mr. WATKINS. I yield for a question.

Mr. STENNIS. First, Mr. President, I wish to thank the chairman of the committee for his consideration of the problem which was presented by the amendment I offered to the Senate, although the conference committee has left in the bill only a remnant of the amendment. Nevertheless, I know the chairman of the committee had some personal interest in the problem which was presented by means of the amendment, and again I wish to say that I regret that the final form of the amendment will not offer protection to the Choctaw Indians that the amendment as submitted would have offered.

I realize that this measure probably will become law; and again I wish to express the very strong hope that the group of Choctaw Indians at Philadelphia, Miss., and in the surrounding area, to which this hospital has meant so much, will continue to have the benefit of its very fine medical services, because unless those Indians do have access to a facility of this kind, they will not be inclined to go to other hospitals. They like to keep to themselves. A great number of them cannot speak English.

If this measure becomes law, I hope those charged with the responsibility will look with great favor and great generosity upon preserving the fine little hospital there, for the 3,000, 3,500, or 4,000 Choctaw Indians.

I thank the Senator from Utah.

Mr. WATKINS. Mr. President, I should like to observe that this measure was endorsed by practically all the medical associations of the United States interested in this problem; and the conferees were unanimous in their approval of the report.

Mr. President, I do not care to repeat the argument that previously was made at considerable length. I now submit the matter.

The PRESIDING OFFICER. The question is on agreeing to the report.

The report was agreed to.

Mr. MONRONEY. Mr. President, I should like to have the RECORD show that both the senior Senator from Oklahoma [Mr. KERR] and the junior Senator from Oklahoma [Mr. MONRONEY] voted in opposition to approval of the conference report.

The PRESIDING OFFICER. The RECORD will so show.

ACCEPTANCE OF CONDITIONAL GIFTS TO FURTHER DEFENSE EFFORT

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 3197) to authorize the acceptance of conditional gifts to further the defense effort, which was, on page 1, line 11, strike out "partciular" and insert "particular."

Mr. KNOWLAND. Mr. President, I have taken up this matter with the acting minority leader. The Senate passed Senate bill 3197, to authorize the acceptance of conditional gifts to further the defense effort; but in the bill as passed by the Senate, there was a misspelling of the word "particular." The amendment of the House is only for the purpose of correcting the spelling of that one word.

Mr. President, I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

AMENDMENT OF MINERAL LEASING LAWS AND MINING LAWS RELATING TO MULTIPLE-MINERAL DEVELOPMENT

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 3344) to amend the mineral leasing laws and the mining laws to provide for multiple-mineral development of the same tracts of the public lands, and for other purposes, which was, to strike out all after the enacting clause and insert:

That, (a) subject to the conditions and provisions of this act and to any valid intervening rights acquired under the laws of the United States, any mining claim located under the mining laws of the United States subsequent to July 31, 1939, and prior to February 10, 1954, on lands of the United States, which at the time of location were—

(1) included in a permit or lease issued under the mineral leasing laws; or

(2) covered by an application or offer for a permit or lease which had been filed under the mineral leasing laws; or

(3) known to be valuable for minerals subject to disposition under the mineral leasing laws,

shall be effective to the same extent in all respects as if such lands at the time of location, and at all times thereafter, had not been so included or covered or known: *Provided, however,* That, in order to be entitled to the benefits of this act, the owner of any such mining claim located prior to January 1, 1953, must have posted and filed for record, within the time allowed by the provisions of the act of August 12, 1953 (67 Stat. 539), an amended notice of location as to such mining claim, stating that such notice was filed pursuant to the provisions of said act of August 12, 1953, and for the purpose of obtaining the benefits thereof: *And provided further,* That in order to obtain the benefits of this act, the owner of any such mining claim located subsequent to December 31, 1952, and prior to February 10, 1954, not later than 120 days after the date of enactment of this act, must post on such claim in the manner required for posting notice of location of mining claims and file for record in the office where the notice or certificate of location of such claim is of record an amended notice of location for such claim, stating that such notice is filed pursuant to the provisions of this Act and for the purpose of obtaining the benefits thereof and, within said 120-day period, if such owner shall have filed a uranium lease application as to the tract covered by such mining claim, must file with the Atomic Energy Commission a withdrawal of such uranium lease application or, if a uranium lease shall have issued pursuant thereto, a release of such lease, and must record a notice of the filing of such withdrawal or release in the county office wherein such notice or certificate of location shall have been filed for record.

(b) Labor performed or improvements made after the original location of and upon or for the benefit of any mining claim which shall be entitled to the benefits of this act under the provisions of subsection (a) of this section 1, shall be recognized as applicable to such mining claim for all purposes to the same extent as if the validity of such mining claim were in no respect dependent upon the provisions of this act.

(c) As to any land covered by any mining claim which is entitled to the benefits of this act under the provisions of subsection (a) of this section 1, any withdrawal or reservation of lands made after the original location of such mining claim is hereby modified and amended so that the effect thereof upon such mining claim shall be the same as if such mining claim had been located upon lands of the United States which, subsequent to July 31, 1939, and prior to the date of such withdrawal or reservation, were subject to location under the mining laws of the United States.

SEC. 2. (a) If any mining claim which shall have been located subsequent to December 31, 1952, and prior to December 11, 1953, and which shall be entitled to the benefits of this act, shall cover any lands embraced within any mining claim which

shall have been located prior to January 1, 1953, and which shall be entitled to the benefits of this act, then as to such area of conflict said mining claim so located subsequent to December 31, 1952, shall be deemed to have been located December 11, 1953.

(b) If any mining claim hereafter located shall cover any lands embraced within any mining claim which shall have been located prior to February 10, 1954, and which shall be entitled to the benefits of this act, then as to such area of conflict said mining claim hereafter located shall be deemed to have been located 121 days after the enactment of this act.

SEC. 3. (a) Subject to the conditions and provisions of this act and to any valid prior rights acquired under the laws of the United States, the owner of any pending uranium lease application or of any uranium lease shall have, for a period of 120 days after the date of enactment of this act, as limited in subsection (b) of this section 3, the right to locate mining claims upon the lands covered by said application or lease.

(b) Any rights under any such mining claim so hereafter located pursuant to the provisions of subsection (a) of this section 3 shall be subject to any rights of the owner of any mining claim which was located prior to February 10, 1954, and which was valid at the date of the enactment of this act or which may acquire validity under the provisions of this act. As to any lands covered by a uranium lease and also by a pending uranium lease application, the right of mining location under this section 3, as between the owner of said lease and the owner of said application, shall be deemed as to such conflict area to be vested in the owner of said lease. As to any lands embraced in more than one such pending uranium lease application, such right of mining location, as between the owners of such conflicting applications, shall be deemed to be vested in the owner of the prior application. Priority of such an application shall be determined by the time of posting on a tract then available for such leasing of a notice of lease application in accordance with paragraph (c) of the Atomic Energy Commission's Domestic Uranium Program Circular 7 (10 C. F. R. 60.7 (c)) provided there shall have been timely compliance with the other provisions of said paragraph (c) or, if there shall not have been such timely compliance, then by the time of the filing of the uranium lease application with the Atomic Energy Commission. Any rights under any mining claim located under the provisions of this section 3 shall terminate at the expiration of 30 days after the filing for record of the notice or certificate of location of such mining claim unless, within said 30-day period, the owner of the uranium lease application or uranium lease upon which the location of such mining claim was predicated shall have filed with the Atomic Energy Commission a withdrawal of said application or a release of said lease and shall have recorded a notice of the filing of such withdrawal or release in the county office wherein such notice or certificate of location shall be of record.

(c) Except as otherwise provided in subsections (a) and (b) of this section 3, no mining claim hereafter located shall be valid as to any lands which at the time of such location were covered by a uranium lease application or a uranium lease. Any tract upon which a notice of lease application has been posted in accordance with said paragraph (c) of said Circular 7 shall be deemed to have been included in a uranium lease application from and after the time of the posting of such notice of lease application: *Provided*, That there shall have been timely compliance with the other provisions of said paragraph (c) or, if there shall not have been such timely compliance, then from and after the time of the filing of a uranium lease application with the Atomic Energy Commission.

SEC. 4. Every mining claim or millsite hereafter located under the mining laws of the United States and every mining claim or millsite heretofore so located which shall be entitled to benefits under the first three sections of this act shall be subject to a reservation to the United States of all Leasing Act minerals and of the right (as limited in sec. 6 hereof) of the United States, its lessees, permittees, and licensees to enter upon the land covered by such mining claim or millsite and to prospect for, drill for, mine, treat, store, transport, and remove Leasing Act minerals and to use so much of the surface and subsurface of such mining claim or millsite as may be necessary for such purposes, and whenever reasonably necessary, for the purpose of prospecting for, drilling for, mining, treating, storing, transporting, and removing Leasing Act minerals on and from other lands; and any patent issued for any such mining claim or millsite and contain such reservation: *Provided, however*, That such reservation contained in the patent shall apply only to the lands included in said mining claim which, at the time of the issuance of such patent are—

(a) included in a permit or lease under the mineral leasing laws; or

(b) covered by an applicaiton or offer for a permit or lease filed under the mineral leasing laws; or

(c) known to be valuable for minerals subject to disposition under the mineral leasing laws.

SEC. 5. Subject to the conditions and provisions of this act, mining claims and millsites may hereafter be located under the mining laws of the United States which at the time of location are—

(a) included in a permit or lease issued under the mineral leasing laws; or

(b) covered by an application or offer for a permit or lease filed under the mineral leasing laws; or

(c) known to be valuable for minerals subject to disposition under the mineral leasing laws;

to the same extent in all respects as if such lands were not so included or covered or known.

SEC. 6. (a) Where the same lands are being utilized for mining operations and Leasing Act operations, each of such operations shall be conducted, so far as reasonably practicable, in a manner compatible with such multiple use.

(b) Any mining operations pursuant to rights under any unpatented or patented mining claim or millsite which shall be subject to a reservation to the United States of Leasing Act minerals as provided in this act, shall be conducted, so far as reasonably practicable, in a manner which will avoid damage to any known deposit of any Leasing Act mineral. Subject to the provisions of subsection (d) of this section 6, mining operations shall be so conducted as not to endanger or materially interfere with any existing surface or underground improvements, workings, or facilities which may have been made for the purpose of Leasing Act operations, or with the utilization of such improvements, workings, or facilities.

(c) Any Leasing Act operations on lands covered by an unpatented or patented mining claim or millsite which shall be subject to a reservation to the United States of Leasing Act minerals as provided in this act, shall be conducted, so far as reasonably practicable, in a manner which will avoid damage to any known deposit of any mineral not so reserved from such mining claim or millsite. Subject to the provisions of subsection (d) of this section 6, Leasing Act operations shall be so conducted as not to endanger or materially interfere with any existing surface or underground improvements, workings, or facilities which may have been made for the purpose of mining operations, or with the utilization of such improvements, workings, or facilities.

(d) If, upon petition of either the mining operator or the Leasing Act operator, any court of competent jurisdiction shall find that a particular use in connection with one of such operations cannot be reasonably and properly conducted without endangering or materially interfering with the then existing improvements, workings, or facilities of the other of such operations or with the utilization thereof, and shall find that under the conditions and circumstances, as they then appear, the injury or damage which would result from denial of such particular use would outweigh the injury or damage which would result to such then existing improvements, workings, or facilities or from interference with the utilization thereof if that particular use were allowed, then in such event such court may permit such use upon payment (or upon furnishing of security determined by the court to be adequate to secure payment) to the party or parties who would be thus injured or damaged, of an amount to be fixed by the court as constituting fair compensation for the then reasonably contemplated injury or damage which would result to such then existing improvements, workings, or facilities or from interference with the utilization thereof by reason of the allowance of such particular use.

(e) Where the same lands are being utilized for mining operations and Leasing Act operations, then upon request of the party conducting either of said operations, the party conducting the other of said operations shall furnish to and at the expense of such requesting party copies of any information which said other party may have, as to the situs of any improvements, workings, or facilities theretofore made upon such lands, and upon like request, shall permit such requesting party, at the risk of such requesting party, to have access at reasonable times to any such improvements, workings, or facilities for the purpose of surveying and checking or determining the situs thereof. If damage to or material interference with a party's improvements, workings, facilities, or with the utilization thereof shall result from such party's failure, after request, to so furnish to the requesting party such information or from denial of such access, such failure or denial shall relieve the requesting party of any liability for the damage or interference resulting by reason of such failure or denial. Failure of a party to furnish requested information or access shall not impose upon such party any liability to the requesting party other than for such costs of court and attorney's fees as may be allowed to the requesting party in enforcing by court action the obligations of this section as to the furnishing of information and access. The obligation hereunder of any party to furnish requested information shall be limited to map and survey information then available to such party with respect to the situs of improvements, workings, and facilities and the furnishing thereof shall not be deemed to constitute any representation as to the accuracy of such information.

SEC. 7. (a) Any applicant, offeror, permittee, or lessee under the mineral leasing laws may file in the office of the Secretary of the Interior, or in such office as the Secretary may designate, a request for publication of notice of such application, offer, permit, or lease, provided, expressly, that not less than 90 days prior to the filing of such request for publication there shall have been filed for record in the county Office of Record for the county in which the lands covered thereby are situate a notice of the

filing of such application or offer or of the issuance of such permit or lease which notice shall set forth the date of such filing or issuance, the name and address of the applicant, offeror, permittee, or lessee and the description of the lands covered by such application, offer, permit, or lease, showing section or sections of land surveyed, or, if such lands are unsurveyed, the section or sections of land which would probably be involved when the public lands surveyed are extended to such lands, or a tie by courses and distances to an approved United States Mineral Monument. The filing of such request for publication shall be accompanied by a certified copy of such recorded notice and an affidavit or affidavits of a person or persons over 21 years of age setting forth that the affiant or affiants have examined the lands involved in a reasonable effort to ascertain whether any person or persons were in possession of or engaged in the working of such lands or any part thereof, and, if no person or persons were found to be in possession of or engaged in the working of said lands or any part thereof on the date of such examination, setting forth such fact, or, if any person or persons were so found to be in possession or engaged in such working on the date of such examination, setting forth the name and address of each such person, unless affiant shall have been unable through reasonable inquiry to obtain information as to the name and address of any such person, in which event the affidavit shall set forth fully the nature and results of such inquiry.

Thereupon the Secretary of the Interior, or his designated representative, at the expense of the requesting person (who, prior to the commencement of publication, must furnish the agreement of the publisher to hold such requesting person alone responsible for charges of publication), shall cause notice of such application, offer, permit, or lease to be published in a newspaper having general circulation in the county in which the lands involved are situate.

Such notice shall describe the lands covered by such application, offer, permit, or lease, as provided heretofore in the notice to be filed in the office of record of the county in which the lands covered are situate, and shall notify whomever it may concern that if any person claiming or asserting under, or by virtue of, any unpatented mining claim, any right or interest in Leasing Act minerals as to such lands or any part thereof, shall fail to file in the office where such request for publication was filed (which office shall be specified in such notice) and within 150 days from the date of the first publication of such notice (which date shall be specified in such notice), a verified statement which shall set forth, as to such unpatented mining claim:

(1) The date of location;

(2) The book and page of recordation of the notice or certificate of location;

(3) The section or sections of the public-land surveys which embrace such mining claim; or if such lands are unsurveyed, either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument;

(4) Whether such claimant is a locator or purchaser under such location; and

(5) The name and address of such claimant and names and addresses so far as known to the claimant of any other person or persons claiming any interest or interests in or under such unpatented mining claim;

such failure shall be conclusively deemed (i) to constitute a waiver and relinquishment by such mining claimant of any and all right, title, and interest under such mining claim as to, but only as to, Leasing Act minerals, and (ii) to constitute a consent by such mining claimant that such mining claim and any patent issued therefor, shall be subject to the reservation specified in section 4 of this act, and (iii) to preclude thereafter any assertion by such mining claimant of any right or title to or interest in any Leasing Act mineral by reason of such mining claim.

If such notice is published in a daily paper, it shall be published in the Wednesday issue for nine consecutive weeks, or, if in a weekly paper, in nine consecutive issues, or, if in a semiweekly or triweekly paper, in the issue of the same day of each week for nine consecutive weeks.

Within 15 days after the date of first publication of such notice, the person requesting such publication (1) shall cause a copy of such notice to be personally delivered to or to be sent by registered mail addressed to each person in possession or engaged in the working of the land whose name and address is shown by an affidavit filed as aforesaid, and to each person who may have filed, as to any lands described in said notice, a request for notices, as provided in subsection (d) of this section 7, and (2) shall file in the office where said request for publication was filed an affidavit showing that copies have been so delivered or mailed.

(b) If any claimant under any unpatented mining claim which embraces any of the lands described in any notice published in accordance with the provisions of subsection (a) of this section 7 shall fail to file a verified statement, as above provided, within 150 days from the date of the first publication of such notice, such failure shall be conclusively deemed, except as otherwise provided in subsection (e) of this section 7, (i) to constitute a waiver and relinquishment by such mining claimant of any and all right, title, and interest under such mining claim as to, but only as to, Leasing Act minerals, and (ii) to constitute a consent by such mining claimant that such mining claim and any patent issued therefor, shall be subject to the reservation specified in section 4 of this act, and (iii) to preclude thereafter any assertion by such mining claimant of any right or title to or interest in any Leasing Act mineral by reason of such mining claim.

(c) If any verified statement shall be filed by a mining claimant as provided in subsection (a) of this section 7, then the Secretary of the Interior or his designated representative shall fix a time and place for a hearing to determine the validity and effectiveness of the mining claimant's asserted right or interest in Leasing Act minerals, which place of hearing shall be in the county where said interest or part of it is located, unless the mining claimant agrees otherwise. The procedures with respect to notice of such a hearing and the conduct thereof, and in respect to appeals shall follow the then established general procedures and rules of practice of the Department of the Interior in respect to contests or protests affecting public lands of the United States. If, pursuant to such a hearing the final decision rendered shall affirm the validity and effectiveness of any mining claim as to Leasing Act minerals then no subsequent proceeding under section 7 of this act shall have any force or effect upon any rights or interests under the said so affirmed mining claim. If at any time prior to a hearing the person requesting publication of notice and any person filing a verified statement pursuant to such notice shall so stipulate, then to the extent so stipulated, but only to such extent, no hearing shall be held with respect to rights asserted under that verified statement, and to the extent defined by the stipulation the rights asserted under that verified statement shall be deemed to be unaffected by that particular published notice.

(d) Any person claiming any right in Leasing Act minerals under or by virtue of any unpatented mining claim and desiring to receive a copy of any notice of any application, offer, permit, or lease which may be published as above provided in subsection (a) of this section 7 and which may affect lands embraced in such mining claim, may cause to be filed for record in the county office of record where the notice or certificate of location of such mining claim shall have been recorded, a duly acknowledged request for a copy of any such notice. Such request for copies shall set forth the name and address of the person requesting copies and shall also set forth, as to each mining claim under which such person asserts rights in Leasing Act minerals:

(1) the date of location;

(2) the book and page of the recordation of the notice or certificate of location; and

(3) the section or sections of the public land surveys which embrace such mining claim; or if such lands are unsurveyed, either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument.

Other than in respect to the requirements of subsection (a) of this section 7 as to personal delivery or mailing of copies of notices and in respect to the provisions of subsection (e) of this section 7, no such request for copies of published notices and no statement or allegation in such request and no recordation thereof shall affect title to any mining claim or to any land, or be deemed to constitute constructive notice to any person that the person requesting copies has, or claims, any right, title, or interest in or under mining claim referred to in such request.

(e) If any applicant, offeror, permittee, or lessee shall fail to comply with the requirements of subsection (a) of this section 7 as to the personal delivery or mailing of a copy of notice to any person, the publication of such notice shall be deemed wholly ineffectual as to that person or as to the rights asserted by that person and the failure of that person to file a verified statement, as provided in such notice, shall in no manner affect, diminish, prejudice, or bar any rights of that person.

SEC. 8. The owner or owners of any mining claim heretofore located may, at any time prior to issuance of patent therefor, waive and relinquish all rights thereunder to Leasing Act minerals. The execution and acknowledgment of such a waiver and relinquishment by such owner or owners and the recordation thereof in the office where the notice or certificate of location of such mining claim is of record shall render such mining claim thereafter subject to the reservation referred to in section 4 of this act and any patent issued therefor shall contain such a reservation, but no such waiver or relinquishment shall be deemed in any manner to constitute any concession as to the date of priority of rights under said mining claim or as to the validity thereof.

SEC. 9. The Atomic Energy Act is hereby amended as follows:

(a) Section 5 (b) (5) is revised to read:

(5) Acquisition: The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this act, to purchase, take, requisition, condemn, or otherwise acquire—

(A) supplies of source materials or any interest in real property containing deposits of source materials, and

(B) rights to enter upon any real property deemed by it to have possibilities of containing deposits of source materials and to conduct prospecting and exploratory operations for such deposits.

Any purchase made under this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes

(U. S. C., title 41, sec. 5) upon certification by the Commission that such action is necessary in the interest of the common defense and security, or upon a showing that advertising is not reasonably practicable, and partial and advance payments may be made thereunder. The Commission may establish guaranteed prices for all source materials delivered to it within a specified time. Just compensation shall be made for any property or interest in property purchased, taken, requisitioned, condemned, or otherwise acquired under this paragraph.

(b) Section 5 (b) (6) is revised to read:

(6) Operations on lands belonging to the United States: The Commission is authorized, to the extent it deems necessary to effectuate the provisions of this act, to issue leases or permits for prospecting for, exploration for, mining, or removal of deposits of source materials (or for any or all of these purposes) in lands belonging to the United States.

(c) Section 5 (b) (7) is revised to read:

"(7) Public lands: No individual, corporation, partnership, or association, which had any part, directly or indirectly, in the development of the atomic bomb project, may benefit by any location, entry, or settlement upon the public domain made after such individual, corporation, partnership, or association took part in such project, if such individual, corporation, partnership, or association, by reason of having had such part in the development of the atomic bomb project, acquired confidential official information as to the existence of deposits of such as uranium, thorium, or other materials in the specific lands upon which such location, entry, or settlement is made, and subsequent to the date of the enactment of this act made such location, entry, or settlement or caused the same to be made for his, or its, or their benefit. In cases where any patent, conveyance, lease, permit, or other authorization has been issued, which reserved to the United States source materials and the right to enter upon the land and prospect for, mine, and remove the same, the head of the department or agency which issued the patent, conveyance, lease, permit, or other authorization shall, on application of the holder thereof, issue a new or supplemental patent, conveyance, lease, permit, or other authorization without such reservation."

(d) Notwithstanding the provisions of the Atomic Energy Act, and particularly section 5 (b) 7 thereof, prior to its amendment hereby, or the provisions of the act of August 12, 1953 (67 Stat. 539), and particularly section 3 thereof, any mining claim, heretofore located under the mining laws of the United States, for, or based upon a discovery of a mineral deposit which is a fissionable source material and which, except for the possible contrary construction of said Atomic Energy Act, would have been locatable under such mining laws, shall, insofar as adversely affected by such possible contrary construction, be valid and effective, in all respects to the same extent as if said mineral deposit were a locatable mineral deposit other than a fissionable source material.

SEC. 10. As used in this act "mineral-leasing laws" shall mean the act of October 20, 1914 (38 Stat. 741); the act of February 25, 1920 (41 Stat. 437); the act of April 17, 1926 (44 Stat. 301); the act of February 7, 1927 (44 Stat. 1057); and all acts heretofore or hereafter enacted which are amendatory of or supplementary to any of the foregoing acts; leasing act minerals shall mean all minerals which, upon the effective date of this act, are provided in the mineral-leasing laws to be disposed of thereunder; leasing act operations shall mean operations conducted under a lease, permit, or license issued under the mineral-leasing laws in or incidental to prospecting for, drilling for, mining, treating, storing, transporting, or removing leasing-act minerals; mining operations shall mean operations under any unpatented or patented mining claim or millsite in or incidental to prospecting for, mining, treating, storing, transporting, or removing minerals other than leasing-act minerals and any other use under any claim of right or title based upon such mining claim or millsite; leasing-act operator shall mean any party who shall conduct leasing-act operations; mining operator shall mean any party who shall conduct mining operations; Atomic Energy Act shall mean the act of August 1, 1946 (60 Stat. 755), as amended: Atomic Energy Commission shall mean the United States Atomic Energy Commission established under the Atomic Energy Act or any amendments thereof; fissionable source material shall mean uranium, thorium, and all other materials referred to in section 5 (b) (1) of the Atomic Energy Act as reserved or to be reserved to the United States; uranium lease application shall mean an application for a uranium lease filed with said Commission with respect to lands which would be open for entry under the mining laws except for their being lands embraced within an offer, application, permit, or lease under the mineral-leasing laws or lands known to be valuable for minerals leasable under those laws; uranium lease shall mean a uranium-mining lease issued by said Commission with respect to any such lands; and person shall mean any individual, corporation, partnership, or other legal entity.

SEC. 11. If any provision of this act, or the application of such provision to any person or circumstances, is held unconstitutional, invalid, or unenforcible, the remainder of this act or the application of such provision to persons or circumstances other than laws to which it is held unconstitutional, invalid, or unenforcible, shall not be affected thereby.

Mr. CORDON. I move that the Senate disagree to the amendment of the House, request a conference with the House on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to, and the presiding officer appointed Mr. MILLIKIN, Mr. WATKINS, Mr. BARRETT, Mr. MURRAY, and Mr. ANDERSON conferees on the part of the Senate.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, its reading clerk, announced that the House had passed, without amendment, the following bills of the Senate:

S. 95. An act for the relief of Mrs. Donka Kourteva Dikova (Dikoff) and her son Nicola Marin Dikoff;

S. 98. An act for the relief of (Mrs.) Betty Thornton or Jozsefne Toth;

S. 102. An act for the relief of Francesco Cracchiolo;

S. 110. An act for the relief of Christopher F. Jako;

S. 203. An act for the relief of Yvonne Linnea Colcord;

S. 222. An act for the relief of Mrs. Dean S. Roberts (nee Braun);

S. 246. An act for the relief of Gerrit Been;

S. 267. An act for the relief of Pantelis Morfessis;

S. 278. An act for the relief of Szyga (Saul) Morgenstern;

S. 308. An act for the relief of Filolaos Tsolakis and his wife, Vassiliki Tsolakis;

S. 496. An act for the relief of Doctor Samson Sol Flores and his wife, the former Cecilia T. Tolentino;

S. 552. An act for the relief of Anna Urwicz;

S. 587. An act for the relief of Carlos Fortich, Jr.;

S. 661. An act for the relief of Nino Sabino Di Michele;

S. 790. An act for the relief of Irene J. Halkis;

S. 794. An act for the relief of Paulus Youhanna Benjamen;

S. 795. An act for the relief of Josef Radziwill;

S. 830. An act for the relief of Samuel, Agnes, and Sonya Lieberman;

S. 841. An act for the relief of Dionysio Antypas;

S. 843. An act for the relief of Rabbi Eugene Feigelstock;

S. 855. An act for the relief of Kirill Mihailovich Alexeev, Antonina Ivanovna Alexeev, and minor children Victoria and Vladimir Alexeev;

S. 891. An act for the relief of Albina Sicas;

S. 912. An act for the relief of Bruno Ewald Paul and Margit Paul;

S. 915. An act for the relief of Augusta Bleys (also known as Augustina Bleys);

S. 917. An act for the relief of Stefan Burda, Anna Burda, and Nikolai Burda;

S. 937. An act for the relief of Virginia Grande;

S. 945. An act for the relief of Moshe Gips;

S. 986. An act for the relief of Mrs. Ishi Washburn;

S. 1129. An act for the relief of Jozo Mandic;

S. 1267. An act for the relief of Irene Kramer and Otto Kramer;

S. 1313. An act for the relief of Olga Balabanov and Nicola Balabanov;

S. 1362. An act for the relief of Rev. Ishai Ben Asher;

S. 1477. An act for the relief of Gerhard Nicklaus;

S. 1490. An act for the relief of David Maisel (David Majzel) and Bertha Maisel (Berta Pieschansky Majzel);

S. 1841. An act for the relief of Carlo (Adiutore) D'Amico;

S. 1850. An act for the relief of Dr. John D. MacLennan;

S. 1860. An act for the relief of Amalia Sandrovic;

S. 1954. An act for the relief of Anthony N. Goraieb;

S. 2009. An act for the relief of Mrs. Edward E. Jex;

S. 2036. An act for the relief of Joseph Robin Groninger;

S. 2065. An act for the relief of Mr. and Mrs. Hendrik Van der Tuin;

S. 2677. An act for the relief of Michio Yamamoto;

S. 2820. An act for the relief of Mrs. Erika Gisela Osteraa; and

S. 2960. An act for the relief of Barbara Herta Geschwandtner.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5185) for the relief of Klyce Motors, Inc.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7839) to aid in the provision and improvement of housing, the elimination and prevention of slums, and the conservation and development of urban communities.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills and joint resolution, and they were signed by the President pro tempore:

S. 1381. An act to amend the Agricultural Act of 1949;

S. 2367. An act to amend the act of June 29, 1935 (the Bankhead-Jones Act), as amended, to strengthen the conduct of research of the Department of Agriculture;

S. 2583. An act to indemnify against loss all persons whose swine were destroyed in July 1952 as a result of having been infected with or exposed to the contagious disease vesicular exanthema;

S. 2766. An act to amend section 7 (d) of the Internal Security Act of 1950, as amended;

S. 2786. An act granting the consent and approval of Congress to the southeastern interstate forest fire protection compact;

S. 3561. An act authorizing the Administrator of Veterans' Affairs to convey certain property to the Armory Board, State of Utah;

S. 3630. An act to permit the city of Philadelphia to further develop the Hog Island tract as an air, rail, and marine terminal by directing the Secretary of Commerce to release the city of Philadelphia from the fulfillment of certain conditions contained in the existing deed which restrict further development;

H. R. 130. An act to amend section 1 of the act approved June 27, 1947 (61 Stat. 189);

H. R. 5185. An act for the relief of Klyce Motors, Inc.;

H. R. 6786. An act authorizing the Secretary of the Interior to purchase improvements or pay damages for removal of improvements located on public lands of the United States in the Palisades project area, Palisades reclamation project, Idaho;

H. R. 8983. An act to provide for the conveyance of certain lands by the United States to the city of Muskogee, Okla.;

H. R. 9005. An act to continue the effectiveness of the act of July 17, 1953 (67 Stat. 177); and

S. J. Res. 96. Joint resolution to strengthen the foreign relations of the United States by establishing a Commission on Governmental Use of International Telecommunications.

ENROLLED BILLS AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, July 20, 1954, he presented to the President of the United States the following enrolled bills and joint resolution:

S. 1381. An act to amend the Agricultural Act of 1949;

S. 2367. An act to amend the act of June 29, 1935 (the Bankhead-Jones Act), as amended, to strengthen the conduct of research of the Department of Agriculture;

S. 2583. An act to indemnify against loss all persons whose swine were destroyed in July 1952 as a result of having been infected with or exposed to the contagious disease vesicular exanthema;

S. 2766. An act to amend section 7 (d) of the Internal Security Act of 1950, as amended;

S. 2786. An act granting the consent and approval of Congress to the southeastern interstate forest fire protection compact;

S. 3561. An act authorizing the Administrator of Veterans' Affairs to convey certain property to the Armory Board, State of Utah;

S. 3630. An act to permit the city of Philadelphia to further develop the Hog Island tract as an air, rail, and marine terminal by directing the Secretary of Commerce to release the city of Philadelphia from the fulfillment of certain conditions contained in the existing deed which restrict further development; and

S. J. Res. 96. Joint resolution to strengthen the foreign relations of the United States by establishing a Commission on Governmental Use of International Telecommunications.

REVISION OF THE ATOMIC ENERGY ACT OF 1946

The Senate resumed the consideration of the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

Mr. HILL. Mr. President, those of us who were privileged to hear the speech of the distinguished Senator from Mississippi [Mr. STENNIS] know how powerfully he presented the argument that under existing law or under section 164 as written into the bill reported by the Joint Committee on Atomic Energy the Atomic Energy Commission would not have authority to enter into the Dixon-Yates proposed contract. The speech of the Senator from Mississippi was one of the most powerful and able I have heard since I first became a Member of this body. We know that other Senators, including the Senator from Kentucky [Mr. COOPER] in his very fine and challenging address, the Senator from Oklahoma [Mr. MONRONEY], in his very strong and able address, and the distinguished junior Senator from Tennessee [Mr. GORE], in his brilliant and devastating speech yesterday, drove home again and again the proposition that there was and is no authority in the Atomic Energy Commission to enter into the proposed Dixon-Yates contract. That fact has become so crystal clear that the distinguished Senator from Michigan [Mr. FERGUSON] has offered his amendment in order to try to put into the law the authority for the Atomic Energy Commission to enter into the Dixon-Yates contract.

However, the amendment of the distinguished Senator from Michigan goes much further than the Dixon-Yates proposal. It will be recalled that the Dixon-Yates proposal is to make a contract for some 600,000 kilowatts of power, whereas the Ferguson amendment seeks to authorize the Atomic Energy Commission to enter into a contract or contracts for power in the amount the Atomic Energy Commission is now receiving, or has a contract to receive, from the Tennessee Valley Authority. That amount of power is not 600,000 kilowatts, but some 3 million kilowatts of power.

So the Ferguson amendment is five times as bad as the Dixon-Yates proposal. It would open the door wide for the Atomic Energy Commission to become a broker for the Tennessee Valley Authority, for the purchase of power again and again and again, up to what would now be some 3 million kilowatts of power.

And, of course, if in the future the Atomic Energy Commission should purchase additional power from the Tennessee Valley Authority, then under the Ferguson amendment, the Atomic Energy Commission would be authorized to make a contract along the lines of the Dixon-Yates proposal, for an amount equal to the additional amount of power which the Atomic Energy Commission might purchase from the Tennessee Valley Authority.

No one can tell just how wide the Ferguson amendment would open the door for the prostitution of this most delicate, vital agency of the Government, the Atomic Energy Commission.

The substitute amendment offered by the distinguished junior Senator from North Carolina [Mr. ERVIN] adopts in toto the provisions of the Ferguson amendment and then goes a step further, as I understand the amendment. There has been no opportunity to analyze the amendment of the Senator from North Carolina carefully, or to give it serious consideration. However, as I understand the amendment, in addition to adopting all the evils of the Ferguson amendment, it provides that a contract entered into for power under the Ferguson amendment shall be sent to the Joint Committee on Atomic Energy for a period not to exceed 30 days. It makes no provision for any check on a contract by the Joint Committee on Atomic Energy. It makes no provision for veto power in the Joint Committee on Atomic Energy, so far as any contract is concerned. The contract would lie there for 30 days, unless the Joint Committee on Atomic Energy should advise the Atomic Energy Commission that it did not desire to have it lie there for 30 days. At the end of the 30-day period the contract would become effective.

So there is no check; there is no power of veto; there is no authority under this amendment for the Joint Committee on Atomic Energy to say, "That contract cannot be entered into," or "That contract must be modified, changed, or amended." In fact, so far as the Dixon-Yates proposal is concerned, although that contract has never been presented in all its details, the proposal itself has been before the Joint Committee on Atomic Energy. The fact is that the Joint Committee on Atomic Energy had 2 days of hearings on the proposal. The committee devoted June 17 and 18 to the hearing of witnesses and the taking of testimony on the Dixon-Yates proposal. The proposal that the Joint Committee on Atomic Energy shall have these contracts presented to it, means nothing; and, so far as the Dixon-Yates proposal is concerned, it is nothing more nor less than a moot question. The Joint Committee on Atomic Energy has had that proposal before it. The joint committee did not see fit to take any action in any way or to advise the Atomic Energy Commission that it thought the contract ought not to be made, or that it should be modified, amended, or changed in some respects. The fact that the Joint Committee on Atomic Energy reported the pending legislation and that it carries section 164 might well be construed as being, on the part of the majority of that committee, a green light for the Atomic Energy Commission to proceed with the making of this contract.

Mr. GORE. Mr. President, will the Senator yield?

Mr. HILL. I yield to my friend from Tennessee.

Mr. GORE. I have before me the amendment offered by the junior Senator from North Carolina. I must say that as I interpret it, it does not comport with the explanation given to the Senate by the junior Senator from North Carolina. I should like to read to the Senator one sentence, exclusive of the parenthetical sentence contained therein:

> Any contract hereafter entered into by the Commission pursuant to this section shall be submitted to the joint committee, and a period of 30 days shall elapse while Congress is in session, before the contract of the Commission shall become effective.

There is a parenthetical sentence injected within that sentence, which reads as follows:

> (In computing such 30 days, there shall be excluded the days in which either House is not in session because of adjournment for more than 30 days.)

Mr. President, the question which I should like to raise with the senior Senator from Alabama is just how the Atomic Energy Commission would act when Congress was in sine die adjournment.

Mr. HILL. I will say to my distinguished friend from Tennessee, as I said in the beginning, that the amendment has just been offered. There has been no opportunity afforded to examine it or to carefully consider it. I suppose, although I do not know, that the provision about waiving the time refers to any time when the joint committee may wish to waive the time when Congress is not in session. I do not know, but I think it may be implied, that perhaps that provision was put in the amendment with the thought in mind that Congress may not always be in session—which of course is true—and if Congress should not be in session, the committee could waive the time.

Mr. GORE. Mr. President, will the Senator yield?

Mr. HILL. I yield to my distinguished friend from Tennessee.

Mr. GORE. As I interpret the language—and I wish to suggest to the Senator from Alabama that I, too, have only now had an opportunity to see the text—it means that in the event the Commission entered into a contract after Congress had adjourned, no action could be taken on the contract until Congress met in January, and then the 30-day period spelled out herein would begin to operate.

Mr. HILL. From what the distinguished junior Senator from North Carolina [Mr. ERVIN] said about his amendment, I think the construction of the Senator from Tennessee is correct. There is a further modification which I wish the Senator from Tennessee would read. It relates to the waiving of the time. That might throw some light on the subject. From what the distinguished junior Senator from North Carolina said about the amendment, I made the interpretation that the distinguished Senator from Tennessee has made. However, there is a further provision about waiving the time. The question is whether the provision with reference to waiving the time could be operative if Congress were not in session, after it had adjourned sine die.

Mr. GORE. I shall read that proviso. It reads:

> *Provided, however,* That the joint committee, after having received the proposed contract, may by resolution in writing, waive the conditions of or all or any portion of such 30-day period.

Mr. HILL. Does the Senator believe there would have to be a formal meeting of the joint committee?

Mr. GORE. If the committee had a meeting for that purpose.

Mr. HILL. It would have to have a formal meeting. I notice the words "in writing."

Mr. GORE. It says "by resolution."

Mr. HILL. By resolution. Would the Senator construe that to mean that there would have to be a resolution in writing, and that there would have to be a formal meeting of the committee, in which case the chances would be that that provision would not affect the situation, perhaps, if Congress were in adjournment?

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. HILL. I yield to my friend from Florida.

Mr. HOLLAND. Mr. President, I do not pretend to speak with the authority the author of the proposed amendment, the distinguished junior Senator from North Carolina [Mr. ERVIN] can speak, since he is the sponsor and author of it. However, I have discussed the amendment with him, and I heard his explanation of it on the floor earlier in the afternoon.

My understanding is that the distinguished junior Senator from North Carolina is trying to get entirely away from any thought that Congress was seeking to exercise, through its Joint Committee on Atomic Energy, a veto power, and he thereby was trying to avoid any constitutional question. He was seeking to create a situation by this amendment under which, if the joint committee required it, 30 full days, as stated in the amendment, while Congress was in session, would be allowed to the joint committee to offer and have passed legislation preventing a contract taking effect in the event the joint committee felt the contract was unwise and unfortunate, or should be opposed.

It was my understanding that the provision with reference to the waiver was to allow the joint committee, if it was in full approval of a contract as proposed, to meet even out of session and to adopt a resolution in writing waiving its right to have the contract held up for 30 days of consideration, during a session of Congress.

That was my understanding of the amendment. Upon a rereading of it, after having a copy handed to me by the distinguished Senator from Tennessee [Mr. GORE], I feel reasonably sure that that is the proper interpretation.

Mr. HILL. Of course, it would take a formal meeting of the joint committee when Congress was in session——

Mr. GORE. Yes.

Mr. HILL. Just as it would take a formal meeting to act when Congress was not in session. In other words, it would require a formal meeting of the committee to act on the matter.

If Congress were in session, and the committee did not act within 30 days, then the contract would be effective. If Congress were not in session, the contract could not become effective until Congress reconvened and 30 days had expired, unless during the adjournment of Congress there was a formal, official meeting of the joint committee, with a resolution in writing passed by a majority of the committee, with a quorum present, I would say.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. HILL. I yield.

Mr. HOLLAND. The Senator from Alabama has correctly stated the contents of the amendment, at least insofar as they are understood by the Senator from Florida.

Mr. GORE. Mr. President, will the Senator yield?

Mr. HILL. I yield.

Mr. GORE. I concur in the interpretation of the amendment which the senior Senator from Florida has given and which the senior Senator from Alabama has given. However, it is difficult of interpretation and far reaching in its effect. Obviously, it needs to be printed and made available to each Senator for study before the Senate shall be called upon to act.

Mr. HILL. That is correct. Surely my distinguished and brilliant friend from Tennessee, who has given so much time and thought to this matter, will agree that, in respect to the Dixon-Yates proposal, it is more or less a moot question so far as the joint committee is concerned. It held hearings on the proposal on June 17 and 18. The joint committee did not see fit to take any action to advise the Atomic Energy Commission that it did not think the contract should be made or, if such contract were made, that certain amendments or modifications should be made in the contract.

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. HILL. I yield to my distinguished friend, the vice chairman of the Joint Committee on Atomic Energy.

Mr. HICKENLOOPER. I thought perhaps, as a member of the joint committee, I might throw some light on the matter which the Senator is discussing.

Mr. HILL. I should be delighted to have the vice chairman make comment on the situation.

Mr. HICKENLOOPER. I call attention to two places in the bill before the Senate. I call attention to section 51, on page 23, and to section 61, on page 31, in which provisions for the submission of certain proposed actions of the Commission to the joint committee are set forth.

The reason why I invite the Senator's attention to that is that those provisions, which are, I believe, identical, or substantially the same as in the proposed amendment which the Senator is discussing, were given considerable study and thought by the joint committee, and

the interpretation of the meaning of the provision with regard to reference to the joint committee and the waiver of the time is as stated by the Senator from Alabama, and as confirmed in his opinion and understanding by the Senator from Florida. I merely wanted to confirm the fact that that was the approach of the joint committee. As to other sections which contain similar provisions, the interpretation of the meaning of the provisions is as stated a moment ago. The joint committee has considered the verbiage of the proposed amendment. I merely wish to confirm the interpretation.

Mr. HILL. I thank the distinguished Senator from Iowa for the information he has given us and for the contribution he has made.

I see no objection to the provision about contracts being referred to the joint committee, but so far as the Dixon-Yates proposal is concerned, the provision is meaningless, because it has been before the Joint Committee on Atomic Energy, which committee held hearings on it for 2 days, June 17 and June 18. If anyone is taking consolation from the fact that this amendment, if it becomes a part of the law, may in any way be effective in stopping what so many of us consider to be an outrageous contract, there is no basis for such consolation. The damage is done, the door is opened, and the basis for the Dixon-Yates proposal, of course, is laid in the first part of the amendment of the Senator from North Carolina, which, as I understand, is a duplication of the amendment of the Senator from Michigan. It seeks to give authority to the Atomic Energy Commission to enter into the Dixon-Yates proposed contract, and then to go even further than that, as I have said, and enter into a contract, or many contracts, for an amount of power five times as large as that which would be provided for under the Dixon-Yates proposed contract.

On yesterday, the distinguished Senator from Tennessee [Mr. GORE], in what I have referred to as a brilliant and devastating attack on the proposed contract, one of the most brilliant and devastating attacks I have heard since I have been a Member of the Senate, some 18 years, laid bare the Dixon-Yates proposal with all its iniquities and all its outrageous provisions.

Mr. GORE. Mr. President, will the Senator from Alabama yield?

Mr. HILL. I yield to my good friend from Tennessee.

Mr. GORE. Perhaps it would be better if I were absent when such complimentary remarks are made, but since I am present I wish to thank the Senator from Alabama, but I feel that his generous remarks are undeserved.

Mr. HILL. As the distinguished Senator from Tennessee knows, it was my privilege to be on the floor and to hear practically every word of his very great and powerful address on yesterday. I reiterate that I have heard no more brilliant and devastating attack than that made yesterday by the Senator from Tennessee in exposing the iniquities and outrages embodied in the Dixon-Yates proposal.

Mr. President, I shall not at this time carry coals to Newcastle by going over that which the Senator from Tennessee covered in such masterly fashion on yesterday. I wish to say, however, that since the debate started, the management of the Tennessee Valley Authority has been accused of overcharges or unwarranted and exceptionally high rates in contracts it has made with the Atomic Energy Commission. The reason for such accusation is clear. The Tennessee Valley Authority refused to bear false witness. Its experts, members of its staff, testified before the Joint Committee on Atomic Energy on June 17 and June 18. There, in response to questions of members of the committee they gave their judgment as to the costs the Government would assume if the so-called Dixon-Yates proposal were accepted as a substitute for TVA's proposal to add generating capacity in its region by the construction of a plant at Fulton, Tenn., and the addition of units to the existing plant. Having given that testimony, they are now subject to attack.

We have had presented here memorandums and statements prepared by the AEC, alleging that TVA has overcharged the AEC for power it delivers to their installation. The charge, Mr. President, is not true. A little later in my remarks I shall refer to the charge in greater detail.

We find, also, that the Bureau of the Budget has entered into this campaign against TVA. A document is circulated among Members of the Senate. One charge, particularly, against TVA attracts my personal attention. The Bureau of the Budget suggests that TVA is making power available in areas beyond its statutory limitations, beyond the jurisdiction prescribed in the Tennessee Valley Act by the Congress of the United States. That charge, Mr. President, is also untrue, and in my remarks I shall deal with it a little later and in more detail.

All these charges, I may say, are a part of a smokescreen—a smokescreen to protect the AEC from detection as it prepares to enter into a contract which it has no authority whatsoever to execute. As I have said, the introduction of the Ferguson amendment confirms the fact that the AEC has no such authority to enter into a contract which is entirely outside the field of the AEC's legitimate responsibilities, a contract which is ordered to be consummated for the single purpose of dismembering TVA, a first step to TVA's destruction.

All these charges, Mr. President, I shall discuss in more detail, but before I do so let me recite a little history, as dispassionately as I can, to explain how this amazing Dixon-Yates proposal happens to be the subject of discussion on the Senate floor at this time.

Before Senators who are not closely in touch with the condition reach their conclusions on the basis of misinformation, let me describe the origin of the present controversy.

In the autumn of 1952, the Board of TVA presented to the Budget Bureau an estimate of its appropriation requirements for fiscal 1954. Thirty million dollars of the total was requested in order that TVA might begin construction of a steam generating plant in fiscal 1954, the year just ended. That is the plant which has been referred to a good many times on the floor as the Fulton plant, which derived its name from the fact that it was to be built at or near Fulton, Tenn.

The request, I may say, was supported by a thorough analysis of the growth of the load expected in Memphis, and the location, as I have said, was selected at Fulton, Tenn., some 30 miles north of Memphis.

The Bureau of the Budget recommended the appropriation to Congress. In January, after the new administration had taken office, a reexamination of the budget previously submitted was undertaken. In the revision, the new administration decided to drop from the budget the item for the Fulton plant. The reason given, as I recall, was that time was desired in which to study the load growth estimates submitted by TVA.

There was an effort then, mild compared with the current operation, to discredit the load growth estimates of TVA in the past. But another year's study has confirmed TVA's estimates and their correctness, and has convinced the new administration that the load growth estimated by TVA must be met.

In the fall of 1953—last fall—the TVA Board again appeared before the Bureau of the Budget, and the construction of the Fulton plant was recommended once more. Once more it was rejected. The rejection was the same, but the reason advanced for the rejection was different. The reason advanced was presented in the President's budget message, which came to the Senate in January of this year. There was no effort this year to dispute the fact that the load growth in Memphis and the surrounding area was certain. The President suggested, however, that as an alternative to recommending an appropriation to begin construction of the Fulton plant, the possibility of meeting the situation in another way should be explored.

The AEC would be directed to discover whether other sources of power might be found for its operations—the AEC operations—at Paducah, Ky., so that TVA might be relieved of from 500,000 to 600,000 kilowatts of its total commitment of 1,205,000 kilowatts to AEC. Then TVA would be able to recapture—to take back—that much of its capacity at the Shawnee plant, a TVA plant at Paducah, Ky., which had been built by TVA at the request of the Atomic Energy Commission, to supply power to the Atomic Energy Commission's Paducah plant. Since TVA would be able to recapture that much of its capacity at Shawnee, and to use that energy to meet the growing loads of its system, the construction of the Fulton plant need not begin.

Apparently the Atomic Energy Commission made an effort to do what the President suggested in his budget message. That is, the Atomic Energy Commission evidently endeavored to find another supply of power for the Paducah atomic-energy plant, in order to relieve the TVA of 600,000 kilowatts being pro-

duced at the TVA Shawnee plant, which, as I have explained, was the plant which TVA built at the request of AEC to supply power for the AEC at the AEC's Paducah plant.

The Dixon-Yates combine made an offer to provide that power—power not to the TVA; power to the AEC.

Mr. GORE. Mr. President, will the Senator yield?

Mr. HILL. I yield to my friend, the distinguished Senator from Tennessee.

Mr. GORE. Is it not reasonable to say, then, that the only relevant comparison of proposals is a comparison of the TVA proposal to build a steam plant at the Fulton site, near Memphis, and the Dixon-Yates proposal to build a steam plant in Arkansas, near Memphis? It is not relevant to compare the Dixon-Yates proposal with Shawnee, or with anything else, except the proposal at Fulton.

Mr. HILL. Exactly, because the proposed Dixon-Yates plant at West Memphis, Ark., and the Fulton, Tenn., plant, proposed to be built by TVA, would be similar plants, built, perhaps, under approximately similar conditions, to serve similar loads, or similar types of loads, and similar customers.

Mr. GORE. As a matter of fact, to serve an identical load.

Mr. HILL. To serve an identical load; exactly.

Mr. GORE. Therefore, will not the Senator agree that all the other irrelevant comparisons submitted to Congress serve only to confuse, rather than to clarify, and to becloud the choice which the Bureau of the Budget and the President made between the two?

Mr. HILL. The Senator is exactly correct. Any comparison other than the comparison suggested by the Senator from Tennessee, which is a comparison between the Dixon-Yates proposed plant at West Memphis, Ark., on the one hand, and the proposed Fulton TVA plant on the other hand, would be entirely out of line, because it would deal with different facts, with different situations, with different conditions, with different customers, and with different needs for power.

To illustrate what I mean by needs for power, a plant serving the Atomic Energy Commission at Paducah, Ky., must have power on the line not 23 hours out of 24, but 24 hours out of 24. There must be a full power load 24 hours out of 24.

A plant serving, let us say, the city of Memphis, or perhaps producing private power for REA—merely general consumers—would have what are called peak hours, when the demand would be great, and then off-peak hours, when there would not be so much demand for the power.

So, as the Senator from Tennessee has so well said, there can be but one really true, honest comparison, and that is between the proposed Fulton plant and the proposed Dixon-Yates West Memphis plant.

Mr. GORE. Will not the Senator go further and say that the only comparison which was submitted to the joint committee, the comparison upon which the Bureau of the Budget submitted its estimates, upon which the Federal Power Commission submitted its estimates, and upon which the Atomic Energy Commission and the TVA submitted their estimates, all related to these two alternatives?

Mr. HILL. The Senator is exactly correct. The estimates were submitted relating to those two alternatives because there was no other alternative. It was a question of one of those two alternatives. There were no other alternatives, any more than if an attempt had been made to relate one of those alternatives to, perhaps, a powerplant in Elmira, N. Y., or somewhere else.

As I have said, the Dixon-Yates combine made an offer to provide the power which would have made it possible, had it been supplied, to let TVA recapture about 600,000 kilowatts of power which TVA is under contractual obligation to supply the Atomic Energy Commission at its Paducah plant.

The Dixon-Yates group offered to build a plant at West Memphis, Ark., about 200 miles from the Paducah facilities of the AEC, and enter into a contract with AEC to supply power for AEC. TVA, under the Dixon-Yates proposal, would simply transmit the energy over its lines to the Atomic Energy Commission's installations.

According to the document now circulated by the Bureau of the Budget, the first offer—that is, the offer I have been speaking of—presented by the Dixon-Yates combine was rejected because, quoting the exact language of the Bureau of the Budget, "it was believed to involve excessive costs to the Government." A revised proposal from Dixon-Yates was obtained in an effort to more nearly equal what TVA could do. The revised proposal was analyzed. The analysis proved that an extra annual cost of $2,923,000—nearly $3 million—every year would be involved to AEC if the proposal were accepted and a contract were made with Dixon-Yates to replace a portion of the existing contract with TVA for TVA's Shawnee power.

The AEC must have thought the cost excessive, because it did not want to accept the proposal. I may say to the Senate all that was brought out in the hearings before the joint committee. All one has to do is read the testimony and the letter from Commissioner Smyth, which the distinguished Senator from Tennessee read on yesterday, to see exactly why the proposal was not accepted—namely, because it meant $3 million of extra cost to the Atomic Energy Commission.

The fact is that whereas the AEC representative estimated an extra cost of $3 million, the TVA arrived at an estimate of more than $4 million a year in extra cost to the Government. I think it fair to assume that the AEC, though presently engaged in an attack on the TVA, recognized in fact that TVA's estimates were more likely to be correct than the estimates of the AEC or of the Bureau of the Budget. At any rate, the comparison was made, a table, dated April 21, was prepared, and the proposal was not accepted.

That was the point at which the Atomic Energy Commission should have bowed out of the picture. It should have advised the President of the United States that it was not feasible and not economical for AEC to relieve TVA of any portion of its contractual commitment at Shawnee; and the Bureau of the Budget should then, with Presidential approval, have submitted an estimate of the amount required to add capacity to the TVA power system.

If the AEC had chosen to accept the proposal as a means of providing power for its operations, we know the AEC could have been, and no doubt would have been, subject to criticism for extravagance. The business judgment of its managers would have been in question. But at least the Congress of the United States would have been spared the picture now before it of a proposal which would prostitute the powers and pervert the purposes for which the Atomic Energy Commission was established.

The Dixon-Yates proposal now pending is not designed to provide power which the Atomic Energy Commission proposes to substitute for Shawnee power at Paducah. AEC does not propose to relieve TVA of a single kilowatt of its commitment to provide power from the TVA Shawnee plant.

AEC is now proposing to have 2 contracts for the same block of power, 1 a contract with TVA, which it now has, to deliver power to its Paducah plant; another contract with Dixon-Yates for 600,000 kilowatts, which is completely surplus to the needs of AEC—not 1 kilowatt of which does the AEC need, and not 1 kilowatt of which does the AEC propose to take.

Mr. MURRAY. Mr. President, will the Senator yield?

Mr. HILL. I yield to the Senator from Montana.

Mr. MURRAY. Will the power which is to be provided by Dixon-Yates be transmitted over the transmission lines of the TVA?

Mr. HILL. It will go over the transmission lines of the TVA, but not to the Atomic Energy Commission. It will simply go to the customers of TVA within the Memphis area of the TVA territory. Not one kilowatt will go to the AEC.

Mr. MURRAY. Will the TVA receive any compensation for transmitting the power, as do the private utilities? The private utilities sometimes charge very high rates for transmission of power over their lines. I was wondering if the TVA would be given any credit for the transmission of power.

Mr. HILL. No. The TVA will not be transmitting any power for AEC. TVA will simply be receiving this power for its customers within the Memphis area of the Tennessee Valley.

On page 1004 of part II of the hearings before the Joint Committee on Atomic Energy, held on June 17 and 18, 1954, to which I adverted earlier, we find the following statement was made by Mr. Thomas Murray:

Mr. HOLIFIELD—

As we know, he was referring to Representative HOLIFIELD, of California, a member of the joint committee—

as I view these negotiations, they amount to this: That if the Atomic Energy Commission enters into a contract with the Dixon-Yates group, we would not cancel, at least

at the moment—and I just heard General Nichols say so—

General Nichols, manager of the Atomic Energy Commission, had just previously testified—

any TVA contracts, but would be negotiating for a bulk of power that is not needed by our—

That means the AEC—

present or projected production facilities. In other words, the Atomic Energy Commission would be used as a vehicle to supply the expanding needs of the Memphis area.

As I said, and as has been stated on the floor of the Senate many times, the Atomic Energy Commission would be used as a power broker to buy power, not one kilowatt of which the Atomic Energy Commission will need. It will merely buy the power for TVA and its consumers in the Memphis area of the Tennessee Valley Authority territory.

Mr. MURRAY. Does the Senator from Alabama understand that the Memphis area has greatly expanded as a result of the TVA?

Mr. HILL. The Memphis area has experienced a very fine growth. As we know, Memphis is a great city on the Mississippi River, and is the largest city in Tennessee, and the largest city in that particular area. It has experienced a fine, dynamic growth.

Mr. MURRAY. I recall that, because of its development, it was able to have located within it a plant which had been intended to be located in Montana.

Mr. HILL. Let me say to the Senator from Montana that, because of his valiant efforts in behalf of the Hungry Horse Dam, and because of the construction of all the other great dams in the Northwest, the people of Montana enjoy relatively low-cost power. Of course, in the Tennessee Valley area, as in all other parts of the Nation, there has been a persistent load growth and an increasing demand for power. That has been wonderful for the economy of the country. That has been the experience both in the Northwest and in all other sections of the Nation. I may say that the TVA's load growth has been at the rate of 750,000 kilowatts a year.

Mr. President, as I have said, if the Dixon-Yates contract is consummated, the Atomic Energy Commission will be nothing but a power broker; it will purchase the power from Dixon-Yates, for sale to the TVA, which in turn will sell the power to consumers in the Memphis area.

I have previously referred to the statement by Mr. Murray, and I shall refer to it again, and in greater detail. As we know, the proposed Dixon-Yates contract was opposed by 3 of the 5 members of the Atomic Energy Commission; in short, the contract was opposed by a majority of the Commission.

We also know that for its authority to enter into this fantastic arrangement, the Atomic Energy Commission relied upon, or pretended to rely upon, a new subsection (d), which in 1953 was added to section 12 of the Atomic Energy Act of 1946. That subsection authorizes the Commission, in connection with the construction and operation of its Oak Ridge, Paducah, and Portsmouth installations, to "enter into new contracts or modify or confirm existing contracts to provide for electric-utility services for periods not exceeding 25 years," and so forth.

The same language is now to be found in section 164, on page 79 of the pending bill.

Mr. President, I must say that if the President's directive to enter into the proposed Dixon-Yates contract contemplated a source of additional power for the needs of the Atomic Energy Commission itself, the provision I have just cited would seem to provide adequate statutory authority. However, the letters of June 16 which were sent directly by the Bureau of the Budget to the President; to Chairman Lewis L. Strauss, of the Atomic Energy Commission; to Vice Chairman Harry Curtis, of the Tennessee Valley Authority; and to the senior Senator from Massachusetts [Mr. SALTONSTALL], chairman of the Independent Offices Subcommittee of the Senate Appropriations Committee, make it clear that what I have said is true, namely, that that is not what the Atomic Energy Commission is being told to do, for, as I have said, the Commission not only will continue in full force and effect its contract for the 600,000 kilowatts of power—an amount equal to that involved in the Dixon-Yates proposal—but also will continue in full force and effect the entire contractual obligation of the TVA to supply the AEC with approximately 1,205,000 kilowatts of power at the AEC's Paducah installation.

As the distinguished Senator from Tennessee brought out so clearly in the debate on yesterday, although the AEC would not receive any of the additional power from the Dixon-Yates installation, the Atomic Energy Commission would be obligated to reimburse Dixon-Yates in the amount of State and local taxes on the new powerplant to be built in Arkansas, such taxes being estimated today at $1,499,000. Of course, no one can tell what they may amount to in the future, although taxes usually rise, and seldom, if ever, decline. In addition, the Atomic Energy Commission would be obligated to reimburse Dixon-Yates for all its Federal income taxes; including not only the normal income taxes, but also the surtaxes; and if an emergency situation were to develop, with the result that Congress would feel constrained to levy excess-profits taxes, the Atomic Energy Commission would have to pay all the excess-profits taxes for which the Dixon-Yates combine would be liable.

Mr. President, if our country should again find itself in an emergency situation, if we should again be at war—although all of us devoutly pray that such a catastrophe will not come to pass—if American boys should again have to be sent to foreign battlefields, to fight and to suffer, and some of them to die; if many of them should be sent into armed conflict and their bodies be broken, blasted, and burned on the field of battle; and if those at home were forced to stagger under an excruciatingly heavy burden of taxation, with many of them perhaps being crushed by that great burden; if all that should come to pass, nevertheless Dixon-Yates would stand off by itself, without $1 of taxes to pay, without $1 of taxes to go from it into the Treasury. Dixon-Yates would not have to carry even one part of that excruciatingly heavy, staggering burden. On the contrary, the Government of the United States would, as the guarantor, pay every dollar of taxes that might be levied on Dixon-Yates, which would stand in that special, favored, preferred position. No matter what might be the suffering or the sacrifices or the heavy burdens carried by the American people, not so with Dixon-Yates. They would stand off—alone, apart, favored, preferred, excused—I might say—or exempted—I might add—from carrying any part of their rightful burden for the defense of our country and its institutions.

Mr. SPARKMAN. Mr. President, will the Senator from Alabama yield to me?

The PRESIDING OFFICER (Mr. BARRETT in the chair). Does the Senator from Alabama yield to his colleague?

Mr. HILL. I yield.

Mr. SPARKMAN. My senior colleague has well depicted how Dixon-Yates will stand alone, exempt from taxes. Is it not also true that they will likewise be exempt from risk?

Mr. HILL. In reply, let me say to my distinguished colleague that although there is much talk about free enterprise yet we know that nothing enters more into free enterprise than competition. There is none of that here. This is a tailor-made proposal, as the distinguished Senator from Tennessee [Mr. GORE] said, for this one concern, the Dixon-Yates combine. There is absolutely no risk. I am sure that if this outrageous contract should ever go into effect it would go down in history as the guaranteed-profits contract, because no risk is involved. There is no venture. There is no chance taken by the Dixon-Yates combine. If there be any risk, if there be any chance, if there be any venture, it is all on the part of the Government of the United States.

Mr. LEHMAN. Mr. President, will the Senator yield?

Mr. HILL. I yield to my friend for a question.

Mr. LEHMAN. Is it not a fact that not only do they assume no burden of risk, but they are actually guaranteed a profit on the amount of capital which they provide?

Mr. HILL. The Senator from New York is exactly correct. As I say, this contract will go down in history not as an example of private enterprise, but as the guaranteed-profits contract. I do not know what brand of socialism this may be, but certainly I can find no private enterprise in it.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. HILL. I yield to my distinguished colleague from Alabama.

Mr. SPARKMAN. I wonder if the Senator may find some area of agreement with someone who has described the proposed contract not as creeping socialism but galloping favoritism.

Mr. HILL. It will go down in history as galloping favoritism. We speak about the Missouri Compromise, and the Wilmot proviso. This contract, if it goes

into effect, will be known, perhaps, as the galloping guaranty. It will be recorded in history as the galloping guaranty. Surely, as the Senator says, it is galloping favoritism at its rankest and worst.

Mr. SPARKMAN. Mr. President, will the Senator yield once more for a question?

Mr. HILL. I am glad to yield to my colleague from Alabama for a question.

Mr. SPARKMAN. Is it not true that the elements which we so often think of as being fundamental to private enterprise, that is, first of all, competition; second, risk; and third, payment of taxes, are totally lacking in this most unusual proposal? Are not all three of them lacking?

Mr. HILL. As the Senator suggests by his question, all the elements which constitute free enterprise, as we have known free enterprise in this country from its very beginning, are lacking. What we have is a brand of socialism under which the Government of the United States takes all risks, all venture, all hazard, and gives to the Dixon-Yates combine an absolute guaranty of its profits. The one thing which we have here which might even suggest the idea of private enterprise is the element of profit. But in this instance that is not an element of private enterprise, because profit is guaranteed by the Government of the United States. I hope Senators will think about this contract and what it means.

As I said before, we fervently pray that we shall not again find our country at war. However, we know that in the past 35 years the United States has been in 3 wars. In each of them we have been forced to send American boys across the seas to foreign battlefields to fight, suffer, and die. The earth may again run red with the blood of American boys. The seas may be incarnadined with their rich red blood. Yet here, sheltered, protected, freed from any obligation or any burden whatsoever, to enjoy this special favor, this special privilege of guaranteed profits, with no risk, and with all taxes paid, stands the Dixon-Yates combine.

I have long thought that this administration looked with particular favor upon private power utilities. But it would never have entered my mind that any administration would go to the extent of proposing so outrageous, so shocking a contract as is embodied in the Dixon-Yates proposal.

Mr. MURRAY. Mr. President, will the Senator yield?

Mr. HILL. I yield to the distinguished Senator from Montana.

Mr. MURRAY. I dislike to interrupt the Senator, but I did not serve on the committee which worked up this contract. I was wondering if the Senator was not overlooking some of the new ideas which have developed in connection with free enterprise.

Yesterday, I read in the newspaper that Mr. Wolfson, of Florida, stated that it is now easier to make $1 million than to make $1,000. So there must be some new ideas which have developed in recent times, which we may be overlooking.

Mr. HILL. The Senator may be correct, but surely there are no new ideas about private enterprise involved in the Dixon-Yates proposal. I know my distinguished friend from Montana will agree with me that there is no private enterprise in the Dixon-Yates proposal. It is socialism in its rankest, most revolting form. If the Government of the United States is to take all the risk, guarantee all the profits, and pay all the taxes, no matter what the conditions in this country may be, no matter what taxes others may be paying, no matter what sacrifices others may be undergoing to save our country—surely if the Government is to do all those things, socialism, as we have known it in the past, is to be preferred.

Mr. President, the Ferguson amendment, in its effort to give authority to this proposed contract, and to remove some of the stench from it, uses the word "replacement."

Mr. GORE. Mr. President, will the Senator yield?

Mr. HILL. I yield to the distinguished Senator from Tennessee for a question.

Mr. GORE. If the Atomic Energy Commission should be authorized to make a contract with a private concern to replace power which it is buying for its use, does not the Senator from Alabama think that preference should be given to the replacement of the highest cost power? If the Government of the United States is to make a contract to relieve itself of a contract which it has, if the Atomic Energy Commission is to be authorized to make a contract to replace power which it is buying for its own use, would it not be better to replace the high-cost power rather than the most economical power?

Mr. HILL. Of course every dictate of business reason would tell us that. I do not doubt that the Senator has in mind the EEI contract and the OVEC contract. As the Senator knows, EEI ran some $50 million above its estimates in the construction of the Joppa plant, which was directly across the river from Paducah, Ky., and which supplies half of the power for the AEC Paducah plant. Half of the power is supplied by TVA from its Shawnee plant, and the other half by EEI, a combination of private electrical companies, from its Joppa plant.

I could tell a story of excess costs piling up on the Government of the United States that would be almost unbelievable, but the Senator knows well that the EEI went some $58 million over its estimates. He also knows that the AEC contract with EEI was a cost-plus contract. Whereas the cost at the TVA Shawnee plant ran approximately $145 a kilowatt, the cost at the Joppa EEI plant is running $190. Senators can figure out the difference, with the profits and the interest and the many other costs, and they will see what that means in the way of extra costs the Government will pay over the period of years these contracts are in force.

On page 1003 of the record there appears a letter signed by Lewis L. Strauss, Chairman of the Atomic Energy Commission, under date of May 19 last, addessed to Representative SIDNEY R. YATES, of the House of of Representatives, in which the Chairman of the Atomic Energy Commission says that the Joppa estimates ran $58 million higher than was expected when the estimates were made, and that the OVEC estimates ran $32 million over the estimates.

It shows that the estimated increase in annual power charges to the Government, because of the additional cost of the facilities at Joppa, will be $2,800,000 a year, and that the extra cost at the OVEC plant will be $1,600,000 a year. The total extra cost is $4,400,000. If we multiply that sum of money by 25 years, it will give some idea of the extra cost. It should be remembered also that any business concern, of course, would add interest on that money. So it might well be asked how many hundreds of millions of dollars these excess costs to the Government will aggregate.

Mr. GORE. The Senator has about convinced the junior Senator from Tennessee that if the Senate is to relieve the Atomic Energy Commission of some contracts, the particular ones we need to get off its back are the OVEC and Joppa contracts.

Mr. HILL. The Senator is exactly right. The excess burdens placed on the backs of the taxpayers of the United States are in the EEI contract and in the OVEC contract. Therefore, as the Senator says, every dictate of sound business, of economy, and of wise management would say, "Let us replace the excessive costs of EEI and OVEC power." Surely every Senator has heard about the Ebasco fiasco in the building of the EEI plant—the fiasco that has contributed so much to these excess costs. So it is interesting to note in this connection that the Ebasco Co., according to the record, is to be employed by the Dixon-Yates combine to build the West Memphis plant if this outrageous contract is signed.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. HILL. I am delighted to yield to my distinguished colleague from Alabama.

Mr. SPARKMAN. I should like to ask my senior colleague, in connection with the statement made by the Senator from Tennessee a moment ago, to the effect that if there are any contracts of which we ought to relieve the Atomic Energy Commission, they are the contracts made in connection with the Paducah plant, with the EEI group, whether it is not a fact that under those contracts the Atomic Energy Commission is pretty well tied down with an indemnity clause which would make it extremely expensive to the United States Government in the event there was a cancellation of the contract?

Mr. HILL. The Bureau of the Budget, in speaking about that clause, stated that the liabilities under the clause to which the distinguished junior Senator from Alabama has referred, would be $40-million-plus.

Mr. GORE. Mr. President, will the Senator yield?

Mr. HILL. I yield to the distinguished Senator from Tennessee.

Mr. GORE. I should like to inform the junior Senator from Alabama that I did not mean to suggest a cancellation that would be outrageously expensive. The Ferguson amendment does not envision cancellation of the AEC contract with TVA. It seeks to authorize the AEC to make contracts with so-called private enterprise to furnish to the TVA, by way of "replacement," electricity in that amount.

What I am suggesting is if the AEC can make a good enough deal, and it is profitable to the Government and it is in the interest of economy and efficiency and good government to replace, through such contracts, power which the TVA is furnishing to the AEC, then we ought to broaden the Ferguson amendment, if it is such a good thing, to include the replacement of power furnished under these expensive contracts with OVEC and EEI.

Mr. HILL. The distinguished Senator from Tennessee, as we often express it, has taken the words out of my mouth. I was going to say exactly what he has so well and eloquently said. Therefore, certainly, if we are going to have the Ferguson amendment, we ought to take the next step and seize the opportunity to get out of the excessively high-cost and burdensome contracts with EEI and OVEC.

Mr. GORE. I am suggesting that that ought to be the first step, not the next step.

Mr. HILL. Certainly; because these contracts are putting excessive burdens on the taxpayers; and, as the Senator says, the Government should be relieved of them now.

Of course, as Senators know, Dixon-Yates power, as I have said, is power that AEC does not need and will not use—not one kilowatt of it. Yet the Ferguson amendment speaks of replacement as if AEC was going to use some of the Dixon-Yates combine power.

The Dixon-Yates power, as I have said before, is for the city of Memphis and surrounding areas. Indefensible as is the memorandum of the Bureau of the Budget, and confusing and unworthy as I believe it to be, it did hit the truth in one or two places. Here is one place where it says the Dixon-Yates contract is the result of "the President's decision to provide for the 1957 expansion of power consumption in the Tennessee Valley area through facilities to be constructed by private enterprise."

In a desperate effort to meet the objections challenging the right of AEC to enter into this contract, we find the Bureau of the Budget making this statement:

> Under the Dixon-Yates proposal, the Atomic Energy Commission would procure power to meet its needs from a privately owned plant which would be located at a considerable distance from the AEC plant for which the power would be purchased.

Of course, as I have said time and time again, there is no basis in truth or in fact for that statement. Then it makes this statement:

> The Dixon-Yates proposal to supply 600,000 kilowatts to the TVA system at Memphis, as replacement for TVA power furnished AEC at Paducah, is similar to the several previous arrangements under which TVA has supplied additional AEC loads by building new generating facilities at points distant from Oak Ridge and Paducah.

Both those statements are quotations from the memorandum of the Bureau of the Budget.

The Bureau of the Budget makes this third statement which I now quote:

> By providing for additional generating capacity at West Memphis to be fed back into the TVA grid in an amount which is necessary to assure delivery of the Commission's requirement at Paducah, this contract can properly be considered as a contract for electric utility service to installations of the Commission.

Mr. President, each and every one of these statements is without any basis of fact and is absolutely untrue.

As to the first point, that AEC would procure power with which to meet its needs, the Dixon-Yates proposal does not provide a way for the Atomic Energy Commission to procure power to meet its needs from a privately owned plant or from any other kind of plant. It already has at Paducah contracts for all the power required to meet its needs. More than 60 percent of this power, amounting to 1,205,000 kilowatts is to come from TVA, and the remainder from Electric Energy, Inc. The AEC does not propose to modify its existing contract with TVA for 1,205,000 kilowatts of power in any respect. Rather, AEC would contract with Dixon-Yates for 600,000 kilowatts of additional power, not for itself, but to be fed into the TVA system for general TVA system purposes. Except for taxes, the AEC does not even propose to pay for Dixon-Yates power. With the exception of the payment for taxes to be made by AEC, all the other costs, all the payments for power, under the Dixon-Yates proposal, are to be met by the TVA.

As for the Dixon-Yates proposal being a replacement arrangement similar to previous arrangements under which TVA is supplied out of AEC power requirements by building new plants at points distant from Oak Ridge and Paducah, there is no similarity at all. On the contrary, the proposal differs from those arrangements in two important respects. In the present case AEC is not expanding its Paducah plant and does not require any additional power at the Paducah plant. The fact is, Mr. President, that earlier I read the testimony of Commissioner Murray in which he said they did not need it in any of their projected or future plants.

Mr. STENNIS. Mr. President, will the Senator from Alabama yield?

Mr. HILL. I yield to my distinguished friend from Mississippi.

Mr. STENNIS. As I have understood, they have all the power they need for the operation of the Atomic Energy plant at Paducah.

Mr. HILL. That is exactly right. If the AEC signs this contract with the Dixon-Yates combine it will be signing a contract for 600,000 kilowatts of power which it does not need, which it will not use, which it has contracted for only for TVA, and which will go into the normal TVA operating system in and around Memphis, Tenn.

Mr. STENNIS. On yesterday, when the question arose concerning the attorney for the Atomic Energy Commission having rendered an opinion that the proposed contract is legal, the Senator from Iowa put the letter into the RECORD for the benefit of Members of the Senate, and I have had an opportunity to read the last paragraph of it. With reference to the point the Senator has made, in order to hold this contract valid, it had to create a shortage of electricity in the operation of the Atomic Energy Commission plants. That is the way they seek to justify the legal authorization. This is what the attorney said:

> The increased cost to the Government of the Dixon-Yates proposal as against the Commission's present contract with TVA would be approximately $3,685,000 annually. However, if the President directs the Commission and TVA to modify their existing arrangement so as to release to TVA 600,000 kilowatts under the present contract, and we do not question the President's authority to do this, then the Commission has authority to make the best contract it can for the replacement of power thus released.

In other words, if they take 600,000 kilowatts of electricity they now have and put it into another channel, there is created a shortage of 600,000 kilowatts, and the statute then applies, because the electricity is needed for the operation of the plant.

I think that is the most circuitous route of legal reasoning I have ever seen.

Mr. HILL. The Senator is absolutely sound and correct. But, of course, when a lawyer is ordered to submit an opinion, he often zigs and zags, and then zags and zigs. That is what this counsel did. He was circuitous. He used the most circuitous and zig-zagged way because he could not go directly to reach the conclusion he had been ordered to reach.

Mr. STENNIS. I note that this memorandum was dated June 22, 1954. That was long after the hearings were held, long after the agreement was tentatively reached. In fact, that is the day after the beginning of this debate.

Mr. HILL. The Senator is correct, and I thank him for the contribution he has made.

I do not know whether the Senator from Mississippi was on the floor when, in the opening of my remarks, I paid my tribute to the magnificent speech he made on the question involved as to the authority of the Atomic Energy Commission to enter into the Dixon-Yates contract. I said then, and I now repeat in the Senator's presence, that I have never heard a more powerful and more compelling presentation than that which he made.

Mr. STENNIS. I thank the Senator.

Mr. HILL. It was the sledge-hammer blows of the Senator from Mississippi which contributed so much to bringing into being the Ferguson amendment.

No one could have heard the speech of the distinguished Senator from Mississippi without knowing that the Senator was absolutely correct, and that he had presented his case with such logic, appeal, and force that any court in the world would be forced to agree

with him that the Atomic Energy Commission did not have any authority or power to proceed under the Dixon-Yates proposal. I think one of the greatest contributions to the debate has been the speech by the distinguished Senator from Mississippi.

Mr. STENNIS. I thank the Senator from Alabama very kindly.

Mr. HILL. As I was saying, the other arrangements to which I referred, under which TVA was supplying power to the Atomic Energy Commission plants at Oak Ridge and Paducah, were different. They had nothing whatsoever to do with and in no way had any of the characteristics of the proposed Dixon-Yates contract.

As I have said, in all these cases the Atomic Energy Commission was expanding its Oak Ridge and Paducah plants, and accordingly additional power was required. In the present case the Atomic Energy Commission is not expanding its Paducah plant beyond the size heretofore planned, and does not require any additional power at the Paducah plant.

The additional power requirements which the Dixon-Yates proposal is intended to meet are the expanding requirements of the TVA system generally. In fact, as I have said before, and as has been said by other Senators on the floor, the Dixon-Yates proposal simply represents a substitute for construction of the Fulton plant by the TVA, the TVA having proposed the Fulton plant to obtain power to meet the normal growth in its general system loads.

In all cases where TVA built new generating capacity to serve AEC loads, but at points distant from Oak Ridge and Paducah, the particular sites were selected because generating units could be installed and operated at the points selected faster and more cheaply than at alternative sites. In this case, power under the Dixon-Yates proposal would not be available any faster than from a plant at Fulton; and instead of being cheaper, it would admittedly be much more expensive.

There is no need of my going back over the proposition that the additional generating capacity of West Memphis, Ark., is not necessary to assure delivery of the Commission's requirements at Paducah, and that it provides not 1 kilowatt of power for the Atomic Energy Commission. The Dixon-Yates proposal, therefore, cannot be properly considered as a proposal for electric utility service to installations of the Commission. The Atomic Energy Commission needs 1,205,000 kilowatts of power from the TVA system at Paducah, and it already has a binding contract with TVA for that power, which acceptance of the Dixon-Yates proposal would in no way affect. What is in question is TVA's ability to supply increasing power demands on its system generally. The Dixon-Yates proposal is simply a device, and a very poor device, for providing TVA with 600,000 kilowatts of power for that purpose. That is the only purpose which the proposal would serve.

So, Mr. President, this is the situation which confronts us. Let us not forget that 3 of the 5 Atomic Energy Commissioners—a majority of the Commission—felt that the matter of providing power for the TVA area was far removed from any responsibility of the Commission, and was not an appropriate venture for the Commission.

Let us remember also that the General Accounting Office did not approve of the venture.

If we are now to find that the Commission is to sign this contract, under some kind of directive, although three members of the Commission say the contract should not be signed, and that they are opposed to any such signing, how can the Members of the Senate, the Members of the House, or the American people have confidence in the Atomic Energy Commission? If there is any single commission in which there should be confidence, it is the Atomic Energy Commission, not only because of its very delicate and vital functions—yes, vital to the defense of our country, and more and more vital in days to come to the economy of our country—but also because the Commission operates so much in a field of what is called classified information.

I sit as a member of the Subcommittee on Independent Offices of the Committee on Appropriations. That is the subcommittee which handles appropriations for the Atomic Energy Commission. I can say to the Senate that much of what the Commission is doing, many of the functions of the Commission, many of its responsibilities and activities, are of a classified nature. Much of it falls within the most secret category. Much of the work carried on by the Commission is not disclosed, and perhaps cannot be disclosed. Much of it is not disclosed even to Congress or the committees of Congress, and surely much of it is not disclosed to the public.

If the Commission will knuckle under, shall we say, and become puppets or automatons in the signing of a contract, which in its best judgment should not be signed, which in the best judgment of the Commission should never have been entered into, how can we have confidence in a Commission of that kind? How can we trust such a Commission, with its great variety of functions, activities, duties, and responsibilities, into which we cannot and do not inquire at all?

Surely nothing could be more destructive of the Atomic Energy Commission, of its integrity, of its position, and of the confidence which it commands, than to be ordered to enter into a contract so outrageous as the proposed Dixon-Yates contract, and then to knuckle under and sign the contract.

Mr. GORE. Mr. President, will the Senator yield?

Mr. HILL. I yield.

Mr. GORE. I concur in the statement which the able Senator from Alabama has just made. I think the situation he has described is most unfortunate for the Atomic Energy Commission, for the country, for the program, and for the consideration of the pending legislation. I see no fortunate features of this proposal, or of what will follow, except exposure of the deal.

A Commission charged with such enormous and frightfully important duties is now to have heaped upon it, by this proposal, the unpleasant duty of carrying out an order, if it knuckles under, and to have the burden of making and administering, not only this contract but, according to the Ferguson amendment, possibly other contracts of a similar kind.

Does the able Senator from Alabama think that would help in the development of the Atomic Energy Commission for either national defense or peacetime purposes?

Mr. HILL. It could not in any conceivable way make any contribution to the development of atomic energy either for wartime purposes or for peacetime purposes; but, on the contrary, it could do much to undermine, impair, and destroy the effectiveness of the work, the activity, and the results of the Atomic Energy Commission.

It is hard to think of anything that could be more unfortunate in the field of the production and advancement of atomic energy than such a proposal as is before the Senate today, a proposal for the undermining, impairment, and destruction of the integrity, independence, and the sound operation of the Atomic Energy Commission.

I have referred, not once, but several times, to what the different commissioners have said. There could not be a stronger letter found than that which Commissioners Smyth and Zuckert wrote and signed, which was sent to the Bureau of the Budget, protesting this prostitution and illegal use of the Atomic Energy Commission.

Senators will recall that in that letter Commissioner Smyth and Commissioner Zuckert declared, among other things:

> The present proposal—

That is the Dixon-Yates combine proposal—

> would create a situation whereby the AEC would be contracting for power not one kilowatt of which would be used in connection with the Commission production activities. The creation of such a contractual relationship would place upon the Commission a continuing responsibility during the 25-year life of the contract for stewardship in respect to matters irrelevant to the mission of the Commission.

That is stating the matter in as diplomatic and as temperate language as possible, I should say.

Feeling deeply, feeling strongly, about this matter, impelled by their consciences to protest, the Commissioners wrote that letter to the Bureau of the Budget.

Mr. Murray, a third member of the Commission, in testifying before the Joint Committee on Atomic Energy, among other things, said:

> Since our program is not advanced by these negotiations—

And whose imagination could conjure for 1 minute any advancement that could come out of the negotiations with the Commission?—

> and the subsequent administration of this 25-year contract, I do not believe that it is desirable for the Atomic Energy Commission to perform a function that another agency

of Government could perhaps more logically perform.

Remember, Commissioner Murray has been most outspoken in his advocacy of the use of private companies. He was the advocate, and so proclaimed himself to be, and I give him all credit for his candor and frankness, the negotiator, really, who worked out the EEI and the OVEC contracts, because, as he said, he was actuated by the desire and the motivation to use to the greatest possible extent private companies rather than to use a Government agency.

Yet, Mr. President, in spite of those protests of the three Commissioners, in spite of all that we now know about the inequities of the contract, and the fact that it is an outrageous proposal, the administration seems determined to force the contract on the Atomic Energy Commission, and, I might add, on the people of Tennessee. And because TVA dared to question its wisdom, TVA has been under attack.

I might say, Mr. President, I have visited the Shawnee plant at TVA. I looked at other installations. I have been at installations which were supplying power to the great Oak Ridge plant of the AEC. I know something of the "blood, sweat, and tears," if I may use that term, which TVA has invested in its efforts to keep the power supply abreast of AEC's expanding load. I know something of the relationship between the two agencies, and I think it unworthy of AEC to be a party to this attack to undermine and discredit the TVA.

Mr. MURRAY. Mr. President, will the Senator yield for a question?

Mr. HILL. I yield to my distinguished friend, the Senator from Montana, for a question.

Mr. MURRAY. I have been wondering what the attitude of the businessmen and the business organizations of the Tennessee Valley is with reference to this matter. I remember visiting there a year ago, and I found at that time that the people of that area were unanimous in their approval of the TVA. Small-business men, and big-business men as well, expressed their appreciation of the work of the TVA. I am wondering now how those businessmen there——

Mr. LANGER. Mr. President, may we have order? We cannot hear the distinguished Senator ask the questions. Senators are talking with each other on the floor of the Senate. It seems to me they ought to be told to go to the cloakroom if they want to talk, instead of doing so on the floor. We cannot hear the distinguished Senator because of conversations all around us.

The PRESIDING OFFICER. The Senate will be in order.

Mr. MURRAY. I was wondering what the attitude of the businessmen and the chambers of commerce and the different business institutions in the Tennessee Valley is on this matter.

Mr. HILL. I may say to my distinguished friend from Montana that a few days ago I placed in the body of the RECORD a resolution passed by an association representing large-business men, what we might call medium-sized-business men and small-business men, as well as farmers, laboring men, professional workers, and people generally. That resolution, together with a letter, was sent to the President of the United States, protesting the signing of the contract, and urging that the contract not be signed, saying very frankly that they, the power consumers of the Tennessee Valley, who need this power so much, whose future economy and future growth and prosperity depend in such large measure upon obtaining the power, would rather face a shortage of power and be denied the power they need and should have than to have the contract signed.

Mr. MURRAY. Has no action been taken on that petition?

Mr. HILL. That protest letter, or petition, was addressed to the President of the United States. If any action has been taken I have not heard of it. I think if there had been any action taken of any consequence, the Senator from Montana and the Senator from Alabama would have been advised of such action.

Mr. President, earlier I have referred to the charge that the TVA has been overcharging the Atomic Energy Commission. I am sorry that my distinguished friend, the Senator from Arkansas [Mr. FULBRIGHT], is not on the floor at this time, for I had advised him that I was going to address the Senate. He was among others who evidently were misled and misinformed about this matter, and have made the charge that the TVA overcharged the Atomic Energy Commission. I am sure the Senator from Arkansas never would have made that charge if he had had the correct information. There is nothing I deplore more than the misleading and indefensible statements by both the Bureau of the Budget and the Atomic Energy Commission, thus giving Senators such erroneous and false information.

Mr. President, in the debate it was said by the Senator from Arkansas that—

> One must conclude that what the TVA has been doing is billing the AEC high charges and giving the benefit of profits therefrom to the city of Memphis and other purchasers in the local area. I see no other explanation for it (p. 9643, col. 3, and p. 9644, col. 1).

He bolstered his charge by endeavoring to compare the cost of power sold by TVA at wholesale to the city of Memphis with the charges of the power sold to AEC by TVA.

Mr. President, I know the Senator from Arkansas is no expert on rates. I am no expert on rates, either, although I have endeavored to be a close student of matters affecting TVA since that agency was created. However, I know enough to know that rate schedules are complicated matters; that power to industry is sold under different rates than the rates for power sold for resale to farms and domestic consumers. I know a little about the load factor; and it seemed to me that the proper comparison was between loads of like characteristics; that the costs of energy supplied by TVA from its Shawnee plant should be compared with the costs of energy supplied to the same AEC facilities by the Joppa plant, across the river, owned by EEI. It would make sense to me to compare the cost of TVA power delivered to Paducah from Shawnee with the cost of the power that OVEC, for example, will deliver to AEC's facilities at Portsmouth. It made sense to me that the cost of power to AEC from Shawnee should be compared with the cost of power to AEC from Dixon-Yates. Such a comparison had been made. It was made by the AEC and representatives of the Bureau of the Budget. It showed that the excess annual cost to AEC would be at least $2,923,000 a year. Those comparisons are valid.

I felt, too, that I would not shed any crocodile tears over possible overcharges for Shawnee power, when AEC refused to give up its contract with TVA, to accept the substitute proposal of Dixon-Yates. If TVA was charging so much, why would AEC be so anxious to hang on to the contract?

I knew the charge that TVA was giving the benefit of the profits from its AEC contract to the city of Memphis was not true, for TVA had with the city of Memphis a contract for more than a decade before there were any AEC facilities at Paducah. During more than 20 years of operation, TVA has earned a net return for the Government, averaging about 4 percent every year on the investment in the TVA power system. Such a return was earned in the years before there were atomic energy plants, and in the years when the purchases of TVA power by AEC were relatively small. The vast increase in TVA's power commitments to AEC has not materially affected the return on investment figure, stabilized before AEC was an important factor among TVA's power consumers. The return has varied from year to year with weather conditions, but there is no indication that it has varied with sales to AEC.

I knew that was the general situation; but, just to be sure, I checked with TVA. I checked the peculiar comparison with Memphis. I was told that the figures were in error; that this month, for example, power is being delivered to Paducah from Shawnee at a cost of 3.56 mills per kilowatt-hour. That is less, not more, than the per kilowatt-hour cost of 3.88 mills quoted as the cost of power sold at wholesale by TVA to Memphis. I was warned by TVA, however, that such a comparison was meaningless as a measure of the equity of entirely different rate schedules. I was reminded that the wholesale rates established in TVA's contract with Memphis and with all its other distributors were fixed to achieve the objectives of the TVA statute—namely, to encourage the widespread use of electricity, "particularly by the domestic and rural consumers."

Mr. President, I had something to do with the writing of that act, for I introduced the bill in the House of Representatives, and I sat on the conference committee, and I was one of those who urged that Congress write into the bill the very requirement to encourage the widespread use of electricity, particularly the use of electricity by the domestic and rural consumers. It was our aim and the aim of all the Congress, when that measure was enacted to try to get power distributed for the benefit of the

farmers and the domestic consumers, to get the power into the homes of the people of the Tennessee Valley, rather than to have all the power purchased by perhaps a few large industrial concerns.

The rates, established long before AEC was a customer of TVA, were at the same time intended to be adequate to cover all the costs of supplying power to TVA's customers, and, in addition, to earn a return to the Government on its investment—a "profit," according to the terminology adopted by the Senator from Arkansas [Mr. FULBRIGHT]. Cities and cooperatives do not use large blocks of power around the clock, as the AEC does at its installations. The facilities at Paducah are served by a giant modern steam plant, constructed by TVA for the purpose. If Memphis and TVA's other distributors had loads of the same characteristics as the AEC load, TVA's whole rate structure would be different. Its system would not be the same.

TVA suggested that if it were important to make comparisons involving the city of Memphis, it might be worthwhile to show what TVA would charge Memphis at wholesale if the city were to purchase power to serve a customer having the characteristics of AEC's Paducah installation. For power purchased for such a customer Memphis would pay TVA at wholesale 3.71 mills per kilowatt-hour. This can be compared with 3.56 mills per kilowatt-hour at which power is moving from Shawnee to Paducah this month.

When the CONGRESSIONAL RECORD was available, I studied the table which my friend the Senator from Arkansas [Mr. FULBRIGHT] had inserted to support his charge that TVA was overcharging AEC, because, according to him, AEC was paying more than the city of Memphis would pay if the city of Memphis were served under a contract like the TVA-Paducah contract. Frankly, the comparison makes no sense to me. I do not think the Senator from Arkansas understood it either. I found that in the middle column of page 10146 of the RECORD, near the top the Senator from Arkansas says plaintively, referring to the differences between 3.88 mills Memphis actually paid and the 4.25 mills he thinks they should have paid, "The difference between these figures is hard for me to explain." It occurred to me that it might be easier for the Senator to explain his very peculiar formula if it were applied to Arkansas and to the proposed Dixon-Yates contract. I am glad to report the results of this odd calculation.

In the House hearings on the TVA appropriation—pages 2909–2910—Mr. Moses, chairman of the board of the Arkansas Power & Light Co., testified that he sold power wholesale to REA cooperatives in Arkansas at a rate of 4.94 mills per kilowatt-hour. Now I am prepared to advise the Senator from Arkansas that if those same cooperatives purchased power under the Dixon-Yates contract they would pay more than 6 mills a kilowatt-hour, in contrast to the 4.94 mills Mr. Moses says they pay.

Therefore, according to the theory advanced by the Senator from Arkansas, the AEC is being overcharged by 20 percent in the Dixon-Yates contract. Under the same formula and the same reasoning Senator FULBRIGHT accused TVA of overcharging AEC only 9.6 percent, as shown in the middle column, page 10146. The whole comparison is nonsense. Rate schedules are complicated, and dissimilar loads cannot be compared. But what is sauce for the goose is sauce for the gander. The only difference is that my table deals with a wholesale customer in Arkansas, and with Dixon-Yates.

To me the fact that power from Shawnee is cheaper power for AEC to buy than power from Joppa, from OVEC, or from Dixon-Yates, is reasonably convincing. The fact that the AEC did not choose to drop its Shawnee contract is further evidence that the accusation of "overcharge" is not true, but just to get the record clear, it may be worthwhile for me to describe, as best as I can, how the rates for Shawnee power at Paducah were established.

TVA estimated its construction and operation as a basis for negotiating a contract with AEC. To those estimated costs it added an amount which it expected would provide a rate of return of 4 percent on the Government capital invested in the plan. At the time the contract was being negotiated, representatives of AEC suggested that TVA should not include in the rates any amount of earnings above the actual costs, including the cost of money to the Government. TVA representatives explained that in order to make the repayments to the Treasury which the law requires, and in order to avoid distorting its financial performance record by having a different level of earnings on its AEC business than its other business, it would be necessary to establish rates estimated to provide the 4 percent return. AEC representatives knew that the rates were intended to include this amount above actual power production costs. They knew why it was essential.

The Congress requires the TVA to make certain returns—returns to cover the cost of interest to the Government, returns which will pay off or amortize the cost of TVA power systems within 40 years. The law requires this amortization. TVA could not escape, whether it was making a contract with the Atomic Energy Commission or a contract with some other Government agency or some other party.

At the time, AEC's disappointment that TVA insisted upon fixing the rates to include a rate of return was somewhat alleviated by the fact that TVA was offering a firm rate as distinguished from the EEI contract being negotiated for power to be produced at Joppa for the same AEC project at Paducah. EEI's was a cost-plus contract. By quoting a firm rate, TVA took a risk. If its costs had run higher than estimated, if operation should prove less efficient than anticipated, its net earnings would have run below the hoped for 4 percent. As a matter of fact, TVA has been able to construct and operate with sufficient efficiency so that the firm rates are providing a little larger net income than originally estimated. Whatever profits TVA makes are the property of the Government and go into the Federal Treasury, as the distinguished Senator from Tennessee [Mr. GORE], who served for so long in the House Committee on Appropriations, so well knows. Such profits go directly into the Federal Treasury. TVA's performance at Shawnee should be applauded, and not criticized by the Atomic Energy Commission or anyone else.

Mr. GORE. Mr. President, will the Senator yield?

Mr. HILL. I yield to my distinguished friend from Tennessee.

Mr. GORE. Does not the Senator think it should be recognized that included in the rates which TVA has proposed to charge is not only depreciation, but also a sufficient amount to amortize the plant within 40 years, plus an additional net earning?

Mr. HILL. The Senator is exactly correct. TVA not only must take care of operating and maintenance costs and depreciation costs, but it has been seeking to take care of the cost to the Government for interest on any money the Government may have borrowed. As the Senator knows, the law itself requires TVA to pay into the Treasury an amount of money which, over a period of 40 years, will amortize every dollar of cost of the TVA power system, and TVA has done this. The Senator knows that there have been sharpshooters up and down the highways and byways seeking to take a potshot at TVA. There are those who have wished to criticize and condemn TVA, but its record of management, its record of administration, its record of payments into the Treasury, has been such that it has largely disarmed its critics and enemies.

Mr. GORE. Mr. President, will the Senator further yield?

Mr. HILL. I yield to my friend.

Mr. GORE. I think there has been some confusion—and it seems to me the confusion has been purposely injected into the RECORD—as to what is involved in the additional $3,685,000 a year which the Dixon-Yates proposal would cost the taxpayers, over and above the TVA rates. Some persons have undertaken to suggest that there were some hidden costs or figures. If the Government were to buy the power from the Dixon-Yates combine, and if the Government were to go through with the proposed Dixon-Yates contract, what would those payments involve in addition to the power?

Mr. HILL. I would say to the distinguished Senator from Tennessee that those payments would involve paying for the operating expenses of the TVA installations, the maintenance of the installations, the depreciation charges on the installations, an amount of money that would reimburse the Government for the interest charges on any loans made for funds for the TVA, and, in addition to that, such an amount of money as at the end of 40 years would pay back to the Treasury—or amortize—all of the Government's capital invested in the TVA power installations.

Mr. GORE. At which time the Government would have recaptured all of the cost of the plant, and in the meantime it would have obtained electricity for its own use at $3,685,000 less a year

than it would cost under the Dixon-Yates proposal.

Mr. HILL. Three million six hundred and eighty-five thousand dollars less a year, according to the estimates of the AEC and the Bureau of the Budget, but some $5½ million less a year according to the estimates of the TVA.

Mr. GORE. I thank the Senator from Alabama.

Mr. HILL. I am glad the distinguished Senator from Tennessee asked that question. I cannot emphasize too strongly that the cost of $3,685,000 is the excess cost, the cost each year over and above what the cost would be if the power were supplied by the TVA, and it is the cost estimated by the AEC and the Bureau of the Budget as submitted to the Joint Committee at the hearings before the Joint Committee, which cost, as I say, high as it is, $3,685,000, is not so high as are the estimates of the TVA, which carry the cost to $5½ million in excess costs each year to the Government of the United States.

Mr. GORE. However, for the purposes of this debate, those of us who oppose this outrageous contract, have taken the figures submitted by the Federal Power Commission, the Atomic Energy Commission, and the Bureau of the Budget, on which they have agreed. We do not acknowledge that the figures are sufficiently high, but for the purposes of this debate we accept those figures.

Mr. HILL. The Senator is exactly right. For the purposes of this debate, we accept those figures, which run to a total of approximately $92 million over a 25-year period. Of course, that does not include the interest which a good businessman would count in, too, because he would have an investment of $3,635,000, and for the remaining 24 years he would be entitled to a certain income in the form of interest. The exact figure, according to the estimates of the AEC and the Bureau of the Budget, is $92,125,000.

As I say, any good businessman, or any banker, considering this matter, would not think only of $92 million, but of the interest the $3,635,000 would draw for the period of this contract, that is, the first $3,685,000 drawing interest for 24 years, the next $3,675,000 drawing interest for 23 years, and so on down the line.

Mr. GORE. That is how I have figured it.

Mr. HILL. Looking back on the performance of TVA and EEI, the Atomic Energy Commission might well wish that it had insisted on a firm price from EEI, as well as from TVA. Had such a firm price been obtained, and had EEI built the Joppa plant for less than its estimates, I am sure AEC would not be whining about an overcharge. Instead, possibly in part because EEI was not bound by a firm price, but had a cost-plus contract, AEC is having to pay a great deal more for the EEI power than had been estimated and than TVA power is costing.

I am sorry that the Senator from Arkansas [Mr. FULBRIGHT] is not on the floor. I advised him that I was going to speak. He even sat by me, and I told him that I was going to address the Senate. After he made his speech making the charge that the TVA was overcharging AEC, he later made another statement. He evidently realized that his first charge was not borne out by the record and that he had been very much misinformed. He repeated the statement about an overcharge, but this time he was not discussing the power from Shawnee. This time AEC had evidently provided him with figures which based the accusation of an overcharge on the costs paid by AEC for interim power purchased for their use by TVA in fiscal 1953.

The allegation of an overcharge is a serious accusation. It impugns the integrity of the TVA power program and goes to the very question of the honesty of its management. AEC should not make such a charge or accusation without full and meticulous documentation. Yet, as I understand the evidence presented, the only basis for the charge is the fact that TVA charged the AEC an average of more than 8 mills per kilowatt-hour for nearly 1 billion kilowatt hours, which it had delivered to the Paducah AEC plant during fiscal 1953.

I emphasize the fact that it is interim power that I am talking about. During the same period, AEC calculates that TVA paid an average of about 5 mills per kilowatt-hour for 2⅔ billion kilowatt-hours purchased and received by interchange from other systems.

The arrangements under which power systems purchase interim power from other systems, under special contracts or interchange agreements, are highly technical. The Senate is hardly a body of power supply engineers or rate analysts. Surely I claim no such encomium. Neither, for that matter, does the general manager of AEC appear to qualify as an expert in these subjects. If he were an expert he would not draw the conclusions he appears to draw from the meager evidence available to him.

These are the facts, as I now get them and know them. During the fiscal year 1953, nearly all of the power delivered by TVA to Paducah—the AEC plant—must have been brought in from some distance, for the first unit in the Shawnee steam plant began operating in April, and the second in June, just before the end of the fiscal year. Mr. Nichols was talking about the total amount of energy delivered by TVA to Paducah during the entire year. A little of it came from Shawnee, but most of it came from other sources.

I do not know from what source it came. The general manager of the Atomic Energy Commission does not know.

AEC fails to realize that TVA bought and sold power in day-to-day transactions with its neighbors long before the Paducah plant was started. They read TVA's 1953 annual report and assume that all the power delivered at Paducah was purchased by TVA from other systems. They assume that all the power delivered to Paducah was not only purchased, but purchased at the average rate TVA paid for all power brought in from other systems. TVA bought nearly three times as many kilowatt-hours during the year as it delivered to Paducah. Most of the energy was probably obtained, as it was before AEC's Paducah plant was built, to help firm up TVA's hydropower in the normal course of operations.

I wonder if the AEC is certain that the power delivered to Paducah was purchased from other systems. Are they certain that none of it came from TVA's old Nashville steam plant which was operated in fiscal 1953 at a cost of nearly 11 mills per kilowatt-hour?

This interim power may not have been available to TVA. As we know, interim power is power bought overnight, so to speak, on a temporary basis. If such power were not available, the only thing TVA could do to meet the power requirements of the AEC would be to operate, for the time being, its high-cost Nashville steam plant.

Does AEC know that no power delivered at Paducah came from the old World War I steam plant at Wilson Dam, operated at a cost of more than 8 mills per kilowatt-hour in 1953? Does the General Manager of AEC know whether the Paducah operation received any power from TVA's Hales Bar steam plant? It cost TVA nearly 8 mills per kilowatt-hour to operate that plant. The 1953 annual report, which shows these costs—page 25 of the appendix—also shows that the kilowatt-hours produced by these three old steam plants equaled half the kilowatt-hours TVA delivered to Paducah. Certainly TVA would never have operated such old plants and incurred these high costs unless some special circumstances required it.

TVA was to supply this power to AEC. AEC needed the power and had to have it, and, if necessary, TVA had to use the old high-cost steam plants to provide the power.

To document the serious accusation one would need to know the source of energy for every kilowatt-hour delivered by TVA. He would need to know how much it cost TVA to generate the energy or to purchase it. He would need to know what transmission losses had been and what transmission costs were.

He would need to know how much power TVA lost in transmitting it; how long a distance the power had to be transmitted.

If one knew all these things and discovered that the cost to AEC had been unreasonably above the cost to TVA, one would have a case. But there is no case. TVA's rate of return in 1953 went down, not up.

Mr. President, as we know, averages are tricky in a good many kinds of computations. It all depends upon where we start and how we start, how we travel, and how much parallel there is between the subjects being compared. Without any reflection upon anyone, I never indulge in figures without thinking of what Disraeli, the great Prime Minister of Great Britain, said when he declared, "There are statistics and statistics and statistics, and then there are ordinary liars." So it all depends, as we say in logic, upon the premise from whence we start.

Far as I am from being an expert, I would know better than to make charges

relating to utility costs and prices on the basis of average costs of large quantities of power obtained from a variety of sources at various times and under different contracts.

My distinguished friend from Mississippi [Mr. STENNIS] knows that a severe drought is afflicting our section today. Not only is our corn burning up, not only are many of our other crops burning up, not only are our fields dry, but many of our rivers and streams are low in water. What does that mean? When we have rain and have plenty of water, our reservoirs are filled.

No, Mr. President, we cannot make comparisons with average costs of large quantities of power obtained from a variety of sources at various times and under different contracts.

I have said before, and I repeat, that the TVA makes payments equivalent to tax payments, 5 percent of the gross revenue on all power sold except on power sold to the Government or to some agency of the Government. How can we compare a rate which does not have to pay 5 percent out of gross revenues with a rate on power going to some private industry or domestic consumer on which a tax of 5 percent or its equivalent is paid?

Mr. President, the fiscal year 1953 ended more than 13 months ago. The fiscal year 1954 ended about a month ago. Yet the first comment relating to any suggestion of overcharges by TVA was made when General Nichols was testifying in favor of the Dixon-Yates proposal before the Joint Committee on Atomic Energy last month. It would seem that to discredit TVA has now become the line for those who advocate that the combine headed by Mr. Dixon and Mr. Yates should supplant TVA as a power supplier for Memphis and the surrounding area. But there again the TVA's distinguished and fine record cannot be discredited by such tactics.

Mr. President, I spoke earlier of the document circulated by the Bureau of the Budget.

I find as an argument against the Fulton plant proposed by TVA, in lieu of the Dixon-Yates West Memphis, Ark., plant, this remarkable statement on page 3 of a document circulated by the Bureau of the Budget:

> Further, the Fulton steam plant would be on the periphery of the TVA area, 80 miles outside the Tennessee River Basin. As the President indicated at his press conference, the question whether the Government should continue to construct plants on the periphery of the basin, contemplating delivery of power far beyond the TVA area, involves a major question of public policy which was and is under study by the administration. A feasible alternative to immediate construction of the Fulton plant by TVA would provide time for completing the study of this question.

In my judgment, this quotation from the document of the Budget Bureau goes to the heart of the problem. All the rest is smokescreen. The AEC knows perfectly well that it has not been overcharged. The AEC knows perfectly well that no question of power replacement is proposed. Those contentions are parts of the smokescreen to protect AEC, so that they can undertake their attempted illegal action of signing this outrageous contract, concealing the real purpose, which is to dismember the TVA power service area, and to destroy TVA.

Mr. President, I had been speaking of the unusual, preposterous, misleading document of the Bureau of the Budget. I call attention to one more paragraph of the document, together with other comments made by persons close to the administration, indicating that the Bureau of the Budget and the President of the United States are under the impression that the public policy established in the act creating TVA contemplated that all the power produced by TVA should be used in the watershed of the Tennessee Valley. That is a very serious mistake, I may say, as one of those who participated in the writing of the act, who introduced the bill in the House, and was a member of the committee of conference.

The boundaries of the TVA power service area are not now and never have been intended to be identical with the boundaries of the watershed. Every Senator knows that a watershed varies. At one point it may be very broad or very wide; at another place it may be very narrow. Particularly is that true in a State which has mountains and high hills, as do many of the States in the Tennessee Valley area. The Allegheny Mountains really come down and finally slope off through North Carolina, north Georgia, Tennessee, and into north Alabama. In north Alabama there are mountains and hills.

Many communities, farmers' cooperatives, and REA's outside the watershed are served by power from TVA. Many communities inside the watershed—and mark this—are served, not by TVA, but by private companies.

TVA's power service area was determined, within the limits prescribed in the law, by the location of the municipalities and cooperatives which qualified under the requirements laid down in the law to receive service. If communities in the watershed did not wish service, it was not forced upon them. It was not forced upon them in the beginning, and it is not forced upon them now.

It is true, insofar as the construction of multipurpose dams is concerned, that TVA is confined to the Tennessee River and its tributaries. It could not, without a change in its basic law, undertake to construct and operate dams on the Cumberland, the Ohio, the Mississippi, or any other river. The Cumberland is another river in Tennessee. The Tennessee and the Cumberland are so close together, so nearly parallel each other in Tennessee, that they are known in that State as the Twin Rivers.

Congress never intended that the benefits of the Tennessee River system should be confined solely to the people living in the Tennessee Valley or watershed. In the basic act Congress clearly directed that power should be made available to people within transmission distance of a hydroelectric dam. That might mean some people in the valleys some distance from the dam, while other people, on the other side of the valley, might be much closer to the dam, as we know.

Tupelo, the first customer to get TVA power, was outside the Tennessee Valley watershed, but within transmission distance of Wilson Dam, on the Tennessee River.

By the way, Wilson Dam was not built by the Tennessee Valley Authority; it was built under section 124 of the National Defense Act of 1916. Construction was started during World War I and was finished after World War I by the Corps of Engineers, not by the Tennessee Valley Authority.

The fact that the Fulton steam plant is proposed to be located outside the Tennessee River Basin does not mean, as the Budget pretends to believe, that TVA is "contemplating delivery of power far beyond the TVA area." The Budget knows better than that. The Fulton plant is proposed, as the Budget knows, to meet the growing needs of the TVA's existing power service area, but only to meet the needs of the existing power service area. The Fulton plant is proposed to meet an expansion in load, not an expansion in territory.

Mr. GORE. Mr. President, will the Senator yield?

Mr. HILL. I yield to the distinguished Senator from Tennessee.

Mr. GORE. The only effort involved, then, to invade the territory of an established service area is by means of the proposed Dixon-Yates contract to invade the TVA service area. Is not that correct?

Mr. HILL. The Senator is exactly right. There is but one proposal for invasion, and that is the proposal of the Dixon-Yates private power monopoly combine to invade TVA area, an area which TVA had almost from the very beginning, which it has served year after year after year.

The Senator from Tennessee knows, as well as I do, that the TVA has been scrupulous, not only in carrying out the law, but in being careful not in any way to invade or impinge upon territory beyond its existing boundaries. As the Senator has said, there is a proposed invasion, surely, but that proposed invasion is not on the part of the TVA. It is a proposal by the private power monopoly combine to invade the TVA territory.

Mr. GORE. Then the peace in the valley, to which the late Wendell Willkie referred with respect to the 1939 act, which stabilized the service areas in that territory, is being disturbed, not by the TVA, but by the private power trust?

Mr. HILL. The Senator from Tennessee is exactly correct. As he so well knows, and as he has suggested by his question, Mr. Wendell Willkie, at that time head of the Commonwealth & Southern, which was then the holding company for the power companies in the southeast, worked out with the Government an arrangement whereby TVA would be left its existing service territory. The Commonwealth & Southern, the holding company, was well paid for the interest it had anywhere in that territory. That was the arrangement which was worked out at that time to compensate the private power company, in order that the TVA might carry on within that service territory.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator from Alabama yield?

Mr. HILL. I yield to the Senator from South Carolina.

Mr. JOHNSTON of South Carolina. Does the Senator from Alabama think that the Dixon-Yates contract will in any way interfere with the TVA?

Mr. HILL. I think it is the first step looking toward the dismemberment and the destruction of the TVA. As I have often said, there has been only one trouble with the TVA—it has done its job too well. It has given to us a yardstick that has worked, a yardstick that has been fair and honest, and a yardstick that has brought down the power rates of the power companies.

Above everything else on earth, what the private-power monopoly seeks to do is destroy the TVA and the TVA yardstick, and the private-power monopoly knows that to be so. If the monopoly can ever put the TVA in such a position that it will be dependent on the private-power monopoly for the power the TVA must have for its consumers, then and there the yardstick will be destroyed and the TVA will be destroyed.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator yield?

Mr. HILL. I yield to the Senator from South Carolina.

Mr. JOHNSTON of South Carolina. I understand President Eisenhower is advocating this proposal.

Mr. HILL. He is not only advocating it; he sent a directive, over the opposition and the protest of 3 of the 5 members of the Commission, ordering the members of the Commission to sign the proposed Dixon-Yates contract.

Mr. JOHNSTON of South Carolina. Is that not in direct contradiction to what President Eisenhower advocated when he was campaigning for the Presidency of the United States?

Mr. HILL. There is no question about that. The proposal is absolutely in contradiction.

Mr. JOHNSTON of South Carolina. Did he not make a statement in regard to the TVA at that time?

Mr. HILL. Yes. This is what the President, who was then a candidate, said:

> If I am elected President, TVA will be operated and maintained at maximum efficiency. I have taken a keen appreciation of what it has done and what it will be able to continue to do in the future. Under the new administration TVA will continue to serve and to promote the prosperity of this great section of the United States.

I inform my friend, the Senator from South Carolina, that that is the wording in a telegram sent by the President, then the candidate, to the editors of the Knoxville News-Sentinel and the Memphis Press-Scimitar 2 days before election day in 1952.

Mr. JOHNSTON of South Carolina. He was talking out of the left side of his mouth then. Now he is talking out of the right side. Right or left, he certainly changed the sides of his mouth from which he was talking.

Mr. HILL. I will say to my distinguished friend from South Carolina that the President's actions have not in any way squared with the promise he made the people of Tennessee on the eve of his election in November of 1952. The Senator from South Carolina will recall that, unlike what happened in his State of South Carolina and in my State of Alabama, the people of Tennessee voted for President Eisenhower, and I think it would be difficult to overestimate the tremendous persuasion and the overriding influence of this promise the President made the people of Tennessee 48 hours before they marched to the polls and voted for him.

Mr. President, as I have said, the Fulton plant is proposed to meet expansion in load, not expansion in territory. As a matter of fact, there has been no particular expansion of the TVA territory in latter years. The Senator referred to 1939. That is the year when we hoped and sought to bring peace in the valley, and when we paid a handsome sum to the remaining interest of the private power companies in the State of Tennessee.

As we all know, TVA has built a number of steam plants, and not one of them has resulted in any expansion of TVA territory, and not one of them was built with any thought or contemplation that there would be an expansion of TVA territory. Apparently, however, this is the question the President and the Bureau of the Budget propose to study. A study of the applicable provisions of the statute and TVA's performance under the statute would take only a few hours of time.

Oh, if I could only get the President and the Bureau of the Budget to read the TVA statute. If I could only get the General Manager of the Atomic Energy Commission to read the TVA statute. It would not take long to read that statute. It would take just a few minutes to read it, and it would give them a chance to try to understand something about TVA, about its territory, about its duties, about its responsibilities.

Mr. MORSE. Mr. President, will the Senator yield for a question?

Mr. HILL. I yield to the distinguished Senator from Oregon for a question.

Mr. MORSE. Am I correct in supposing that the expressed desire of the Senator to have the President read the statute is based on the assumption that the Senator thinks there might be on the part of the President openmindedness and the possibility of changing his opinion with regard to the giveaway proposed in the contract?

Mr. HILL. I am not optimistic about the giveaway. The Senator from Oregon must not charge me with undue optimism. But surely, if we could get the President to read the statute, we might at least have a faint ray of hope that he would remember the promise he made to the people of Tennessee 48 hours before they voted for him for President, and at least accord a little more enlightened consideration to TVA.

Mr. GORE. Mr. President, will the Senator yield?

Mr. HILL. I yield to the Senator from Tennessee.

Mr. GORE. According to the press, the President said he had ordered the signing of the 25-year contract in order that he might have time to study it. Perhaps the President is going to study it a long time.

Mr. HILL. Is the Senator implying that perhaps he is going to study it for 25 years?

Mr. GORE. No.

Mr. HILL. The Senator from Tennessee knows that after a 25-year contract is signed, even though one might study it for 25 years, he could not do anything about it.

Mr. GORE. The time to study it is before the contract is signed.

Mr. HILL. Yes; before the contract is signed.

Mr. MORSE. Mr. President, will the Senator from Alabama yield?

Mr. HILL. I yield to the Senator from Oregon.

Mr. MORSE. Mr. President, am I to understand from the observations of the Senator from Alabama with respect to his hope that the President might change his present position regarding the contract, because of a promise he made during the campaign to the people of Tennessee, that if there is some hope that the President might do that in respect to the people of Tennessee, then there is hope that he might change his position on the farm question, in view of the promises he made during the campaign not only once but many times with respect to parity?

Mr. HILL. No; I say to my distinguished friend, the Senator from Oregon, that with all my love and loyalty to the people of Tennessee, I do not indulge myself in any such optimism—even in my fondest hopes—as to believe that the people of Tennessee will enjoy such a preferred status.

Mr. President, consumers of TVA power have a right to fear that the study proposed would not be a study of the facts, but would be a study of how a series of arrangements like the Dixon-Yates proposal can be contrived to deny TVA power to all consumers living outside the watershed itself. A policy of shrinking TVA's service area and confining it to the customers living within the watershed and presently receiving service would not carry out the public policy established by the Congress in the TVA Act. The adoption of this new policy would mean dismemberment of the TVA system. It would be a prelude to destruction.

The President and the Bureau of the Budget may underestimate the dimensions of the problem they have assumed. Nashville is not in the Tennessee watershed, although it is a customer of TVA. Memphis is not in the Tennessee Valley itself. In Kentucky, only 10,000 of a total of 85,000 TVA power consumers live in the Tennessee Valley. In Mississippi, only 5,000 of the 138,000 consumers of TVA power live in the watershed; the rest—133,000—reside outside the area the Bureau of the Budget thinks Congress intended to favor. Alabama would be less drastically affected if such a revision of the TVA power service area were attempted by action of the Executive. 150,000 consumers in Alabama use power from the TVA system, and 125,000 live in the watershed; only 25,000, outside; but

in Tennessee, the State having the largest number of consumers—a total of 920,000—445,000 live in the watershed, and 475,000 live outside it. More than half of Tennessee's consumers are menaced by the study of the President and the Bureau of the Budget, if the implications of this memorandum are understood. In Georgia, where there are about 25,000 consumers of TVA power, half of them live out of the valley. As a matter of fact, it is only in North Carolina and Virginia, where very small areas are served, that the TVA power service area falls within the boundaries of the watershed.

The intent of the act creating TVA was clear. Power was to be made available to the communities which wanted to be served by TVA and were within transmission distance of a dam on the Tennessee River or one of its tributaries.

Mr. President, we hear much, these days, about partnership arrangement. The people of this area have a partnership arrangement with their Government. On the basis of that partnership and on the basis of their faith in the good faith of their Government, they have invested approximately $400 million of their own funds in distribution systems and lines to make this partnership effective. They are asking the Government to keep faith with them in this partnership.

The preoccupation of the Bureau of the Budget with the watershed, as distinguished from the power service area, raises an interesting question. Indifferent apparently to the right of self-determination of the communities which voted to receive power from TVA, is the Bureau of the Budget likewise to be indifferent to the wishes of the communities in the watershed which did not vote to take power from TVA, and which are now customers of private utility companies? Most of the Tennessee watershed in Virginia and North Carolina is in the service area of private power companies. Are they threatened by the accident that their service area lies within the watershed, as municipalities and rural cooperatives receiving power from TVA, but located outside the watershed, are menaced by the novel "public policy" now suggested by the Bureau of the Budget?

One hundred and forty-eight publicly owned systems, having a total investment today of about $400 million, have entered into long-term contracts with TVA for power service. There is nothing obscure about the history and the record. But the Bureau of the Budget, pooling its lack of knowledge with misinformation current in high places, now assumes that the TVA power system never was intended to go beyond the river basin, and that they must study ways to get it back within the boundaries they consider proper. They are saying to 475,000 customers who live in Tennessee, to 133,000 customers who live in Mississippi, to 25,000 in Alabama, and 75,000 in Kentucky. "You are not to be considered eligible to receive power from TVA in the future. You qualified under the TVA Act; you made your investments; you entered into a contract with your Government in good faith; but your wishes are to be ignored. You must become a customer of someone like Mr. Dixon and Mr. Yates, and AEC will take over the responsibility for arranging the contracts."

Mr. President, let us carefully consider this contract, and the admission that the Atomic Energy Commission was proceeding without authority, without power, to what would have been an illegal and unlawful contract. Let us contemplate that now the amendment of the Senator from Michigan would open wide the door—or, to use the expression used the other day by the Senator from Oregon [Mr. MORSE], would in fact, remove the entire side of the house, to permit more and more and more such Dixon-Yates contracts, up to an extent of power 5 times as great as the amount involved in the Dixon-Yates proposal. Let us contemplate that prostitution of this most delicate and vital agency, this agency of the very greatest importance to the defense of the country and also to its peacetime economy. Let us contemplate the proposition not only of destruction of the integrity and independence of this agency, but also the invitation and the opening wide the door for the destruction of the independence and integrity of all other independent agencies. Let us also contemplate all the conditions of the contract, as brought out so brilliantly, as I have said, by the distinguished junior Senator from Tennessee [Mr. GORE]—that is to say, that—among other defects—there would be no competition; and, Mr. President, let me say that if there is anything the Senate and the House of Representatives have insisted upon, it is that wherever possible there shall be competition. However, in this case there is not only to be no competition, but the contract is proposed, and the proposal is written, for only one combine, namely, the Dixon-Yates private monopoly combine.

Mr. MORSE. Mr. President, will the Senator from Alabama yield at this point for a question?

The PRESIDING OFFICER (Mr. SALTONSTALL in the chair). Does the Senator from Alabama yield to the Senator from Oregon?

Mr. HILL. I yield to my friend, the Senator from Oregon.

Mr. MORSE. Does the Senator from Alabama agree with me that in using descriptive language for the bill and the contract that is encompassed by it, it probably would be more accurate to describe it as a stick of legislative dynamite destroying the people's interest in a sound public power program for the Nation, rather than to use the old figure of speech that was used the other day, when reference was made to closing the barn door after all the horses were stolen?

Mr. HILL. The Senator from Oregon is entirely correct; he could not be more correct. Let me say that no one has given more study and more thought to this subject, or has spoken with greater eloquence or more compellingly on the whole matter of our power policy, than has the Senator from Oregon.

Mr. President, when we consider all these things—the unusual situation and the unprecedented preference and favoritism—almost scandalous favoritism, in fact—provided in the tax portions of the Dixon-Yates proposal; when we think about the increased burden placed upon the taxpayers by means of the excess cost to them if the Dixon-Yates proposal is signed into a contract, then I say, Mr. President that not only can there be no justification, but there cannot be even the barest excuse for signing the contract, unless it is shown to be absolutely necessary in order to advance the atomic energy program. But I challenge the proponents of the Dixon-Yates proposal—either here in the Senate or otherwise—to show one iota of necessity or the slimest, barest excuse for the Dixon-Yates proposal as being necessary to the atomic energy program. In view of all these facts and the inequitous provisions of the contract, I challenge them to show that such a contract could, in any way, shape, fashion, or form, be to the best interests of the United States or of the people of the United States.

Mr. LEHMAN. Mr. President, first I wish to compliment my distinguished colleague from Alabama for his masterly presentation of this highly important subject. He has rendered a distinct service to the Nation and to the world.

Mr. HILL. I thank the Senator.

Mr. LEHMAN. Mr. President, I send to the desk and ask to have printed and lie on the table an amendment in the form of a complete substitute for S. 3690, the pending omnibus revision of the Atomic Energy Act.

The PRESIDING OFFICER. The amendment will be received, printed, and will lie on the table.

Mr. LEHMAN. My proposal, Mr. President, is not an omnibus substitute. It does not undertake to strike down and completely rewrite present law. My bill gives full credit to the assurance of President Eisenhower in his message of February 17 of this year, that the present law, the McMahon Act, is still adequate to the Nation's needs.

My proposed substitute follows the recommendations of President Eisenhower in giving priority to certain revisions in present law designed to facilitate the exchange of atomic information, both on the military and on the peacetime uses of atomic energy, with foreign countries—chiefly our allies and friends. It also authorizes freer access to atomic information for our own citizens, private organizations, institutions, and enterprises.

My bill is primarily designed to meet the urgent need for fuller cooperation with our allies in the military sphere, and fuller cooperation with all friendly nations in the use of atomic energy for industrial, technological, and nonmilitary purposes.

This is an immediate need, attested to by President Eisenhower and by the Atomic Energy Commission. This is a need which should be met by legislation enacted at this session of Congress.

To meet this need, I propose a substitute which was drafted by the Atomic Energy Commission, approved by President Eisenhower, and submitted by him to the Congress in support of his special

message of February 17. I feel that President Eisenhower's recommendations were sound, and that the amendment he submitted should be enacted. The text of that amendment is to be found on page 10804 of the CONGRESSIONAL RECORD of July 17, 1954.

I have ascertained from members of the Joint Committee on Atomic Energy that President Eisenhower's suggestions were not incorporated in the bill reported by the committee. On the contrary, the majority of the committee saw fit to approve provisions which, as far as I can see, go in exactly the opposite direction from that urged by the President.

We have had some debate, Mr. President, on provisions of the pending bill, the committee bill, tending to indicate that there is grave doubt—certainly many of us have such doubts—as to the wisdom of some of the complex and even obscure provisions of the bill dealing with the peacetime development of atomic energy in our own country. Many of these provisions have been described—I have so described them—as among the most radical, the most dangerous, the most repugnant to the public interest—of any provisions of any bill to come before us at this session.

In my judgment, Mr. President, the pending bill is a thinly disguised giveaway bill, which will have the effect of forfeiting and giving away the public rights in a priceless public resource—atomic energy. The Government has spent $12 billion to unlock the innermost secrets of the atom, and to harness the vast power which nature has placed in the atom.

The monetary value of these secrets cannot be estimated. They are worth billions and billions and billions of dollars. They belong to the whole American people. Indeed they should be shared with private enterprise. Indeed, the great private industrial genius of America should be invited to participate in the development of the undreamt potentialities of atomic energy. I cannot urge that too strongly.

But the Government of the United States has an inescapable obligation to safeguard the legitimate interest of the people in atomic energy—in its peacetime uses. The sharing with private enterprise must be undertaken with every essential safeguard of the public's rights. We cannot be too cautious in this regard. The Government must retain full control and full sovereignty over the peacetime use of atomic energy, just as the Government must retain full control and full sovereignty over our great systems of navigable waters, over the ether, and over the airspace above us. These belong to all the people. So does atomic energy belong to all the people.

I knew this is a complicated subject—far too complicated for me fully to comprehend in the time that has thus far been available for the study of the legislation before us. I am continuing to study it. Every day I am learning new things about it. I have scores of questions, and before I am through, I may have ten times that number—questions which must be answered before I dare to give my assent to the legislation before us, or to any legislation dealing with this vast epoch-making subject.

I want all the expert advice and counsel I can get on this matter. I have every trust and confidence in the members of the Joint Committee, but it cannot yield my responsibility, as the representative of the Senate of the 15 million people of New York State, to any committee of the Congress. This bill may effect a revolution in the economic life of my State, and of many other States. This bill may result in the development of a monopoly over the source of atomic power that will dwarf any other monopoly in the concept of the mind.

I want to study the licensing provisions of this bill and the patent provisions. I will say, frankly, that I do not as of today even begin to understand all their implications.

So, Mr. President, I am not ready to vote on this bill. I will not be ready for some time to come, and I will not consent to it, if my consent is required.

But I do understand the international provisions of this bill, at least in part. What I understand I do not like, and what I do not understand I suspect.

This bill, in its international provisions, does not do what the President recommended. It does the contrary. It makes practically impossible, in my judgment, what the President recommended as urgently necessary. It places new restrictions on the exchange of atomic information with our allies. Its provisions dealing with the establishment of an international atomic pool, as recommended by President Eisenhower, are mere widow dressing, and are directly frustrated by other provisions in this measure.

The bill seems to give authority with one hand while it takes away with another.

The bill does nothing more or less than apply the principle of the Bricker amendment to the negotiation of agreements and the making of arrangements on atomic energy.

The requirement is written into the bill for the submission of any agreement on this subject, no matter how detailed or how insignificant to the Congress. Here in this bill is plainly written and expressed a mistrust of the President of the United States. In the bill it is proposed to tie the hands of the President in the conduct of the foreign relations of our country in regard to atomic energy.

In the bill we go to the length of requiring the President to obtain the approval—not the advice or counsel, but the approval—of the Department of Defense in some instances and of the Atomic Energy Commission in others for the negotiation of international arrangements and agreements in the atomic-energy field.

Is not the President the head of the Defense Department? Is he not the Commander in Chief of the Armed Forces? Is he not the Chief Officer of the United States with regard to the conduct of our foreign relations? Then why do we give to the Defense Department and to the Atomic Energy Commission statutory veto power over his acts?

Mr. President, if the President of the United States negotiates a treaty in the atomic energy field, he will have to submit that treaty to the Senate. If he negotiates an executive agreement of substance, he will have to come to Congress to have it implemented. There is no need, in connection with this bill, to debate the Bricker amendment all over again. We disposed of that, or so I thought.

What did President Eisenhower himself have to say on this subject in his special message of February 17? He said:

> Our own security will increase as our allies gain information concerning the use of and the defense against atomic weapons.

He was referring, of course, to the proposal embodied in the substitute which I have just sent to the desk, for the grant of authority to exchange certain military information in the atomic field with our allies.

Mr. President, I wish to prick a little balloon which has been floating around in the public press for the last several weeks. I am referring to the allegation that the bill is designed to carry out the President's dramatic proposal before the United Nations last year for the creation of an international pool of atomic material and atomic information, for peaceful, industrial, and technological uses.

The committee bill does no such thing. Nor, Mr. President—and I hope my colleagues will listen carefully to what I have to say, because there is apparently a widely prevalent misapprehension on this point—did President Eisenhower desire, recommend, or expect that this bill would implement his proposal for the establishment of an atomic pool.

The President said in his message of February 17:

> These recommendations are apart from my proposal to seek a new basis for international cooperation in the field of atomic energy as outlined in my address before the General Assembly of the United Nations last December. Consideration of additional legislation which may be needed to implement that proposal should await the development of areas of agreement as a result of our discussions with other nations.

I am deeply perturbed over the allegation that the pending bill implements the President's proposals for an international atomic pool for peacetime uses. I am firmly convince that the proposed bill would do just the opposite.

I believe that the bill now pending would seriously hamper the President and the Secretary of State in their current negotiations looking toward the creation of any international pool, and I believe that the stringent requirements for working out international agreements, especially the requirements contained in sections 123 and 124, would make such a concept as an international pool in which the Soviet Union would participate utterly impossible.

The President clearly indicated to the Congress in his message of February 17, that congressional consideration of legislation which might be needed to implement his atomic-pool proposal should "await the development of areas of agreement as a result of our discussion with other nations."

As far as I know he has made no further recommendations on this subject, and still is of the opinion that any legislative action on this front should await the conclusion of exploratory talks between this Government and governments of other nations.

The Senator from Rhode Island [Mr. PASTORE], in his statement of separate views attached to the report on S. 3690, has indicated serious question over the bill's provisions covering international cooperation. Representatives HOLIFIELD and PRICE have indicated further reservations.

Representatives HOLIFIELD and PRICE state that "section 124 appears to us a premature attempt to legislate in a delicate field where international diplomatic negotiations are pending." I agree with that view.

Mr. President, I believe—and I am sure many of my colleagues will agree—that it is essential that we pass some legislation on the subject of international cooperation in the atomic field.

Here is a bill everybody can support. It is the one recommended by the President, and drafted by the Atomic Energy Commission. Let us approve it.

As for the other provisions of the pending bill, dealing with licenses, patents, and many other complex phases of the unexplored field of commercial development of atomic energy, let us have time to study the provisions of this bill. Let the experts in this field study it. Let the public interest groups study it. Then let us take time, early in the next session, for such extensive debates as will be required, and move on now to the other essential legislation which must and should be enacted before we adjourn.

We must not be stampeded into hasty action. We must not let the desire to adjourn betray us into approving that which is best left for calm, sober, and careful evaluation. I ask unanimous consent that the text of my substitute amendment be printed in the RECORD at this point in my remarks.

The PRESIDING OFFICER (Mr. SALTONSTALL in the chair). Without objection it is so ordered, and the amendment will be received and printed, and will lie on the table.

The amendment submitted by Mr. LEHMAN is as follows:

On page 1 strike all after the enactment clause and insert the following:

"SEC. 2. Section 5 (a) (3) (C) of the Atomic Energy Act of 1946, as amended, is amended to read as follows:

"'(3) Prohibition: It shall be unlawful for any person to * * *.

* * * * *

"'(C) directly or indirectly engage in the production of any fissionable material outside of the United States, except that the President may authorize the Commission, in accordance with such conditions as he may prescribe for the protection of the common defense and security of the United States to grant exceptions to this clause (C).'

"SEC. 3. Section 5 (d) (1) of the Atomic Energy Act of 1946, as amended, is amended to read as follows:

"'(d) General provisions: The Commission shall not—

"'(1) distribute any fissionable material to—

"'(A) any person for a use which is not under or within the jurisdiction of the United States;

"'(B) any foreign government, except that notwithstanding any limitation of any provision of this section the President may authorize the Commission, in accordance with such conditions as he may prescribe for the protection of the common defense and security of the United States, to enter into direct arrangements with the governments of other nations involving the distribution of fissionable material to such governments for research or industrial use: *Provided*, That no fissionable material shall be distributed to any foreign government except upon receipt of assurances from the recipient government that such material will be used only for research or industrial purposes and will not be used for weapons or other military purposes; or

"'(C) any person within the United States if, in the opinion of the Commission, the distribution of such fissionable material to such person would be inimical to the common defense and security.'

"SEC. 4. Section 10 (a) of the Atomic Energy Act of 1946, as amended, is amended to read as follows:

"'(a) Policy: It shall be the policy of the Commission to control the dissemination of restricted data in such a manner as to assure the common defense and security. Consistent with such policy, the Commission shall be guided by the following principles:

"'(1) That until Congress declares by joint resolution that effective and enforceable international safeguards against the use of atomic energy for destructive purposes have been established, there shall be no exchange of restricted data with other nations, except that the President may authorize the Commission, in accordance with such conditions as he may prescribe for the protection of the common defense and security of the United States, to enter into arrangements involving the communication to other nations of—

"'(A) restricted data necessary to assist other nations in the development of industrial applications of atomic energy for peaceful purposes;

"'(B) restricted data necessary to assist nations which are participating with the United States in the defense of the free world, including regional defense organizations such as the North Atlantic Treaty Organization, in the development of defense plans, the training of personnel in the employment of and defense against atomic weapons, and the evaluation of the capabilities of potential enemies in the employment of atomic weapons; and

"'(C) restricted data on refining, purification, and subsequent treatment of source materials; reactor development; production of fissionable materials; health and safety; and research and development relating to the foregoing.

"'(2) That the dissemination of scientific and technical information relating to atomic energy should be permitted and encouraged so as to provide that free interchange of ideas and criticisms which is essential to scientific progress.'

"SEC. 5. Section 10 (b) (1) of the Atomic Energy Act of 1946, as amended, is amended to read as follows:

"'(1) The term "restricted data" as used in this section means all data concerning the theory, design, and manufacture of atomic weapons, the production of fissionable material, or the use of fissionable material in the production of power, but shall not include any data which the Commission from time to time determines may be published without adversely affecting the common defense and security: *Provided*, That in the case of data which the Commission and the Department of Defense jointly determine to relate primarily to the military utilization of atomic weapons the determination that the data may be published without adversely affecting the common defense and security shall be made by the Commission and the Department of Defense jointly: *Provided further*, That the Commission shall remove from the restricted data category such data as the Commission and the Department of Defense jointly determine to relate primarily to the military utilization of atomic weapons and which the Commission and the Department of Defense jointly determine can be adequately safeguarded, as classified defense information, under other applicable statutes. Action by the Commission pursuant to the preceding proviso shall not be regarded as excluding the applicability of any other laws, including sections 793 and 794 of title 18 of the United States Code.'

"SEC. 6. Section 10 (b) (5) (B) of the Atomic Energy Act of 1946, as amended, is amended by adding the following subsection:

"'(viii) The Commission shall determine the scope and extent of personnel security investigations to be made for the Commission by the Federal Bureau of Investigation or the Civil Service Commission on the basis of the nature and significance of the access to restricted data which will be permitted: *Provided*, That nothing in this act shall be construed as limiting the authority of the Commission to authorize any contractor, prospective contractor, licensee, or prospective licensee of the Commission to permit any employee of an agency of the Department of Defense or of its contractors or any member of the Armed Forces to have access to restricted data required in the performance of his duties where the head of the appropriate agency of the Department of Defense or his designee has determined, in accordance with the established personnel security procedures and standards of such agency, that permitting the member or employee to have access to such restricted data will not endanger the common defense and security.'"

Mr. LEHMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. SALTONSTALL in the chair). The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. LEHMAN. Mr. President, I ask unanimous consent that the order for the call of the roll be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPOINTMENT OF OFFICERS OF THE REGULAR NAVY AND MARINE CORPS—CONFERENCE REPORT

Mr. SALTONSTALL. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6725) to reenact the authority for the appointment of certain officers of the Regular Navy and Marine Corps. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6725) to reenact the authority for the

appointment of certain officers of the Regular Navy and Marine Corps, having met after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows: That the Senate recede from its amendments numbered 1 and 2.

LEVERETT SALTONSTALL,
FRANCIS CASE,
JAMES H. DUFF,
JOHN C. STENNIS,
Managers on the Part of the Senate.

L. C. ARENDS,
PAUL W. SHAFER,
LEROY JOHNSON,
JAMES E. VAN ZANDT,
CARL VINSON,
PAUL J. KILDAY,
L. MENDEL RIVERS,
Managers on the Part of the House.

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. SALTONSTALL. Mr. President, the House and the Senate conferees met in full and complete discussion of the Senate amendments to H. R. 6725, which were offered on the floor of the Senate by the Senator from Colorado [Mr. JOHNSON].

The purpose of the amendments was to confer on the Board for the Correction of Naval Records authority to review the cases of officers of the Navy who were passed over during the wartime selection system by panels, as contrasted with selection boards.

The Senate amendments would also have provided special relief to two naval officers, a Commander Rawlins and a Commander Shanahan.

The House conferees remained adamant, and the Senate conferees were as unable to prevail with any compromise language as they were to insist upon the original language.

It was agreed, however, by all conferees that the original purpose of H. R. 6725 was completely sound, and that a grave injustice would be done to several hundred Reserve officers of the Marine Corps and of the Navy if the bill failed of enactment.

For the reasons which I have stated, therefore, the Senate conferees receded from their amendments and agreed to the bill as it passed the House.

I may say, in addition that, not only the Senate conferees, but also the House conferees, were sympathetic to the fact that the present Chief of Naval Operations felt an injustice had been done in the two cases mentioned and that private bills, if they were introduced, would be considered at the next session of the Congress by the respective committees in the Senate and the House.

I hope the report will be accepted. It was unanimously agreed to by the conferees.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

REVISION OF THE ATOMIC ENERGY ACT OF 1946

The Senate resumed the consideration of the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

Mr. JOHNSTON of South Carolina. Mr. President——

The PRESIDING OFFICER. The Chair recognizes the Senator from South Carolina.

Mr. JOHNSTON of South Carolina. Mr. President, I rise to suggest some safeguards of the public interest in electric power which I feel should be incorporated into the bill before the Senate (S. 3690) before its passage. I also desire to call to the attention of the Senate the relationship of the electric power provisions of this atomic bill and other efforts to weaken and destroy the Federal power policy which has been worked out over many years.

Mr. President, any bill on atomic energy which passes this Congress should protect the more than $11 billion which the American people have invested in the atomic energy program. Our people through their Government have made this huge investment to harness the atom for defense and now for peacetime use. I am in favor of the civilian use of atomic energy for power development, but I think it is essential that any amendments of the Atomic Energy Act continue the present protection of the public interest and insure that the benefits of the Government's atomic development program will be available to all the people. Above all we cannot permit a monopoly to be built by the few giant utility and industrial companies which have the financial and technical resources at this time.

Mr. President, this bill fails to contain adequate provisions to insure that the Atomic Energy Commission will not overstep the bounds of its intended functions. We now have one example of the AEC's overstepping its limits to contract for power from private utilities which the AEC will not use. We see the AEC being used to run interference for the private utilities in their efforts to divide and destroy the Tennessee Valley Authority.

In the McMahon Act, as amended, the Commission was given authority to contract for power for use at the Oak Ridge, Paducah, and Portsmouth AEC installations. It was not given blanket authority to contract for power to be used by other parties. In spite of the intent of the previous legislation and over the objection of the majority of the Commission, the AEC is being forced by the administration to make just such a contract.

The plan would have the AEC become a power broker, to buy power which it does not need, which would be used several hundred miles from any of the three sites authorized in the act.

The hearings before the Joint Committee on Atomic Energy indicate the views of Commissioners Smyth and Zuckert, "that the present proposal would create a situation whereby the AEC would be contracting for power not one kilowatt of which would be used in connection with the Commission's production activities."

Not only would the intent of the law be circumscribed by this contract, but the taxpayers would be charged with a minimum of $90 million more than the same power can be produced for the AEC by the TVA.

Mr. President, I should like to read an editorial which appeared in my hometown newspaper with reference to this subject. The editorial comes from the Anderson Independent of June 27, 1954, from which I read:

AS A TAXPAYER, YOU'VE BEEN ORDERED BY IKE TO BUILD A POWERPLANT FOR A FEW TYCOONS

A private power syndicate, composed of a few tycoons, wants to build a new $107 million powerplant near Memphis, Tenn. This group is known as the Dixon-Yates syndicate.

Ironically enough, although operating under the banner of "private enterprise," these individuals do not wish to risk their own money on the project. They want the Federal taxpayers to foot the bill.

This group went to Washington. They said they wanted:

1. To use the Government's credit to build the plant.

2. To secure an expensive contract with the Atomic Energy Commission to pay off the bonds.

Then, of course, within the next few years they would own the plant outright and reap rich profits from a project built with your tax dollars. You get nothing for the use of your money.

What happened when this bold request was laid before the powers that be?

President Eisenhower ordered that it be done at once, and he issued the ukase in the sacred name of "free enterprise." We assume that in this case this means that these fellows are to get for free a powerplant, thanks to a little political enterprise.

This kind of thing—dipping into the Public Treasury to line the pockets of a favored few—is common during Republican regimes, but it must come as a shock to the disciplery to find the great moral crusader the leading light in a deal that would make the old Teapot Dome gang turn green with envy at the legal finesse.

The AEC doesn't need the power from the proposed plant. AEC has an excellent and economical contract with TVA, which was built with public funds and which still belongs to the people of the United States.

This scheme can be regarded as the first step in the plan to make TVA ripe for future "giveaway" to a few individuals at a few cents on the dollar.

From the standpoint of the Dixon-Yates syndicate, the present scheme makes Santa Claus look like Scrooge. They expect to put up equity capital of 5 percent of total cost of the plant, something like $5,850,000. Ordinarily, private utility financing calls for 40 percent equity capital, in this case about $46,800,000, and 60 percent bonds.

But with Ike giving them a 25-year contract with AEC, the Dixon-Yates outfit will get by with 5 percent equity capital and 95 percent in money borrowed on Government credit.

Now for the kicker: The contract with Dixon-Yates will cost the AEC (and thus the taxpayers) $3,600,000 a year more than the TVA contract. This will amount to more than $90 million over the 25-year period.

By the way, there is a little proviso that the contract can be extended for two 5-year periods, which makes the total time 35 years, instead of 25 years.

I continue to read:

What is more, it will represent a contribution by the taxpayers to Dixon-Yates, thus handing this private group a $107 million installation for, at most, only $17 million.

An effort will be made by conscientious Congressmen to block the President's order. As Representative HOLIFIELD puts it, the plan

calls for a free ride for the utilities at the end of which the private utilities will own the automobile paid for by the taxpayers.

This is the great moral crusade the Republican Party is giving the United States.

This is from the Anderson Independent, a great newspaper of South Caroline, which always keeps the people informed of what is going on.

This additional cost to the people might run as high as $140 million over the 25-year life of the contract. The AEC admits the cost will be as much as $90 million while the TVA thinks it will be nearer $140 million. The administration is pledged to a government of economy but this looks like the people will pay to improve the economic status of the private utilities.

Mr. President, it is shocking that an independent commission set up by the Congress to administer the atomic energy program can be made to ignore its own judgment. It is the body best informed on the subject, and it is most unfortunate that the reasoned conclusions of this body should be laid aside at the desire of the administration.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield to the Senator from Illinois.

Mr. DOUGLAS. Is the Senator from Illinois correct in his understanding that the discretionary power of the President in relation to atomic matters is primarily, indeed almost exclusively, confined to decisions as to types of weapons, distribution of information to allies, and so forth, but that he does not have the power to dictate the day-to-day policies of the Atomic Energy Commission in relationship to the details of its operation?

Mr. JOHNSTON of South Carolina. In answer to the Senator from Illinois, I may say that I had always thought, up until this particular question arose, that it was left to the President of the United States, as Commander in Chief, to protect the country, so far as defense was concerned, and that he could act on matters affecting it.

But, as the Atomic Energy Commission is an independent agency, and, as I had always thought, a nonpolitical agency, it has a free hand to do what it thinks best in the development of atomic energy, not only for the purposes of defense, but also for the good of the Nation.

Mr. DOUGLAS. Mr. President, will the Senator yield for a further question?

Mr. JOHNSTON of South Carolina. I yield.

Mr. DOUGLAS. The question before the Senate has nothing whatsoever to do with the national defense or with the preparation of weapons; it is simply a question of whether or not the Memphis area should be primarily served by TVA power or by private power. Is not that correct?

Mr. JOHNSTON of South Carolina. When the situation is boiled down to its last analysis, I think that is true. It does not in any way affect our national defense.

Mr. DOUGLAS. Really the question is of no concern to the Atomic Energy Commission is it?

Mr. JOHNSTON of South Carolina. Not at all. I do not think the Atomic Energy Commission is trained to do the type of work which it will be called upon to do in this particular field.

Mr. DOUGLAS. So this would be the use of a governmental body for a purpose which was never desired by the Commission.

Mr. JOHNSTON of South Carolina. That is true. It was not created to perform any function like this. Its function was to develop atomic energy—mostly for the national defense when it was first brought into existence.

Mr. DOUGLAS. Is not the fact that the terms of the members of the Commission overlap a fairly good indication of the fact that it was the intention of Congress to create a nonpolitical Commission?

Mr. JOHNSTON of South Carolina. There is no doubt whatsoever in my mind that that was the intention of Congress when it created the Atomic Energy Commission.

Mr. DOUGLAS. The Atomic Energy Commission was not intended to be like one of the executive departments of the Government, and to be under the direct control of the President, was it?

Mr. JOHNSTON of South Carolina. That is true. It was established as an independent agency, and not as an administrative office under the President.

Mr. DOUGLAS. If a similar order in connection with another matter had been issued to a quasi-judicial body, such as the Federal Trade Commission, it would have been regarded as an infringement upon that Commission's jurisdiction, would it not?

Mr. JOHNSTON of South Carolina. In my opinion, it would clearly have been decided so; and similarly in the case of the Federal Power Commission or the Interstate Commerce Commission. All the commissions are in the same category.

Mr. DOUGLAS. In other words, regulatory and quasi-judicial bodies are not intended to be under the administrative control of the President, are they?

Mr. JOHNSTON of South Carolina. No; they are supposed to be independent agencies, designed to act upon matters coming before them as they consider right and just from a legal standpoint and, at the same time, from a standpoint of equity.

Mr. DOUGLAS. Is my memory correct that this question really was decided by the Supreme Court of the United States in the so-called Humphrey case, in an early administration of President Franklin D. Roosevelt, who removed Commissioner William Humphrey from the Federal Trade Commission, and the Supreme Court ruled that because the Federal Trade Commission was a quasi-judicial body, the President had no power of removal?

Mr. JOHNSTON of South Carolina. I am familiar with that case; and it happens that I am probably a little more familiar with it than are some of my fellow Senators, because one of my friends in the Interstate Commerce Commission has been threatened in recent days with being ousted. I had occasion, then, to go back and read those cases, and I read the Humphrey case. In the Humphrey case the decision of the Supreme Court was that the Federal Trade Commission was an independent agency; and because it was an independent agency, the Commissioners were appointed for specified terms of office, and the President could not remove them without cause until they had finished their terms of office.

Mr. DOUGLAS. The Humphrey case was differentiated sharply from the case involving the postmaster in Portland, Oreg., who was removed by President Wilson. That removal was judged to be proper because he was held to be an administrative official, directly under one of the department heads under the President.

Mr. JOHNSTON of South Carolina. That is true. He was directly under one of the Cabinet officers. That being so, the President could remove him.

Mr. DOUGLAS. I take it the argument which the very able Senator from South Carolina is making is that the President exceeded his constitutional powers when he caused one of his administrative assistants to tell the Atomic Energy Commission that they should consummate the Dixon-Yates contract.

Mr. JOHNSTON of South Carolina. I think he was exceeding his rights as President when he told the Commission what to do.

Mr. President, I wish to repeat a statement I have made, because this is the way I feel about it. It is shocking that an independent commission created by the Congress to administer the atomic energy program can be made to ignore its own judgment by the President of the United States. It is the body best informed on the subject, and it is most unfortunate that the reasoned conclusions of this body should be laid aside at the desire of the administration.

As the Anderson Independent, a newspaper of my State, said in an editorial June 19, 1954:

> Special interests are in the saddle, riding hell for leather to gouge the American people of their natural heritage and property built with their tax money. Is this the moral crusade we were promised by "King Ike and his knights of the spoils table"?

Mr. President, I consider it essential that this bill not pass until a provision is added to insure that the AEC can contract for power only for its own needs.

Even with that addition, the bill would need many other major improvements to make it acceptable. The bill does not contain a preference provision with regard to municipal, cooperative, or other nonprofit public bodies, which has been the established policy within the last 50 years.

The present bill and the McMahon Act both contemplate the availability of by-product power which may be created in the production of fissionable material. They provide that such energy may be used by the Commission, transferred to other Government agencies, or sold to public or private utilities.

Our Federal policy has long recognized that cooperatives and public bodies should be given preference in the sale of electric power from projects involving

the development of irrigation, water conservation, flood control, and navigation improvement. This policy was embodied in the Federal Water Power Act of 1920 and the Federal Power Act of 1935. The principles were continued in the Boulder Dam Act of 1928, the Tennessee Valley Authority Act of 1933, the Bonneville Act of 1937, the Flood Control Act of 1944, and most recently in the Falcon Dam bill passed a few months ago.

The purpose of the preference policy is to insure that the benefits of public resources go to the people and not just to private profit interests. The Atomic Energy bill before this body should continue this well-established policy. The people own the atomic energy developments which have been achieved with their money, just as the people own the rivers of our land. When there is by-product power from AEC installations, the benefits should be passed on to the consumer, and the only way to do it is to make the power available first to the consumer-owned utilities which will pass on the benefits.

Such preference for cooperative and public bodies should also be provided in the law with regard to obtaining nuclear materials and obtaining licenses for nuclear powerplants. That would be comparable to present statutes giving preference in the development of hydroelectric sites. The nuclear materials are a public resource, and would remain so under the proposed amendments. It is only fair to give preference to public bodies to that which is paid for by the taxpayers.

Preference for public bodies and cooperatives is not only based on fairness, but it is founded on the experience that this is the only effective way to combat monopoly rates and to provide a low-cost yardstick to show what electricity should cost. Electric utilities by their nature are monopolistic. We cannot have a multitude of electric companies serving the same area, and the individual consumer cannot choose between various competing utilities on the basis of their rates and service. The only way we have succeeded in introducing the important American element of competition into electric service is by having a small percentage of public power, which has exercised on rates a downward influence out of all proportion to its comparative size.

Mr. President, I have outlined how the bill fails to take into account the preference principle which has evolved in our Federal power policy over the last half century. I should like now to indicate some other ways in which the bill, which is really a power bill, disregards past experience. The bill as reported is deficient in its failure to provide adequate safeguards to protect the public interest in the licensing of non-Federal agencies to produce and sell atomic power.

Among the safeguards which have been included in the Federal Power Act, but are not included in this bill, are—

First. Safeguards for the prior right of Federal development of the resource in any specific case where this will best serve the public interest.

Second. Safeguards for the right to public hearings in connection with applications, with specific provision for the admission as parties of interested States, State commissions, municipalities, representatives of interested consumers, or competitors.

Third. Safeguards for the right of Federal or other public recapture of any development by a private licensee at the end of the license period, on payment of no more than the licensee's net investment in the project.

Fourth. Safeguards for reasonable rates to consumers by a provision requiring licensees as a condition of any license to agree to Federal regulation where States have provided no regulation of electric rates; and with a further provision that in any rate proceeding the licensee can claim for rate base purposes no more than the net investment in the development.

Mr. President, when we consider that six States have not set up any State agency to regulate the rates charged by electric utilities, then we can clearly see the need for providing for such protection before the bill is passed.

I certainly am in favor of private power, but we need safeguards to prevent the private capitalization of values inherent in the right to use a public resource. The private developers of atomic power should receive what is necessary to assure them the funds required for development, but the public are also entitled to receive the full value of their resources.

Mr. President, in this bill I cannot find any assurance that private patents could not be obtained on developments occurring as a result of research financed by the Federal Government. The principle of rewarding inventive genius with a patent is well founded, and can be justified where it does not produce uncontrollable monopoly. However, I believe the proposed amendments even would make it possible for a private patent to be obtained retroactively on developments denied patents under the present law.

The amendments would give the Atomic Energy Commission optional authority to declare a patent affected with the public interest, and to make it available, under a patent license, to interested parties, upon payment of reasonable royalty fees. In order to make certain that patents which "affect the public interest" are so declared, it seems necessary to make such a finding mandatory if certain conditions are met. This is a provision of the McMahon Act which should be continued.

Mr. President, before this bill passes, it should be amended so as to prevent the AEC from being used to damage the TVA; to provide preference for public and cooperative bodies in buying by-product power, in obtaining nuclear materials, and in the granting of licenses for nuclear powerplants; to incorporate the other safeguards of the Federal Power Act; and to prevent monopolization through patents.

Mr. President, I was very much pleased to read the majority report and the separate views on the bill, as submitted from the Joint Committee on Atomic Energy. I should like to indicate how important the minority of the committee think this bill is. I read now from the first page of the minority views of Representative HOLIFIELD and Representative PRICE:

> The atomic-energy bill is one of the most important bills before the Congress.

Note that, Mr. President—"one of the most important bills before the Congress."

> It proposes to chart the future course of peacetime atomic-energy development. So deep and farreaching is its potential impact on the American economy and upon our position in world affairs that we consider it necessary to set forth our own views and reservations concerning the bill.
>
> As members of the Joint Committee on Atomic Energy we have endeavored always to act in a spirit of nonpartisanship. The duties and responsibilities committed to the jurisdiction of our committee are too directly concerned with the Nation's security and welfare to allow the play of partisan politics. In the same objective way we have tried to approach this legislation.
>
> During the course of the committee hearings and conferences, we have presented what we believed were constructive proposals for improving the bill. Some were accepted in whole or in part and others rejected. Among the committee members there were, and presumably still are, many differences of opinion and interpretation regarding particular provisions of the bill. We respect those differences, and although we were willing to have the bill reported out for floor debate, the public importance of this measure compels us to recount here what we consider still its major defects.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. DOUGLAS. As I remember, the minority views were signed by Representative HOLIFIELD, of California, and my good friend and colleague, Representative PRICE, of Illinois.

Mr. JOHNSTON of South Carolina. That is true.

Mr. DOUGLAS. They are two of the ablest and finest Members of the other House. Does not the Senator from South Carolina agree that their views deserve very serious consideration?

Mr. JOHNSTON of South Carolina. I think if anyone follows the hearings and reads the questions which they asked and the interpretations they placed upon the evidence coming before them, he would have to agree with the Senator from Illinois that those two men are the most learned in the field of atomic energy that we have in the Congress today.

Mr. DOUGLAS. Mr. President, will the Senator further yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. DOUGLAS. Is it not a fact that while people talk vaguely about the tremendous power which is latent within atomic energy, they do not fully appreciate its enormous possibilities? For example, the theory of atomic energy arises from one of Einstein's two fundamental equations, namely, that energy is equal to mass multiplied by the square of the velocity of light; and since the velocity of light is approximately 186,000 miles a second, if we square that we

reach a figure just short of 40 billion, which means that the potential of that power can be stepped up potentially 40 billion times, or close to it.

Mr. JOHNSTON of South Carolina. Under that formula, that is true.

Mr. DOUGLAS. It is undoubtedly true that the full possibilities of the Einstein formula have not been realized. Nevertheless, it is also apparent from the newspaper comments which have been made that we are approaching them ever more closely. Therefore the industrial, as well as the military possibilities of atomic energy are enormous.

Does not the Senator from South Carolina therefore feel that a thorough consideration of this subject by the entire membership of the Senate is very appropriate? We are dealing not merely with a powerful military weapon, but with something which may revolutionize industry and the manner of life, not only of this country, but of the entire world.

Mr. JOHNSTON of South Carolina. I do not think any of us today can conceive how vast the possibilities in that field are. I know I cannot. I am not a scientist. I know that there are very few learned scientists in the Congress at the present time. However, we are aware that marvelous things have happened in the past few years. We can judge the future only by the past. If that is a reliable yardstick by which to measure, we must acknowledge that we have no idea how vast the atomic-energy field will prove to be in the near future.

Mr. DOUGLAS. Is it not true that the people of the United States have a tremendous stake in the development of atomic power? They have already invested $12 billion in the enterprise.

Mr. JOHNSTON of South Carolina. They have invested in that field between $11 billion and $12 billion. The investment having been made by the people of the United States, of course, it belongs to the people of the United States, and not to any one corporation or group of individuals.

Mr. DOUGLAS. Mr. President, will the Senator further yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. DOUGLAS. Is it not true that while this investment has been primarily made for the sake of greater military security, there has always been the hope in the minds of people that these great powers could be used for human advancement, for peacetime purposes, and that this hope has assuaged, so to speak, some of the doubts which men and women might otherwise have had about the program?

Mr. JOHNSTON of South Carolina. I do not like to think that the only purpose of the potentialities in the field of atomic energy is to furnish weapons for destruction. I like to believe that there are just as great possibilities in the field of industry and helping the peoples of the world as there are in the military field, where atomic energy is used as a destructive element.

Mr. DOUGLAS. Even though we are in the very infancy of the peacetime uses of atomic power, is it not true that it has already demonstrated its value as a tracer in diagnosing diseases, in irradiation to preserve foods by killing bacteria, in the potential development of energy, and in a series of other possibilities as well?

Mr. JOHNSTON of South Carolina. That is true.

Mr. DOUGLAS. So all of industry may ultimately be revolutionized by the possibilities flowing from atomic energy.

Mr. JOHNSTON of South Carolina. That is true. For that reason I do not believe that we should attempt to go into a subject so vast near the close of the session. The great potentialities of atomic power should be the subject of discussion and debate, so that the public as well as Members of Congress, may know what is going on. Many persons who are not Members of Congress could probably throw a great deal of light on this subject if we only had time to go into it. But if we rush through the consideration of such an important measure, as we are doing at the present time, near the close of the session, I fear we may do something which we may regret in the future.

Mr. DOUGLAS. Therefore the Senator from South Carolina thinks it is very important to discuss such matters as who shall develop the power, under what conditions, what control over the material sold or leased shall be exercised by governmental authority, what the patent provisions are to be, whether there are to be any preference clauses, what provision there should be concerning the exchange of information between nations, and many other subjects. These are highly appropriate subjects, upon which full discussion is needed. It is not enough for Congress to be composed merely of "yes" men, whose only function is to ratify whatever is submitted to them on the floor.

Mr. JOHNSTON of South Carolina. I do not want a Commission to go into a field that will probably consume its time and energy, with the result that, instead of developing the field it should be developing, it will be attending to the running of an electric powerplant. That is the situation we are facing at the present time.

Mr. DOUGLAS. In other words, the Senator from South Carolina feels the task of the Atomic Energy Commission is so important that it should not be asked to take in washing for Dixon-Yates. Is that correct?

Mr. JOHNSTON of South Carolina. That is putting it right down on the line. I do not believe we ought to be asked to take in washing for Dixon-Yates at this time when a great many people have a fear as to whether we are developing our atomic-energy program as fast as Russia is developing hers. Has the Senator heard anyone discuss that point?

Mr. DOUGLAS. Oh, yes.

Mr. JOHNSTON of South Carolina. I think that is more important than whether the Atomic Energy Commission shall be the selling agent for TVA. We could probably set up a little commission to do that, but I do not believe we want to do it, for the reason that such a commission would not be popular. Right now the Atomic Energy Commission, having gone into the field of atomic energy, in developing the atomic bomb and the hydrogen bomb, the people are looking to the Commission as their saviour. It is one of our defense agencies, and we do not want it to do work for which it is not fitted at all.

Mr. DOUGLAS. I wish to congratulate the Senator from South Carolina for his able speech.

Mr. JOHNSTON of South Carolina. I certainly thank the Senator from Illinois for what he has lent to my discussion. He always brings something worthwhile.

Mr. President, I would not be so gravely concerned about this atomic power bill, or about other power legislation which has been or will be before the Congress, unless I thought they were all part of an organized campaign to destroy the effectiveness of our Federal power policy.

In my opinion, our Federal power policy has proved too important a key to the economic expansion of the South and other sections of the country for us to allow such a campaign to succeed.

The people of my region understand the importance of maintaining an alternative to monopoly in the vital field of electric power. They know the part which the Federal power program, in all its aspects, has played in ending the time when the South could be referred to as economic problem number 1. They do not look with favor on any action of Congress or the present administration which tends to restore private power to a position of monopoly.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. DOUGLAS. Although it may have been said 20 years ago that the South was the No. 1 economic problem of the country, is it not true that under the developments of the past 20 years, in which the Government has played some part, the South has made tremendous progress; and is it not also true that the whole Nation rejoices in that progress?

Mr. JOHNSTON of South Carolina. I am glad to hear the Senator from Illinois say that. I know he felt that way even before he spoke. In the past 20 years the South has progressed more than it did in the hundred years before that. There is no question about that in my mind.

Mr. DOUGLAS. Mr. President, will the Senator yield further?

Mr. JOHNSTON of South Carolina. To show the difference, in the field of electricity, in 1932 only about 4 percent of the farm homes in South Carolina were electrified. Today approximately 90 percent of the farm homes in South Carolina are electrified.

Mr. DOUGLAS. Mr. President, will the Senator yield further?

Mr. JOHNSTON of South Carolina. I yield.

Mr. DOUGLAS. In view of the great progress the South has made in the period from 1933 to 1952, is it not a shame that certain southern leaders forgot whence this progress had come and deserted the home of their fathers?

Mr. JOHNSTON of South Carolina. Of course, that is true. I was about to quote Will Rogers on that. He was talking to a friend and he said to him, "I hear you have gotten rich."

The friend said, "Oh, no; I haven't gotten so rich."

Will said, "Well, I understand you have made several million dollars."

His friend said, "Oh, no; I don't know about that."

"Well," Will said, "I understand that you have made enough money to change from a Democrat to a Republican." [Laughter.]

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. DOUGLAS. Does the Senator from South Carolina have an estimate as to what the critical point is under which such changes take place?

Mr. JOHNSTON of South Carolina. I do not know, but I have seen them take place in several instances. Of course a different yardstick is needed for different people.

Mr. President, the Federal power program of the last 47 years has benefited us in many lines of activity. It has been flexible and adaptable to the needs and desires of every region. It has also been a worthwhile force in breaking down the restraints of monopoly price fixing on the widespread use of electricity in the homes, on the farms, and in the building of industry and employment.

While this program was establishing the Tennessee Valley Authority in the great river basin to the west of us, it was forming the basis for the local authorities providing power supply for municipal and rural electric cooperatives in my State of South Carolina. I shall have something further to say about this later in my remarks.

Here I shall only point out that the future demand on such systems as those of the South Carolina Public Service Authority, a State agency, and the Greenwood County Electric Power Commission, can be met only if the Federal programs for development of our river basins continues, and if these bodies have access to atomic-power developments.

I need not remind my colleagues that the Rural Electrification Administration has played an important part in the economic progress of the South. Today, in the States of Virginia, North Carolina, South Carolina, Georgia, Alabama, Mississippi, Tennessee, and Kentucky, there are 229 rural electric cooperatives serving more than 1,300,000 farm families and rural establishments. This means rising standards of living and more profitable farm operation.

This is sound business from the point of view of the Government. The investment is repaid over and over again, not only in the repayment of Government loans, but also in the improvement in the region's ability to pay taxes of all kinds.

The progress of the South during the last 20 years, Mr. President, will continue. But a vital factor in the ability of the South to increase its contribution to the Nation will be the continuation of the Federal power programs and a dynamic rural electrification program. This requires a halt to the efforts by this administration to comply with the restrictive demands of private power monopoly.

In saying this, I do not want to reflect on the region-building efforts of the private power companies which serve the South. But I do want to point out that they have gained their places among the more progressive power systems in the country largely under the stimulus which the Federal power policy of the last 20 years has provided.

No one can discount the influence of the Tennessee Valley Authority program on the neighboring companies. No one can discount the influence of the public power agencies authorized under the laws of South Carolina. No one can explain away the accomplishments of the rural electrification program of the Federal Government.

Mr. President, I am going to review some of the development in the South for which Federal power policy is responsible, together with our hopes for the future, and then turn to a discussion of the present situation, for a threat to those hopes is arising like a cloud on the horizon. That threat is that the present Republican administration will try to capture for private monopoly the entire field of electric power, including the emerging atomic power program.

If the well-organized private power companies succeed in their present campaign, it will mean a setback for the South and a setback for the Nation as a whole.

Let me first say a word about the influence of the Tennessee Valley Authority in the field of electric power.

TVA showed that a revolutionary change in the philosophy of power marketing, in a region where low average income was reflected in low average use of power, could promote a phenomenal expansion of both, so that within the short span of 20 years, first, the region has utilized all of the more than 2 million kilowatts of undeveloped hydroelectric power in the Tennessee River Basin; second, the region is reaching out to absorb the hydroelectric resources of the neighboring Kentucky River Basin as fast as they can be developed; third, the region is expanding its demand for coal to produce steam power at a far greater rate than is the rest of the country; fourth, this provides a stimulus to the more efficient use of other resources which, in return, lift per capita incomes and the total income of the region to levels which mean a proportionately greater contribution to the business of the Nation.

Mr. President, the entire South has profited by the influence of that example, as have other parts of the Nation as well. But, as I have already remarked, Federal power policy is flexible, provided there is no departure from its basic principle, the principle which challenges private monopoly. So in my State a different experiment was undertaken by having the State legislature give legislative sanction to the creation of the South Carolina Public Service Authority.

During the same years in which the TVA was going forward with the development of the hydroelectric resources of the Tennessee River Basin, our South Carolina authority was going forward with the multipurpose development of the famous Santee-Cooper project on the Santee River. The Federal Government, under the Public Works Administration, provided a loan and grant which made this development possible.

The Santee-Cooper project has a capacity of 134,535 kilowatts. Its output of electrical energy in 1951 totaled about 466 million kilowatt-hours.

Let me tell the Senate what the power companies did when we started to develop that project. Engineers testified that the dam would not be feasible because it would be built in the lower part of my State. They said the water would run under the dam and make holes like crawfish holes. We fought for it through the State courts, the Federal court, and all the way to the Supreme Court of the United States. We finally won in the Supreme Court of the United States.

Mr. DOUGLAS. Mr. President, will the Senator from South Carolina yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. DOUGLAS. Would the Senator permit me to say that in the long and distinguished record of the Senator from South Carolina, he has always fought on the side of the people, both as Governor and as Senator, and has made a marvelous record in defending the small farmer and the industrial worker of his State and of other States, as well.

Mr. JOHNSTON of South Carolina. I appreciate the remarks of the Senator from Illinois. When, as a Member of the Congress, I stop serving the ordinary person, I want the people to defeat me in South Carolina.

Mr. DOUGLAS. Would the Senator permit me to make some comments on the political history of the Palmetto State?

Mr. JOHNSTON of South Carolina. I should be glad to hear the Senator's comments.

Mr. DOUGLAS. I regard the Senator from South Carolina as a man who continues the progressive internal policies of the late Senator Ben Tillman. I disagreed with Senator Tillman in some of his remarks about the colored race and some of his actions in that regard, but is it not a fact that Senator Tillman, when he became Governor of South Carolina, represented the small farmer and fought for him and against the control exercised by the tidelands plantation owners of South Carolina?

Mr. JOHNSTON of South Carolina. That was his effort, and he carried on that effort as long as he lived.

Mr. DOUGLAS. And the present Senator from South Carolina is continuing that branch of the Tillman tradition.

Mr. JOHNSTON of South Carolina. I think it is a compliment for the Senator from Illinois to say that, because I have always been a great admirer of Tillman. Naturally, we never agree with everything that any public man stands for.

Mr. DOUGLAS. May I dissociate myself from Tillman's views on the race question, with which I do not agree, but with his policies as between the small

farmer and the big plantation owner did not Tillman reverse the policies of the government of South Carolina and establish a series of measures to help the small independent upland farmers?

Mr. JOHNSTON of South Carolina. That is true. He was for the man who made his living by the sweat of his brow. The cities, at first, fought him bitterly, and the large landowners fought him bitterly, but before he died, a great many of them agreed with what he was doing, because what he did was for the best interests of all.

Mr. DOUGLAS. Did he not found Clemson College, a great institution of the agricultural and mechanical arts in South Carolina?

Mr. JOHNSTON of South Carolina. He did. He was the man who founded Clemson College. Today that college has done, I was about to say, more than any other institution in the State, but, of course, I should not say that, because I am a graduate of the University of South Carolina, and naturally we have our differences, which we settle every year at the big football game between the two institutions.

Mr. DOUGLAS. Is it not true that Clemson College introduced mechanical and agricultural training, which enabled large groups of South Carolinians to improve their earning capacity, raise their standards of living, and improve the general welfare of the community?

Mr. JOHNSTON of South Carolina. That is true. Having worked myself, for 10 years in the cotton mills, I have observed today how the boys who went to Clemson and received their engineering training there, have gone into the cotton mills upon their graduation from Clemson, taken positions as assistant superintendents, in order to secure practical knowledge, and have today become the officials of a great many of the cotton mills in South Carolina. This has meant much in bringing industry to South Carolina, because now we have trained men in the State who have the know-how. That means a great deal in any field, whether it be in the textile field or farming.

Today improved methods of farming are being used in South Carolina. I think it will be found that Clemson College graduates have gone to practically every farm in South Carolina, and have given advice to the farmers as to what is best to grow on the different kinds of soil in the State of South Carolina. Today, farming in South Carolina is diversified. South Carolina does not depend wholly on cotton, which for a long while was the ruination of farming in the State.

Mr. DOUGLAS. Is it not true that the Rural Electrification Administration, to which the Senator from South Carolina has referred, has lifted a mighty burden of toil from the backs of the farmers of South Carolina, and their wives?

Mr. JOHNSTON of South Carolina. It makes me sad to think how the mothers used to work on what to them were blue Mondays. But today they look forward to Mondays, because for them the sun is shining. Monday, washday, in days gone by brought with it hard work. But today the women are not bothered about washday. They put their wash in the electric washers, and go about the proper care of their children.

Mr. DOUGLAS. Tuesday was ironing day, but in many cases the electric iron, heated with electric energy, has removed the drudgery. Is not that true?

Mr. JOHNSTON of South Carolina. That is true.

Mr. DOUGLAS. Food is preserved in electric refrigerators.

Mr. JOHNSTON of South Carolina. Millions of dollars worth of food which formerly went to waste is now being preserved and kept from spoiling.

Mr. DOUGLAS. Water is being pumped, and is being heated for baths, by electricity, is it not?

Mr. JOHNSTON of South Carolina. The Senator is correct.

Mr. DOUGLAS. Barns are being heated and lighted with electricity.

Mr. JOHNSTON of South Carolina. All those things are being done.

Mr. DOUGLAS. I congratulate the Senator from South Carolina upon stressing the importance of these homely, but very significant items.

Mr. JOHNSTON of South Carolina. A great many farms, of any size at all, have electric milkers and electric churns. So many things are now being done by electricity that conditions have vastly improved in the past few years. It has all occurred under the present system, which we hear criticized so much.

People talk about creeping socialism whenever they hear about a project into which the Government has put a little money. The Government put some money into the Sante-Cooper project, but, oh, how much it has meant to South Carolina, especially the lower part of my State. It has provided a yardstick with which to measure the charges made by the private power companies in the State.

Oh, it is all right for the Government to give money to foreign countries. I happened to pick up a newspaper recently and read an article about a World Bank loan to Austria. The article is as follows:

WORLD BANK LOAN IN AUSTRIA TO AID POWER PROJECT

The International Bank for Reconstruction and Development yesterday announced its first loan in Austria.

The loan, in European currencies, will help to finance the Reisseck-Kreuzeck hydroelectric power project being constructed in southern Austria.

The project will make more power available to industries, and will enable Austria to increase power exports to Italy.

The bank expects that about half the loan will be disbursed in Italian lire and about half in Swiss francs. Italian lire in the amount of approximately 3,750 million will be provided out of Italy's subscription to the capital of the bank. Some 26 million Swiss francs required will be drawn from the proceeds of the bank's sales of its bonds in Switzerland.

I have not heard of the American people getting any money out of Switzerland.

Mr. DOUGLAS. As the Senator from South Carolina is aware, I frequently do not have the same views as does the Senator from South Carolina on these matters, because I am not opposed to such loans. But is it not interesting that the President of the United States sent a very able American, Mr. Eric Johnston, to the Near East to negotiate an agreement between the Arab States and Israel for a development similar to the TVA on the Jordan River?

Mr. JOHNSTON of South Carolina. That is true.

Mr. DOUGLAS. That project is, I think, going to be undertaken. I may say that I am pleased because it is.

Mr. JOHNSTON of South Carolina. I am not criticizing it at all.

Mr. DOUGLAS. Is it not extraordinary that it is regarded as being good for the Jordan, but not good for the Tennessee River?

Mr. JOHNSTON of South Carolina. It is good to send money over there, but not to use it at home, according to the present administration. I cannot understand that.

Under a special act providing for relief and rehabilitation of South Korea, the President provided a fund of $200 million. In order to bring about the rehabilitation of the Republic of Korea, it was necessary to get power quickly. Steam plants can be placed in operation faster than can hydroplants. So $30 million has been provided to build 3 steam plants in the Republic of Korea, 1 of 50,000 kilowatts annual capacity at Seoul, a $25,000 kilowatt plant at Masan, near Pusan, and a 25,000 kilowatt plant at Sanchok, on the east coast, near the Korean coalfields.

It is all right to do that for Korea, but the Government does not want to use any of the people's money for Federal projects in this country.

The Republic of Korea has a contract with Pacific Bechtel to build the plants. The contract was negotiated for the Republic of Korea by the United States Foreign Operations Administration, and FOA will pay the cost.

The Government seems to be very willing to use the people's money to build such plants in Korea and elsewhere, but in the United States it seems to be the plan to take away such plants after they have already been built, and to operate in some other way.

Mr. DOUGLAS. In other words, it is all right if public power gallops in the Jordan Valley, in Korea, and in Austria, but it is not allowed to creep in the United States.

Mr. JOHNSTON of South Carolina. It is fine for other countries, but it is creeping socialism when it is done in the United States.

A smaller public system set up under the State law is operated by the Greenwood County Electric Power Commission. It owns a steam-electric station with 16,000 kilowatts capacity and a hydroelectric station with a capacity of 15,000 kilowatts. The output of these stations in 1951 totaled 147,525,000 kilowatt-hours of electrical energy. They both now purchase Federal energy from the Clark Hill Dam on the Savannah River.

Mr. President, the fact that both of these publicly owned systems offered themselves as a source of low-cost power supply to municipally owned and rural cooperative electric systems has had a

very beneficial effect on the cost of electric service in South Carolina.

Thus, rural electric cooperatives in my State are securing their power supply at seven-tenths of a cent a kilowatt-hour, on the average, and a number of them are paying the South Carolina Public Service Authority only a little over half a cent a kilowatt-hour for their power supply.

It is interesting to note that the Greenwood County Electric Power Commission, generating 75 percent of its power in a small steam plant, is able to offer rural electric cooperatives a power supply at three-quarters of a cent a kilowatt-hour. The great systems of New England, with about the same proportion of steam-generated power, are asking rural electric systems for about one and a quarter cents for the same kind of kilowatt-hour.

Needless to say, Mr. President, the private power companies in my State have fallen in line with this progressive policy. Thus, the 23 rural electric cooperatives serving the farmers of South Carolina are securing their power supply for an average of just over two-thirds of a cent per kilowatt-hour, or just about one-half of the price which similar cooperatives must pay the private power systems in New England. I would like to have someone answer that question.

It is very interesting to look at a map showing the cost of wholesale power supply to rural electric cooperatives in each State of the Union. In fact, I know of no clearer illustration of the effectiveness of what I interpret as the Federal power policy.

Such a map shows that during the fiscal year 1953, the cost of power supply to such cooperatives averaged less than three-quarters of a cent per kilowatt-hour in all States in which that policy, in one or another of its forms, has been effective. In other States the rural electric cooperatives pay increasingly more, as the distance from Federal power areas increases, rising to a peak of just over 1½ cents in Maine. And I am told that Maine has some very good undeveloped hydroelectric resources.

Let me cite, very briefly, what these important farmers' institutions are paying in the South. In order to show the variation from State to State, I must refer to the average rates in mills or tenths of a cent.

The charges for electric power purchased by such rural electric cooperatives average 4.8 mills in Tennessee, where the Tennessee Valley Authority is the only supplier. Let me cite examples of costs where the Tennessee Valley Authority is not the only supplier: 5.3 mills in Mississippi; 5.8 mills in Alabama; 6.4 mills in Georgia—we are getting a little farther away from TVA—and 7.1 mills in South Carolina, when the overall average is considered.

Across the Mississippi River, in our neighboring States of the Southwest, we find the average charges to rural cooperatives running at 5.5 mills in Louisiana—not very far away from the TVA—6 mills in Arkansas; 5.8 mills in Texas; and 6 mills in Oklahoma.

Mr. President, we of the South feel sorry for the rural electric cooperatives up North, where they are paying 15.4 mills in Maine—let that sink in—15.4 mills in Maine; down in Tennessee it is 4.8 mills; 12.3 mills in New Hampshire, 12.3 mills in Vermont, 11.2 mills in New York, 10.5 mills in Pennsylvania, 12.8 mills in Michigan, 13.7 mills in Wisconsin, 12.6 mills in Iowa, 14 mills in Minnesota; 11.2 mills in North Dakota; and 11.7 mills in South Dakota. They are just too far away from the area where the influence of the Federal power policy is effective today. Remember, they are buying from power companies. Do not think the TVA is selling it to them, no; but that is the effect of the yardstick when that kind of power is close by.

Mr. GORE. Mr. President, will the Senator from South Carolina yield?

Mr. JOHNSTON of South Carolina. I yield to the Senator from Tennessee.

Mr. GORE. The power rates which the distinguished Senator is citing are all rates of private power companies, as I understand.

Mr. JOHNSTON of South Carolina. That is true; they are all rates of private power companies.

Mr. GORE. And the Senator is showing that the companies surrounding the TVA service area have, by reason of the TVA yardstick, reduced their rates to less than half what they are in certain other areas, is he not?

Mr. JOHNSTON of South Carolina. They are less than one-third of what they are in Maine; less than one-third.

Mr. GORE. And as the private power companies have brought their rates down, the consumption of electricity by the people has gone up, and so have profits of the companies. Is that not correct?

Mr. JOHNSTON of South Carolina. Not only do the people use more power, but there are more users of electricity, and as the number of consumers has increased, the use of more electrical equipment of every kind has also increased. The American Government likewise benefits, for whenever a washing machine is bought, all persons or companies which handle it, from manufacturer to consumer, pay taxes on their profits. In turn, the manufacturer of the machine manufactures more, and he makes more profit. It is an endless chain, so to speak, of making money for the Government.

Some persons seem to think that we want nothing but free enterprise, individualism. That is fine, but we do not want to go to the point where private power companies are given an unfair advantage. It must be remembered that practically every power company is a monopoly in the particular district in which it is located. Power companies do not have competition from power companies selling in the same area. A power company is a monopoly; and I am not in favor of taking away the yardstick of the Federal Government and not having a yardstick with which to measure the rates charged by the private companies.

As I see it, the pending bill is nothing more than the first step to take away the life of the TVA. If the Commission handles its cases in the future in the way it has handled the one in the past, all the President will have to do will be to say, "I want you to make the rates throughout the United States the same," and then the Commission will do as the President tells them; he will have a whip over their backs. He will appoint Commissioners who will carry out his instructions. Although the Atomic Energy Commission was established as an independent commission, it will lose its independence the minute anyone can call from the White House and tell the Commissioners what to do.

Mr. President, there is more in the bill than many persons think. I believe we should study the bill more, in order not to do in a hasty manner something we would regret in years to come.

I have seen how we have profited in the past by our power policy. I, for one, wish it to continue in the future in order that we may make further progress in that particular field and at the same time not handicap the Atomic Energy Commission in carrying out the purposes for which it was intended and created, namely, to develop atomic energy, and then—in view of the fact that it belongs to all the people—to make it available to all the people, not to only a few persons or to a corporation. Eleven billion dollars has been spent on investigations and experimentations in the atomic energy field, and atomic energy belongs to the people of the United States. Yet it is proposed that the Dixon-Yates group be told, "You can have this for 25 years, and you will be guaranteed by the Government a profit of 9 percent," or a profit amounting to about one-tenth of the investment, Mr. President; that is what it would amount to.

I do not favor giving away our investment in that way. I want the people of my State, whom I have the honor, in part, to represent, to have their property rights defended for them; and they can be defended only by action by the Members of Congress when such a proposal as this is made. In view of the manner in which the proposal is before us today, Mr. President, we will continue to carry on this fight.

Mr. MURRAY. Mr. President, will the Senator from South Carolina yield for a question?

The PRESIDING OFFICER (Mr. PAYNE in the chair). Does the Senator from South Carolina yield to the Senator from Montana?

Mr. JOHNSTON of South Carolina. I yield.

Mr. MURRAY. I have been greatly interested in the speech being delivered by the distinguished junior Senator from South Carolina. It occurred to me that, inasmuch as the Tennessee Valley Authority has accomplished so much, there should be a desire on the part of the Government to provide similar arrangements for all sections of the country. I believe bills calling for the development of the various river-valley systems have been introduced. If such a program were carried out, it would be of tremendous value to the country and to the people, and would greatly increase the wealth and prosperity of the whole Nation. Is that not true?

Mr. JOHNSTON of South Carolina. Yes.

I have visited Montana; in fact, I spoke there just a few weeks ago. Montana is suffering today because of a lack of power.

Mr. MURRAY. That is correct.

Mr. JOHNSTON of South Carolina. The power companies there are not developing. They say, "Oh, we will do it," but they have not done it, and they will not do it.

I can recall a time in South Carolina, when I was Governor—along about 1935 or 1936—when a petition would be presented to me to get the power companies to extend their lines only a mile or two from a town. The power companies would argue that that could not be done, that it would be too expensive. But when we began the Santee-Cooper project, do you know, Mr. President, what the private-power companies would do then? They would extend a branch line into the most profitable territory in order to keep the Santee-Cooper line from extending on a parallel and reaching the same profitable customers. That shows how the private-power companies cooperate.

Mr. President, I certainly hope Montana will receive from some source help to build some of the necessary power dams. Certainly they are needed, not only for the development of power, but to conserve water. Under present circumstances, in Montana, in one season all the water runs off and is gone.

I visited one dam that is being built in Montana; the Senator from Montana remembers that, I am sure.

Mr. MURRAY. Yes.

Mr. JOHNSTON of South Carolina. It is wonderful for Montana to have that dam; but it is only a drop in the bucket, insofar as the needs of Montana are concerned.

Mr. MURRAY. Yes.

A number of other projects in Montana have been studied, and are ready to be developed. We did build what is known as the Hungry Horse Dam, on the upper stretches of the Columbia River; and that development has been of great value to our State. But, as the Senator from South Carolina has pointed out, there is need for the development of other dams in Montana in order to carry out the program to its fullest extent.

Mr. JOHNSTON of South Carolina. I should like to say it is not the fault of the distinguished Senator from Montana that the program has not been carried along further. Certainly he has worked day in and day out to have the proper powerplants constructed in his State.

Mr. President, a moment ago I called attention to the different rates in different States. Perhaps the trouble should be traced to the fact that those States have been misled by the propaganda of the private power companies into opposing the policy which has brought such blessings to us in the South, for it certainly does seem a shame that rural electric cooperatives in New York State, within easy transmission distance of two of the greatest and cheapest undeveloped hydroelectric resources in the world, should be paying 11.2 mills per kilowatt-hour for their power supply. Just think, Mr. President, of Niagara Falls and the St. Lawrence—practically undeveloped, insofar as the power companies are concerned. We in the South would like to be able to move the St. Lawrence and Niagara Falls into the southeastern section of the United States. We would not let the 15 billion kilowatt-hours of electricity a year which they can produce go undeveloped very long. What is more, we would make sure that those kilowatt-hours would be available to public and cooperative electric systems, without any surcharges added by private monopoly.

Mr. President, a few moments ago I said that power sold by private power companies is always sold by a monopoly. An examination of the situation will reveal that the private companies have their field, in which they sell without any competition whatsoever.

Mr. President, some people wonder why it is that cotton mills are leaving New England and moving into the South. The answer to it is that power is much cheaper in the South than in the New England States. Census figures show costs of power per unit in New England are 52 percent higher than in the country as a whole, 80 percent higher than in North Carolina, and 246 percent higher than in Tennessee. I do not blame them. I would close up and move out, too, and go where I could get cheap power.

In the New England woolen and worsted-textile industry, which has been very hard hit with unemployment, the weighted average cost of purchased electric power in Massachusetts and Rhode Island was 75 percent in excess of the weighted average in the Carolinas and Georgia. That is a big item. I do not have time to tell the other reasons why industries are moving to the South. There are so many reasons that I would be here all night if I were to tell all of them. But power is one of the reasons, and that is the question before us at the present time.

The November 1952 report of the New England Governors' Committee on the Textile Industry said that the higher power costs and the relatively small development of hydroelectric power were among the factors causing the decline of the textile industry in New England and the lack of new industrial establishments. That is a statement from the governors' conference. That is not the statement of the Senator from South Carolina. I am quoting the Governors.

Mr. President, it is a fact that there are more than 150 Federal hydroelectric projects in the country. There is not one in New England. Let that sink in.

Mr. HILL. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. HILL. Is it true that the power rates in New England are 52 percent higher than the average rates throughout the country?

Mr. JOHNSTON of South Carolina. Yes; and 80 percent higher than the rates in the States around South Carolina.

Mr. HILL. I understand they are 80 percent higher than the rates in North Carolina.

Mr. President, will the Senator further yield?

Mr. JOHNSON of South Carolina. I yield.

Mr. HILL. I am not an engineer. I have never visited New England, which is one of the loveliest sections of our country, and seen its rivers—the Connecticut River and the other rivers—without wondering why the people have not harnessed those rivers and put them to work. It would not affect the beauty of the streams, except to enhance it and create lovely lakes for recreational purposes. I do not understand why they have not harnessed their streams and obtained cheaper power rates.

Mr. JOHNSTON of South Carolina. I cannot understand it either; but they have been waiting for private power companies to build. The private power companies have not built so far, to the extent necessary to give the people the rates they should have.

Mr. HILL. Mr. President, will the Senator further yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. HILL. We know what mass production has done in manufacturing. Henry Ford was a great leader in mass production. The same principle applies in the power business. If the rates are brought down, mass consumption is made possible, is it not?

Mr. JOHNSTON of South Carolina. That is true.

Mr. HILL. When there is mass consumption, it is possible to continue to reduce the rates.

Mr. JOHNSTON of South Carolina. That is true with respect to electricity to a greater extent than with respect to any other field. When the transmission lines are built they are there to carry a small amount of power or a large amount of power.

Mr. HILL. A small load or a heavy load.

Mr. JOHNSTON of South Carolina. A small load, or a heavy load, up to a certain limit.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. ANDERSON. Does not the Senator believe that that is one of the reasons why men from the New England States, men such as the Senator from Rhode Island [Mr. PASTORE], are so interested in the possibility of developing power plants for the production of electric energy alone, feeling, perhaps, that that might contribute to the reduction of the power cost? Does the Senator think that is an important consideration for the New England States?

Mr. JOHNSTON of South Carolina. It is my opinion that the Senator from Rhode Island believes that. Having been Governor of his State, he realizes how the people are handicapped at the present time, and almost embarrassed by the rates they have to pay. If a single Federally owned powerplant were built in his State, it would affect rates as far away as Maine. The people would

get the benefit of cheaper rates. I think that has been proved by the building of the TVA and, in South Carolina, by the building of our power installation, known as the Santee-Cooper project, under the South Carolina Power Authority.

As I was saying, there is not a single federally owned electric project in the New England States——

Mr. UPTON. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. UPTON. The Senator has been referring to the difference in costs of electric power, as between certain sections in the South and New England. Can the Senator give us any information as to the difference in wages paid for skilled and unskilled labor as between the South and New England?

Mr. JOHNSTON of South Carolina. I will answer that question by saying that it will be found that the wages paid in the South are in line, to a very large extent, with those paid in the New England States. I am sorry to say that at one time that was not true. However, in the South there is now a different system. A great many of the cotton mill workers—I presume they are the ones to whom the Senator is referring—own their own homes. Some of them are able to rent houses for $10 a month. In the New England States they do not own their own homes. All those things are taken into consideration. I, for one, believe that the wages paid to the workers in industries in the South and in the North are not what they should be.

Mr. UPTON. Mr. President, will the Senator further yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. UPTON. Did not the governor of the Senator's State recently advise the legislature or the people that it would be necessary to enact a so-called right-to-work statute for South Carolina in order to maintain its industrial standing among other States in the South?

Mr. JOHNSTON of South Carolina. I do not exactly agree with everything my governor says, though he is Governor of South Carolina. I have not always agreed with him in his method of conducting the affairs of the State, in his way of financing, his political methods, and other things. We differ somewhat. We have differed on a great many subjects.

Mr. UPTON. Is my understanding correct that the governor of the Senator's State advised the people of the State that such a statute would be necessary?

Mr. JOHNSTON of South Carolina. I think that is true. The Governor of South Carolina did make some recommendation to that effect. He did not exactly say why.

Mr. UPTON. I leave that to the Senator.

Mr. JOHNSTON of South Carolina. I do not know what reasons he gave. The only thing I know is that he signed the bill.

Mr. UPTON. What would be the purpose of such a statute? Would it be to further the organization of labor, or would it tend to retard it?

Mr. JOHNSTON of South Carolina. I am sorry to say that labor is not very well organized in South Carolina. I wish it were organized to a greater extent.

The industrialist, Henry Kaiser, has given some good advice to our friends from New England. He said:

> You New Englanders can be the richest people in the Nation or the poorest. The choice is yours. If you develop your neglected water power, you can expand your industries tremendously and create thousands of new ones. But if you continue to waste water power—your most valuable natural asset—you will lose factory after factory until your famous manufacturing centers will be little more than ghost towns. The highly electrified South and West will outsell you and outstrip you. And you will find yourself increasingly helpless.

That is what Henry Kaiser said about the conditions he found in the New England States.

Mr. President, the alternative for the statesmen of New England and other high-cost power areas is not to assist in the destruction of our public power developments in other parts of the country, but rather they need to work for programs which will bring the low-cost yardstick of public power to their area. They need to work for the full utilization of the power resources of the Niagara, and of atomic power.

The mere full development of the Niagara River or other hydroelectric or atomic resources is not enough. They must be developed with preference guaranteed to public bodies and cooperatives in the marketing of the power. This is necessary to insure that the benefits of such developments are passed on to the consumer of electricity. If this is done in the Northeast, the result would be a real competitive yardstick in an area having the highest power rates in the Nation.

That is why the Senator from Rhode Island [Mr. PASTORE] wants the system and policy to continue. He would like to get a Federal powerplant in Rhode Island. Then the people of Rhode Island would have a yardstick. When they began to measure with it they would find that someone was not giving them 36 inches to the yard and that they were being charged more than three times the amount paid elsewhere for power generated by a steam plant—the same kind of power that is generated in a steamplant by a private power company—not publicly owned, but by a private power company—in the South. Can anyone explain that?

Mr. HILL. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. HILL. Is it not true that the power business is different from practically any other business in America? In the first place, when power is generated from water, a power company is using the resources that belong to all the people. Is that not true?

Mr. JOHNSTON of South Carolina. In other words, the inherent power in a stream does not belong to any individual; it belongs to the people.

Mr. HILL. Because when God Almighty sends the waters in the form of rain He sends them for all of us, not for any particular company or any particular person. Is that not true?

Mr. JOHNSTON of South Carolina. That is entirely right.

Mr. HILL. Is there not also another difference, namely, that the power business is by its very nature a monopoly business; there is no competition in the business. Is that not true?

Mr. JOHNSTON of South Carolina. I have already explained time after time that if the Federal Government does not go at all into the power field, the power companies are left with a monopoly in the particular field in which they are located. The Senator from Alabama well knows that a power company serves people in one area, and other power companies do not come into that area. Therefore, there is no competition, and, consequently, there is a monopoly.

Mr. HILL. Is there not also another difference, in that it is a cost-plus operation?

Mr. JOHNSTON of South Carolina. That is right; it is a cost-plus operation. It is a big plus, too.

If this power is merged with the present high cost sources of power, its benefits will be dissipated and the result will be that the ultimate domestic rural and industrial consumer will benefit little, if any. There will not be the competitive impetus to bring down rates.

It is unfortunate that the New York Power Authority, unlike the South Carolina Public Service Authority, has no provision for preference to public bodies and cooperatives. This makes it necessary that the Congress insure that any benefits of the development of a public resource like our rivers and atomic energy be passed on to the consumer, even when that resource is developed by a State or other public agency.

Mr. President, the vital public question in the Southeast today is whether we are going to be able to take full advantage of the fine hydroelectric power from these projects and from the further development of our resources. The answer will depend on the success or failure of the people in their effort to stop the present drive to reverse Federal power policy.

The people of my State are particularly fortunate because they moved in the 1930's to take advantage of Federal financial assistance in the setting up of the South Carolina Public Service Authority, commonly known as Santee-Cooper. This Authority and the Greenwood County Electric Power Commission, each with its own generating and transmission system, have the ability to purchase Clark Hill power at the generating station, so that the people of the State are not completely dependent on private monopoly for power supply to their municipal and cooperative systems.

On the other hand, it is unfortunate that our friends on the other side of the Savannah River in Georgia do not have such transmission facilities and have not been able to receive their half of the

Clark Hill power. Because the rural electric cooperatives in Georgia do not have lines to the dam, and the Georgia Power Co. with the support of the administration has thus far refused to "wheel" the power to them—think of that, Mr. President—the co-ops on the Georgia side have not received a kilowatt. Meanwhile, the power which the co-ops are entitled to under the law is being sold to the Georgia Power Co. They have been dividing the power down the line, giving the power company a chance to make a little profit out of the farmers.

The people of my State may also be in a position to meet future load growth by obtaining additional power from future development of other waterpower sites on the Savannah River and its tributaries. But, there is no such possibility in other States of the region, nor can the future hydroelectric projects which all the rivers of the region offer assured low-cost power supply unburdened by monopoly, unless the power from these projects is integrated and offered to the people's nonprofit power agencies, in accordance with the principles embodied in section 5 of the 1944 Flood Control Act.

Mr. President, the people of my region are aware of the fact that the wind of private-power influence in the Federal Government is blowing with a force which threatens the future of our rural electric cooperatives, just as much as if a real hurricane threatened to uproot the poles which carry the rural electric lines.

All that the private-power people have to accomplish is to cut off the future low-cost power supply from these cooperatives, or from our fine municipal power systems, and the result will be fatal. If, in addition, the access to low-cost financing is restricted, the great gains which our people have a right to expect from their river-basin resources will be choked off.

In simple language that all will understand, if the present drive on Federal power policy succeeds, the people of the Southeast will be able to use only a part of the 23 billion additional kilowatt-hours of electricity which their rivers can supply and then only by paying toll on each kilowatt-hour to private-power monopoly.

Let me suggest a few evidences of how the wind is blowing. And I am going to talk about evidences in the Southeast, although I am aware that attempts to give away such great public waterpower resources as Hells Canyon in the Pacific Northwest and Niagara Falls in the Northeast, not to mention the abrogation of the Federal contracts with the Southwestern cooperatives, are matters of significance to all of us throughout the land.

First, Mr. President, the Federal Power Commission, which is supposedly an arm of the legislative branch of the Government, is acting to give away many key hydroelectric projects in Federal river-basin programs. It is true that the United States Supreme Court has held that the Commission has the discretion to do this. But this does not mean that an agency of Congress should fly in the face of, or render futile, a policy established by Congress.

I am convinced that Congress should hasten to close the barn door before all the people's horsepower is stolen, by enacting into law the bill introduced sometime ago by the distinguished Senator from the State of Washington [Mr. MAGNUSON]. This bill would prevent the Commission from issuing a license for private development of a waterpower resource which is part of a construction program approved by Congress.

We cannot afford to have the Federal river-basin programs in any region mutilated by the Commission's grant of licenses to private monopoly for private development of the premier hydro sites. Certainly, where the full development of those sites is dependent on regulation of stream flow by other projects upon which the Federal Government has spent millions of dollars, the grant of such licenses without congressional consent is inexcusable in terms of public policy.

If this policy continues, the rural electric cooperatives, along with the municipally owned electric systems, will be rendered dependent on the very private monopolies which would like to see them destroyed, so they can move in and take over the business.

But this giving away of these fine waterpower resources is not the whole of the story. For the drive against Federal power policy is many-pronged. It includes the cutting out of appropriations for transmission lines, the reduction in appropriations for Federal multipurpose river-basin projects, as well as for the vital rural electrification program, and the increasing sympathy of the administration in Washington with the views of private monopoly as to how power from Federal projects should be marketed. The bill goes into that field.

If, through the administration's budget policy, or the actions on appropriation requests, or administrative action in refusing to carry out the clear intent of the legislation defining Federal power policy, the reversal of that policy can be achieved, the political party presently in control of the Government of the United States will have, in effect, repealed that legislation.

Mr. President, through battles in successive sessions of successive Congresses, the organized private power interests, represented by a heavily financed lobby in Washington, have failed to repeal or amend the law which provides for Federal development and marketing of power with a preference to publicly owned and cooperative systems. Public protests have made it clear that such a change would be highly unpopular.

I am convinced that once the people have been alerted to what is now happening, they will take effective steps to make sure that the power policy which has meant so much to the whole country is not sabotaged in the interest of private monopoly.

What the threatened change of policy will mean to the Southeast is clear. The 100-percent deletion of Southeastern Power Administration transmission lines to serve preference customers in North Carolina, South Carolina, Florida, Georgia, and Alabama places power companies in those States in a position to purchase the output of 3 existing dams and 2 others under construction.

As I have already noted, it is only the fact that South Carolina has the South Carolina Public Service Authority, with an existing transmission system, and the Greenwood County Electric Power Commission able to take over the Clark Hill-Greenwood transmission line, which will leave the public and the cooperative systems in my State in a position to take advantage of power from the Federal Clark Hill project on the Savannah River. But that provides no assurance for the future as our load grows.

The attitude of the private utilities in the Southeast already reflects the threatened change of policy. With no fear of alternative construction of Federal transmission lines, the Virginia Electric & Power Co. is the only company in the entire Southeast that has agreed to wheel even a small amount of Federal power to preference customers. Oh, yes; they will wheel it to others, but not to preference customers. That company has assurance, over the signature of the Southeastern Power Administrator, that it may get out of the wheeling arrangement if the Secretary of the Interior accepts the Georgia Power Co.'s proposal which would compel rural electric cooperatives to become customers of the company.

In the language of the Administrator of the Southeast Power Administration, the proposal which the Georgia Power Co. has made for the purchase of Government power "does not provide for the sale of any firming energy by the company to the Government nor for any transmission of power by the company for the account of the Government but provides merely for the outright sale by the Government to the company of all Government power to be disposed in the company's service area and for the resale by the company of such power to agencies given preference by law."

Mr. President, approval of this contract would, in effect, repeal the true intent of the preference provision of the law, under which the Secretary of the Interior markets power from Federal hydroelectric developments. It would accord private monopoly the entire preference. The previous Secretary of the Interior took the position that he could not sign such a contract under the law.

The people of my region will be watching to see what the present Secretary of the Interior will do about this proposal.

We will also watch closely the provision that is made for meeting the future needs of the region through Federal development of the great waterpower resources of our many rivers. So far, we have failed to get started the Hartwell project, above the Clark Hill development on the Savannah River. It should be the next step in harnessing this river to provide the people of the region more than 2 billion kilowatt-hours of needed low-cost electrical energy.

I am very much in favor of the Hartwell project. It should be started. We need it, because we need the power.

We do not want to see the cost of wholesale power supply to our municipal plants and our rural electric cooperative systems go up to high levels like those that prevail in New England where power company influence has kept the people from taking advantage of Federal power policy.

I hope the power companies in New England will feel a little sorry for the people there, and will reduce their power rates. It might be that I am talking against my own interests in South Carolina. The longer the power rates are kept up in New England, the more industries will come to South Carolina and to the South.

But I intend to continue to advertise, hoping that it will do some good for the New England people, so far as reducing their power rates is concerned. We are getting industries in South Carolina. They have piled in down there in the past 20 years. I expect them to continue to come, because South Carolina is God's paradise.

We do not want to see the electric bills paid by our homes and farms go up to the levels which prevail in New England, because we think that would seriously affect our economy. A farmer does not have too much money, and he has to watch his pennies. The price of cotton has already gone down. According to an article which I read in a recent issue of the Wall Street Journal, probably not more than 12 million bales of cotton will be produced this year. Sixteen million bales were produced last year. If my arithmetic serves me correctly, that is a 25 percent reduction.

We all know how prices have gone down in the past 2 years, and also how the amount of cotton produced has dropped.

I think my friend, the Senator from North Carolina, understands how the farmer has reduced his production. Of course, God had a little something to do with it. I will not blame the Republicans for an act of God. The production of cotton has dropped because of a lack of normal rainfall. At the same time, that has reduced the amount of money which the farmers have, and they need every cent they can get. If they have to pay more for electricity from the rural cooperatives, then someone else is not going to get the money. It may be that farmers soon will be cutting down on their use of electricity. A farmer might let one light burn a little sometimes, but when the sun goes down, he will go to bed, if the price of electricity goes up to the point where it is in the New England States, and money becomes scarce as it appears it will be in the near future.

Mr. MORSE. Did the Senator say "in the near future"?

Mr. JOHNSTON of South Carolina. It is already as scarce as it can be.

Mr. MORSE. That is the point I wanted to make.

Mr. JOHNSTON of South Carolina. I was conducting a committee hearing on a bill relating to salary increases, and I was trying to get at the point of whether the proposed legislation should not be made permanent. Many persons wanted the increase made temporary. I thought it should be made permanent.

I said, "Are you not a little afraid that if the increase is made temporary, it may lead to the thinking that in the future there will be either a recession or a depression? I think it would have good effect if the increase were made permanent, as was done in other bills. If an increase in salary is needed, let it be made permanent legislation. Let us not put fear into the hearts of the people."

So we need a little more money now. The farmers of my State, especially, need it. Being a member of the Committee on Agriculture and Forestry, I know how farmers have been reducing their acreage, and how it cuts down production. It has a telling effect.

We do not want to see the electric bills for industrial power in the Southeast go up to the levels which prevail in New England because we think that would discourage the expansion in industry and industrial employment which is raising the South to a position of economic equality in the family of regions which compose the Nation.

I am convinced that all of these things could happen if the present drive of private power monopoly to reverse Federal power policy succeeds.

But I would urge that we go further to resist all efforts of private monopoly to overturn the Federal power program. We must go forward to develop our waterpower resources through agencies which will preserve all the values for the people. We must assure adequate appropriations to keep such development abreast of the needs of public and cooperative power systems in every region. We must stop the giveaway program which would hand over our richest power resources to private monopoly. And, finally, we must make sure that Government power, developed from the people's resources for the people, shall reach them without having to pay toll at a private tollgate.

I am convinced that unless we meet squarely the brazen campaign of the private power interests, which are seeking to mesmerize and mislead the people, not only the economic expansion but also the very health of our democracy will suffer in the future.

It is true that Theodore Roosevelt was one of the first to start the conservation of our natural resources, and we want to give him credit for that.

Our Government has continued that policy up to the present time, but I can see in the wind at this time that we are not going to develop any more public power, but will give it over to private power corporations. When that is done, we can expect high rates to be paid per kilowatt-hour. The charge for a kilowatt-hour will be left to the private power company in each particular locality. I ask people not to become excited if they find they will be charged the same rate which is now being paid in Maine, more than a cent and a half a kilowatt, for the energy that is used through the cooperatives.

Mr. President, I have outlined the safeguards which I believe should be incorporated in the atomic energy bill before its passage. I have pointed out the relationship of the power features of the bill with a concerted attack on Federal public power policy. It is my belief that passage of the atomic power provisions of the bill, as reported to the Senate, would constitute a giveaway of the greatest magnitude of the people's resources. Eleven billion dollars is quite a giveaway. The McMahon Act has served us well, as has our Federal power policy. I think we should continue both until a better comprehensive plan can be worked out.

Mr. President, during the hearings held by the Joint Committee on Atomic Energy, a great many witnesses appeared before the committee and testified, in particular Gen. Kenneth D. Nichols. He pointed out to the Commission the dangers in this bill. I agree with him. I remind my colleagues that we are dealing with a large and important bill, the results of which are inestimable. When one picks up the bill and looks at it, he can see how big it is. It contains 104 pages. It must be remembered that when we are dealing with power, a subject that is so involved, a little sentence perhaps can really and truly ruin the Federal power policy in existence in America today.

Mr. MORSE. Mr. President, will the Senator from South Carolina yield for a question?

The PRESIDING OFFICER (Mr. WELKER in the chair). Does the Senator from South Carolina yield to the Senator from Oregon?

Mr. JOHNSTON of South Carolina. I yield for a question.

Mr. MORSE. Does not the Senator from South Carolina think the bill is of such vital importance to the American people that it ought to be read sentence by sentence into the RECORD, with interpolations following the reading of each sentence, pointing out the implications contained therein?

Mr. JOHNSTON of South Carolina. I believe that should be done. Right along that same line, I fear that very few Senators have read the bill. I should not like to ask Senators, particularly those across the aisle, how many of them have read every line in the bill. I would dislike even more to ask how many have read 10 pages of the bill.

Mr. MORSE. Will the Senator yield further for a question?

Mr. JOHNSTON of South Carolina. I yield.

Mr. MORSE. If the Senator from South Carolina feels that way, and I share his feelings and his fears, does he not think some of us in the Senate have really a great moral obligation to read the bill to our brethren line by line, with interpolations line by line?

Mr. JOHNSTON of South Carolina. I think that should be done. I do not think all Senators could be here, but I believe it would be very profitable to the general public if the bill were read and discussed sentence by sentence and there was an explanation of what each sentence meant.

Mr. MORSE. Will the Senator yield further for a question?

Mr. JOHNSTON of South Carolina. I yield for a question.

Mr. MORSE. Even though the Senator has stated that he is not sure Senators would all be here, does not the Senator agree that in conducting that educational process in the Senate we would have fulfilled our obligation to the American people, at least in putting the Senate on due notice as to what is contained in the bill?

Mr. JOHNSTON of South Carolina. The Senator is entirely correct. There has been a great deal of criticism because the bill has been debated, but when the fact is considered that there is involved in the bill a giveaway of $11 billion, I think the necessity for studying the bill and discussing it to some extent is obvious. I personally think that action on bills of this nature should be delayed until the next session, in order to give us time to go back home, and, under the shade of a tree, read and study the bill. What is the rush, anyway?

Mr. MORSE. Mr. President, will the Senator yield for a question?

Mr. JOHNSTON of South Carolina. I yield.

Mr. MORSE. The Senator understands, does he not, that I am not permitted to answer questions, although I would be delighted to do so if I were allowed to do so? The question I wanted to ask the Senator from South Carolina is this: Does he agree with me that it is not surprising that those of us who are insisting upon a full disclosure of the implications of the bill are bound to be subjected to criticism by reactionary forces in the country which want to get the bill passed quickly, before the American people awaken as to what is in it?

Mr. JOHNSTON of South Carolina. I think there are people in the United States who would like to see this bill passed without a word said about it. I think there are people who would be glad to have it done that way, and keep quiet about the bill, and then have the public wake up later and find out what had happened to rights which the people had had for many, many years—for the past 47 years.

The PRESIDING OFFICER. The Senator from South Carolina has the floor.

Mr. JOHNSTON of South Carolina. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. GORE. Mr. President, I ask unanimous consent that the order for the call of the roll be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE PROGRAM

Mr. KNOWLAND. Mr. President, I am about to move that the Senate take a recess until 10 o'clock tomorrow morning.

At this time I wish to announce to the Senate, for its information regarding the future legislative program, what we have in mind.

Of course, the pending bill is Calendar No. 1710, Senate bill 3690. When action on that bill has been completed, we intend to call up Calendar No. 1825, Senate bill 3052, the farm program bill. We probably shall follow it—although not necessarily in the precise order I shall now state—with the following bills:

Calendar No. 1831, House bill 9678, the foreign-aid authorization bill.

Calendar No. 1808, House bill 9709, the unemployment-compensation bill.

Calendar No. 644, House bill 6287, the renegotiation bill.

Calendar No. 1931, Senate bill 2559, the copyright bill.

Calendar No. 1952, House bill 5420, the patent bill.

Calendar No. 1315, Senate bill 2910, providing for the creation of certain United States judgeships.

Calendar No. 1774, House bill 7815, relating to the Cougar Dam.

Calendar No. 1773, Senate bill 3134, relating to the Talent Division of the Rogue River Basin reclamation project.

Calendar No. 1749, Senate bill 880, amending the license law of the District of Columbia.

Calendar No. 1830, House bill 3300, relating to control of the level of Lake Michigan.

Calendar No. 1797, Senate bill 2601, providing Federal financial assistance in the construction of public elementary and secondary school facilities.

Calendar No. 1801, House bill 2235, for the construction of the Santa Maria project, in California.

Calendar No. 1802, House bill 4213, authorizing works for water supplies in the Central Valley project.

Calendar No. 1803, Senate bill 620, providing authorization for certain uses of public lands.

We also expect to have, either tomorrow or Thursday, the conference report on the housing bill; and, I hope, by the end of the week, the conference report on the tax bill.

We shall not have another calendar call, in all probability, until we have completed action on the following proposed legislation: the farm bill and foreign-aid bill. I would expect we would have 1 or possibly 2 more calendar calls before adjournment sine die.

I wished to give this notice to the Senate as far in advance as possible.

We have not been able to obtain a unanimous-consent agreement regarding a vote on the pending bill. I am about to move that the Senate take a recess tonight until tomorrow morning, at 10 o'clock.

I have understood from the discussions on the other side of the aisle that the general belief is that we can do some voting on the amendments—and I hope on the bill itself—tomorrow. I hope we can complete action on the pending legislation by this time tomorrow night. I think it is only fair to advise the Senate, however, that I have requested the Sergeant at Arms to prepare cots for tomorrow evening; and that, if necessary, we shall be prepared to run through tomorrow night to complete action on the pending legislation.

Mr. GORE. Mr. President, will the Senator yield?

Mr. KNOWLAND. I yield to the Senator from Tennessee.

Mr. GORE. Some of us who have been very much interested, and who have remained very much interested in the enactment of the Anderson amendment have given to the distinguished majority leader a gentleman's agreement to assist in reaching a vote upon that amendment and the issue presented by that amendment and the Ferguson amendment tomorrow.

I respectfully suggest to the majority leader, however—though perhaps he needs no suggestion from the junior Senator from Tennessee—that there are many far-reaching and important provisions in this 104-page bill. Action upon the Anderson amendment tomorrow may indicate the need for a more intensified consideration of the bill.

Mr. KNOWLAND. Mr. President, earlier this evening I suggested to the Senator that if the distinguished Senator and other Senators associated with him in his endeavors wanted the vote on the Ferguson amendment and the various corollary amendments to go over until tomorrow I would certainly not object to that, though I think it is a little unreasonable to require 95 other Members of the Senate to sit through another day because, perhaps, some Senators have found it inconvenient to be present today.

I suggested to the Senator from Tennessee that under those circumstances it seemed to me to be not unreasonable, if the Ferguson amendment is withdrawn, together with other primary and highly controversial amendments, to expect a vote on any one of half a dozen or more other amendments today.

However, I could obtain no assurance from the Senator from Tennessee or other Senators associated with him that if we did so, we could do any voting. As I suggested earlier today, we have a very heavy program. As many Members on the Democratic side of the aisle as on the Republican side of the aisle have pointed out to me the importance of the farm program. There are those who believe in fixed 90-percent parity and those who believe in flexible parity.

Many Senators have also pointed out the critical international situation facing the country in connection with the foreign-aid bill, the situation confronting us in connection with the extension of the unemployment compensation provisions and social security coverage, the importance of the tax bill, the housing bill, and the bill relating to the Upper Colorado River Basin. There are a great many other matters of considerable concern, including some purely local bills.

As I pointed out last night, sorry as I am to say it, each day that passes makes it less likely that some of the other bills, not of major magnitude, will be considered or passed at this session, and unfortunately they must die on the calendar when the Congress adjourns sine die.

Under all the circumstances, the distinguished minority leader and the great majority of Senators on the other side

of the aisle have cooperated very wonderfully in the program up to date. I hope we may have full cooperation in expediting the consideration of the pending legislation, so that we can give consideration to other measures.

In fairness, I will say to the Senator that I believe work on the pending bill can be completed tomorrow, but it may be necessary to run through most of the evening and into the morning.

Mr. GORE. Mr. President, will the Senator yield?

Mr. KNOWLAND. I yield.

Mr. GORE. I hope the Senator does not think the junior Senator from Tennessee was in any way seeking to be offensive, and I hope he did not prove to be so in rising to suggest to the distinguished majority leader that there are some 20 amendments pending at the desk to the most important bill to be considered at this session of Congress.

As an example, I hold in my hand an amendment presented by the distinguished senior Senator from Colorado [Mr. JOHNSON], an amendment which is of vast importance to the country.

I rose merely to suggest to the distinguished majority leader that it appeared to at least one new Member of this body that it would be unreasonable haste to consider all other amendments to this very important bill in one all-night session. Perhaps the majority leader can accomplish his goal, but I must say that in the opinion of the junior Senator from Tennessee it would not accord to this important bill and these twenty-odd amendments the adequate consideration which I believe they require and which I believe the country is entitled to have.

Mr. KNOWLAND. I am glad to have the Senator's views.

Mr. FERGUSON. Mr. President, will the Senator yield?

Mr. KNOWLAND. I yield to the Senator from Michigan.

Mr. FERGUSON. Mr. President, I have heretofore sent to the desk an amendment which was the pending question, on page 80, line 9. I wish to modify that amendment by adding certain language at the end thereof.

The PRESIDING OFFICER. The Senator is entitled to modify his amendment.

Mr. FERGUSON. I modify my amendment by adding the following language at the end thereof:

Any contract hereafter entered into by the Commission pursuant to this section shall be submitted to the joint committee and a period of 30 days shall elapse while Congress is in session (in computing such 30 days there shall be excluded the days in which either House is not in session because of adjournment for more than 3 days) before the contract of the Commission shall become effective: *Provided, however,* That the joint committee, after having received the proposed contract, may by resolution in writing, waive the conditions of or all or any portion of such 30-day period.

So as to make the amendment read:

On page 80, line 9, insert the following:

"The authority of the Commission under this section to enter into new contracts or modify or confirm existing contracts to provide for electric utility services includes, in case such electric utility services are to be furnished to the Commission by the Tennessee Valley Authority, authority to contract with any person to furnish electric utility services to the Tennessee Valley Authority in replacement thereof. Any contract hereafter entered into by the Commission pursuant to this section shall be submitted to the joint committee and a period of 30 days shall elapse while Congress is in session (in computing such 30 days, there shall be excluded the days in which either House is not in session because of adjuornment for more than 3 days) before the contract of the Commission shall become effective: *Provided, however,* That the joint committee, after having received the proposed contract, may by resolution in writing, waive the conditions of or all or any portion of such 30 day period."

I send to the desk the original language, together with the modification, and ask that the amendment be modified in that way.

The PRESIDING OFFICER. The amendment is modified accordingly.

Mr. ERVIN. Mr. President, I withdraw my amendment, as a substitute for the Ferguson amendment, inasmuch as the Senator from Michigan has modified his amendment to read the same as mine.

Mr. ANDERSON. Mr. President, do I correctly understand that the Senator from Michigan has now had his modified amendment made the pending question?

Mr. FERGUSON. That is correct.

Mr. ANDERSON. I congratulate the Senator from Michigan. I congratulate the junior Senator from North Carolina [Mr. ERVIN], who is very much interested in this question.

I am offering my amendment, as I propose to modify it, as a substitute for the modified amendment of the Senator from Michigan.

The PRESIDING OFFICER. How does the Senator from New Mexico wish to modify his amendment?

Mr. ANDERSON. I do, by striking out, on the first page, lines 1 through the middle of line 7, ending with the word "party," and, after line 11 on page 2, to strike out lines 12 through 16.

Mr. KNOWLAND. Mr. President, will the Senator yield for a question?

Mr. ANDERSON. Let me explain my amendment. I take the language which the Senator from Michigan has just added to his amendment and incorporate it in my amendment. I modify my amendment by striking out certain language, leaving in it only the requirement that this service shall be given directly. As the Senator from Michigan pointed out the other day, this will prevent a direct conflict between these two amendments.

Then I shall move the amendment as a substitute for the amendment of the Senator from Michigan, which would give us an opportunity to dispose of this matter. I believe that would result in saving a great deal of time.

Mr. KNOWLAND. As I understand, the Senator has first modified his own amendment, which, of course, he has a right to do, just as the Senator from Michigan [Mr. FERGUSON] has done. Then the Senator from New Mexico is offering his amendment, as modified, as a substitute for the amendment offered by the Senator from Michigan [Mr. FERGUSON], which is the pending amendment. That in turn will make the amendment of the Senator from New Mexico the first order of business. Is that correct?

Mr. ANDERSON. The able majority leader has stated the situation exactly. I have removed from the amendment those portions which would not be directly applicable. For example, my amendment originally contained a phrase referring to cancellation clauses, and there was also a reference to income tax. Those provisions have been deleted. The amendment is now brought down to the language suggested by the Senator from Michigan [Mr. FERGUSON], as originally submitted. Then the additional language which he has added is identical with the language in my amendment, except for the language at the bottom of page 2. That will give us a chance to act directly on the subject and thereby give a directive to the Atomic Energy Commission to proceed, if it is to proceed, or not to proceed. However, it offers a direct test.

I appreciate very much the cooperation of the majority leader and the Senator from Michigan in making such a direct test possible.

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. KNOWLAND. I yield to the Senator from Iowa.

Mr. HICKENLOOPER. I wish to inquire of the Senator from New Mexico whether he has changed the word on page 2, line 6.

Mr. ANDERSON. I appreciate very much the Senator from Iowa calling that to my attention. He and I had a discussion on that point. I have failed to modify the amendment in that respect. On page 2, line 6, the word "thirty" should be changed to read "three."

I appreciate the Senator's calling that point to my attention.

Mr. KNOWLAND. Mr. President, in order to keep the parliamentary record straight, if it has not been done so—and I do not believe it has been done—I believe the amendment, as modified, offered by the Senator from New Mexico should be stated.

The PRESIDING OFFICER. The Secretary will state the amendment, as modified.

The LEGISLATIVE CLERK. On page 80, line 9, it is proposed to insert the following:

The authority of the Commission to enter into contracts for electric utility services shall extend only to contracts with persons who agree to supply the contractual amount of electric utility service directly to the installations of the Commission named herein. Any contract hereafter entered into by the Commission pursuant to this section shall be submitted to the joint committee and a period of 30 days shall lapse while Congress is in session (in computing such 30 days, there shall be excluded the days in which either House is not in session because of adjournment for more than 3 days) before the contract of the Commission shall become effective: *Provided, however,* That the joint committee, after having received the proposed contract, may by resolution in writing, waive the conditions of or all or any portion of such 30-day period.

Mr. ANDERSON. As I understand, my substitute amendment is now the pending question.

The PRESIDING OFFICER. Yes; the substitute amendment of the Senator from New Mexico [Mr. ANDERSON] is now the pending question.

Mr. KNOWLAND. Mr. President, I shall be glad to yield for insertions in the RECORD. Then I shall move that the Senate stand in recess.

SUBSIDY REQUIREMENTS OF CERTAIN UNITED STATES AIR CARRIERS

Mr. BRICKER. Mr. President, on the 6th day of July, 1954, at page 9710 of the CONGRESSIONAL RECORD, I inserted a letter from the Honorable Chan Gurney, Chairman of the Civil Aeronautics Board, in answer to a letter from the Postmaster General of the United States with regard to a $50 million estimated offset in airline subsidy payments.

The original letter from the Postmaster General was inserted in the RECORD by the Senator from West Virginia [Mr. KILGORE].

Mr. President, I ask unanimous consent to have printed in the body of the RECORD at this point, as a part of my remarks, a letter from the Honorable Arthur E. Summerfield, Postmaster General, in regard to his previous estimate that $50 million may be offset in airline subsidy payments as a result of the recent Supreme Court decision in the Chicago and Southern case, decided February 1, 1954.

This letter of the Postmaster General was written at my request following a hearing of the Committee on Interstate and Foreign Commerce on S. 3426. The Postmaster General was requested to reconcile the issues raised by his previous letters and the letter of the Honorable Chan Gurney, Chairman of the Civil Aeronautics Board, which I inserted in the CONGRESSIONAL RECORD on July 6, 1954, on page 9710.

The Postmaster General's offset estimates are based upon the maximum claims of the airlines seeking subsidy in proceedings presently pending before the Civil Aeronautics Board and covering past years. The Postmaster General is a party to these pending proceedings and properly scrutinizes and challenges the claims made by applicants for subsidy. It is common practice for the airlines to make exaggerated claims, and the Postmaster General properly recognizes that his estimates are based upon these claims and that they may be denied in whole or in part by the Civil Aeronautics Board after hearing an argument.

The Postmaster General's letter clarifies a second important point; namely, that the $50 million he estimates may be offset in airline subsidy payments relates to past rate periods and has nothing to do with the appropriation estimates for the fiscal year 1955. He points out that "the amount of subsidy that may be involved in the future under the Supreme Court ruling is a matter for the Civil Aeronautics Board, which now has the responsibility for making subsidy payments" under the President's Reorganization Plan No. 10, effective October 1, 1953.

The Supreme Court decision and the added responsibility given to the Board by the President's reorganization plan have introduced new and complex issues in the pending mail rate proceedings of the Civil Aeronautics Board. A review of their practices and procedures in determining mail rates and subsidy payments may well be in order, as well as the adequacy of the statutory standards under which the Board is proceeding. I intend to discuss these matters with the chairman of the Senate Appropriations Committee at an early date.

Mr. President, I believe the letter of the Postmaster General, which I have asked to be inserted in the RECORD, clarifies much of the airline subsidy offset issue raised by previous letters already inserted in the RECORD, and again emphasizes the complexity of the problems pending before the Board in airline mail rate proceedings.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., July 13, 1954.

Hon. JOHN W. BRICKER,
Chairman, Senate Committee on Interstate and Foreign Commerce,
United States Senate,
Washington, D. C.

DEAR MR. CHAIRMAN: This letter is in reply to your letter of July 8, wherein you asked that I review the entire matter concerning my estimate of approximately $50 million asserted to be involved in the issue of offsetting excess earnings of certain air carriers as a result of the recent Supreme Court decisions of February 1, 1954. You also asked that I furnish your committee with a reconciliation of my estimates with those furnished by the Honorable Chan Gurney, Chairman of the Civil Aeronautics Board, in his letter to you of July 1, 1954. Finally you request any further comments which may be deemed desirable.

BACKGROUND

The above-mentioned Supreme Court cases arose under the following circumstances. In 1948, the Board fixed a final future mail rate for Chicago & Southern's (C. & S.) domestic operations, which rate the Board estimated would yield a net return, after taxes, of 7.4 percent on that part of the carriers investment allocable to those domestic operations. The following 3 years—1948, 1949, 1950—C. & S.'s domestic division obtained total revenues of at least $654,000 in excess of the 7.4 percent rate of return.

C. & S. also operated a Latin American division. In 1951 for C. & S.'s Latin American operations, the Board fixed subsidy rates retroactively from November 1, 1946, to December 16, 1950, and prospectively from December 16, 1950. In fixing these subsidy rates for the Latin American division, the Board refused the request of the Postmaster General to offset against the carrier's subsidy need for this Latin American division the excess earnings of its domestic division mentioned above. On the Postmaster General's petition for review, the Court of Appeals reversed the Board (207 F. 2d 207, May 4, 1953). The Board and the carrier sought and were granted certiorari by the Supreme Court; but the Court ruled against them and affirmed the lower court's decision. *C. A. B. (and Delta as successor by merger to C. & S.) v. Summerfield, Postmaster General* (347 U. S. 74, Feb. 1, 1954).

In so ruling, the court referred to section 406 of the Civil Aeronautics Act by which the Board is directed to fix mail rates and pointed out that the subsidy "need" provision of section 406 (b) provides that the Board in determining those rates "shall take into consideration * * * the need of each such air carrier for compensation * * * together with all other revenue of the air carrier." The court stated that the act thus poses as the initial question for the Board whether the financial condition of the carrier is such that it needs a subsidy or has no need for one. The court also stated that the standard is "the need of each such air carrier" and that the "need" of the carrier is measured by the entirety of its operations, not by the losses of one division or department. The court pointed out that since the Board did not construe and apply the act in that manner, the lower court was correct in reversing the Board's rate order.

While this C. & S. case was pending before the courts, the Postmaster General asserted, by various legal documents, the same principle in other mail-rate proceedings before the Board. These proceedings also involve carriers having two or more divisions where excesses over a fair return were realized in one division while subsidy was being claimed in the other division. Progress on these latter proceedings have been held up at various stages by the Board pending the outcome of the Supreme Court decision.

SENATOR KILGORE'S REQUEST TO THE POSTMASTER GENERAL

Approximately 2½ months after the Supreme Court decision was handed down, Senator KILGORE sent a letter to the Postmaster General. In his letter, Senator KILGORE wished to be advised whether a certain statement by Congressman GARY was correct, especially "his itemization of various briefs, exceptions, and other legal documents filed by you totaling approximately $35,034,000." The statement of Congressman GARY may be found in the CONGRESSIONAL RECORD of March 3, 1954, at page 2603. Congressman GARY in that statement set forth the names of six CAB proceedings wherein the Postmaster General had filed legal documents which contained assertions of substantial amounts of money involved on the same principle as decided by the Supreme Court on February 1, 1954. Congressman GARY totalled those claims and found them to be $35,034,000. Senator KILGORE asked for verification of those totalled claims. In the letter of reply, the Postmaster General stated that the figure does represent the totalization of the claims previously asserted by the Department in the proceedings mentioned.

Senator KILGORE also requested information concerning excess earnings for periods other than those covered in the documents mentioned by Congressman GARY and finally, he requested a list of the airmail payments claimed by the carriers or proposed in such dockets. This information was supplied by the Postmaster General in his letter of June 5. The letter stated that the Department was asserting claims of approximately $15 million in addition to the previous mentioned claims of $35 million. The Postmaster General's letter also stated that these additional claims were set forth on the basis of information presently available to the Department, and involved various rate periods all prior to July 1, 1954, the commencement of fiscal year 1955.

It was not intended by the Postmaster General that by listing these claims for past rate periods any inference should be drawn that the same amount of money could thereby be asserted prospectively for fiscal 1955. The Post Office Department did not attempt to estimate air-carrier earnings prospectively, and did not state that any of the carriers involved in these claims would continue to have excess earnings for the future fiscal year 1955.

POSTMASTER GENERAL'S LETTER TO SENATOR BRICKER

Subsequently upon your request, the Postmaster General by letter of June 18, 1954, made a report on S. 3426, a bill "To amend subsection 406 (b) of the Civil Aeronautics Act of 1938, as amended." In the letter it was stated that "the Post Office Department is opposed to the bill because it would have the effect of nullifying the airmail subsidy rate-making principle presently embodied in section 406 (b) as interpreted by the Supreme Court in its decision of February 1, 1954, in *C. A. B.* v. *Summerfield, Postmaster General, supra.*" The Department set forth the fact that the bill would effect other pending Board proceedings for past rate periods where the issue of excess earnings had also been raised by the Department. It was also stated:

"Since these proceedings have not yet reached the Board for final determination, the exact amount of public funds embodied in the issue cannot be stated with finality. However, on the basis of available data for past rate periods ending December 31, 1953, the Department has asserted that a total of approximately $50 million is involved in the issue of offsetting excess earnings.

The Department thus called specific attention to the fact that these proceedings involved past rate periods and thus did not involve any rate period in fiscal 1955. Furthermore, the letter stated that the exact amount involved and the final dollar offsets could not be presented at the present time because the Board has not yet made final determinations in these cases. The Department however believed that some indication should be given to your committee as to the amounts of excess earnings available for offset, in the opinion of the Postmaster General, in these rate proceedings. It should be recognized that such claims of the Postmaster General may be upheld or denied, in part or in whole by the Board in its final determination after hearing and argument. It should be pointed out, however, that on the basis of available facts and the present status of the pending cases the Department believes that the claims of the moneys involved are justifiable.

JULY 1, 1954, LETTER FROM CHAIRMAN OF THE CIVIL AERONAUTICS BOARD TO SENATOR BRICKER

At the hearing on S. 3426 Senator BRICKER requested the Civil Aeronautics Board to submit written comments regarding the Postmaster General's letter to Senator KILGORE, mentioned above. The Chairman of the Board, Mr. Gurney, by letter of July 1, 1954, has made such comments. This letter has been reproduced in the CONGRESSIONAL RECORD of July 6, at pages 9710–9712. The Chairman of the Board states that "no one can presently eliminate the uncertainty that stems from the fact that the mail-rate cases to which the ruling of the Supreme Court in the C. & S. case is to be applied are pending before the Board and will not be concluded for some time." The Chairman properly refrained from setting forth his or the Board's opinion of the proper amounts of the offsets to be applied in each of the cases mentioned by the Postmaster General. To do so at this time would be to prejudge the cases before all procedural steps had been taken.

Item No. 1 of Mr. Gurney's letter deals with the Board's request for appropriations for fiscal year 1955. Since the claims being asserted by the Postmaster General relate to past periods the Postmaster General would have no reason to attempt to project those claims into fiscal 1955. To reemphasize these claims made by the Postmaster General in Board proceedings do not refer to the fiscal year 1955 but to prior fiscal years.

Item 2 of Mr. Gurney's letter also refers to the Board's appropriation request for fiscal 1955 and sets forth his comments on whether or not there would be excess earnings in this future year. It is not believed necessary or proper for the Postmaster General to comment on that aspect.

With respect to item 3 of Mr. Gurney's letter, the Post Office Department agrees that there are wide differences between the parties to these past rate proceedings, both in theories and the amounts of money involved in the offset issue. In this connection, Mr. Gurney stated, "• • • the Post Office contends that where a carrier has excess earnings in one year and a deficiency in another year, both years being in the open-rate period, the Board should offset the excess earnings but should ignore the deficiencies."

This statement was made without benefit of the Post Office Department's brief in the Transatlantic Mail Rate Case filed June 30, 1954.

It is not the Department's position that the Board should offset the excess but ignore the deficiencies. Rather, it is the Department's position that reported losses should be taken into account only after the Board has determined the amount of such losses to be underwritten under the statutory test of honest, efficient and economical management, as set forth in section 406 (b) of the act. In other words, the reported losses must first be screened under these standards before they can be considered in connection with grants of subsidy. In the absence of such screening the Department does not believe that the Board should or can recognize reported losses. The Board's letter of July 1 overlooks this phase of the Department's position which was set forth in the Department's brief filed June 30.

In the Department's brief in the Transatlantic Mail Rate case, filed June 30, 1954, its position with respect to TWA's past rate period from February 5, 1946, through 1953, is summarized at page 19, essentially as follows: For the period 1951–53, TWA's domestic division realized earnings that exceed an 8-percent return by an amount computed to be $27,044,000, after making proper adjustments for Federal income tax liability. The Board should offset such excess against TWA's claimed subsidy need in its international operations. For the earlier period, March 14, 1947, through 1950, the losses reported by TWA for its domestic division were considered by the Board in a proceeding concluded in 1951, wherein the Board granted the carrier the amount of subsidy which it determined to be required under under the test of honest, efficient, and economical management. The subsidy payments made by the Department to TWA pursuant to that decision amount to approximately $20 million. Therefore, the Department is now contending that the losses of 1947–50 have already been screened and the Board has granted the subsidy needed for this period under the standards of the act. Thus, the deficiencies of 1947–50 cannot now be asserted again to decrease the excess profits above mentioned.

TWA had also reported a loss for its domestic division for the period February 5, 1946, to March 14, 1947. The Department contends that these claimed losses, incurred after mail payments of over $3 million, should not be employed to decrease the above-mentioned excess earnings until such time as the Board obtains sufficient evidence to enable it to determine whether the losses were properly incurred under the statutory standards of honest, efficient, and economical management. This determination has not been made.

Mr. Gurney also comments on the fact that counsel for the Bureau of Air Operations of the Board is contending for almost a million dollars more by way of offset against Pan American in the pending transatlantic mail-rate proceedings than the Post Office asserts. On the basis of our figures to Senator KILGORE, his statement is correct. In that transatlantic proceeding the Board's own staff is claiming that there are several million dollars of excess earnings realized both by Pan American and TWA which should be applied against the carriers' subsidy needs.

With respect to item 4 of Mr. Gurney's letter, the Department agrees that the entire $50 million available for offset may not be so applied or "recaptured" after the Board makes its final determinations in the various cases. It depends entirely on the finalizations of the various computed subsidy needs of the carriers calculated on a divisional basis and the amounts available for offset. For instance, using Mr. Gurney's hypothetical example, if it is to be assumed that there has been a final determination that the carrier's international operation, on a divisional basis, needs $5 million in subsidy, then only $5 million of the $10 million excess from the domestic division would be applied as an offset against the need. But until the final determinations have been made by the Board, the Department believes it to be in the best interests of the taxpayers to present and assert the entire amounts of excess that are available for offset. In the hypothetical example the amount so involved and available would be the $10 million excess. But in the actual examples of TWA and Pan American, the amounts asserted by the Department as available for offset are far less than the total subsidy mail payments proposed by the Board's examiner for the international operations—$87 million for Pan American, and $63 million for TWA, as shown in my letter of June 5 to Senator KILGORE.

The other statement made by Mr. Gurney in connection with United Airlines would also be correct if it were to be assumed that the Board has actually made those determinations. But, again, United has made a total subsidy claim of approximately $14½ million, subject to further amendments. The Board has not yet acted. Under the circumstances the Department asserts that there are $15,857,000 available for offset.

Thus, if United's claim remains unchanged and if the Board were to approve it on a divisional basis, the Department's position would be:

United's Hawaiian claim, $14,595,503; mail services rendered and paid, —$1,600,052; balance due as subsidy, $12,995,451. But Post Office claims there are the following earnings in excess of an 8-percent return from United's domestic division available for offset against its subsidy need, —$15,857,000; net subsidy due United, none. Post Office has already paid United-Hawaiian under temporary orders, total, $2,626,918, of which service mail pay is —$1,600,052. Balance already paid as temporary subsidy, $1,026,866.

Therefore the Department would claim that United should repay the $1,026,866 to the Department as subsidy paid on account and not actually warranted under the above situation. Hearings on United's claim are tentatively scheduled by the Board for next month. Any changes in United's claims or proposed Board's allowances would correspondingly change the computations above.

If, however, S. 3426 were approved, the Post Office Department would not be permitted to assert the offset principle, and, using the above computation, the Department would be ordered by the Board to pay United $12,995,451 less $1,026,866 already paid, or $11,968,585 as subsidy for the past period April 30, 1947, through August 7, 1952.

The Department also agrees with Mr. Gurney's statement made in connection with Delta Airlines, again assuming, as Mr. Gurney does, "if the Board should ultimately find after hearing." But apparently Delta does not now agree or accept the estimated excess profits of $954,000 for its domestic operations because Delta states its earnings are below the Board's forecast for 1953–54.

If that is the case, the subsidy requirement estimate of $730,000 for the Latin American operation may also have to be increased. See Delta's letter to the Postmaster General, dated June 22, 1954, page 3, which letter has been offered by Delta by way of a printed statement (p. 5) of Mr. Erle Cocke, Jr., presented July 8, 1954, to your committee on S. 3426.

With respect to the attachment of Mr. Gurney's letter (also reproduced in the CONGRESSIONAL RECORD of July 6, 1954, pages 9711–9712), it appears to be a summary of the effect of the Supreme Court decision on offsets for the future year July 1, 1954–June 30, 1955, fiscal year 1955.

First, the Department, as previously stated, has not asserted any offset claims against any carrier for that future period. The Department has not attempted to estimate whether any excess earnings will be available for fiscal 1955. Reorganization Plan No. 10 of 1953 has relieved the Department of the responsibility of paying subsidies as of October 1, 1953. The Department therefore, if requested, would accept the Board's estimate of projected results for the future fiscal year 1955 on the subsidy offset principle.

Secondly, the Department reads the Board's estimates for fiscal 1955 as in no way affecting or prejudging the Department's claims of excess earnings of the various carriers for the past fiscal years mentioned in the Postmaster General's letter of June 5, 1954, to Senator KILGORE. For example, the attachment does not include United, as mentioned in the footnote to the attachment. Again, the estimate does not mention the Postmaster General's claim against Braniff for the periods prior to January 1, 1954. Likewise the Department does not read the reference to TWA as a prejudgment of the amount available for offset in the calendar year 1953 to be only $1,500,000.

Finally, the Board's estimates of the service mail pay for fiscal 1955 are not understood to be a prejudgment of the final proper service mail rates for 1955 presently under consideration by the Board in pending proceedings for various domestic overseas and international carriers.

In conclusion, the Department wishes to state that it realizes that the computations involved in the offset principle can be made complex and that there are controversies as evidenced by the pending cases, just as there always are controversies on money claims. The principle, however, is simple and fair, as shown by the unanimous opinion and decision of the Supreme Court on this and related matters—"If, the carrier's treasury is lush, the 'need' [for subsidy] decreases * * *."

This matter demonstrates rather forcefully the importance of the President's Reorganization Plan No. 10, separating subsidy from mail payments, which was approved by Congress, effective October 1, 1953. In addition to relieving the postal service of the burden of making subsidy payments, one of the principal purposes of this plan was to identify separately the amount of the appropriations to be made by Congress for subsidy purposes.

Before this plan became effective, subsidy payments were made by the Post Office Department. The amount in question here covers past rate periods for which the Department has the responsibility of paying such subsidies. The amount of subsidy that may be involved in the future under the Supreme Court ruling is a matter for the Civil Aeronautics Board which now has the responsibility for making the subsidy payments.

The Post Office Department would be remiss in its duties to the public if it did not closely scrutinize the amount to be charged to it for the past rate periods under the Supreme Court's interpretation of the law.

Sincerely yours,

ARTHUR E. SUMMERFIELD,
Postmaster General.

ORDER OF BUSINESS

Mr. KNOWLAND. Mr. President, if there are no further remarks or insertions to be made in the RECORD, before I make a motion to recess, I would respectfully request the cooperation of Senators on both sides of the aisle to be in the Chamber promptly at 10 o'clock tomorrow morning. I know that committee meetings are scheduled for 10 o'clock in the morning, but if Senators attending such meetings will come to the Chamber on the first roll call at 10 o'clock they may again leave to attend the committee meetings. In that way we may save a great deal of time, instead of holding up the Senate for a lengthy quorum call.

Mr. BRICKER. Mr. President, is it the desire of the majority leader that we have no committee meetings after 10 o'clock?

Mr. KNOWLAND. I would say to the Senator from Ohio that I would not want to suggest an invariable rule to that effect. In some instances it might be urgent that a committee hold a hearing. However, if a meeting can be postponed from tomorrow to the following day, I believe, in view of the fact that we will be voting tomorrow—and undoubtedly there will be a number of quorum calls—there will be few if any committee meetings held tomorrow.

Mr. BRICKER. I thank the Senator.

DEATH OF FORMER SENATOR BLAIR MOODY, OF MICHIGAN

Mr. FERGUSON. Mr. President, it is with deep feeling of sadness that I announce the death of my former colleague from Michigan, Blair Moody. I know that the Senate receives this news with profound sorrow. I am sure we all extend our sympathy to the family and the many friends of Blair Moody in Michigan.

RECESS TO 10 A. M. TOMORROW

Mr. KNOWLAND. Mr. President, I move that the Senate stand in recess until 10 o'clock a. m., tomorrow.

The motion was agreed to; and (at 9 o'clock and 38 minutes p. m.) the Senate took a recess until tomorrow, Wednesday, July 21, at 10 o'clock a. m.

CONFIRMATIONS

Executive nominations confirmed by the Senate July 19 (legislative day of July 2), 1954:

UNITED STATES DISTRICT JUDGES

Emett C. Choate, to be United States district judge for the southern district of Florida. (New position.)

Fred M. Taylor, to be United States district judge for the district of Idaho. (New position.)

HOUSE OF REPRESENTATIVES

TUESDAY, JULY 20, 1954

The House met at 11 o'clock a. m.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Almighty God, our heavenly Father, who hast revealed unto us the way of blessedness, we are again calling upon Thy great and holy name for by Thy power we are sustained and strengthened to meet and discharge our tasks and responsibilities with quietness and confidence with renewed energy and hope.

Help us to appreciate more fully how greatly we need divine wisdom and guidance and that Thou hast placed at our disposal the inexhaustible resources of Thy grace.

Grant that daily we may hear and heed Thy voice for the ways which Thou hast marked out for us are the ways of pleasantness and peace.

Encourage us with a clear vision of the final triumphant fulfillment of our loftier hopes and aspirations for the Lord God omnipotent reigneth and of His kingdom of righteousness and justice there shall be no end.

In Christ's name we pray. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate agrees to the amendments of the House to a bill and concurrent resolution of the Senate of the following titles:

S. 3197. An act to authorize the acceptance of conditional gifts to further the defense effort; and

S. Con. Res. 80. Concurrent resolution to print additional copies of Senate Document 87, Review of the United Nations Charter—A Collection of Documents.

The message also announced that the Senate agrees to the reports of the committees of conference on the disagreeing votes of the two Houses on the amendments of the Senate to bills and a joint resolution of the House of the following titles:

H. R. 303. An act to transfer the maintenance and operation of hospital and health facilities for Indians to the Public Health Service, and for other purposes;

H. R. 7434. An act to establish a National Advisory Committee on Education;

H. R. 7601. An act to provide for a White House Conference on Education;

H. R. 8571. An act to authorize the construction of naval vessels, and for other purposes;

H. R. 9040. An act to authorize cooperative research in education; and

H. J. Res. 534. Joint resolution to authorize the Secretary of Commerce to sell certain war-built passenger-cargo vessels, and for other purposes.

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 3344) entitled "An act to amend the mineral leasing laws and the mining laws to provide for multiple mineral development of the same tracts of the public lands, and for

other purposes"; requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MILLIKIN, Mr. WATKINS, Mr. BARRETT, Mr. MURRAY, and Mr. ANDERSON to be the conferees on the part of the Senate.

The message also announced that the Vice President has appointed Mr. CARLSON and Mr. JOHNSTON of South Carolina members of the joint select committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An act to provide for the disposition of certain records of the United States Government," for the disposition of executive papers referred to in the report of the Archivist of the United States numbered 55–2.

AUTHORIZING SECRETARY OF AGRICULTURE TO COOPERATE WITH STATES FOR SOIL CONSERVATION

Mr. HOPE submitted a conference report and statement on the bill (H. R. 6788) to authorize the Secretary of Agriculture to cooperate with States and local agencies in the planning and carrying out of works of improvement for soil conservation, and for other purposes.

CREEPING SOCIALISM

Mr. CLARDY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CLARDY. Mr. Speaker, there are those who think that the advent of socialism will be heralded with banners and beating drums. There are those who believe that the coming of socialism will be advertised in screamer headlines and blowing sirens. Nothing could be further from the truth. Such folks are deceiving themselves and the Nation. Socialism will sneak up on us gradually—as it has been for some time. But we can be beguiled into taking longer steps in that direction if we are not careful.

Last Sunday the New York Times carried an article in which Bernard M. Baruch was quoted as demanding an immediate congressional action to grant to unnamed bureaus and departments the power to socialize this Nation overnight. Mr. Baruch does not put it in so many words, but that is the plain meaning of what he says.

His is indeed an odd way of saving our system of free enterprise. He wants to save it by embracing all of the Socialists' program for regimenting the entire Nation.

Surely experience has taught us that a handful of bureaucrats in Washington are not wiser than the collective judgment of all our people. Surely experience has shown us that the way to wreck our system of a free economy is to subject it to more and more Government control. If we have not learned that then the case for free enterprise is hopeless.

Mr. Baruch wants us to enact a program that will give the bureaucrats power to hold down wages along with the power to regulate every other phase of the economy. Rationing and all the things that go with it are included in his program—his is a program for the complete socialization of the Nation at one blow.

Just when would he put the program into operation? It is there that he becomes vague and uncertain. But he makes it obvious that he wants this power to be exercised the moment someone he leaves unnamed becomes apprehensive about what may happen. He says that the regulation should be less severe for a situation such as military intervention in southeast Asia than in an all-out war. I wonder who would make the decision as to when we must become completely socialized? And just what will trigger that decision? Will it merely require someone to say he thinks an emergency is about to start?

It is obvious he does not want the Congress to have anything to say about when the regimentation of socialism shall commence—or the extent of that socialization. He exhibits a complete faith in bureaucrats and a complete lack of confidence in the representatives of the people. In that direction lies dictatorship.

But he reaches the height of absurdity when he says:

> Controls would last only as long as they were required—certainly for the duration of the emergency and for a sufficient time thereafter to permit a proper readjustment.

Just how optimistic about the removal of these things can you get?

We have been living in a period of so-called emergency for years. I wonder just what further events must take place before he would have the bureaucrats clamp on the stranglehold? And I wonder who would decide when the so-called emergency and "a sufficient time thereafter for readjustment" had elapsed? Under his theory it would certainly not be Congress. Has he learned nothing from experience about how it becomes politically impossible to unshackle ourselves from bureaucratic controls? If these folks have their way the time will never come when controls are not needed.

Why must we be forever threatening ourselves with destruction from within? Does he think for 1 minute that business and industry can make long-range plans with the sword of Damocles forever hanging over their heads? Has he completely lost faith in the ability of the free enterprise system to weather the storms of everyday life? And how much of a breeze does he think must develop before the bureaucrats will call it a cyclone? Does he have more faith in the ability of a handful of little men to tell all of us what to do than he does in the combined genius of our people and our system?

He makes the astonishing suggestion that by threatening ourselves with complete socialization we will somehow or other deter our only enemy from commencing an all-out war. Has he forgotten that it is the aim and purpose of that enemy to socialize us? Does he not realize that our enemy wants us to become socialized as a necessary step in transition to full communization?

He says that the next war may come in a big smash—and he asks where Congress will be? If it is going to be that bad there will not be any bureaucrats left to put these chains on our wrists. They will perish right along with the Congress. What he really means is that Congress may not be persuaded to fully regiment our people overnight. He thinks that would be bad.

But back of all of this talk about all-out war is to be discerned the real motive. What he wants and what those who think like him want is something on the books that will enable the Socialist-minded people in our midst to take over whenever they think the opportune moment has arrived. Anything will be a "crisis" to them—all they want is the excuse to take over.

It would be the supreme folly of our time if we should adopt his suggestion that we speed up the process of socializing ourselves. It would be the greatest mistake in our history if we should now abandon all hope and surrender our ideals and principles. I cannot subscribe to his policy of despair.

PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the first bill on the calendar.

ANNA URWICZ

The Clerk called the bill (S. 552) for the relief of Anna Urwicz.

There being no objection, the Clerk read the bill, as follows:

> *Be it enacted, etc.*, That for the purposes of the Immigration and Nationality Act, Anna Urwicz shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CHUAN HUA LOWE AND HIS WIFE

The Clerk called the bill (S. 997) for the relief of Chuan Hua Lowe and his wife.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GRAHAM. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

GIUSEPPI CLEMENTI

The Clerk called the bill (H. R. 7924) for the relief of Giuseppi Clementi.

There being no objection, the Clerk read the bill, as follows:

> *Be it enacted, etc.*, That, notwithstanding the provision of section 212 (a) (9) of the

Immigration and Nationality Act, Giuseppi Clementi may be admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that act: *Provided*, That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice have knowledge prior to the enactment of this act.

With the following committee amendment:

Page 1, line 9, strike out "have" and insert "had."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. DINA MIANULLI (NEE KRATZER)

The Clerk called the bill (H. R. 7925) for the relief of Mrs. Dina Mianulli (nee Kratzer).

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, notwithstanding the provision of section 212 (a) (9) of the Immigration and Nationality Act, Mrs. Dina Mianulli (nee Kratzer) may be admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of that act: *Provided*, That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice have knowledge prior to the enactment of this act.

With the following committee amendment:

Page 1, line 10, strike out "have" and insert "had."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HELMUT CERMAK AND HANA CERMAK

The Clerk called the bill (H. R. 8334) for the relief of Helmut Cermak and Hana Cermak.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Helmut Cermak and Hana Cermak shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct two numbers from the appropriate quota for the first year that such quota is available.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. DONKA KOURTEVA DIKOVA AND HER SON NICOLA MARIN DIKOFF

The Clerk called the bill (S. 95) for the relief of Mrs. Donka Kourteva Dikova (Dikoff) and her son Nicola Marin Dikoff.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the immigration and naturalization laws, Mrs. Donka Kourteva Dikova (Dikoff) and her son Nicola Marin Dikoff shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided in this act, the Secretary of State shall instruct the proper quota-control officer to deduct two numbers from the appropriate quota for the first year that such quota is available.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. BETTY THORNTON OR JOZSEFNE TOTH

The Clerk called the bill (S. 98) for the relief of (Mrs.) Betty Thornton or Jozsefne Toth.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the immigration and naturalization laws, Mrs. Betty Thornton or Jozsefne Toth shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FRANCESCO CRACCHIOLO

The Clerk called the bill (S. 102) for the relief of Francesco Cracchiolo.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the immigration and naturalization laws, Francesco Cracchiolo shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CHRISTOPHER F. JAKO

The Clerk called the bill (S. 110) for the relief of Christopher F. Jako.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Christopher F. Jako shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

YVONNE LINNEA COLCORD

The Clerk called the bill (S. 203) for the relief of Yvonne Linnea Colcord.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, notwithstanding the provision of section 212 (a) (9) of the Immigration and Nationality Act, Yvonne Linnea Colcord may be admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of that act: *Provided*, That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice have knowledge prior to the enactment of this act.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BRUNO EWALD PAUL AND MARGIT PAUL

The Clerk called the bill (S. 912) for the relief of Bruno Ewald Paul and Margit Paul.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act,

Bruno Ewald Paul and Margit Paul shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct the required numbers from the appropriate quota or quotas for the first year that such quota or quotas are available.

SEC. 2. The Attorney General shall not hereafter exclude or deport Bruno Ewald Paul from the United States on the ground that he has been convicted of a crime involving moral turpitude or admits the commission thereof: *Provided*, That this exemption shall apply only to a ground for exclusion or deportation of which the Department of State or the Department of Justice has knowledge prior to the enactment of this act.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ALBINA SICAS

The Clerk called the bill (S. 891) for the relief of Albina Sicas.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, notwithstanding the provisions of section 212 (a) (4) of the Immigration and Nationality Act, Albina Sicas may be admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of such act: *Provided*, That a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of the said act: *And provided further*, That the said Albina Sicas shall be held and considered to be the minor child of her mother, Mrs. Hilda Sicas.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BRUNHILDE WALBURGA GOLOMB, RALPH ROBERT GOLOMB, AND PATRICIA ANN GOLOMB

The Clerk called the bill (S. 1225) for the relief of Brunhilde Walburga Golomb, Ralph Robert Golomb, and Patricia Ann Golomb.

There being no objection, the Clerk read the bill as follows:

Be it enacted, etc., That, notwithstanding the provisions of section 212 (a) (9) of the Immigration and Nationality Act, Brunhilde Walburga Golomb, the fiancé of Sgt. Robert F. Hartsworm, a citizen of the United States, and her two minor children, Ralph Robert Golomb and Patricia Ann Golomb, shall be eligible for visas as nonimmigrant temporary visitors for a period of 3 months, if the administrative authorities find (1) that the said Brunhilde Walburga Golomb is coming to the United States with a bona fide intention of being married to the said Sgt. Robert F. Hartsworm, and (2) that they are otherwise admissable under the Immigration and Nationality Act. In the event the marriage between the above named persons does not occur within 3 months after the entry of the said Brunhilde Walburga Golomb and the two minor children, Ralph Robert Golomb and Patricia Ann Golomb, they shall be required to depart from the United States and upon failure to do so shall be deported in accordance with the provisions of the Immigration and Nationality Act. In the event that the marriage between the above named persons shall occur within 3 months after the entry of the said Brunhilde Walburga Golomb and her two minor children, Ralph Robert Golomb and Patricia Ann Golomb, the Attorney General is authorized and directed to record the lawful admission for permanent residence of the said Brunhilde Walburga Golomb and her two minor children, Ralph Robert Golomb and Patricia Ann Golomb, as of the date of the payment by them of the required visa fees: *Provided*, That the exemption granted herein shall apply only to a ground for exclusion of which the Department of State or the Department of Justice has knowledge prior to the enactment of this act.

With the following committee amendment:

Strike out all after the enacting clause and insert "That, notwithstanding the provision of section 212 (a) (9) of the Immigration and Nationality Act, Brunhilde Walburga Golomb Hartsworm may be admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of that act: *Provided*, That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this act."

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "An act for the relief of Brunhilde Walburga Golomb Hartsworm."

A motion to reconsider was laid on the table.

OLGA BALABANOV AND NICOLA BALABANOV

The Clerk called the bill (S. 1313) for the relief of Olga Balabanov and Nicola Balabanov.

BARBARA HERTA GESCHWANDTNER

The Clerk called the bill (S. 2960) for the relief of Barbara Herta Geschwandtner.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, notwithstanding the provision of section 212 (a) (9) of the Immigration and Nationality Act, Barbara Herta Geschwandtner may be admitted to the United States for permanent residence if otherwise admissible under that act: *Provided*, That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice has knowledge prior to the enactment of this act: *And provided further*, That she marries her citizen fiancé, Cpl. Marvin C. Drum, within 6 months following the date of enactment of this act.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CPL. ROBERT D. McMILLAN

The Clerk called the bill (S. 599) for the relief of Cpl. Robert D. McMillan.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Cpl. Robert D. McMillan (Army serial number RA-17053963), the sum of $1,806.72, in full settlement of all claims against the United States on account of damage to, or loss or destruction of his personal property in a fire that occurred at the Branch United States Disciplinary Barracks, Milwaukee, Wis., on February 24, 1950; the said claim of Cpl. Robert D. McMillan being a claim that is not cognizable under the Federal Tort Claims Act, as amended: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, line 4, strike out "in excess of 10 percent thereof."

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LT. COL. ROLLINS S. EMMERICH

The Clerk called the bill (S. 1203) for the relief of Lt. Col. Rollins S. Emmerich.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Lt. Col. Rollins S. Emmerich, of Alexandria, Va., the sum of $221.49 in full satisfaction of his claim against the United States for reimbursement of expenses incurred by him in transporting his private automobile from Pusan, Korea, to Kobe, Japan, in connection with the evacuation of Korea by American personnel ordered by the United States Ambassador to Korea on June 27, 1950: *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, line 2, strike out "in excess of 10 percent thereof."

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GIVENS CHRISTIAN

The Clerk called the bill (S. 2070) for the relief of Givens Christian.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the estate of Givens Christian, late a deputy sheriff of Union County, Ky., the sum of $5,000, in full satisfaction of all claims against the United States for the death of the said Givens Christian on or about June 2, 1948, sustained as a result of his being run over by an Army truck driven by a soldier who was attempting to escape from the custody of the said Givens Christian: *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, line 2, strike out "in excess of 10 percent thereof."

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PAUL BERNSTEIN

The Clerk called the bill (H. R. 3742) for the relief of Paul Bernstein.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Paul Bernstein, of Brooklyn, N. Y., the sum of $797.78. The payment of such sum shall be in full settlement of all claims of the said Paul Bernstein against the United States arising out of services rendered by him to the United States between June 30, 1936, and November 1, 1939, as an employee of the Federal Works Agency, Work Projects Administration, New York City. Such sum is the amount due the said Paul Bernstein for sick leave and annual leave, earned but not taken by him before a retroactive transfer to an agency under a different leave system. Similar payments may now be made under the subsequently enacted provisions of the act approved December 21, 1944 (U. S. C., 1946 ed., Supp. V, title 5, sec. 61d): *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JAMES DORE, JR.

The Clerk called the bill (H. R. 7508) for the relief of James Dore, Jr.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Administrator of Veterans' Affairs is authorized and directed to reinstate the national service life insurance (N-3847155; SN-33224919) issued to James Dore, Jr., (Veterans' Administration claim No. C-10479200), if the said James Dore, Jr., within 6 months after the date of enactment of this act, files application requesting such reinstatement and tenders therewith an amount sufficient to pay the premiums for such insurance for a period of at least 2 months. Upon reinstatement of such insurance (1) all premiums for such insurance for the period commencing December 1, 1947, and ending on the date of reinstatement of such insurance under this act, shall be held and considered to have been paid, (2) the amount tendered pursuant to the first sentence, less an amount equal to the premiums for such insurance for 1 month, shall be applied as premiums for such insurance for the period immediately following the date of the reinstatement of such insurance under this act, and (3) the said James Dore, Jr., shall be entitled to receive all of the rights, benefits, and privileges which he would have been entitled to receive with respect to such insurance if such insurance had been continuously in effect during the period beginning December 1, 1947, and ending on the date of reinstatement of such insurance under this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. HELEN ALDRIDGE

The Clerk called the bill (H. R. 7636) for the relief of Mrs. Helen Aldridge.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mrs. Helen Aldridge, El Paso, Tex., the sum of $20,000. The payment of such sum shall be in full settlement of all claims of the said Mrs. Helen Aldridge against the United States arising out of the death of her husband, Jesse Aldridge, who was killed while walking across the international bridge between El Paso and Juarez, Mexico, on August 30, 1951, when he was struck by a bullet fired by a Mexican policeman who had been improperly permitted by officers of the United States Immigration Service to enter United States territory in pursuit of a fugitive: *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 1, line 6, strike out "$20,000" and insert "$10,000."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

M. M. HESS

The Clerk called the bill (H. R. 7762) for the relief of M. M. Hess.

There being no objection, the Clerk read the bill, as follows:

Be it enacted,, etc., That the claim of M. M. Hess, of 226 North State Street, Litchfield, Ill., for relief under section 322 (b) (1) of the Internal Revenue Code shall be held and considered to have been received by the Internal Revenue Department of the United States within the time allowed by law and regulations for the filing of such a claim: *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GEORGE D. KYMINAS

The Clerk called the bill (H. R. 669) for the relief of George D. Kyminas.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the immigration and naturalization laws, George D. Kyminas shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee and head tax. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

With the following committee amendments:

On page 1, lines 3 and 4, strike out "immigration and naturalization laws" and substitute "Immigration and Nationality Act."

On page 1, line 7, strike out the words "and head tax."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ISRAEL RATSPRECHER AND MARYSE RATSPRECHER

The Clerk called the bill (H. R. 787) for the relief of Israel Ratsprecher and Maryse Ratsprecher.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the immigration and naturalization laws, Israel Ratsprecher and Maryse Ratsprecher shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee and head tax. Upon the granting of permanent residence to such aliens as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct two numbers from the appropriate quota for the first year that such quota is available.

With the following committee amendments:

On page 1, lines 3 and 4, strike out "immigration and naturalization laws" and substitute "Immigration and Nationality Act."

On page 1, line 8, strike out the words "and head tax."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. EMMA MARTHA STAACK

The Clerk called the bill (H. R. 818) for the relief of Mrs. Emma Martha Staack.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Mrs. Emma Martha Staack shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ATSUKO KIYOTA SZEKERES

The Clerk called the bill (H. R. 842) for the relief of Atsuko Kiyota Szekeres.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That Atsuko Kiyota Szekeres, who lost United States citizenship under the provisions of section 401 (e) of the Nationality Act of 1940, as amended, may be naturalized by taking prior to 1 year after the effective date of this act, before any court referred to in subsection (a) of section 310 of the Immigration and Nationality Act or before any diplomatic or consular officer of the United States abroad, the oaths prescribed by section 337 of the said act.

With the following committee amendment:

On page 1, line 10, after the word "act" change the period to a semicolon and insert the following: "*Provided*, That she is not found to be disqualified from becoming a citizen by reason of section 313 of that act: *Provided further*, That failure to reestablish her residence in the United States within a period of 18 months following the enactment of this act shall bring about a divestiture of United States citizenship thereby acquired."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to restore United States citizenship to Atsuko Kiyota Szekeres."

A motion to reconsider was laid on the table.

FRANCISZEK WOLCZEK

The Clerk called the bill (H. R. 905) for the relief of Franciszek Wolczek.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Franciszek Wolczek, Alien Registration No. A-6159685, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PANOULA PANAGOPOULOS

The Clerk called the bill (H. R. 950) for the relief of Panoula Panagopoulos.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purpose of the Immigration and Nationality Act, Panoula Panagopoulos shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. WAI-JAN LOW FONG

The Clerk called the bill (H. R. 1171) for the relief of Mrs. Wai-Jan Low Fong.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, in the administration of the immigration laws, Mrs. Wai-Jan Low Fong shall be held and considered to be a nonquota returning resident alien, as defined by section 4 (b) of the Immigration Act of 1924, as amended.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following: "That, in the administration of the Immigration and Nationality Act, Mrs. Wai-Jan Low Fong shall be held and considered to be a nonquota returning resident alien as defined by section 101 (a) (27) (B) of that act."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

STYLIANOS HARALAMBIDIS

The Clerk called the bill (H. R. 1209) for the relief of Stylianos Haralambidis.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the immigration and naturalization laws, Stylianos Harlambidis shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon payment of the required visa fee and head tax. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

With the following committee amendments:

On page 1, lines 3 and 4, strike out "immigration and naturalization laws" and substitute "Immigration and Nationality Act."

On page 1, line 7, insert a period after the words "visa fee" and strike out the remainder of the bill.

The amendments were agreed to.

Mr. GRAHAM. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GRAHAM: On page 1, lines 4 and 5, strike out the name

"Harlambidis" and substitute "Haralambidis."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill for the relief of Stylianos Haralambidis."

A motion to reconsider was laid on the table.

GEORGINA CHINN

The Clerk called the bill (H. R. 1324) for the relief of Georgina Chinn.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, notwithstanding the provisions of section 2 of the act of December 17, 1943, as amended (8 U. S. C. 212 (a)), and for the purpose of sections 4a and 9 of the Immigration Act of 1924, as amended, the minor child, Georgina Chinn, shall be held and considered to be the natural-born alien child of Harold N. Chinn, a citizen of the United States.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following: "That, for the purposes of sections 101 (a) (27) (A) and 205 of the Immigration and Nationality Act, Georgina Chinn shall be held and considered to be the natural-born alien child of Harold N. Chinn, a citizen of the United States."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. BETTY E. LaMAY

The Clerk called the bill (H. R. 1897) for the relief of Mrs. Betty E. LaMay.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the immigration and naturalization laws, Mrs. Betty E. LaMay shall be held and considered to have been lawfully admitted to the United States for permanent residence as of October 17, 1950, the date on which she entered the United States, upon the payment of the required visa fee and head tax.

With the following committee amendment:

Strike out all after the enacting clause and insert "That, for the purposes of the Immigration and Nationality Act, Mrs. Betty E. LaMay shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act, upon the payment of the required visa fee."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

IVO MARKULIN

The Clerk called the bill (H. R. 2051) for the relief of Ivo Markulin.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, for the purposes of the Immigration and Nationality Act, Ivo Markulin shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. SMITH of Wisconsin. Mr. Speaker, that concludes the calendar for the day. We have no reports on the remaining bills.

GRANTING PERMANENT RESIDENCE TO CERTAIN ALIENS

Mr. GRAHAM. Mr. Speaker, I ask unanimous consent for the immediate consideration of the resolution (H. Con. Res. 254), which is No. 1026 on the calendar and in which about 25 Members of the House are interested.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There being no objection, the Clerk read the resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That the Congress favors the granting of the status of permanent residence in the case of each alien hereinafter named, in which case the Attorney General has determined that such alien is qualified under the provisions of section 4 of the Displaced Persons Act of 1948, as amended (62 Stat. 1011; 64 Stat. 219; 50 App. U. S. C. 1953):

The concurrent resolution was agreed to, and a motion to reconsider was laid on the table.

AUTHORIZING SECRETARY OF COMMERCE TO SELL CERTAIN WAR-BUILT PASSENGER VESSELS

Mr. TOLLEFSON submitted a conference report and statement on the resolution (H. J. Res. 534) to authorize the Secretary of Commerce to sell certain war-built passenger vessels, and for other purposes.

KLYCE MOTORS, INC.

Mr. JONAS of Illinois. Mr. Speaker, I call up the conference report on the bill (H. R. 5185) for the relief of Klyce Motors, Inc., and I ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2272)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5185) for the relief of Klyce Motors, Incorporated, having met after full and free

conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the Senate amendment numbered 1 and agree to the the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert "$91,000"; and the Senate agree to the same.

EDGAR A. JONAS,
USHER L. BURDICK,
THOMAS J. LANE,
Managers on the Part of the House.

WILLIAM LANGER,
HERMAN WELKER,
ESTES KEFAUVER,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5185) for the relief of Klyce Motors, Inc., submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to such amendments, namely:

This bill as passed the House would appropriate the sum of $38,960 to the Klyce Motors, Inc., in full settlement of all claims against the United States for losses sustained under War Assets Administration sales document No. 262845, in connection with the purchase of 109 trucks, dated May 25, 1946, for which there was a breach of warranty on the part of the War Assets Administration.

The Senate increased the amount by restoring the original sum as introduced, that is, $116,982.76. The Senate also amended the bill so as to provide that no attorney shall be paid from the appropriation. At the conference the sum of $91,000 was agreed upon, and the House conferees agreed to the Senate amendment as to the proviso in connection with attorney fees.

EDGAR A. JONAS,
USHER L. BURDICK,
THOMAS J. LANE,
Managers on the Part of the House.

The SPEAKER. The question is on the conference report.

The conference report was agreed to, and a motion to reconsider was laid on the table.

SUPPLEMENTAL APPROPRIATION BILL, 1955

Mr. BROWN of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 646 and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That during the consideration of the bill (H. R. 9936) making supplemental appropriations for the fiscal year ending June 30, 1955, and for other purposes, all points of order against the bill or any provisions contained therein are hereby waived.

The SPEAKER. The gentleman from Ohio is recognized for 1 hour.

Mr. BROWN of Ohio. Mr. Speaker, I yield myself such time as I may use, and yield 30 minutes to the gentleman from Virginia [Mr. SMITH].

Mr. Speaker, I rise to urge the adoption of House Resolution 646 which will make in order the consideration of the bill, H. R. 9936, making supplemental appropriations for the fiscal year ending June 30, 1955, and for other purposes.

House Resolution 646 would provide for the waiving of points of order during the consideration of the bill.

Mr. Speaker, this waiving of points of order is necessary for several very important reasons. First of all H. R. 9936 changes certain limitations which were previously set in other bills.

In chapter 11, relating to general provisions, there are the usual general provisions that have been carried for several years in one bill, rather than carrying them in each bill that is reported out by the Appropriations Committee during the session. This also necessitates the waiving of the points of order against the bill.

Section 1111 has a new piece of language which is designed to define what an obligation is. This new language has been made necessary by the fact that in the past certain agencies have called things obligations when they were not. It is hoped that this new language will clarify this whole situation.

Mr. Speaker, in the bill itself, the figure recommended by the Committee on Appropriations is $765,770,188 less than was asked for in the budget estimate.

Mr. Speaker, there is no need to emphasize to the House membership the importance of this bill. I hope that the House will adopt this rule which will allow for the waiving of points of order during the consideration of the bill.

Mr. SMITH of Virginia. Mr. Speaker, the Committee on Appropriations was unanimous in asking for this rule. I see no objection to it. I have no desire to consume any of the time of the House.

Mr. Speaker, I yield back the remainder of my time.

Mr. BROWN of Ohio. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

H. R. 9910

Mr. VORYS. Mr. Speaker, I ask unanimous consent that the bill (H. R. 9910) to amend section 413 (b) of the Foreign Service Act of 1946, be stricken from the Union Calendar and recommitted to the Committee on Foreign Affairs.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. VORYS. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs may have until midnight tomorrow night to file a report on the bill H. R. 9910.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

COMMITTEE ON RULES

Mr. BROWN of Ohio. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file certain reports.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

CALL OF THE HOUSE

Mr. WAINWRIGHT. Mr. Speaker, I make a point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. ARENDS. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 106]

Angell	Heller	Philbin
Bailey	Hess	Powell
Barden	Kearney	Regan
Bentsen	Kersten, Wisc.	Richards
Boykin	Latham	Secrest
Brooks, La.	Long	Short
Brownson	Lucas	Sieminski
Buckley	Lyle	Sikes
Camp	McGregor	Simpson, Pa.
Curtis, Nebr.	McMillan	Sutton
Davis, Tenn.	Mailliard	Thompson, La.
Dingell	Miller, N. Y.	Thompson, Tex.
Dodd	Morrison	Weichel
Fallon	Norblad	Wheeler
Fisher	Osmers	Whitten
Fulton	Patman	Willis
Grant	Patten	
Harris	Perkins	

The SPEAKER. On this rollcall 380 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

SPECIAL ORDER GRANTED

Mrs. ROGERS of Massachusetts asked and was given permission to address the House for 10 minutes tomorrow, following the legislative program of the day and the conclusion of special orders heretofore entered.

HOUSING ACT OF 1954

Mr. WOLCOTT. Mr. Speaker, I call up the conference report on the bill (H. R. 7839) to aid in the provision and improvement of housing, the elimination and prevention of slums, and the conservation and development of urban communities—the so-called housing bill—and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2271)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7839) to aid in the provision and improvement of housing, the elimination and prevention of slums, and the conservation and development of urban communities, having met, after full and free conference, have

agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following: "That this Act may be cited as the 'Housing Act of 1954'.

"TITLE I—FEDERAL HOUSING ADMINISTRATION

"Amendments of title I of the National Housing Act

"SEC. 101. (a) Section 2 (a) of the National Housing Act, as amended, is hereby amended—

"(1) by striking out the period at the end of the second sentence and by inserting a colon and the following: *'Provided,* That with respect to any loan, advance of credit, or purchase made after the effective date of the Housing Act of 1954, the amount of any claim for loss on any such individual loan, advance of credit, or purchase paid by the Commissioner under the provisions of this section to a lending institution shall not exceed 90 per centum of such loss.'; and

"(2) by inserting at the end thereof the following:

"'After the effective date of the Housing Act of 1954, (i) the Commissioner shall not enter into contracts for insurance pursuant to this section except with lending institutions which are subject to the inspection and supervision of a governmental agency required by law to make periodic examinations of their books and accounts, and which the Commissioner finds to be qualified by experience or facilities to make and service such loans, advances or purchases, and with such other lending institutions which the Commissioner approves as eligible for insurance pursuant to this section on the basis of their credit and their experience or facilities to make and service such loans, advances or purchases; (ii) only such items as substantially protect or improve the basic livability or utility of properties shall be eligible for financing under this section, and therefore the Commissioner shall from time to time declare ineligible for financing under this section any item, product, alteration, repair, improvement, or class thereof which he determines would not substantially protect or improve the basic livability or utility of such properties, and he may also declare ineligible for financing under this section any item which he determines is especially subject to selling abuses; and (iii) the Commissioner is hereby authorized and directed, by such regulations or procedures as he shall deem advisable, to prevent the use of any financial assistance under this section (1) with respect to new residential structures that have not been completed and occupied for at least six months, or (2) which would, through multiple loans, result in an outstanding aggregate loan balance with respect to the same structure exceeding the dollar amount limitation prescribed in this subsection for the type of loan involved.'

"(b) As used in the amendments made by subsection (a) of this section 'effective date of the Housing Act of 1954' shall mean the first day after the first full calendar month following the date of approval of the Housing Act of 1954.

"SEC. 102. Section 2 (f) of said Act, as amended, is hereby amended by adding the following at the end thereof: 'The account heretofore established in connection with insurance operations under this section and identified in the accounting records of the Federal Housing Administration as the Title I Claims Account shall be terminated as of August 1, 1954, at which time all of the remaining assets of such account, together with deposits therein for the account of obligors, shall be transferred to and merged with the account established pursuant to this subsection. Moneys in the account established pursuant to this subsection not needed for the current operations of the Federal Housing Administration may be invested in bonds or other obligations of, or in bonds or other obligations guaranteed as to principal and interest by, the United States.'

"SEC. 103. Section 8 of said Act, as amended, is hereby amended by striking the period at the end of subsection (a) and inserting a colon and the following: *'And provided further,* That no mortgage shall be insured under this section after the effective date of the Housing Act of 1954, except pursuant to a commitment to insure issued on or before such date.'

"Amendments of title II of National Housing Act

"SEC. 104. Section 203 (b) (2) of said Act, as amended, is hereby amended to read as follows:

"'(2) Involve a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Commissioner shall approve) in an amount not to exceed $20,000 in the case of property upon which there is located a dwelling designed principally (whether or not it may be intended to be rented temporarily for school purposes) for a one- or two-family residence; or $27,500 in the case of a three-family residence; or $35,000 in the case of a four-family residence; and not to exceed an amount equal to the sum of (i) 95 per centum (but, in any case where the dwelling is not approved for mortgage insurance prior to the beginning of construction, 90 per centum) of $9,000 of the appraised value (as of the date the mortgage is accepted for insurance), and (ii) 75 per centum of such value in excess of $9,000, except that the President may increase such dollar amounts up to not to exceed $10,000 if, after taking into consideration the general effect of such higher dollar amounts upon conditions in the building industry and upon the national economy, he determines such action to be in the public interest: *Provided,* That if the mortgagor is not the occupant of the property the principal obligation of the mortgage shall not exceed an amount equal to 85 per centum of the amount computed under the foregoing provisions of this paragraph (2): *Provided further,* That the mortgagor shall have paid on account of the property at least 5 per centum (or such larger amount as the Commissioner may determine) of the Commissioner's estimate of the cost of acquisition in cash or its equivalent.'

"SEC. 105. Section 203 (b) (3) of said Act, as amended, is hereby amended to read as follows:

"'(3) Have a maturity satisfactory to the Commissioner, but not to exceed, in any event, thirty years from the date of the insurance of the mortgage or three-quarters of the Commissioner's estimate of the remaining economic life of the building improvements, whichever is the lesser.'

"SEC. 106. Section 203 (b) (5) of said Act, as amended, is hereby amended to read as follows:

"'(5) Bear interest (exclusive of premium charges for insurance, and service charges if any) at not to exceed 5 per centum per annum on the amount of the principal obligation outstanding at any time, or not to exceed such per centum per annum not in excess of 6 per centum as the Commissioner finds necessary to meet the mortgage market.'

"SEC. 107. Section 203 (c) of said Act, as amended, is amended by striking out of the second sentence the word *'Provided'* and inserting: *'Provided,* That debentures presented in payment of premium charges shall represent obligations of the particular insurance fund to which such premium charges are to be credited: *Provided further'.*

"SEC. 108. Section 203 (d) of said Act, as amended, is hereby amended by striking the period at the end thereof and inserting a colon and the following: *'And provided further,* That no mortgage shall be insured pursuant to this subsection after the effective date of the Housing Act of 1954, except pursuant to a commitment to insure issued on or before such date.'

"SEC. 109. Subsections (f) and (g) of section 203 of said Act, as amended, are hereby repealed.

"SEC. 110. Section 203 of said Act, as amended, is hereby further amended by adding the following new subsections at the end thereof:

"'(h) Notwithstanding any other provision of this section, the Commissioner is authorized to insure any mortgage which involves a principal obligation not in excess of $7,000 and not in excess of 100 per centum of the appraised value of a property upon which there is located a dwelling designed principally for a single-family residence, where the mortgagor is the owner and occupant and establishes (to the satisfaction of the Commissioner) that his home which he occupied as an owner or as a tenant was destroyed or damaged to such an extent that reconstruction is required as a result of a flood, fire, hurricane, earthquake, storm, or other catastrophe which the President, pursuant to section 2 (a) of the Act entitled "An Act to authorize Federal assistance to States and local governments in major disasters and for other purposes" (Public Law 875, Eighty-first Congress, approved September 30, 1950), as amended, has determined to be a major disaster.

"'(i) Notwithstanding any other provision of this section, the Commissioner is authorized to insure any mortgage which involves a principal obligation not in excess of $6,650 and not in excess of 95 per centum of the appraised value, as of the date the mortgage is accepted for insurance, of a property in an area where the Commissioner finds it is not practicable to obtain conformity with many of the requirements essential to the insurance of mortgages on housing in built-up urban areas, upon which there is located a dwelling designed principally for a single family residence, and which is approved for mortgage insurance prior to the beginning of construction: *Provided,* That (1) the mortgagor shall be the owner and occupant of the property at the time of insurance and shall have paid on account of the property at least 5 per centum of the Commissioner's estimate of the cost of acquisition in cash or its equivalent, or (2) the mortgagor shall be the owner and occupant of the property at the time of insurance, regardless of his credit standing, with whom a person or corporation having a credit standing satisfactory to the Commissioner, shall have entered into a written contract (a) to pay on behalf of the prospective owner and occupant all or part of the downpayment required by this paragraph agreeing to take as security a note from the latter bearing interest at the rate of not more than 4 per centum per annum, maturing after the last maturity date of principal due on the insured mortgage, with a right in the holder to accelerate maturity to a date following prepayment of the entire mortgage debt, under the terms of which note all rights of such person or corporation are subordinated to the rights of the mortgagee or assignees of the mortgagee, and (b) to guarantee payment of the insured mortgage by the owner and occupant according to the terms of the mortgage, or (3) shall be the builder constructing the dwelling; in which case the principal obligation shall not exceed 85 per centum of the appraised value of the property or $5,950: *Provided further,* That the Commissioner finds that the project with respect to which the mortgage is executed is an acceptable risk, giving consideration to the need for providing adequate housing for families of low and moderate income particularly in

suburban and outlying areas or small communities: *Provided further,* That under the foregoing provisions of this subsection the Commissioner is authorized to insure any mortgage issued with respect to the construction of a farm home on a plot of land five or more acres in size adjacent to a public highway, the total amount of insurance outstanding at any one time under this proviso not to exceed $100,000,000.'

"SEC. 111. Section 204 (a) of said Act, as amended, is hereby amended—

"(1) by striking out of the third sentence the words 'any mortgage insurance premiums paid after either of such dates' and inserting 'any mortgage insurance premiums paid after either of such dates, and any tax imposed by the United States upon any deed or other instrument by which said property was acquired by the mortgagee and transferred or conveyed to the Commissioner';

"(2) by striking out of the second proviso the words 'or under section 213 of this Act,' and inserting the following: 'or under section 213 of this Act, or with respect to any mortgage accepted for insurance under section 203 on or after the effective date of the Housing Act of 1954,'; and

"(3) by striking the period at the end thereof and inserting a colon and the following: *'And provided further,* That, notwithstanding any requirement contained in this Act that debentures may be issued only upon acquisition of title and possession by the mortgagee and its subsequent conveyance and transfer to the Commissioner, and for the purpose of avoiding unnecessary conveyance expense in connection with payment of insurance benefits under the provisions of this Act, the Commissioner is authorized, subject to such rules and regulations as he may prescribe, to permit the mortgagee to tender to the Commissioner a satisfactory conveyance of title and transfer of possession direct from the mortgagor or other appropriate grantor and to pay the insurance benefits to the mortgagee which it would otherwise be entitled to if such conveyance had been made to the mortgagee and from the mortgagee to the Commissioner'.

"SEC. 112. (a) Section 204 (d) of said Act as amended, is hereby amended by striking out of the second sentence thereof the words 'three years after the 1st day of July following the maturity date of the mortgage on the property in exchange for which the debentures were issued, except that debentures issued with respect to mortgages insured under section 213 shall mature twenty years after the date of such debentures' and inserting 'twenty years after the date thereof'.

"(b) Section 207 (1) of said Act, as amended, is hereby amended by striking out of the second sentence thereof 'ten' and inserting 'twenty'.

"(c) Section 803 (f) of said Act, as amended, is hereby amended by striking out of the second sentence thereof 'ten' and inserting 'twenty'.

"(d) Section 904 (d) of said Act, as amended, is hereby amended by striking out of the third sentence thereof the word 'ten' and inserting 'twenty'.

"(e) This section shall not apply in any case where the mortgage involved was insured or the commitment for such insurance was issued prior to the effective date of the Housing Act of 1954.

"SEC. 113. Section 204 of said Act, as amended, is hereby amended by adding at the end thereof the following new subsection:

"'(j) In the event that any mortgagee under a mortgage insured under section 203 forecloses on the mortgaged property but does not convey such property to the Commissioner in accordance with this section, and the Commissioner is given written notice thereof, or in the event that the mortgagor pays the obligation under the mortgage in full prior to the maturity thereof, and the mortgagee pays any adjusted premium charge required under the provisions of section 203 (c), and the Commissioner is given written notice by the mortgagee of the payment of such obligation, the obligation to pay any subsequent premium charge for insurance shall cease, and all rights of the mortgagee and the mortgagor under this section shall terminate as of the date of such notice.'

"SEC. 114. Section 205 of said Act, as amended, is hereby amended to read as follows:

"'SEC. 205. (a) The Commissioner shall establish as of July 1, 1954, in the Mutual Mortgage Insurance Fund a General Surplus Account and a Participating Reserve Account. All of the assets of the General Reinsurance Account shall be transferred to the General Surplus Account whereupon the General Reinsurance Account shall be abolished. There shall be transferred from the various group accounts to the Participating Reserve Account as of July 1, 1954, an amount equal to the aggregate amount which would have been distributed under the provisions of section 205 in effect on June 30, 1954, if all outstanding mortgages in such group accounts had been paid in full on said date. All of the remaining balances of said group accounts shall as of said date be transferred to the General Surplus Account whereupon all of said group accounts shall be abolished.

"'(b) The aggregate net income thereafter received or any net loss therafter sustained by the Mutual Mortgage Insurance Fund in any semiannual period shall be credited or charged to the General Surplus Account and/or the Participating Reserve Account in such manner and amounts as the Commissioner may determine to be in accord with sound actuarial and accounting practice.

"'(c) Upon termination of the insurance obligation of the Mutual Mortgage Insurance Fund by payment of any mortgage insured thereunder, the Commissioner is authorized to distribute to the mortgagor a share of the Participating Reserve Account in such manner and amount as the Commissioner shall determine to be equitable and in accordance with sound actuarial and accounting practice: *Provided,* That, in no event, shall any such distributable share exceed the aggregate scheduled annual premiums of the mortgagor to the year of termination of the insurance.

"'(d) No mortgagor or mortgagee of any mortgage insured under section 203 shall have any vested right in a credit balance in any such account or be subject to any liability arising out of the mutuality of the Fund and the determination of the Commissioner as to the amount to be paid by him to any mortgagor shall be final and conclusive.'

"SEC. 115. Section 207 (c) of said Act, as amended, is hereby amended—

"(1) by inserting before the semicolon at the end of paragraph numbered (2) a colon and the following: *'And provided further,* That nothing contained in this section shall preclude the insurance of mortgages covering existing construction located in slum or blighted areas, as defined in paragraph numbered (5) of subsection (a) of this section, and the Commissioner may require such repair or rehabilitation work to be completed as is, in his discretion, necessary to remove conditions detrimental to safety, health, or morals';

"(2) by striking out the word 'Alaska,' in paragraph numbered (2) and inserting 'Alaska, or in Guam,'; and

"(3) by striking out paragraph numbered (3) and inserting the following:

"'(3) not to exceed, for such part of such property or project as may be attributable to dwelling use, $2,000 per room (or $7,200 per family unit if the number of rooms in such property or project is less than four per family unit): *Provided,* That as to projects to consist of elevator type structures, the Commissioner may, in his discretion, increase the dollar amount limitation of $2,000 per room to not to exceed $2,400 per room and the dollar amount limitation of $7,200 per family unit to not to exceed $7,500 per family unit, as the case may be, to compensate for the higher costs incident to the construction of elevator type structures of sound standards of construction and design.'

"SEC. 116. Section 207 (d) of said Act, as amended, is hereby amended by inserting the words 'of the Housing Insurance Fund' between the words 'debentures' and 'issued' in the first sentence of such section.

"SEC. 117. Section 207 (h) of said Act, as amended, is hereby amended by striking out the period at the end of the first sentence and adding the following: 'and a reasonable amount for necessary expenses incurred by the mortgagee in connection with the foreclosure proceedings, or the acquisition of the mortgaged property otherwise, and the conveyance thereof to the Commissioner.'

"SEC. 118. Section 212 (a) of said Act, as amended, is hereby amended by inserting at the end thereof the following new sentence: 'The provisions of this section shall also apply to the insurance of any mortgage under section 220 which covers property on which there is located a dwelling or dwellings designed principally for residential use for twelve or more families.'

"SEC. 119. (a) Section 213 (b) of said Act, as amended, is hereby amended by striking clauses (1) and (2) and inserting:

"'(1) not to exceed $5,000,000, or not to exceed $25,000,000 if the mortgage is executed by a mortgagor regulated or supervised under Federal or State laws or by political subdivisions of States or agencies thereof, as to rents, charges, and methods of operations; and

"'(2) not to exceed, for such part of such property or project as may be attributable to dwelling use, $2,250 per room (or $8,100 per family unit if the number of rooms in such property or project is less than four per family unit), and not to exceed 90 per centum of the estimated value of the property or project when the proposed physical improvements are completed: *Provided,* That if at least 65 per centum of the membership of the corporation or number of beneficiaries of the trust consists of veterans, the mortgage may involve a principal obligation not to exceed $2,375 per room (or $8,550 per family unit if the number of rooms in such property or project is less than four per family unit), and not to exceed 95 per centum of the estimated value of the property or project when the proposed physical improvements are completed: *Provided further,* That as to projects which consist of elevator type structures, and to compensate for the higher costs incident to the construction of elevator type structures of sound standards of construction and design, the Commissioner may, in his discretion, increase the aforesaid dollar amount limitations per room or per family unit (as may be applicable to the particular case) within the following limits: (i) $2,250 per room to not to exceed $2,700; (ii) $2,375 per room to not to exceed $2,850; (iii) $8,100 per family unit to not to exceed $8,400; and (iv) $8,550 per family unit to not to exceed $8,900: *And provided further,* That for the purposes of this section the word 'veteran' shall mean a person who has served in the active military or naval service of the United States at any time on or after September 16, 1940, and prior to July 26, 1947, or on or after June 27, 1950, and prior to such date thereafter as shall be determined by the President.'

"(b) Section 213 (c) of said Act, as amended, is hereby amended by striking from clause (1) 'paragraph (A), paragraph (C), or paragraph (D) of'.

"SEC. 120. Section 213 (f) of said Act, as amended, is hereby amended by striking the last sentence thereof.

"SEC. 121. Section 217 of said Act, as amended, is hereby amended to read as follows:

"'SEC. 217. Notwithstanding limitations contained in any other section of this Act on

the aggregate amount of principal obligations of mortgages or loans which may be insured (or insured and outstanding at any one time), the aggregate amount of principal obligations of all mortgages which may be insured and outstanding at any one time under insurance contracts or commitments to insure pursuant to any section or title of this Act (except section 2) shall not exceed the sum of (a) the outstanding principal balances, as of July 1, 1954, of all insured mortgages (as estimated by the Commissioner based on scheduled amortization payments without taking into account prepayments or delinquencies), (b) the principal amount of all outstanding commitments to insure on that date, and (c) $1,500,000,000, except that with the approval of the President such aggregate amount may be increased by not to exceed $500,000,000.

"'It is the intent and purpose of this section to consolidate and merge all existing mortgage insurance authorizations or existing limitations with respect to any section or title of this Act (except section 2) into one general insurance authorization to take the place of all existing authorizations or limitations.'

"SEC. 122. Section 219 of said Act, as amended, is hereby amended by striking out the words 'or the Defense Housing Insurance Fund,' and inserting 'the Defense Housing Insurance Fund, or the Section 220 Housing Insurance Fund,'.

"SEC. 123. Title II of said Act, as amended, is hereby amended by adding at the end thereof the following new sections:

"'*Rehabilitation and neighborhood conservation housing insurance*

"'SEC. 220. (a) The purpose of this section is to aid in the elimination of slums and blighted conditions and the prevention of the deterioration of residential property by supplementing the insurance of mortgages under sections 203 and 207 of this title with a system of mortgage insurance designed to assist the financing required for the rehabilitation of existing dwelling accommodations and the construction of new dwelling accommodations where such dwelling accommodations are located in an area referred to in paragraph (1) of subsection (d) of this section.

"'(b) The Commissioner is authorized, upon application by the mortgagee, to insure, as hereinafter provided, any mortgage (including advances during construction on mortgages covering property of the character described in paragraph (3) (B) of subsection (d) of this section) which is eligible for insurance as hereinafter provided, and, upon such terms and conditions as he may prescribe, to make commitments for the insurance of such mortgages prior to the date of their execution or disbursement thereon.

"'(c) As used in this section, the terms "mortgage", "first mortgage", "mortgagee", "mortgagor", "maturity date", and "State" shall have the same meaning as in section 201 of this Act.

"'(d) To be eligible for insurance under this section a mortgage shall meet the following conditions:

"'(1) The mortgaged property shall—

"'(A) be located in (i) the area of a slum clearance and urban redevelopment project covered by a Federal-aid contract executed, or a prior approval granted, pursuant to title I of the Housing Act of 1949, as amended, before the effective date of the Housing Act of 1954, or (ii) an urban renewal area (as defined in title I of the Housing Act of 1949, as amended) in a community respecting which the Housing and Home Finance Administrator has made the certification to the Commissioner provided for by subsection 101 (c) of the Housing Act of 1949, as amended: *Provided*, That a redevelopment plan or an urban renewal plan (as defined in title I of the Housing Act of 1949, as amended), as the case may be, has been approved for such area by the governing body of the locality involved and by the Housing and Home Finance Administrator, and said Administrator has certified to the Commissioner that such plan conforms to a general plan for the locality as a whole and that there exist the necessary authority and financial capacity to assure the completion of such redevelopment or urban renewal plan, and

"'(B) meet such standards and conditions as the Commissioner shall prescribe to establish the acceptability of such property for mortgage insurance under this section.

"'(2) The mortgaged property shall be held by—

"'(A) a mortgagor approved by the Commissioner, and the Commissioner may in his discretion require such mortgagor to be regulated or restricted as to rents or sales, charges, capital structure, rate of return and methods of operation, and for such purpose the Commissioner may make such contracts with and acquire for not to exceed $100 stock or interest in any such mortgagor as the Commissioner may deem necessary to render effective such restriction or regulations. Such stock or interest shall be paid for out of the Section 220 Housing Insurance Fund and shall be redeemed by the mortgagor at par upon the termination of all obligations of the Commissioner under the insurance; or

"'(B) by Federal or State instrumentalities, municipal corporate instrumentalities of one or more States, or limited dividend or redevelopment or housing corporations restricted by Federal or State laws or regulations of State banking or insurance departments as to rents, charges, capital structure, rate of return, or methods of operation.

"'(3) The mortgage shall involve a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Commissioner shall approve) in an amount—

"'(A) not to exceed $20,000 in the case of property upon which there is located a dwelling designed principally for a one- or two-family residence; or $27,500 in the case of a three-family residence; or $35,000 in the case of a four-family residence; or in the case of a dwelling designed principally for residential use for more than four families (but not exceeding such additional number of family units as the Commissioner may prescribe) $35,000 plus not to exceed $7,000 for each additional family unit in excess of four located on such property; and not to exceed an amount equal to the sum of (i) 95 per centum (but, in any case where the dwelling is not approved for mortgage insurance prior to the beginning of construction, 90 per centum) of $9,000 of the appraised value (as of the date the mortgage is accepted for insurance), and (ii) 75 per centum of such value in excess of $9,000, except that the President may increase such dollar amounts up to not to exceed $10,000 if, after taking into consideration the general effect of such higher dollar amounts upon conditions in the building industry and upon the national economy, he determines such action to be in the public interest: *Provided*, That if the mortgagor is not the occupant of the property the principal obligation of the mortgage shall not exceed an amount equal to 85 per centum of the amount computed under the foregoing provisions of this paragraph (A); or

"'(B) (i) not to exceed $5,000,000, or, if executed by a mortgagor coming within the provisions of paragraph (2) (B) of this subsection (d), not to exceed $50,000,000; and

"'(ii) not to exceed 90 per centum of the estimated value of the property or project when the proposed improvements are completed (the value of the property or project may include the land, the proposed physical improvements, utilities within the boundaries of the property or project, architect's fees, taxes, and interest during construction, and other miscellaneous charges incident to construction and approved by the Commissioner); and

"'(iii) not to exceed, for such part of such property or project as may be attributable to dwelling use, $2,250 per room (or $8,100 per family unit if the number of rooms in such property or project is less than four per family unit): *Provided*, That as to projects to consist of elevator-type structures, the Commissioner may, in his discretion, increase the dollar amount limitation of $2,250 per room to not to exceed $2,700 per room and the dollar amount limitation of $8,100 per family unit to not to exceed $8,400 per family unit, as the case may be, to compensate for the higher costs incident to the construction of elevator-type structures of sound standards of construction and design, except that the Commissioner may, by regulation, increase the foregoing limits by not to exceed $1,000 per room in any geographical area where he finds that cost levels so require: *And provided further*, That nothing contained in this paragraph (B) shall preclude the insurance of mortgages covering existing multifamily dwellings to be rehabilitated or reconstructed for the purposes set forth in subsection (a) of this section.

"'(4) The mortgage shall provide for complete amortization by periodic payments within such terms as the Commissioner may prescribe, but as to mortgages coming within the provisions of paragraph (3) (A) of this subsection (d) not to exceed the maximum maturity prescribed by the provisions of section 203 (b) (3). The mortgage shall bear interest (exclusive of premium charges for insurance and service charge, if any) at not to exceed 5 per centum per annum on the amount of the principal obligation outstanding at any time, or not to exceed such per centum per annum not in excess of 6 per centum as the Commissioner finds necessary to meet the mortgage market; contain such terms and provisions with respect to the application of the mortgagor's periodic payment to amortization of the principal of the mortgage, insurance, repairs, alterations, payment of taxes, default reserves, delinquency charges, foreclosure proceedings, anticipation of maturity, additional and secondary liens, and other matters as the Commissioner may in his discretion prescribe.

"'(e) The Commissioner may at any time, under such terms and conditions as he may prescribe, consent to the release of the mortgagor from his liability under the mortgage or the credit instrument secured thereby, or consent to the release of parts of the mortgaged property from the lien of the mortgage.

"'(f) The mortgagee shall be entitled to receive the benefits of the insurance as hereinafter provided—

"'(1) as to mortgages meeting the requirements of paragraph (3) (A) of subsection (d) of this section, as provided in section 204 (a) of this Act with respect to mortgages insured under section 203; and the provisions of subsections (b), (c), (d), (e), (f), (g), and (h) of section 204 of this Act shall be applicable to such mortgages insured under this section, except that all references therein to the Mutual Mortgage Insurance Fund or the Fund shall be construed to refer to the Section 220 Housing Insurance Fund and all references therein to section 203 shall be construed to refer to this section; or

"'(2) as to mortgages meeting the requirements of paragraph (3) (B) of subsection (d) of this section, as provided in section 207 (g) of this Act with respect to mortgages insured under said section 207, and the provisions of subsections (h), (i) (j), (k), and (l) of section 207 of this Act shall be applicable to such mortgages insured under this section, and all references therein to the Housing Insurance Fund or the Housing Fund shall be construed to refer to the Section 220 Housing Insurance Fund.

"'(g) There is hereby created a Section 220 Housing Insurance Fund which shall be used by the Commissioner as a revolving fund for carrying out the provisions of this section, and the Commissioner is hereby authorized to transfer to such Fund the sum of $1,000,000 from the War Housing Insurance Fund established pursuant to the provisions of section 602 of this Act. General expenses of operation of the Federal Housing Administration under this section may be charged to the Section 220 Housing Insurance Fund.

"'Moneys in the Section 220 Housing Insurance Fund not needed for the current operations of the Federal Housing Administration under this section shall be deposited with the Treasurer of the United States to the credit of such Fund, or invested in bonds or other obligations of, or in bonds or other obligations guaranteed as to principal and interest by, the United States. The Commissioner may, with the approval of the Secretary of the Treasury, purchase in the open market debentures issued under the provisions of this section. Such purchases shall be made at a price which will provide an investment yield of not less than the yield obtainable from other investments authorized by this section. Debentures so purchased shall be canceled and not reissued.

"'Premium charges, adjusted premium charges, and appraisal and other fees received on account of the insurance of any mortgage accepted for insurance under this section, the receipts derived from the property covered by such mortgage and claims assigned to the Commissioner in connection therewith shall be credited to the Section 220 Housing Insurance Fund. The principal of, and interest paid and to be paid on, debentures issued under this section, cash adjustments, and expenses incurred in the handling, management, renovation, and disposal of properties acquired under this section shall be charged to such Fund.

"'SEC. 221. (a) This section is designed to supplement systems of mortgage insurance under other provisions of the National Housing Act in order to assist in relocating families to be displaced as the result of governmental action in a community respecting which (1) the Housing and Home Finance Administrator has made the certification to the Commissioner provided for by subsection 101 (c) of the Housing Act of 1949, as amended, or (2) there is being carried out a project covered by a Federal aid contract executed, or prior approval granted, by the Housing and Home Finance Administrator under title I of the Housing Act of 1949, as amended, before the effective date of the Housing Act of 1954. Mortgage insurance under this section shall be available only in those localities or communities which shall have requested such mortgage insurance to be provided: *Provided*, That the Commissioner shall prescribe such procedures as in his judgment are necessary to secure to the families to be so displaced, referred to above, a preference or priority of opportunity to purchase or rent such dwelling units: *Provided further*, That the total number of dwelling units in properties covered by mortgage insurance under this section in any such community shall not exceed the aggregate number of such dwelling units which the Housing and Home Finance Administrator, from time to time, certifies to the Commissioner to be needed for the relocation of families to be so displaced and who would be eligible to rent or purchase dwelling accommodations in properties covered by mortgage insurance authorized by this section: *Provided further*, That, with respect to any community referred to in clause (1) of this subsection, said Administrator shall not certify any dwelling units during any period when, in his opinion, the locality fails to carry out the workable program upon which said Administrator based the certification to the Commissioner that mortgage insurance under this section may be made available in such community: *And provided further*, That with respect to any community referred to in clause (2) of this subsection (but not clause (1) thereof), the number of dwelling units certified by said Administrator shall not exceed the number which he estimates to be needed for the relocation of such displaced families during the period when the project referred to in said clause (2) is being carried out.

"'(b) The Commissioner is authorized, upon application by the mortgagee, to insure under this section as hereinafter provided any mortgage which is eligible for insurance as provided herein and, upon such terms and conditions as the Commissioner may prescribe, to make commitments for the insurance of such mortgages prior to the date of their execution or disbursement thereon.

"'(c) As used in this section, the terms "mortgage," "first mortgage," "mortgagee," "mortgagor," "maturity date" and "State" shall have the same meaning as in section 201 of this Act.

"'(d) To be eligible for insurance under this section, a mortgage shall—

"'(1) have been made to and be held by a mortgagee approved by the Commissioner as responsible and able to service the mortgage properly;

"'(2) involve a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Commissioner shall approve) in an amount not to exceed $7,600, except that the Commissioner may by regulation increase this amount to not to exceed $8,600 in any geographical area where he finds that cost levels so require, and not to exceed 95 per centum of the appraised value (as of the date the mortgage is accepted for insurance) of a property, upon which there is located a dwelling designed principally for a single-family residence: *Provided*, That the mortgagor shall be the owner and occupant of the property at the time of the insurance and shall have paid on account of the property at least 5 per centum of the Commissioner's estimate of the cost of acquisition in cash or its equivalent: *Provided further*, That nothing contained herein shall preclude the Commissioner from issuing a commitment to insure and insuring a mortgage pursuant thereto where the mortgagor is not the owner and occupant and the property is to be built or acquired and repaired or rehabilitated for sale and the insured mortgage financing is required to facilitate the construction or the repair or rehabilitation of the dwelling and provide financing pending the subsequent sale thereof to a qualified owner-occupant, and in such instances the mortgage shall not exceed 85 per centum of the appraised value; or

"'(3) if executed by a mortgagor which is a private nonprofit corporation or association or other acceptable private nonprofit organization, regulated or supervised under Federal or State laws or by political subdivisions of States or agencies thereof, as to rents, charges, and methods of operation, in such form and in such manner as, in the opinion of the Commissioner, will effectuate the purposes of this section, the mortgage may involve a principal obligation not in excess of $5,000,000; and not in excess of $7,600 per family unit for such part of such property or project as may be attributable to dwelling use, except that the Commissioner may by regulation increase this amount to not to exceed $8,600 in any geographical area where he finds that cost levels so require, and not in excess of 95 per centum of the Commissioner's estimate of the value of the property or project when constructed, or repaired and rehabilitated, for use as rental accommodations for ten or more families eligible for occupancy as provided in this section; and

"'(4) provide for complete amortization by periodic payments within such terms as the Commissioner may prescribe, but not to exceed thirty years from the date of insurance of the mortgage or three-quarters of the Commissioner's estimate of the remaining economic life of the building improvements, whichever is the lesser; bear interest (exclusive of premium charges for insurance and service charge, if any) at not to exceed 5 per centum per annum on the amount of the principal obligation outstanding at any time, or not to exceed such per centum per annum not in excess of 6 per centum as the Commissioner finds necessary to meet the mortgage market; and contain such terms and provisions with respect to the application of the mortgagor's periodic payment to amortization of the principal of the mortgage, insurance, repairs, alterations, payment of taxes, default reserves, delinquency charges, foreclosure proceedings, anticipation of maturity, additional and secondary liens, and other matters as the Commissioner may in his discretion prescribe.

"'(e) The Commissioner may at any time, under such terms and conditions as he may prescribe, consent to the release of the mortgagor from his liability under the mortgage or the credit instrument secured thereby, or consent to the release of parts of the mortgaged property from the lien of the mortgage.

"'(f) The property or project shall comply with such standards and conditions as the Commissioner may prescribe to establish the acceptability of such property for mortgage insurance.

"'(g) The mortgagee shall be entitled to receive the benefits of the insurance as hereinafter provided—

"'(1) as to mortgages meeting the requirements of paragraph (2) of subsection (d) of this section, as provided in section 204 (a) of this Act with respect to mortgages insured under section 203, and the provisions of subsections (b), (c), (d), (e), (f), (g), and (h) of section 204 of this Act shall be applicable to such mortgages insured under this section, except that all references therein to the Mutual Mortgage Insurance Fund or the Fund shall be construed to refer to the Section 221 Housing Insurance Fund and all references therein to section 203 shall be construed to refer to this section; or

"'(2) as to mortgages meeting the requirements of paragraph (3) of subsection (d) of this section, as provided in section 207 (g) of this Act with respect to mortgages insured under said section 207, and the provisions of subsections (h), (i), (j), (k), and (l) of section 207 of this Act shall be applicable to such mortgages insured under this section, and all references therein to the Housing Insurance Fund or the Housing Fund shall be construed to refer to the Section 221 Housing Insurance Fund; or

"'(3) in the event any mortgage insured under this section is not in default at the expiration of twenty years from the date the mortgage was endorsed for insurance, the mortgagee shall, within a period thereafter to be determined by the Commissioner, have the option to assign, transfer, and deliver to the Commissioner the original credit instrument and the mortgage securing the same and receive the benefits of the insurance as hereinafter provided in this paragraph, upon compliance with such requirements and conditions as to the validity of the mortgage as a first lien and such other matters as may be prescribed by the Commissioner at the time the loan is endorsed for insurance. Upon such assignment, transfer, and delivery the obligation of the mortgagee to pay the premium charges for insurance shall cease, and the Commissioner shall, subject to the cash adjustment provided herein, issue to the mortgagee debentures having a total face value equal to the amount of the original principal obligation of the mortgage which was unpaid on the date of the assignment, plus accrued interest to such date. Debentures issued pursuant to this paragraph (3)

shall be issued in the same manner and subject to the same terms and conditions as debentures issued under paragraph (1) of this subsection, except that the debentures issued pursuant to this paragraph (3) shall be dated as of the date the mortgage is assigned to the Commissioner, and shall bear interest from such date at the going Federal rate determined at the time of issuance. The term "going Federal rate" as used herein means the annual rate of interest which the Secretary of the Treasury shall specify as applicable to the six-month period (consisting of January through June or July through December) which includes the issuance date of such debentures, which applicable rate for each such six-month period shall be determined by the Secretary of the Treasury by estimating the average yield to maturity, on the basis of daily closing market bid quotations or prices during the month of May or the month of November, as the case may be, next preceding such six-month period, on all outstanding marketable obligations of the United States having a maturity date of eight to twelve years from the first day of such month of May or November (or, if no such obligations are outstanding, the obligation next shorter than eight years and the obligation next longer than twelve years, respectively, shall be used), and by adjusting such estimated average annual yield to the nearest one-eighth of 1 per centum. The Commissioner shall have the same authority with respect to mortgages assigned to him under this paragraph as contained in section 207 (k) and section 207 (l) as to mortgages insured by the Commissioner and assigned to him under section 207 of this Act.

"'(h) There is hereby created a Section 221 Housing Insurance Fund which shall be used by the Commissioner as a revolving fund for carrying out the provisions of this section, and the Commissioner is hereby authorized to transfer to such Fund the sum of $1,000,000 from the War Housing Insurance Fund established pursuant to the provisions of section 602 of this Act. General expenses of operation of the Federal Housing Administration under this section may be charged to the Section 221 Housing Insurance Fund.

"'Moneys in the Section 221 Housing Insurance Fund not needed for the current operations of the Federal Housing Administration under this section shall be deposited with the Treasurer of the United States to the credit of such Fund, or invested in bonds or other obligations of, or in bonds or other obligations guaranteed as to principal and interest by, the United States. The Commissioner may, with the approval of the Secretary of the Treasury, purchase in the open market debentures issued under the provisions of this section. Such purchases shall be made at a price which will provide an investment yield of not less than the yield obtainable from other investments authorized by this section. Debentures so purchased shall be canceled and not reissued.

"'Premium charges, adjusted premium charges, and appraisal and other fees received on account of the insurance of any mortgage accepted for insurance under this section, the receipts derived from the property covered by such mortgage and claims assigned to the Commissioner in connection therewith shall be credited to the Section 221 Housing Insurance Fund. The principal of, and interest paid and to be paid on, debentures issued under this section, cash adjustments, and expenses incurred in the handling, management, renovation, and disposal of properties acquired under this section shall be charged to such Fund.'

"SEC. 124. Title II of said Act, as amended, is further amended by adding at the end thereof the following new section:

"'*Mortgage insurance for servicemen*

"'SEC. 222. (a) The purpose of this section is to aid in the provision of housing accommodations for servicemen in the Armed Forces of the United States and their families, and servicemen in the United States Coast Guard and their families, by supplementing the insurance of mortgages under section 203 of this title with a system of mortgage insurance specially designed to assist the financing required for the construction or purchase of dwellings by those persons. As used in this section, a "serviceman" means a person to whom the Secretary of Defense (or any officer or employee designated by him), or the Secretary of the Treasury (or any officer or employee designated by him), as the case may be, has issued a certificate hereunder indicating that such person requires housing, is serving on active duty in the Armed Forces of the United States or in the United States Coast Guard and has served on active duty for more than two years, but a certificate shall not be issued hereunder to any person ordered to active duty for training purposes only. The Secretary of Defense and the Secretary of the Treasury, respectively, are authorized to prescribe rules and regulations governing the issuance of such certificates and may withhold issuance of more than one such certificate to a serviceman whenever in his discretion issuance is not justified due to circumstances resulting from military assignment, or, in the case of the United States Coast Guard, other assignment.

"'(b) In addition to mortgages insured under section 203, the Commissioner may, for the purpose of this section, insure any mortgage under this section which would be eligible for insurance under section 203, except that as to mortgages so insured the maximum ratio of loan to value may, in the discretion of the Commissioner, exceed the maximum ratio of loan to value prescribed in section 203 but not to exceed in any event 95 per centum of the appraised value of the property and not to exceed $17,100: *Provided*, That a mortgage insured under this section shall have been executed by a mortgagor who is a serviceman and who, at the time of insurance, is the owner of the property and either occupies the property or certifies that his failure to do so is the result of his military assignment, or, in the case of the United States Coast Guard, other assignment.

"'(c) The Commissioner may prescribe the manner in which a mortgage may be accepted for insurance under this section. Premiums fixed by the Commissioner under section 203 with respect to, or payable during, the period of ownership by a serviceman of the property involved shall not be payable by the mortgagee but shall be paid not less frequently than once each year, upon request of the Commissioner to the Secretary of Defense or the Secretary of the Treasury, as the case may be, from the respective appropriations available for pay and allowances of persons eligible for mortgage insurance under this section. As used herein, "the period of ownership by a serviceman" means the period, for which premiums are fixed, prior to the date that the Secretary of Defense (or any officer or employee or other person designated by him) or the Secretary of the Treasury (or any officer or employee or other person designated by him), as the case may be, furnishes the Commissioner with a certification that such ownership (as defined by the Commissioner) has terminated.

"'(d) Any mortgagee under a mortgage insured under this section is entitled to the benefits of the insurance as provided in section 204 (a) with respect to mortgages insured under section 203.

"'(e) The provisions of subsections (b), (c), (d), (e), (f), (g), and (h) of section 204 shall apply to mortgages insured under this section, except that as applied to those mortgages (1) all references to the "Fund", or "Mutual Mortgage Insurance Fund", shall refer to the "Servicemen's Mortgage Insurance Fund", and (2) all references to "section 203" shall refer to this section.

"'(f) There is hereby created a Servicemen's Mortgage Insurance Fund to be used by the Commissioner as a revolving fund to carry out the provisions of this section, and the Commissioner is directed to transfer the sum of $1,000,000 to such Fund from the War Housing Insurance Fund created by section 602 of this Act. Any premium charges, adjusted premium charges, and appraisal and other fees received on account of the insurance of any mortgage accepted for insurance under this section, the receipts derived from the property covered by such mortgage and claims assigned to the Commissioner in connection therewith shall be credited to the Servicemen's Mortgage Insurance Fund. The principal of, and interest paid and to be paid on, debentures issued under this section, and cash adjustments and expenses incurred in the handling, management, renovation, and disposal of properties acquired under this section shall be charged to the Servicemen's Mortgage Insurance Fund. General expenses of operation of the Federal Housing Administration incurred under this section may be charged to the Servicemen's Mortgage Insurance Fund. Moneys in that Fund not needed for the current operation of the Federal Housing Administration under this section shall be deposited with the Treasurer of the United States to the credit of that Fund, or invested in bonds or other obligations of, or in bonds or other obligations guaranteed as to principal and interest by, the United States. The Commissioner may, with the approval of the Secretary of the Treasury, purchase in the open market debentures issued under this section. Those purchases shall be made at a price which will provide an investment yield of not less than the yield obtainable from other investments authorized by this section. Debentures so purchased shall be canceled and not reissued.'

"SEC. 125. Title II of said Act, as amended, is hereby further amended by adding at the end thereof the following new section to transfer to title II the mortgage insurance program in connection with the sale of certain publicly owned property as contained in section 610 of title VI; the insurance of mortgages to refinance existing loans insured under section 608 of title VI and sections 903 and 908 of title IX; and to authorize the insurance under title II of mortgages assigned to the Commissioner under insurance contracts and mortgages held by the Commissioner in connection with the sale of property acquired under insurance contracts:

"'*Miscellaneous housing insurance*

"'SEC. 223. (a) Notwithstanding any of the provisions of this title, and without regard to limitations upon eligibility contained in section 203 or section 207, the Commissioner is authorized, upon application by the mortgagee, to insure or make commitments to insure under section 203 or section 207 of this title any mortgage—

"'(1) executed in connection with the sale by the Government, or any agency or official thereof, of any housing acquired or constructed under Public Law 849, Seventy-sixth Congress, as amended; Public Law 781, Seventy-sixth Congress, as amended; or Public Laws 9, 73, or 353, Seventy-seventh Congress, as amended (including any property acquired, held, or constructed in connection with such housing or to serve the inhabitants thereof); or

"'(2) executed in connection with the sale by the Public Housing Administration, or by any public housing agency with the approval of the said Administration, of any housing (including any property acquired, held, or constructed in connection with such housing or to serve the inhabitants thereof) owned or financially assisted pursuant to the provisions of Public Law 671, Seventy-sixth Congress; or

"'(3) executed in connection with the sale by the Government, or any agency or official thereof, of any of the so-called Greenbelt towns, or parts thereof, including projects, or parts thereof, known as Greenhills, Ohio; Greenbelt, Maryland; and Greendale, Wisconsin, developed under the Emergency Relief Appropriation Act of 1935, or of any of the village properties or employee's housing under the jurisdiction of the Tennessee Valley Authority; or

"'(4) executed in connection with the sale by a State or municipality, or an agency, instrumentality, or political subdivision of either, of a project consisting of any permanent housing (including any property acquired, held, or constructed in connection therewith or to serve the inhabitants thereof), constructed by or on behalf of such State, municipality, agency, instrumentality, or political subdivision, for the occupancy of veterans of World War II, or Korean veterans, their families, and others; or

"'(5) executed in connection with the first resale, within two years from the date of its acquisition from the Government, of any portion of a project or property of the character described in paragraphs (1), (2), and (3) above; or

"'(6) given to refinance an existing mortgage insured under section 608 of title VI prior to the effective date of the Housing Act of 1954 or under section 903 or section 908 of title IX: *Provided*, That the principal amount of any such refinancing mortgage shall not exceed the original principal amount or the unexpired term of such existing mortgage and shall bear interest at a rate not in excess of the maximum rate applicable to loans insured under section 203 or section 207, as the case may be, except that in any case involving the refinancing of a loan insured under section 608 or 908 in which the Commissioner determines that the insurance of a mortgage for an additional term will inure to the benefit of the applicable insurance fund, taking into consideration the outstanding insurance liability under the existing insured mortgage, such refinancing mortgage may have a term not more than twelve years in excess of the unexpired term of such existing insured mortgage: *Provided*, That a mortgage of the character described in paragraph (1), (2), (3), (4), or (5) shall have a maturity satisfactory to the Commissioner, but not to exceed the maximum term applicable to loans insured under section 203 or section 207, as the case may be, and shall involve a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Commissioner shall approve) in an amount not exceeding 90 per centum of the appraised value of the mortgaged property, as determined by the Commissioner, and bear interest (exclusive of premium charges and service charges, if any) at not to exceed the maximum rate applicable to loans insured under section 203 or section 207, as the case may be, except that where a mortgage of a character described in paragraph (1), (2), (3), or (5) covers property held by a nonprofit cooperative ownership housing corporation or nonprofit cooperative ownership housing trust, the permanent occupancy of the dwellings of which is restricted to members of such corporation or to beneficiaries of such trust, if at least 65 per centum of such members or beneficiaries are veterans, such principal obligation may be in an amount not exceeding 95 per centum of such appraised value.

"'(b) The Commissioner shall also have authority to insure under this title any mortgage assigned to him in connection with payment under a contract of mortgage insurance or executed in connection with the sale by him of any property acquired under title I, title II, title VI, title VII, title VIII, or title IX without regard to any limitation upon eligibility contained in this title II.'

"SEC. 126. Title II of said Act, as amended, is hereby amended by adding at the end thereof the following new sections:

"'*Debenture interest rate*

"'SEC. 224. Notwithstanding any other provisions of this Act, debentures issued under any section of this Act with respect to a mortgage accepted for insurance on or after thirty days following the effective date of the Housing Act of 1954 (except debentures issued pursuant to paragraph (3) of section 221 (g) hereof) shall bear interest at the rate in effect at the time the mortgage is insured. The Commissioner shall from time to time, with the approval of the Secretary of the Treasury, establish such interest rate in an amount not in excess of the annual rate of interest determined by the Secretary of the Treasury, at the request of the Commissioner, by estimating the average yield to maturity, on the basis of daily closing market bid quotations or prices during the calendar month next preceding the establishment of such rate of interest, on all outstanding marketable obligations of the United States having a maturity date of fifteen years or more from the first day of such next preceding month, and by adjusting such estimated average annual yield to the nearest one-eighth of 1 per centum.

"'*Open-end mortgages*

"'SEC. 225. Notwithstanding any other provisions of this Act, in connection with any mortgage insured pursuant to any section of this Act which covers a property upon which there is located a dwelling designed principally for residential use for not more than four families in the aggregate, the Commissioner is authorized, upon such terms and conditions as he may prescribe, to insure under said section the amount of any advance for the improvement or repair of such property made to the mortgagor pursuant to an "open-end" provision in the mortgage, and to add the amount of such advance to the original principal obligation in determining the value of the mortgage for the purpose of computing the amounts of debentures and certificate of claim to which the mortgagee may be entitled: *Provided*, That the Commissioner may require the payment of such charges, including charges in lieu of insurance premiums, as he may consider appropriate for the insurance of such "open-end" advances: *Provided further*, That only advances for such improvements or repairs as substantially protect or improve the basic livability or utility of the property involved shall be eligible for insurance under this section: *Provided further*, That no such advance shall be insured under this section if the amount thereof plus the amount of the unpaid balance of the original principal obligation of the mortgage would exceed the amount of such original principal obligation unless the mortgagor certifies that the proceeds of such advance will be used to finance the construction of additional rooms or other enclosed space as a part of the dwelling: *And provided further*, That the insurance of "open-end" advances shall not be taken into account in determining the aggregate amount of principal obligations of mortgages which may be insured under this Act.

"'*FHA appraisal available to home buyers*

"'SEC. 226. The Commissioner is hereby authorized and directed to require that, in connection with any property upon which there is located a dwelling designed principally for a single-family residence or a two-family residence and which is approved for mortgage insurance under section 203, 213 with respect to any property or project of a corporation or trust of the character described in paragraph numbered (2) of subsection (a) thereof, 220, 221, 222, or 903 of this Act, the seller or builder or such other person as may be designated by the Commissioner shall agree to deliver, prior to the sale of the property, to the person purchasing such dwelling for his own occupancy, a written statement setting forth the amount of the appraised value of the property as determined by the Commissioner. This section shall not apply in any case where the mortgage involved was insured or the commitment for such insurance was issued prior to the effective date of the Housing Act of 1954.

"'*Builder's cost certification*

"'SEC. 227. Notwithstanding any other provisions of this Act, no mortgage covering new or rehabilitated multifamily housing shall be insured under this Act unless the mortgagor has agreed (a) to certify, upon completion of the physical improvements on the mortgaged property or project and prior to final endorsement of the mortgage, either (i) that the approved percentage of actual cost (as those terms are herein defined) equaled or exceeded the proceeds of the mortgage loan or (ii) the amount by which the proceeds of the mortgage loan exceeded such approved percentage of actual cost, as the case may be, and (b) to pay forthwith to the mortgagee, for application to the reduction of the principal obligation of such mortgage, the amount, if any, certified to be in excess of such approved percentage of actual cost. As used in this section—

"'(a) The term "new or rehabilitated multifamily housing" means a project or property approved for mortgage insurance prior to the construction or the repair and rehabilitation involved and covered by a mortgage insured or to be insured (i) under section 207, (ii) under section 213 with respect to any property or project of a corporation or trust of the character described in paragraph numbered (1) of subsection (a) thereof, (iii) under section 220 if the mortgage meets the requirements of paragraph (3) (B) of subsection (d) thereof, (iv) under section 221, (v) under section 803, or (vi) under sections 903 and 908;

"'(b) The term "approved percentage" means the percentage figure which, under applicable provisions of this Act, the Commissioner is authorized to apply to his estimate of value or replacement cost, as the case may be, of the property or project in determining the maximum insurable mortgage amount; and

"'(c) The term "actual cost" has the following meaning: (i) in case the mortgage is to assist the financing of new construction, the term means the actual cost to the mortgagor of such construction, including amounts paid for labor, materials, construction contracts, off-site public utilities, streets, organizational and legal expenses, and other items of expense approved by the Commissioner, plus (1) a reasonable allowance for builder's profit if the mortgagor is also the builder as defined by the Commissioner, and (2) an amount equal to the Commissioner's estimate of the fair market value of any land (prior to the construction of the improvements built as a part of the project) in the property or project owned by the mortgagor in fee (or, in case the land in the property or project is held by the mortgagor under a leasehold or other interest less than a fee, such amount as the mortgagor paid for the acquisition of such leasehold or other interest but, in no event, in excess of the fair market value of such leasehold or other interest exclusive of the proposed improvements), but excluding the amount of any kickbacks, rebates, or trade discounts received in connection with the construction of the improvements, or (ii) in case the mortgage is to assist the financing of repair or rehabilitation, the term means the actual cost to the mortgagor of such repair or rehabilitation, including the amounts paid for labor, materials, construction contracts, off-site public utilities, streets, organization and legal expenses, and other items of expense approved by the Commissioner, plus (1) a reasonable allowance for builder's profit

if the mortgagor is also the builder as defined by the Commissioner, and (2) an additional amount equal to (A) in case the land and improvements are to be acquired by the mortgagor and the purchase price thereof is to be financed with part of the proceeds of the mortgage, the purchase price of such land and improvements prior to such repair or rehabilitation, or (B) in case the land and improvements are owned by the mortgagor subject to an outstanding indebtedness to be refinanced with part of the proceeds of the mortgage, the amount of such outstanding indebtedness secured by such land and improvements, but excluding (for the purposes of this clause (ii)) the amount of any kickbacks, rebates, or trade discounts received in connection with the construction of the improvements: *Provided*, That such additional amount under either (A) or (B) of this clause (ii) shall in no event exceed the Commissioner's estimate of the fair market value of such land and improvements prior to such repair or rehabilitation.

"'SEC. 228. Notwithstanding section 505 of the Classification Act of 1949, as amended, the Commissioner may establish and place one position in grade GS–18, four positions in grade GS–17, and eight positions in grade GS–16 in the Federal Housing Administration, which positions shall be in lieu of any positions presently allocated in the Federal Housing Administration under said section 505.'

"Additional amendments relating to Federal Housing Administration

"SEC. 127. Title VI of said Act, as amended, is hereby amended by adding the following new section at the end thereof:

"'SEC. 612. Notwithstanding any other provision of this title, no mortgage or loan shall be insured under any section of this title after the effective date of the Housing Act of 1954 except pursuant to a commitment to insure issued on or before such date.'

"SEC. 128. (a) Section 803 (a) of said Act, as amended, is amended by striking out 'July 31, 1954' and substituting therefor 'June 30, 1955'.

"(b) Section 903 (a) of said Act, as amended, is hereby amended by adding the following before the last proviso thereof: '*Provided further*, That the Commissioner shall require each dwelling covered by a mortgage insured under this section, for which a commitment to insure is issued after the effective date of the Housing Act of 1954, to be held for rental for a period of not less than three years after the dwelling is made available for initial occupancy:'.

"SEC. 129. Section 104 of the Defense Housing and Community Facilities and Services Act of 1951, as amended, is hereby amended as follows: (1) by striking out the material within the parentheses in clause (a) and substituting therefor 'except (i) pursuant to a commitment to insure issued on or before such date or (ii) after July 31, 1954, and until July 1, 1955, during such period, or for such project or projects, as the President may designate hereunder', and (2) by adding after the last comma in clause (b) 'except after July 31, 1954, and until July 1, 1955, during such period, or for such project or projects, as the President may designate hereunder: *Provided*, That, to the extent necessary to assure the adequate completion of any facilities for which prior agreements have been made under title III, the Housing and Home Finance Administrator may, at any time after July 31, 1954, enter into amendatory agreements under such title involving the expenditure of additional Federal funds within the balance available therefor on or before such date."

"SEC. 130. The paragraph following paragraph numbered (3) of section 803 (b) of the National Housing Act, as amended, and paragraph numbered (3) of section 908 (b) of said Act, as amended, are hereby amended to read as follows: 'The mortgagor shall enter into the agreement required by section 227 of this Act, as amended.'

"SEC. 131. The eighth paragraph of section 709 of title 18 of the United States Code is hereby amended to read as follows:

"'Whoever uses as a firm or business name the words "Housing and Home Finance Agency", "Federal Housing Administration", "Federal National Mortgage Association", or "Public Housing Administration" or the letters "FHA" or any combination or variation of those words or the letters "FHA" alone or with other words or letters reasonably calculated to convey the false impression that such name or business has some connection with, or authorization from, the Housing and Home Finance Agency, the Federal Housing Administration, the Federal National Mortgage Association, the Public Housing Administration, the Government of the United States or any agency thereof, which does not in fact exist, or falsely claims that any repair, improvement, or alteration of any existing structure is required or recommended by the Housing and Home Finance Agency, the Federal Housing Administration, the Federal National Mortgage Association, the Public Housing Administration, the Government of the United States or any agency thereof, for the purpose of inducing any person to enter into a contract for the making of such repairs, alterations, or improvements, or falsely advertises or falsely represents by any device whatsoever that any housing unit, project, business, or product has been in any way endorsed, authorized, inspected, appraised, or approved by the Housing and Home Finance Agency, the Federal Housing Administration, the Federal National Mortgage Association, the Public Housing Administration, the Government of the United States or any agency thereof; or'.

"SEC. 132. Title V of the National Housing Act, as amended, is hereby amended by adding the following new sections after section 511:

"'SEC. 512. Notwithstanding any other provision of law, the Commissioner is authorized to refuse the benefits of participation (either directly as an insured lender or as a borrower, or indirectly as a builder, contractor, or dealer, or salesman or sales agent for a builder, contractor or dealer) under title I, II, VI, VII, VIII, or IX of this Act to any person or firm (including but not limited to any individual, partnership, association, trust, or corporation) if the Commissioner has determined that such person or firm (1) has knowingly or willfully violated any provision of this Act or of title III of the Servicemen's Readjustment Act of 1944, as amended, or of any regulation issued by the Commissioner under this Act or by the Administrator of Veterans' Affairs under said title III, or (2) has, in connection with any construction, alteration, repair or improvement work financed with assistance under this Act or under said title III, or in connection with contracts or financing relating to such work, violated any Federal or State penal statute, or (3) has failed materially to properly carry out contractual obligations with respect to the completion of construction, alteration, repair, or improvement work financed with assistance under this Act or under title III of the Servicemen's Readjustment Act of 1944, as amended. Before any such determination is made any person or firm with respect to whom such a determination is proposed shall be notified in writing by the Commissioner and shall be entitled, upon making a written request to the Commissioner, to a written notice specifying charges in reasonable detail and an opportunity to be heard and to be represented by counsel. Determinations made by the Commissioner under this section shall be based on the preponderance of the evidence.

"'SEC. 513. (a) The Congress hereby declares that it has been its intent since the enactment of the National Housing Act that housing built with the aid of mortgages insured under that Act is to be used principally for residential use; and that this intent excludes the use of such housing for transient or hotel purposes while such insurance on the mortgage remains outstanding.

"'(b) Notwithstanding any other provisions of this Act, no new, existing, or rehabilitated multifamily housing with respect to which a mortgage is insured under this Act shall be operated for transient or hotel purposes unless (1) on or before May 28, 1954, the Commissioner has agreed in writing to the rental of all or a portion of the accommodations in the project for transient or hotel purposes (in which case no accommodations in excess of the number so agreed to by the Commissioner shall be rented on such basis), or (2) the project covered by the insured mortgage is located in an area which the Commissioner determines to be a resort area, and the Commissioner finds that prior to May 28, 1954, a portion of the accommodations in the project had been made available for rent for transient or hotel purposes (in which case no accommodations in excess of the number which had been made available for such use shall be rented on such basis).

"'(c) Notwithstanding any other provisions of this Act, no mortgage with respect to multifamily housing shall be insured under this Act (except pursuant to a commitment to insure issued prior to the effective date of the Housing Act of 1954), and (except as to housing coming within the provisions of clause (1) or clause (2) of the preceding subsection) no mortgage with respect to multifamily housing shall be insured for an additional term, unless (1) the mortgagor certifies under oath that while such insurance remains outstanding he will not rent, or permit the rental of, such housing or any part thereof for transient or hotel purposes, and (2) the Commissioner has entered into such contract with, or purchased such stock of, the mortgagor as the Commissioner deems necessary to enable him to prevent or terminate any use of such property or project for transient or hotel purposes while the mortgage insurance remains outstanding.

"'(d) The Commissioner is hereby authorized and directed to enforce the provisions of this section by all appropriate means at his disposal, as to all existing multifamily housing with respect to which a mortgage was insured under this Act prior to the effective date of the Housing Act of 1954 as well as to all multifamily housing with respect to which a mortgage is hereafter insured under this Act: *Provided*, That no criminal penalty shall, by reason of enactment of this section, be applicable to the rental or operation of any such existing multifamily housing in violation of any provision of subsection (b) of this section at any time prior to the effective date of the Housing Act of 1954.

"'(e) As used in this section, (1) the term "rental for transient or hotel purposes" shall have such meaning as prescribed by the Commissioner but rental for any period less than thirty days shall in any event constitute rental for such purposes, and (2) the term "multifamily housing" shall mean (i) a property held by a mortgagor upon which there are located five or more single family dwellings, or upon which there is located a two-, three-, or four-family dwelling, or (ii) a property or project covered by mortgage insured or to be insured under section 207, under section 213 with respect to any property or project of a corporation or trust of the character described in paragraph numbered (1) of subsection (a) thereof, under section 220 if the mortgage is within the provisions of paragraph (3) (B) of subsection (d) thereof, under section 221 if the mortgage is within the provisions of paragraph (3) of subsection (d) thereof, under section 608, under section 803, or under section 908, or (iii) a project with respect to

which an insurance contract pursuant to title VII is outstanding.
